Board of Supervisors of Marin County. Sealed bids will be received by the Clerk of the Board of Supervisors of Marin County, at his office, at **1 o'clock p. m. on Tuesday, the 2nd day of June, 1914**, for macadamizing a portion of the County Road, known as the San Geronimo or Glenna Road, from the railroad crossing at Manor Station to the railroad crossing at Alderneys Station, a distance of 21,608 feet, in Road of District Nos. 2 and 6, Marin County, California, in strict accordance with the specifications on file in the office of the Clerk of said Board. To which bidders are hereby referred.

Each bid will state a price for the completion of all of the work in each one of the sections numbered 1, 2, and 3.

All bids must be accompanied by a certified check for the full amount of the amount bid, drawn on any responsible bank and made payable to the order of the Chairman of the Board of Supervisors of Marin County.

The said Board of Supervisors reserves the right to accept or reject the bid for macadamizing any one or more of the sections numbered one, two or three as specified.

ROB. E. GRAHAM
Clerk of the Board of Supervisors of Marin County.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at **9:00 A. M. Tuesday, May 19, 1914**, for Constructing the Live Stock Exhibit in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$25.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit a deposit of \$25.00 will forfeit the deposit of Twenty-five Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman. (*)

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, noon, Monday, June 1, 1914**, for the purpose of being to be publicly opened and read for furnishing all material, except glass, for the Green House Superstructure of a building to be known as the New Conservatory, State Capitol Park, Sacramento, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidders' bond, or a certified check in the sum of ten per cent (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5) Dollars will be required on plans and specifications, the deposit to be returned immediately on the award of the contract. Communications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Greenhouse Superstructure, State Capitol Park, Sacramento, California."

(Signed) W. F. MCCLURE,
State Engineer.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, noon, Monday, June 8, 1914**, said bids then and there to be publicly opened and read

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of Redwood City School District up to the hour of 8 o'clock p. m. on Thursday, May 28, 1914, for installing a toilet system in the Redwood City Grammar School, per plans and specifications on file in the office of the Principal of the school, where same may be inspected.

The bids must be addressed to the Clerk of said Board of Trustees at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned Clerk of said Board of Trustees, same to be forfeited if the Redwood City School District as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the President of said Board, in an amount not exceeding the contract price, or to enter into a written contract with said Board in accordance with said plans and specifications and the bid.

All bids from contractors must specify the time for completion of the said work.

The right is reserved to reject any and all bids. H. STEINBERGER,
Clerk of the Board of Trustees of Redwood City School District.

NOTICE TO CONTRACTORS.

PURSUANT to an order of the Board of Supervisors of Fresno County, California, duly made and entered in its minutes of the 13th day of May, 1914, notice is hereby given that the said Board will receive up to 2 o'clock p. m. of the day of Tuesday, June 2, 1914, sealed proposals for the construction of a run room and bath room together with necessary remodeling and other work necessary thereto, at the County Orphanage, of said county, all according to plans and specifications on file in the office of the Clerk of the Board of Supervisors of said County.

Bids must be addressed to the Clerk of the Board of Supervisors, and must be accompanied by a certified check in the sum of ten (10) per cent of the amount of the bid, made payable to the Chairman of the Board, as a guar-

antee that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract with the County of Fresno according to said plans and specifications, and give sufficient bonds as required by law and orders of the Board of Supervisors, conditioned upon the faithful performance of the terms of said contract.

The Board reserves the right to reject any or all bids.

Dated this 31st day of May, 1914.
(Seal) D. M. BARNWELL, Clerk.

STATE OF CALIFORNIA.

DEPARTMENT OF ENGINEERING.

CALIFORNIA HIGHWAY COMMISSION.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highways as follows:

Until 11 o'clock A. M. June 30, 1914.
Shasta County from La Moine to Hazel Creek P. O. (11-Sha-3-D), about 9.5 miles in length, to be built of Portland cement concrete.

Tehama County from the southerly boundary to Corning (11-Teh-7-A), about 8.5 miles in length, to be built of Portland cement concrete.

Butte County from Lindo Channel to the northerly boundary (11-But-3-D), about 11.2 miles in length, to be built of Portland cement concrete.

Glenn County from Grapit to the northerly boundary (11-Gle-7-C), about 7 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Dunnsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

NEWELL D. STARLINGTON,
CHARLES F. STEIN,
California Highway Commission.
AUSTIN R. FLETCHER,
Highway Engineer.
WILSON R. ELLIS,
Secretary.

Dated: May 5, 1914.

NOTICE TO BIDDERS.

NOTICE is hereby given that the Clerk of the Board of Supervisors will receive at his office at Ukiah, California, up to 2:30 p. m. of Tuesday, June 2nd, 1914, sealed bids for the construction of Section 1 of the proposed Navarro Grade, as surveyed by R. E. Donahoe.

Maps, plans and specifications for this work are on file in the office of the above named clerk, to which all bidders are hereby referred.

Bids must be sealed and accompanied by a certified check or deposit in cash in the sum of ten per cent of the amount of the bid.

The work is to be completed on or before September 1st, 1914. The suc-

cessful bidder will be required to give a bond in half the total of the work, and another bond in the same amount for the protection of material men and workmen employed on the contract. The Board reserves the right to reject any and all bids.

A. J. FAIRBANKS,
Chairman of Board of Supervisors.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$7,990. San Francisco, Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mr. Jenkins. The dwelling has been designed for an eight-room house and will be erected in Marine View Terrace on 44th avenue. Interior of the house will be finished in pine and hardwood with some white enamel. There will be furnace heat and open fire places. Mantels will be of tile and brick. Hardwood floors will be used in all of the principal rooms. Plans provide for two baths which will be finished in tile and will have composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, James Welsh, 244 20th avenue, S. F. The dwelling will be erected on the east side of 22nd avenue south of Lake street, and has been designed to contain seven rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owner, E. Nelson, 30 Presidio avenue, S. F. The dwelling will be erected on the east side of 16th avenue north of California in a district in which Mr. Nelson has operated extensively. The house will contain seven rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco, Architect, Frederick H. Meyer, Bank

ers' Investment Bldg., S. F. Owner, Mrs. Bertha Overfeld. The building will be erected at the corner of Fillmore and Green streets, and will cover a considerable ground area. Interior has been arranged for a number of three and four room suites, all of which will have private baths and wall beds. Interior finish will be of pine and hardwood veneer. There will be steam heat, portable vacuum cleaners and a hot water system. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. A pressed brick veneer base will be used. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco, Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogrefe. The building will be erected on the west side of Hyde street north of Pine, having a frontage of 25 feet and a depth of 64 feet. There will be a total of six suites arranged in two and three room with private baths and wall beds. Interior finish will be of pine and redwood. Hardwood floors will be used in the living rooms. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior will be covered with cement plaster on metal lath and ship-lap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—3 story and base, brick and steel, \$69,500. San Francisco, Architect, Herman Barth, 12 Geary street, S. F. Owners, Katz Estate. The building will be erected at the northwest corner of California and Hyde streets, covering an area of 87 feet 4 inches by 75 feet 8 inches. There will be 36 apartments of two and three rooms and a store. Interior finish will be of pine and elm. Hardwood floors will be used in the halls and living rooms. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning plant. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds and will have private bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are

complete and figures are being taken.

CONCESSION BUILDING—1 story, frame and plaster. Cost not stated. San Francisco. Architect, Carl Werner, Phelan Bldg., S. F. Owners, The Neptune Amusement Co. The work will include a large swimming tank besides many unique features. There will also be a large auditorium with a seating capacity of 1,000 people. Interior will be finished in plaster. Special mechanical equipment will be required. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are now being taken.

LIVE STOCK BUILDING—1 story, frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for the main Live Stock Exhibit building to be erected on the Exposition grounds. Bids are now being taken by the Buildings and Grounds Committee of the Exposition Co. Plans can be secured from the office of the Director of Works. An official proposal appears in another column of this issue. Bids will be opened on May 21.

SPRAYING EXHIBITION PALACES WITH COLD WATER PAINT—Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on May 19th for spraying the principal exhibition palaces on the grounds with cold water paint. All particulars can be secured from the office of the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

STATE EXHIBIT BUILDING—2 story, frame and plaster, \$55,000. San Francisco. Architect's name not given. Owners, State of Massachusetts. Bids opened for this work show W. D. Henderson of San Francisco low at \$52,978. A complete list of these figures will be found under the heading of San Francisco in this issue.

APARTMENT HOUSE—5 story and base, brick and steel. Cost not stated. San Francisco, Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. The building will be erected at the northwest corner of Sacramento and Hyde streets, covering a considerable ground area. Interior has been arranged for a total of nine suites of five rooms and bath each. Interior finish will be of pine and hardwood veneer with oak floors in the principal rooms. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Entrance will be finished in tile and marble. All bath rooms will have the wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STABLE BUILDINGS—5, 1 story and basement, brick or reinforced concrete. Cost not stated. San Francisco. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Bids were opened in the office of the Constructing Quartermaster at Fort Mason for the construction of five large stable buildings to be erected at the Presidio. Bids were asked for brick and reinforced concrete types of construction and with unit prices. The Constructing Quartermaster's office had not

completed the tabulation and a complete list of the bids is not available. Frank M. Garden Co. were reported as being low.

GARBAGE CREMATORY—Brick construction. Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Plans have been completed and figures are now being called for on the construction of a new garbage crematory at the Presidio. Plans and complete particulars can be secured from the engineer at Fort Mason. Bids will be opened on May 22nd. An official proposal appears in another column of this issue.

HOSPITAL SCREENS—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting of the Board of Public Works for furnishing and installing window screens at the San Francisco City Hospital. McSheehy Bros. were the low men. A complete list of the bids appears under the heading of San Francisco.

HIGHWAY WORK—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed for highway work in the following counties: Shasta, Tehama, Butte, and Glenn. Bids for the work will be opened in Sacramento on June 8th. Plans and specifications can be secured from the State Highway Commission. An official proposal appears in another column of this issue.

PAVING BRICKS—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids are now being called for on furnishing the city and county with approximately 1,000,000 vitrified paving bricks. Full particulars can be secured from the City Engineer, Temporary City Hall. An official proposal appears in another column of this issue.

RAILROAD CONSTRUCTION—\$30,000. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Plans are now being completed for the construction of a railroad connecting the Fort Mason tunnel with the Transport Docks. Specifications are now in the hands of the printer and bids will be called for within a few days. An official proposal will appear in this issue. The work will require 114-pound rails, 127-pound guard rails, redwood ties and rock ballast.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco. Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, Mr. Marks. The dwelling will be erected in West Clay Park and has been designed for a seven-room house with two baths and a sleeping porch. Interior finish will be of pine and hardwood. Hardwood and inlaid floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered

with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,400. San Francisco. Architect, none. Owner, M. F. Nolan, 228 Noe street, S. F. The dwelling will be erected on the east side of 22nd avenue, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and furnace heat. Mantels will be of tile of brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

RESIDENCE—2 story and base, frame, alterations and additions, \$12,000. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Dr. Herbert Moffitt. This work will be carried out at the residence located on the north side of Broadway east of Octavia, and will consist of extensive interior finish, mill work, plumbing, plastering, painting and electric work. A new system of heating will also be installed. Exterior of the present building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

POWER STATION—1 story and base, reinforced concrete, \$30,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. The building will be erected on the south side of Commercial street east of Montgomery, covering an area of 49 feet 9 inches by 59 1/2 feet. Construction will be fireproof with reinforced concrete walls, floors and roof slabs. Interior will be finished in pine and metal. Metal window sash and frames and fireproof doors will be used. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

STORE—1 story, frame, \$10,000. San Francisco. Architect, A. J. Bain, Phelan Bldg., S. F. Owner, A. Gunzen-dorfer. The building will be erected at the southeast corner of Fillmore and Lombard streets, and will have a frontage of 45 feet and a depth of 100 feet. There will be three stores. Interiors will be finished in pine and redwood. Cement floors and patent store fronts are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

RESIDENCE—2 story and base, frame, \$3,500. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Hugo Arrigoni. Contractors, Ratto & Giannini, S. F. Contract price, \$3,500.

APARTMENT HOUSE—3 story and base, frame, \$15,800. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, E. J. Keller. Contractor, Charles Cohn, 4030 24th street, S. F. Contract price, \$15,800.

STORES AND LOFTS—6 story and base, brick and steel, \$50,000. San Francisco. Architect, Alfred Henry Jacobs,

110 Sutter street, S. F. Owner, Charles Schlesinger. Contractor, Ira W. Cohn, Hearst Bldg., S. F., general construction only. Contract price, \$50,000.

Massachusetts Bids As Opened In Boston.

ing porches. Interior finish will be of pine and hardwood. Hardwood and linoleum floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have the wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Brock. The dwelling has been designed for an eight-room house with two baths and sleeping porch, and will be erected in the Highlands Tract. Interior finish will be of pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Henry Crosby. The dwelling will be erected on Lake Shore Drive and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. There will be hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have the wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, W. R. Alberger. The dwelling will contain seven rooms, two baths and a sleeping porch, and will be erected at the corner of Paloma and Calmar. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have the wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$8,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, J. A. Munro. The dwelling will contain eight rooms, two baths and a sleeping porch. It will be erected on Grand avenue near Rand. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic

water heater will be installed. Bath rooms will have the wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE CLUB—2 story and base, frame, \$12,000. Berkeley, Alameda Co., Cal. Architect, Warren Perry, 2436½ Dwight Way, Berkeley. Owners, Faculty Club. The work will consist of extensive alteration to the present building and will include plastering, painting, mill work, hardwood and pine interior trim and hardwood floors. New plumbing and electric work will be installed. Exterior of the building will be altered and a new coat of cement plaster will be put on. Plans are complete and the work will be done by Day Labor under the direction of the architect.

GARAGE—2 story and base, reinforced concrete, \$30,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Huntington. The building will be erected on the west side of Broadway north of 19th street, and has been designed for a large commercial garage. There will be office space, storage rooms and a completely equipped machine shop included. Interior finish will be of pine. Concrete walls, floors and roof slabs are specified. Plans provide for metal window sash and frames and special gasoline storage tanks. Interior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

GARAGE—2 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owners, Imperial Garage and Supply Co. The building, which has been mentioned here before, will be erected on the east side of Franklin street north of 14th street, covering a considerable ground area. Interior will be finished in pine. Plans provide for metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, F. A. Dalley, 2130 Broadway, Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have the floor and wainscot and will be equipped with shower. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—8 story and base, Class A construction. Cost not stated. Oakland, Cal. Architect, Carl Werner, Phelan Bldg., S. F. Owner, C. J. Heeseman. The building will be erected at one of the most prominent corners in Oakland and will cover an area of 130 by 234 feet. Apartments will range from three to seven rooms with from one to two baths. Interior finish will be of pine and hardwoods with all baths finished in tile with

composition floors. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning system. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

SAN JOSE & SANTA CLARA CLARA VALLEY.

RESIDENCE—2 story and base,
 frame. Cost not stated. Palo Alto,
 Santa Clara Co., Cal. Architect, John
 Hudson Thomas, First National Bank
 Bldg., Berkeley. Owner, H. L. Hachl.
 The dwelling has been designed for
 an eight-room house with bath and
 sleeping porch. Interior finish will be
 of pine and redwood. Hardwood floors
 will be used in the principal rooms.
 There will be furnace heat and open
 fire places. Mantels will be of tile or
 brick. Bath room will have tile floor
 and wainscot. An automatic water
 heater will be installed. Exterior of
 the house will be covered with cement
 plaster on metal lath. Plans are
 nearly ready for figures and a contract
 will be let next week.

EUNGALOW—1 story and base,
 frame, \$2,500. San Jose, Santa Clara
 Co., Cal. Architect, none. Owner, T. L.
 Marteo, 300 Bird avenue, San Jose. The
 house has been designed for a five-
 room house and will be erected on Bird
 avenue. Interior finish will be of pine
 throughout. There will be some oak
 floors. A large open fire place will be
 used in the living room. Mantel will
 be of tile. The wainscot will be used
 in the bath room and kitchen. An au-
 tomatic water heater will be installed.

Exterior of the dwelling will be covered
 with rustic and cement plaster on
 metal lath. Plans are complete and the
 work will be done by Day Labor.
 CHAPEL—1 story, frame and plaster,
 \$1,000. San Jose, Santa Clara Co.,
 Cal. Architect, none. Owners, The
 Santa Crista Church Society. The
 building will be erected on North
 Santa Clara street between 28th and
 29th streets adjoining the other church
 property. Interior will be finished in
 pine throughout. Exterior of the
 building will be covered with cement
 plaster on metal lath. Plans are com-
 plete and in the hands of the owners
 who will do the work by Day Labor.

THEATRE AND STORES—1 story
 and base, brick and steel, \$15,000. Palo
 Alto, Santa Clara Co., Cal. Architect,
 J. Henry Bohrer, Delger Bldg., Oak-
 land. Owners, Boardman Estate. The
 building will be erected on one of the
 principal corners of the city, and has
 been designed to contain stores as well
 as a large motion picture theatre. In-
 terior finish will be of pine. Construc-
 tion will be fireproof throughout.
 There will be special electric wiring
 and patent store fronts. Exterior of
 the building will be faced with cement
 plaster. Plans are complete and the
 contract will be awarded on a percent-
 age basis.

LODGE HALL—2 story and base, re-
 inforced concrete. Cost not stated.
 Gonzales, Monterey Co., Cal. Architect,
 H. B. Douglass, Pajaro Bank Bldg.,
 Watsonville. Owners, Trustees of the
 Gabriel Lodge No. 372 I. O. O. F. of
 Gonzales. The building will be erec-
 ted on 4th street and will be arranged
 for stores on the first floor and lodge
 room above. Interior finish will be of
 pine throughout with some maple
 floors. Patent store fronts will be
 used. Exterior of the building will be
 faced with cement plaster. Bids have
 been taken on the work and a contract
 will be awarded shortly.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL—2 story and base. Cost not stated. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, City of Fresno. Preliminary plans have been prepared under the direction of W. D. Coates, Supervising Architect, for the Emerson School. No details of the buildings have been made public, but it is understood that it will be one of the largest of the new schools to be erected at Fresno. All modern school appliances will be installed. Further details will be given as the work progresses.

SCHOOL—2 story and base, brick. Cost not stated. Fresno, Fresno Co., Cal. Architects, Glass & Butler, Fresno. Owners, City of Fresno. The building has been designed for a seven-room school with an assembly hall. Interior finish will be of pine throughout. Maple floors will be used in the class rooms. There will be steam heat, an oil burning plant and vacuum cleaning. Exterior of the building will be faced with brick. Plans will be completed shortly.

OFFICES—6 story and base. Glass A construction. Cost not stated. Bakersfield, Kern Co., Cal. Architect, T. B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, H. J. Brandt and W. E. Underwood. The building will be erected at the corner of 16th and Chester streets, and will cover a large area. Construction will be fireproof with a complete steel

Frame, reinforced concrete walls, floors and roof slabs. There will be a number of stores on the first floor besides the entrance to the upper floors. Upper floors will be arranged for modern offices. Plans provide for steam heat, elevator service and a hot water supply. Interior finish will be of pine and hardwood. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

COURT HOUSE—2 story, base and dome, reinforced concrete, \$30,000. Alturas, Modoc Co., Cal. Architect, De lungehamps, Reno, Nev. Owners, Modoc County. All figures for the construction of this building under revised plans have been received and will either be awarded or rejected at the Wednesday meeting of the Board of Supervisors.

LODGE HALL—2 story and base, brick and steel. Cost not stated. Auburn, Placer Co., Cal. Architect, Allen D. Fellows, East Auburn. Owners, Masonic Temple Association. The building will be erected on a corner and will occupy a considerable ground area. The first floor has been designed for stores while the upper floors will be used for lodge rooms and a large auditorium. Interior will be finished in pine and hardwood with maple floor in the auditorium. There will be steam heat. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans have been prepared and figures will be called for shortly.

HIGHWAY CONSTRUCTION — Cost not stated. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor R. E. Donohue, Ukiah. Owners, Mendocino County. Plans have been completed for constructing Section 1 of the proposed Navarro Grade and figures on the work are now being called. Bids will be opened on June 2nd. Plans and specifications can be secured from the County Surveyor at Ukiah. An official proposal appears in another column of this issue.

RESIDENCE — 2 story and base, frame, \$8,000. Galt, Sacramento Co., Cal. Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, Mayrus Mitling. The house has been designed to contain eight rooms, two baths and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. An automatic water will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SCHOOL—2 story and base, brick and steel. Cost not stated. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 California street, Stockton. Owners, City of Stockton. Bids opened at the last meeting of the Board of Education for the construction of the West Side School show Daniels & Green of Stockton low at \$71,841. They will probably be awarded the contract.

A complete list of the bids as opened appears under the heading of Sacramento, Stockton and Northern California in this issue.

CONSERVATORY—1 story, steel and plaster. Cost not stated. Sacramento, Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for the construction of a new conservatory on the grounds of the State Capitol. Bids will be opened for the work on June 8th. On the same day bids will also be opened for the superstructure work for a new greenhouse which will also be erected on the State Capitol Grounds. Plans and specifications for the work can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

WAREHOUSE—2 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owners, Gladding-McBean Co., Crocker Bldg., S. F. The building will be erected at the southeast corner of 24th and R streets, and will cover a large area. No interior finish will be used. There will be a cement floor. Exterior of the building will be faced with corrugated iron. Plans are complete and the work will be done by Day Labor.

HALL OF RECORDS LIGHTING FIXTURES—Cost not stated. Colusa, Colusa Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. Plans and specifications have been completed for furnishing and installing light fixtures in the new hall of records at Colusa. Bids will be opened on June 2nd. An official proposal appears in another column of this issue.

Stockton School Bids As Opened Yesterday.

Twelve Sets of Figures Opened at Stockton for New West Side School. Award to be Made.

(By Special Wire)

STOCKTON, CAL., May 15, 1914—Bids opened in Stockton today for the construction of the West Side High School show Daniels & Green of Stockton low at \$71,841. An award of contract will probably be made tonight. L. Cereghino & Son of San Francisco bid \$72,900 and Robert Powell of Stockton bid \$72,691. Twelve bids in all were submitted. The building was designed by Architects Stone & Wright of Stockton.

BUILDING CONTRACTS.

SACRAMENTO COUNTY.

LOT 20, Urban Court, Sacramento. One-story frame dwelling.

Owner.....Oscar H. Braugher, 1630 N. St., Sacramento.

Architect.....None.

Contractor...B. E. Scoble, 620 14th St., Sacramento.

COST, \$1750

S 23½ FT. LOT 1, K, L, 2ND AND 3RD STS., No. 1114 2nd St., Sacramento. Build brick bake oven in basement of building.

Owner.....Harry Goldstein, Premises Architect.....None.

Contractor...Chas. A. Vanina, 202½ M St., Sacramento.

COST, \$600

N ¼ OF LOT 1, I, J, 2ND AND 3RD STS., No. 903 2nd St., Sacramento. Place bar fixtures and construct balcony in saloon.

Owner.....Harvey Rasmussen, Prem. Architect.....None.

Contractor...Sacramento Cabinet Co., 12th & B Sts., Sacramento.

COST, \$900

LOT 97 BLK "E" Oak Grove, Sacramento. One-story frame porch on dwelling.

Owner.....G. R. Clegg, Live Oak, Sutter Co., Cal.

Architect.....None.

Contractor.....L. T. Pond, Live Oak, Sutter Co., Cal.

COST, \$200

PTN 8 ACRES, Shaw Batchelor Co., 31st bet. Stockton Road and R St., Sacramento. Fifteen four-room frame dwellings.

Owner.....Libby, McNeil & Libby, 31st & P Sts., Sacramento. Architect.....None.

Contractor...E. A. Pierce, Forum Bldg., Sacramento.

COST, \$600 each

E 32 FT. LOT 7, M, N, 23RD AND 24TH STS., No. 2315 N St., Sacramento. Raise dwelling and finish off 1st floor of five-room dwelling.

Owner.....F. H. Loyd, Premises.

Architect.....None.

Contractor...C. C. Foy, 2315 M St., Sacramento.

COST, \$1300

E ½ OF W ½ LOT 3, J, K, 2ND & 3RD STS., No. 220 K St., Sacramento. One story brick 12-room lodging house.

Owner.....Mrs. S. Retzenefsky, 709 O St., Sacramento.

Architect.....F. A. Schardin, 610 ½ K St., Sacramento.

Contractor...Miller Bros., 1400 P St., Sacramento.

COST, \$8942

LOT 1548 TRACT 24, Wright & Kimbrough, Sacramento. Two-story 9-room frame dwelling.

Owner.....L. T. Allee, 719 K St., Sacramento.

Designer...W. K. Bartges, 2009 G St., Sacramento.

Contractor...J. Harry Wygant, 2100 X St., Sacramento.

COST, \$1140

LOT 14 (one acre) MONTE VISTA-Monte Vista Ave., Sacramento. Two-story frame barn.

Owner.....John Rasmussen, Monte Vista.

Architect.....None.

Day's work.

COST, \$300

E 10 FEET S ½ LOT 2 W 22½ FT. LOT 3, P, Q, 4th and 5th Sts. (rear) No. 418 P St., Sacramento. One-story 7-room frame dwelling.

Owner.....Lorance Yutronic, Prem. Architect.....None.

Contractor...Peter Leoni, 1330 V St., Sacramento.

COST, \$2100

E 20 FT. S $\frac{1}{2}$ OF W $\frac{1}{2}$ LOT 2, H. I. 7th and 8th (rear 710-712 H St.), Sacramento. Move house to rear of Lot 8 and finish off into 4 flats (3-rooms and bath.)

Owner.....Frank Hickman, 724 T St., Sacramento.

Architect...None.

Contractor...Mathews Construction Co., Forum Bldg., Sacramento.
COST, \$1250

E 20 FT. OF W $\frac{1}{2}$ LOT 2, H. I. 7th and 8th (rear 706-708 H St.), Sacramento. Move house to rear of Lot 8 and finish off into 4 flats (3-room and bath).

Owner.....Frank Hickman, 724 T St., Sacramento.

Architect...None.

Contractor...Mathews Construction Co., Forum Bldg., Sacramento.
COST, \$1250

Owner.....T. W. Knox, 601 22nd St., Sacramento.

Architect...None.

Day's work. COST, \$300

S 40 FT. OF W 160 OF LOT "A" W J Lander's Add'n "A," Sacramento. Move building back and finish off interior of dwelling.

Owner.....Benj. Bean, 2304 $\frac{1}{2}$ O St., Sacramento.

Architect...None.

Contractor...B. H. Bill, 3215 4th St., Sacramento.
COST, \$300

N $\frac{1}{2}$ OF LOT 5, I. J. 19TH & 20TH Sts., No. 918 20th St., Sacramento. Two-story brick addition to warehouse.

Owner.....H. L. Dean, Premises.

Architect...None.

Contractor...C. C. Finegan, 823 Q St., Sacramento.
COST, \$2500

E $\frac{1}{2}$ LOT 2, H. I. 18TH AND 19TH STS Sacramento. Build sleeping porch.

Owner.....Mrs. H. R. Suthiff, 1812 H St., Sacramento.

Architect...None.

Contractor...M. D. Smith, 1905 1 St., Sacramento.

COST, \$450

LOT 66 Prin Ave near Riverside Road, Sacramento. Frame addition to dwlg.

Owner.....Frank Corey, Premises.

Architect...None.

Day's work.

COST, \$300

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—4 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, C. W. Stewart, Waverly Apartments, L. A. Owner, Walter I. Wilson, 725 West 21st street, L. A. The building will be erected on West street and will have a frontage of 40 by 100 feet. Interior has been arranged for a total of 72 rooms with baths and wall beds. Interior finish will be of pine and hardwood veneer. Some oak floors will be used. Plans provide for steam heat and a hot water system. Bath rooms will be finished in tile and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

MOTION PICTURE FACTORY Group of 2 and 3 story, reinforced concrete, \$1,000,000. Los Angeles, Cal. Architects, S. Tilden Norton and F. H. Wallis, Title Insurance Bldg., L. A. Owners, Universal Film Company. An official of the film company is coming from the principal office in New York to supervise all construction work. A reinforced concrete wall 18 feet high will be constructed along the property line where it faces public highways. The buildings will include the administration building, projecting theatre, restaurant to seat 500 people, planning mill and carpenter shop, 300 dressing rooms, several stages, one of which will be 600 feet long, emergency hospital, property rooms, scene painting rooms, laboratory, power plant, etc. All the buildings will be of Mission design, of reinforced concrete construction, with tile and composition roofs.

HOTEL—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Mrs. Antone Milovitch. The building will be erected on High street near Ord, covering an area of 83 by 50 feet. The first floor will contain five stores and the hotel entrance. Upper floor has been arranged for twenty rooms and a number of public baths. Interior finish will be of pine with some redwood. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

RESIDENCE—2 story and base, frame and plaster. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins. The dwelling has been designed to contain fifteen rooms, three baths and sleeping porches. Interior will be finished in pine and hardwood. Hardwood and inlaid floors will be used in the principal rooms. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile and will

be equipped with showers. Open fire places will be used in the principal rooms. Mantels will be of tile and marble. A vacuum cleaning system will be installed. Exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

SCHOOL—2 story and base, reinforced concrete, \$20,000. Lancaster, Los Angeles Co., Cal. Architect, E. I. Hopkins, Delta Bldg., L. A. Owners, Lancaster School District. A one-story building to contain four class rooms, besides laboratory rooms, study rooms, etc., and a dormitory to accommodate thirty students will be erected. Both will be of reinforced concrete construction with pine finish and floors, furnace heat, composition roofs, and plumbing. Plans are being prepared.

BANK AND OFFICES—7 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, Harriet C. Merritt. The building will be erected at the corner of 8th and Broadway, covering an area of 60 by 115 feet. The stories will be higher than usually constructed, and the height of the building will be 115 feet. There will be stores in the first story and a bank in the second. The upper floors will be arranged for office purposes. The seventh story being occupied by the Merritt Corporation. The building will be of steel frame and brick construction, and will have reinforced concrete floors, sidewalk lights, pressed brick and stone facing, plate glass windows, marble finish in the lobby and corridors, hollow tile partitions, metal frames and sash, hardwood trim, three elevators, marble stairways, steam heat, vacuum cleaning. Plans are complete and figures are being taken.

Contracts Awarded.
WAREHOUSE—4 story and base, brick and steel, \$43,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H. Van Nuys. Contractors, Alta Planning Mill Co., \$20 McGarry street, L. A. Contract price, \$43,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—4 story and base, brick and steel, \$50,000. Portland, Ore. Architects, Claussen & Claussen, Macley Bldg., Portland. Owner, C. C. Brown. The building will be erected on Madison between Broadway and Park street with a frontage of 50 feet and a depth of 100 feet. Plans show a total of 34 suites of three and four rooms each with bath and wall beds. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service, vacuum cleaning and a hot water supply. All bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

SCHOOL—2 story and base, brick, \$26,000. McMinnville, Ore. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, McMinnville School District. The building has been designed to contain six class rooms, principal's office and an assembly hall. Interior will be finished in pine throughout.

Veneered Panels that

White Brothers

5th and Brannan Streets

San Francisco

Maple floors will be used in the class rooms. Plans provide for furnace heat and modern school plumbing. Exterior will be faced with pressed brick. Plans are now being prepared and figures will be called for within the next three weeks.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE--2 story and base, brick and steel, \$30,000. Seattle, Wash. Architects, Thompson & Thompson, Mutual Life Bldg., Seattle. Owner, S. A. Martin. The building will be erected on Republican street, covering an area of 41 by 83 feet. There will be a number of two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and hardwood veneer. Plans provide for steam heat and a hot water supply. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE -- 2 story and base, brick, \$20,000. Seattle, Wash. Architect, Julian Everett, Boston Block, Seattle. Owner, Dr. O. F. Lawson. The dwelling will be erected on Federal avenue on a large plot of ground which will be laid out in formal gardens. The dwelling has been designed to contain ten rooms and several baths. Interior finish will be largely of hardwood with pine used in the servants' rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. All bath rooms will have tile wainscot and floors and will be equipped with showers. An automatic water heater will be installed. Vacuum cleaning is also specified. Exterior of the house will be faced with pressed brick. Plans are complete and figures are being taken.

THE WEAKNESS OF THE LIEN LAW

By Lloyd S. Ackerman.

The Mechanics' Lien Law is a vast improvement over the former one, and we owe a debt of gratitude to the sturdy fighters who represented the Buildings Trades at the 1911 session of the Legislature, and to whose tireless efforts the passage of the present law is attributable. There has been less litigation under the existing law by more than 40% than there was under the old system. The fact that no case has yet reached the Appellate Courts of this State in which the con-

stitutionality of the new system has been attacked is proof conclusive that it furnishes no encouragement to litigation and that under its clearly defined provisions the owner and the general contractor have exercised sufficient caution in building operations to guard against the consequences of the direct lien. All mechanics' lien laws are designed to furnish protection to the person or persons whose work, labor or materials enters into the construction of a building. The theory of these laws in all the states is that such persons should not be required to look to the personal credit of the person by whom they are employed, but having by their own hands or acts made their work an inseparable portion of the owner's land, the land must stand security for the payment. I propose in this article to consider the efficacy of statutes authorizing liens as a real protection to contractor, material man and mechanic, and shall confine my consideration exclusively to the existing law in this State.

I concede that the direct lien is vastly to be preferred to the lien on the fund due from owner to general contractor from the standpoint of the person who does work or furnishes materials. Formerly the improvident contractor who dissipated the payments received from the owner and diverted them from their proper course could defeat the rights of sub-contractor, laborers and materialmen whose sole recourse for their compensation was the money due the contractor by the owner. If the contractor had incurred liabilities to laborers, materialmen, etc., to an amount of \$5,000 and his payments remaining due under the contract were only \$2,500, the persons who furnished labor and materials were obliged to divide the \$2,500 between them and receive fifty cents on the dollar for their work through no fault of their own. This condition, happily, is now changed and sub-contractors, laborers and materialmen now are given a means whereby they may obtain payment in full for their work, and this by virtue of the direct lien which has nothing to do with the state of accounts between the owner and the original contractor. How does this work out in practice? Has the person who furnishes labor and materials a real as distinguished from an apparent security for his work? To determine this question let us examine a typical case which now arises with increasing frequency. A contract is let for construction of a building, the general

contractor finds that he has bitten off more than he can chew, the claims of persons who have furnished labor and materials aggregate \$6,000, the amount due the contractor from the owner is \$4,000. These persons demand their money in full. The owner says, "I can only pay you 66% on your claims. I only owe the contractor \$4,000 and your demands aggregate \$6,000. You will have to take your proportion of the amount due the contractor." "Ah," replies the sub-contractor, etc., "but we have the direct lien and if you do not pay us we will file liens against your property."

"Alright," says the owner, "go ahead and lien."

Now to the unrelated this would seem to be a problem simple of solution from the lien claimant's point of view. But is it? Let us take the case of one of the sub-contractors as an example. He is a plasterer and has a claim against the building for \$1,500. He goes to his attorney and is advised to file a lien. He inquires how long it will take to foreclose and he is told possibly six months, possibly a year. He anxiously informs his attorney that he needs the money to carry on other jobs, that he can't wait that long, that he must have the money now. The attorney is powerless. The sub-contractor rushes back to the owner and lays his difficulty before him. The owner is indifferent and refuses to help. The result is in nine cases out of ten the sub-contractor takes his 66c on the dollar, and the owner without the slightest legal excuse defrauds him out of the just proceeds of his honest toil.

This is one case. Take another and more flagrant one. The owner decides to build without the general contractor. He farms out all his contracts to different contractors and material men. All his contracts are therefore original. When the work on the building is completed and final payments are due on the various contracts, the unscrupulous owner decides that he will wring a few dollars from the necessities of his contractors. His total obligations were originally \$60,000. His final payments aggregate \$12,500. He sees an easy way to make \$1,350, and so he tells all of his contractors that he is short of money, and he is very sorry to inform them that if they want immediate settlement they will have to take 90% of their just claims. "Of course if you want to wait," he informs them, "for two or three months I can pay you in full." Again the contractor consults his attorney and the

poor man of law advises him that he has the direct lien,—the direct lien—that panacea of the worker's ills which palliates but does not cure. "But," says the contractor, "If as you say it will take me six months to foreclose and your fee will be 15% of the amount of my claim, surely I am better off to take 90% of my claim now from the owner," most assuredly he is better off, and forthwith he goes to the owner and enriches him to the extent of the 10% to which the fraudulent owner has no shadow of a claim.

My readers will be surprised to know that this practice on the part of the owner is growing to such proportions that the shrewd and unscrupulous make a real business of it. They would laugh at the idea of not realizing some easy money on their contracts, they would scoff at the notion of paying their contractors in full. It is their proud boast that they can get their buildings built at absolute net cost without figuring the contractor's and materialman's profit. That 10% which means the bread and butter of the building trades is slid into the pockets of the owner by the simplest kind of a trick. What contractor who reads this article will not recall some recent occurrence in his own experience where some such kind of a fraud has been perpetrated by an unspeakable owner.

If the reader wants to know why the owner can do these things, let him carefully read the Mechanics' Lien Law, and he will see that there is no penalty whatever attached to the owner's failure to meet his obligations other than he is obliged to pay costs of court proceedings, which in such actions rarely exceeds \$20.00, cost of verifying and recording lien \$1.50, and interest at 7% on the claim.

The Remedy.

The old Mechanics' Lien Law contained a provision that if the owner unsuccessfully contests a lien he must pay a reasonable attorney's fee to the claimant to be taxed as part of the costs of the action. The Appellate Courts of California some years ago declared this provision unconstitutional. The new law contains no provision of any kind penalizing the owner for an unsuccessful or frivolous contest of mechanic's lien action. The remedy for the deplorable practices which I have described lies in this: Some provision must be written in the new mechanic's lien law which penalizes the owner for an unsuccessful defense to a foreclosure suit on a mechanic's lien. Under present conditions the law is an encouragement to unscrupulous owners to defraud builders, etc., out of the reward of their work. If the owner were obliged to pay the lien claimant an attorney's fee or a money penalty of any kind the practices which I have adverted to would promptly cease. The contractor could then afford to contest the owner's ultimatum, feeling that he will be to some extent compensated for the damage he sustains by the withholding of moneys due him under his contract. I propose to show how this remedy can be brought about.

The theory upon which the Supreme Court of California held unconstitutional the provision of the old law authorizing the Court to award an attorney's fee to successful lien claim-

ants was that it was violative of the constitutional provision guaranteeing to any person within its jurisdiction the equal protection of the laws. Whether this decision is good law or not is not for me to say. The law stands and must be respected. The decision meant that it was unlawful to say to the owner, "If you lose you must pay the lien claimant an attorney's fee, but if you win you shall pay your own attorney's fee." Beyond any question of doubt, if the law had provided that the unsuccessful party in an action for foreclosure of a mechanic's lien must pay the fee of the attorney for the other party, the law would have been sustained. What objection on the behalf of the building trades exists to the enactment of such a provision in our mechanic's lien law? I can conceive none. If the lien claimant brings an action to foreclose a lien to which he has no legal right let him be penalized the same as we would penalize the owner for an insufficient defense. Under the present law nearly all of the technical defenses are taken from the owner and it will be a rare case where a person who has actually performed labor or furnished materials to be used in the construction of a building would not be legally entitled to foreclose his lien. Under the former law 90% of the cases lost to the lien claimant were defeated because the owner successfully maintained his defense that he owed nothing to the general contractor. All this is now changed and the owner's only real defenses to a legitimate claim are that the work done by the lien claimant was not embraced within or covered by the original contract for construction and that the work done or materials furnished did not enter into the construction of the building.

To impose this burden upon the owner would undoubtedly go far towards preventing recurrences of such actions as I have referred to. If the owner is penalized for a failure to successfully defeat a mechanic's lien for foreclosure brought against him, he will think twice before he will without legitimate cause or reason refuse payment to a contractor on a just claim for the purpose of forcing the latter to compromise. Furthermore, the contractor will be in a position to enforce his claim by law without feeling that he will be a loser no matter which way the cat jumps.

I would go even further and enact into the law a provision authorizing the court to fine an owner for a frivolous defense just as is done by the Supreme Court of this State when a party takes a frivolous appeal. If the owner, as is frequently done, contests the claim up to the point of the actual trial, I would have the judge as part of the judgment rendered in the contractor's favor, require the owner to pay a fine unless the parties of the case stipulated that a compromise was reached and that the owner had apparent reason for refusing to pay the contractor's claim in the first instance. This would be attacked by many lawyers as special legislation, but I believe it would be sustained on the ground that laborers, materialmen, and contractors constitute a class which require special protection.

With these two propositions enacted into the law I venture the prediction

that there would be no recurrences of the cases cited. The owner would either pay when payment was due or pay more than the amount of the claim after suit is brought. When we stop to consider that the law requires a person guilty of a breach of contract to pay the damages which the other party has sustained by reason of the breach, there appears to be no real reason why the owner should not pay damages to the person who has performed work on his building and has not received his pay even though such damages are by an antiquated rule of law restricted to the amount of the contract price and interest. If the rule were written into our statute books that the measure of damages for breach of a contract to pay money was the contract price and the detriment suffered by the payee by reason of the delay in payment, no lawyer would venture to dispute its constitutionality. The remedy is at hand and it remains for the building trades to see that it is made a law.

THE STATE HIGHWAY.

Facts Concerning Its Construction.

Travelers on the State Highway where the concrete road is still unsurfaced frequently note the cracks in the concrete and wonder if they are defects in construction. These cracks, according to the Highway Engineer, are not only desirable, but they are economical as well. They take the place of the metal expansion joints sometimes used in concrete highway building, and when the concrete is covered with the bituminous surface the cracks serve a useful and necessary purpose, but are not apparent to the traveler. The ability to do without metal expansion joints in California effects a large saving in construction, which is put into additional mileage.

An east and west paved highway of importance to all Californians and to tourists who come to the State is taking form through the efforts of the California Highway Commission and the co-operation of Sacramento, Yolo, Napa, Sonoma, Marin, El Dorado, Solano and Contra Costa counties. The road will ultimately form a main artery across the central portion of the State, connecting Lake Tahoe with San Francisco and materially shortening the distance to Sacramento from a large portion of the coast and the west side of the Sacramento Valley.

A monumental portion of this route will comprise 16,000 feet of trestle across the Yolo bypass, now impassable except for a few months of the year. Practically all of the structure will be of concrete, and it will give an approach to Sacramento which will connect at Davis with the highway along the western side of the Sacramento Valley and into Reno. Bids for constructing this Yolo basin causeway will be opened by the Highway Commission June 8.

A scenic drive through Contra Costa county will form part of the State Highway route from Berkeley and Oakland and by ferry from San Francisco, and east of Sacramento in the State road will connect to Lake Tahoe and the East. A survey is to be made this month to determine the cost of a

cutoff through Napa and Sonoma counties for an airline road into Sausalito, thereby shortening the distance into San Francisco. This cutoff also serves to open the fertile Napa and Sonoma valleys and forms a delightful "around-the-bay" scenic tour on which are possible visits to Napa and Sonoma resorts, the Petaluma poultry industry and the Russian river country. It will prove a factor in facilitating communication with the points along the northern California coast. Napa, Sonoma and Marin counties agree to contribute cash bonuses totalling \$175,000 to offset the extra cost of constructing the proposed cutoff.

That California's State Highway, built and surfaced with State materials, will maintain a first place in excellence among the highways of America and Europe and prove the superiority of native road-building material was asserted by Highway Engineer Austin B. Fletcher in a paper presented recently before the Commonwealth Club of San Francisco, in which he said:

"Experiments in the eastern states led the California Highway Commission to consider the bituminous carpets for the California roads. The only essential difference between the work in the East and that here lies in the use of heavy asphaltic oil instead of tar. It was not possible to use coal tar in California without long railroad carriage and correspondingly high cost, for it is not produced here in any considerable quantity. The writer, however, has no regret on that account.

"The bituminous carpets, using California asphaltic oil, on 80 per cent of the work already done, are far superior in his judgment to the tar and screening carpets of the East which he has inspected. They are also far superior to the bituminous carpets usually applied to the macadam roads in the East, and he asserts, after more than twenty years experience in State Highway work, that no Eastern State is today getting its State highways constructed so cheaply, so thoroughly or surfaced so satisfactorily as is California.

"California started late with its State highways. Its people, with the changed conditions of traffic brought about by the automobile, are demanding what to all intents and purposes is city street work out in the country. And California is getting it, to all intents and purposes."

UNITED STATES CIVIL SERVICE EXAMINATION.

ELECTRICAL ENGINEER AND DRAFTSMAN (MALES)

June 3, 4, 1914.

The United States Civil Service Commission announces an open competitive examination for electrical engineer and draftsman, for men only, on June 3 and 4, 1914. From the register of eligibles resulting from this examination certification will be made to fill vacancies as they may occur in this position, at \$1,200 per annum, in the office of the Supervising Architect, Treasury Department, Washington, D. C., and in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy

by reinstatement, transfer, or promotion.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

- | | |
|---|----------|
| Subjects. | Weights. |
| 1. Theoretical and practical questions in electrical science (covering the subject with special reference to lighting and elevator work in public buildings)..... | 25 |
| 2. Drawing and design (involving ability to design and draw plans, etc., for all apparatus and machinery connected with electrical work in public buildings)..... | 40 |
| 3. Training and experience..... | 35 |
| Total | 100 |

Persons who meet the requirements and desire this examination should at once apply for Form 1312 to the United States Civil Service Commission, Washington, D. C., or to the Secretary of the United States Civil Service Board at San Francisco.

Issued April 30, 1914.

SHORT CIRCUITS.

Mission of the Fuse When the Wires Beehive Crossed.

"Another short circuit!"

One of the commonest reports heard in all electrical works.

A "short circuit" means that the electric wires have become crissed or connected so as to form a bypath or shunt of comparatively low resistance, through which so much of the electrical current passes as practically to cut out that part of the circuit through which the current originally flowed. In other words, a "short circuit" has replaced the normal circuit, which may be considered a long circuit. The cutting out of the resistance of the long line permits the power to rush over this path of low resistance, and if the apparatus were not protected by the fuse or circuit breaker the electrical machinery would do itself serious harm.

To prevent serious effects from accidental short circuits of electric lighting wires in buildings a "fuse" is inserted in the circuit just inside the building. In case a nail or some other falling object short circuits the electric wires in the house this fuse blows out—namely, melts out—and throws the circuit open so that no electricity can flow through the wires in the house until the "short" has been found and corrected.—New York World.

CONSTRUCTION WORK ABROAD.

CANADA.

To Connect British Columbia and Alaska.

The suggestion of co-operation between the United States government and British Columbia in building railways to connect British Columbia with Alaska has met with general approval in western Canada. Situated as it is, between United States territory on the south and north, the extension of railway lines through the Province, affording direct railway communication from the States through British Columbia and Yukon Territory to Alaska, would be of great benefit to the Province. The connection would be through an extension of the Pacific Great Eastern from the Peace River district

the Yukon to the Alaska boundary. This would, however, result in a rather circuitous route, making the distance from the international boundary on the south one of great length to the Alaskan border, but it would seem to be the only feasible route, as the topographical formations of portions of the British Columbia coast country is such as to render the building of railways difficult, if not impossible.

The Government Contract with the Pacific Grand Trunk.

The Pacific Grand Trunk Railway which is constructing new lines and extensive port terminal improvements in British Columbia, has issued a statement denying the report that the company is asking further assistance from the Dominion Government in the way of additional guarantees. In 1905, when the Grand Trunk Transcontinental contract was made, the Government agreed to guarantee the company's bonds at \$125,000 per mile on the prairie section and 75 per cent of the cost on the mountain section, and in 1905 took powers by act of Parliament to guarantee \$10,000,000 therefor. The amount provided, however, is not sufficient to cover the proportion of the expense guaranteed, and the Parliament has been asked to consider the advisability of taking further powers to provide the Government's proportion of the expense of construction under the original guarantee.

American Railway to Enter Vancouver.

Another American railway, the Chicago, Milwaukee & St. Paul, is endeavoring to secure terminal facilities in Vancouver, and will enter into competition with other transcontinental lines for the carrying trade of this port. Pending a grant for terminal facilities, it has arranged to enter over the British Columbia Electric Railway, making connection at Sumas, at the international boundary. The Chicago, Milwaukee & St. Paul has further increased its traffic facilities on the Pacific coast by purchasing the Bellingham & Northern Railway, which runs from Bellingham to Sumas. A car-barge service is operated between Bellingham and Seattle for handling freight routed over the main line to the Middle West, the East, and South.

Municipal Improvements in Alberta.

Extensive improvements are to be made at Banff, Alberta, during the coming season. Paving and lighting streets and repairing Government buildings will cost about \$1,000,000. A new sanitarium is projected which will cost approximately \$200,000. While it is given out that a million dollars will be spent this year, it is more probable that the improvements will extend over a longer period. The Canadian Pacific Railway and the Government are jointly concerned in making Banff the national playground of Canada.

Among other buildings that will be started in the near future in Medicine Hat, Alberta, are the following: Technical high school, \$300,000; two 8-room grade schools and primary school, \$100,000; hospital and convent, \$100,000; radiator factory, \$100,000; candy factory, \$25,000; immigration hall and addition to Federal Building, \$50,000; and other factories and business blocks which are now being arranged for, besides homes and residences all over the city.

Plans for a ten-story hotel to cost about \$300,000, to be erected in Edmonton some time this year, have just been completed.

English-speaking members of the Roman Catholic Church in Edmonton are planning to erect an edifice to cost \$100,000. It will be known as St. Joseph's Church. Work is to begin this spring.

New Railway in Alberta.

Additional transportation facilities from northern Alberta to Fort William, Ontario, will be provided by the Northwestern Railway, whose application for incorporation has just been granted by the Dominion Government. The line starts at a point southeasterly to the Athabasca River, thence crosses close to range 7, or a few miles west of Holmes Crossing, and continues southeasterly to Edmonton, thence in the same direction to Camrose and southeasterly to the boundary of Alberta.

Municipal Improvements in Edmonton.

Edmonton, the capital of Alberta, will have a period of unusual building activity this year, if plans, recently announced, are carried to fulfillment.

A capitalist of Warwick, England, announced in Edmonton on March 20 that his plans for this year include the erection of a ten-story business and office building, costing \$600,000, and a theatre building with seating capacity for 2,500, estimated to cost \$400,000.

The G. A. Fuller Co., of New York, reports that work on the superstructure of the \$350,000 arts building for the University of Alberta in Edmonton will begin early in June.

The building committee of Robertson Presbyterian College has decided to erect a theological building costing \$150,000 on the grounds of the University of Alberta in Edmonton. It is to be ready for the 1915-16 term.

The Bank of Alberta, recently incorporated under a Dominion charter, will expend \$250,000 in constructing a modern bank and office building in Edmonton, according to an announcement made by a director of the bank.

A Roman Catholic cathedral, magnificent in design and extensive in proportion and costing \$150,000 to construct, will be erected this year in Edmonton just east of the University of Alberta grounds, for Archbishop Legat, of Edmonton.

Calgary City Improvements.

The city of Calgary will require \$1,734,600 for various purposes this year, and by-laws covering that sum will be submitted to the ratepayers for ratification this spring. The list is as follows: Parks, \$50,000; waterworks extensions, \$250,000; fire department, \$30,000; publicity, \$17,000; exhibition, \$260,000; Centre Street Bridge (concrete), \$330,000; Mission Bridge (concrete), \$77,600; Ninth Street West Bridge (steel), \$60,000; electric light extensions, \$300,000; Hillhurst athletic grounds, \$60,000; general hospital, \$200,000.

The by-laws for the last two items, namely, the new hospital and the purchase of the Hillhurst athletic grounds, have not yet been prepared, and have not passed the council. They may be voted on at a later date than the others.

Building Activity at Windsor.

The Canada Home Construction Co., of Windsor, is considering building 50 or more homes in the western part of

the city, which would mean a great gain over the already large increase in building that has been going on since the first of the year. The permits issued by the engineer's office for March show an increase of \$28,500 over March last year, and the increase for the first three months of the year 1914 is nearly double that of previous year.

Civic Center for Vancouver.

The establishment of a civic center in Vancouver, consisting of a group of public buildings of artistic design and forming a nucleus which will later be amplified and enlarged by the addition of other buildings and public improvements, has received the indorsement of the commercial and industrial organizations of the city. Definite steps will soon be taken to carry the plan into execution. The city owns some available property in the center of the business district and powers of expropriation will be asked of the provincial government to enable the city to acquire land for the civic center scheme.

The plan as outlined, in addition to the central buildings, includes the widening and beautifying of streets connecting Stanley and Hastings Parks, located at extreme opposite ends of the city, and the erection of monuments and fountains along the thoroughfares radiating from the center and leading to the parks.

The growth of Vancouver and the unprecedented commercial and industrial development of the territory in its immediate environments have been so rapid in recent years that the energies of the people have been directed to material interests, commercial enterprises, and development schemes, to the neglect of the artistic features or the beautifying of the municipality. The unusual activity in real estate and the rapid rise in values have encouraged the acquisition of centrally located properties in Vancouver for private enterprises and speculative purposes, while the demand for business houses and office buildings has been such as to encourage the construction of edifices to meet an emergency demand at high rental values.

This abnormal condition has resulted in the growth and development of a city possessing great commercial and industrial interests, but lacking in many respects the artistic features of a metropolis municipality. There are many splendid and not martistic buildings in the business section of Vancouver, but they are so distributed and interspersed among smaller structures lacking in substantial and artistic features that their attractive appearance is lost or negated in the general ensemble. Telegraph, telephone and overhead trolley wires form a network along the business thoroughfares, and the poles on which the wires are strung obstruct the view and give to the long straight streets an unsightly appearance. It is to correct these defects that the present movement for a civic center has been started.

At the last municipal election the voters of Vancouver approved the plan for a civic center and the location for a new city hall. The plan now under consideration is to use as a nucleus some vacant properties owned by the city and to acquire others either by purchase or expropriation, within a

radius bounded by Beatty, Cambie, Pender, Howe, Georgia, and Hastings streets. This district is in the center of the business section, where the principal thoroughfares converge, and is admirably adapted to the purpose outlined in the plan.

Pacific Great Eastern Railway Extension.

The recent authorization of the British Columbia Legislature for the extension of the Pacific Great Eastern Railway from its present objective point, Fort George, northward and eastward through the Rocky Mountains to the Prairie Provinces, is one of the most important of recent years in the development of the natural resources of the Province. The road will tap and open up for settlement the Peace River valley country, a territory estimated to contain 31,500 square miles, equal to 20,000,000 acres.

The proposed route from Fort George will be almost 140 miles due north, penetrating the Rockies at Pine River, thence traversing the open country 290 miles to the Alberta boundary. The Peace River section of the road will traverse virgin, undeveloped country. Grading will commence in May, and the company expects to have the 330-mile stretch of track northwest from Fort George to the Alberta line ready for traffic in 1915. The first section of the Pacific Great Eastern, extending from Vancouver to Fort George, tapping the Pemberton, Lillooet, Quesnel, and Fort George districts, will soon be completed and carrying the products of that heretofore undeveloped section of British Columbia to Pacific coast markets.

WHY COURTS ARE STRONGER THAN LEGISLATURES.

Admittedly our courts are our most powerful and capable branch of government. As between the courts and the legislatures this is because our courts are organized better than our legislative bodies.

If the process were reversed—if our legislatures were composed of a few experts in their field, always on duty; and if our courts were composed of a large number of unqualified men, meeting occasionally—our legislative branch of government would be the more powerful.

To maintain the ideal equal balance both should have the power that comes from being capable.

It may be possible to prove that courts make as many mistakes as legislatures. The number of reversals of decisions would indicate it. But the point is that courts even make their mistakes capably. They "put things across." They have at least a capable machinery that could be used with the minimum of humanity's errors. The greatest aid in reducing these errors to the minimum would be a capable or efficient legislative machinery.

Superficially, the perponderating (almost the overmastering) power of the judicial branch of American government comes from its power to construe the Constitution. But it gets its practical monopoly of that power because the legislative branch is not fitted to construe the Constitution. Let there be a legislative commission as strong in its

personnel as the judicial "commission" is and they would work together in the construction of the Constitution. Such a legislative commission would build up a "jurisprudence of legislation," to use Prof. Charles McCarthy's phrase, as strong as the jurisprudence of courts.

For one thing, there would be far fewer occasions for courts to overturn the legislative work. For another, if a statute were overturned it could be almost immediately set on its proper bottom.

It is well to remember that our courts are now essentially a commission system. The different results attained by them and by our checks and balances system of legislation are instructive.—Kansas City Star.

MISSISSIPPI RIVER BRIDGE TO BE BUILT AT NEW ORLEANS.

It seems that the project of a bridge over the Mississippi near New Orleans, first proposed in 1858, is to be put through. The original design was for a crossing about four or five miles above New Orleans, where no change of bed or banks has occurred in the recorded history of the river. The span of the cantilever bridge was to be 1,070 feet between centers of main piers, the suspended span being 440 feet long and the anchor arms each 660 feet 8 inches in length. The foundations were to extend to 170 feet below low water and were to rest upon a bed of firm sand. The piers were to be sunk by dredging through open weirs or cylinders. The present plan calls for a double deck bridge, one deck for highway and electric railway travel, and the other for railway service.—Scientific American.

In spite of the progress of civilization, man remains a fighting animal. Peace societies begin to think they are making progress toward taming his instincts, and they are confronted by another war. Here is a partial list of the wars of the northern hemisphere in the last sixty years, exclusive of the minor revolts in Northern South America, in Central America and the West Indies and in Africa:

Crimean war, 1854-56.
Seyo mutiny, 1857.
Italy and France against Austria, 1859.

Civil war in America, 1860-65.
Mexico invaded by Austria and allies, 1861-67.
Prussia and Austria against Denmark, 1861.

Seven weeks' war, Austro-Prussian, 1866.

Franco-Prussian, 1870.
Russo-Turkish, 1877-78.
Servo-Bulgarian, 1885.
Japanese-Chinese, 1894-95.
Greco-Turkish, 1897.
Spanish-American, 1898.
Filipino-American, 1899.
China against the allies, 1900.
Boer war, 1899-1902.
Russo-Japanese, 1904.
Balkan states against Turkey, 1912.
Balkan states against Bulgaria, 1913.
Mexican war, 1914.

This has been said, is only a partial list. England has had several small wars, including the important conquest of the Soudan, which are not included, and there have been numerous minor disturbances of one sort and another. But the list includes twenty fair-sized

wars, or one every three years.

There has been no falling off in recent years. Take the last two decades, for instance, and there have been ten wars, or one every two years.

Perhaps there is some encouraging lesson for the peace societies to be drawn from this fairly bloody record. Perhaps it means that wars are vanishing from the earth. But it would take a pretty incorrigible optimist to read this prediction in the history of the last half century.

Apparently the world isn't going to be able to get on for some time to come without fighting.—Kansas City Star.

The following account of an educational exhibit in the matter of safety devices exhibited by an Eastern railroad is taken from the Scientific American:

"Sending a 'Safety First' campaign car over its entire lines, and instructing its employees in safeguarding not only their own lives, but the lives of the public as well, is the latest development in the campaign of safety waged by the New York Central Railway. This is the first instance of such an exhibit traveling in a railroad car, and the instruction given through its equipment is doing much to decrease accidents. The car has been in operation but a few months, and already records show that there have been thirty-five fewer employees killed while on duty than for the same period of last year. This, of course, covers the entire system of the road. As an educational feature, the car is especially interesting to the general public as well as to the employees of the railroad. Its lessons are all strongly impressed upon the minds of the on-lookers, by a system of 'Seeing is believing.' Models of all machinery used by the company are shown, together with the right and wrong method of guarding dangerous parts. Photographs on one side of the car picture to the audience unsafe practices of railroad employees. The trespass dancer is very forcibly shown by a number of photographs illustrating how persons risk their lives needlessly walking on railroad property. Above these pictures is a statement calling attention to the fact that no less than ten thousand such danger-defying people are killed on the roads of this country each year. One model of especial interest is that of the modern freight car with all its up-to-date mechanism and safety appliances. Attached to the exhibit car is a coach to be used as the lecture room, and this is equipped with a stereopticon by means of which illustrated lectures on safety are given to the men employed by the road."

This shows the attitude that the people are taking toward the idea of conservation of human life. And it seems to be an anomaly that the liability law and safety appliance act in California should meet such violent objection from employers and be looked upon as confiscatory of their property when in reality it looks in the long run to their own benefit.

POMPEY'S PILLAR.

This is the name of a celebrated column standing on a slight elevation in

the southwest section of ancient Alexandria, a short distance outside the Arabian walls. It is a monolith of red granite of the Corinthian order raised upon a pedestal. Its total height is ninety-eight feet nine inches, shaft seventy-three feet and circumference twenty-nine feet eight inches. The present name is a mere invention of travelers. The inscription on the base shows that it was erected by Publius, emperor of Egypt, in honor of the Emperor Diocletian A. D. 302. It stood in the center of the court of the serapeum, or great sanctuary, of Serapis and survived its transformations into a church and a fortification.—Exchange

LARGE PIER AT OIL REFINERY IS ALMOST COMPLETE.

Capable of accommodating the largest vessels afloat, the new division of the Standard Oil company's quay, 500 feet in length, will be ready for acceptance shortly. The wharf is being constructed at Point Orient for the handling of the increasing Oriental trade.

The total length of wharfage space now controlled by the Standard at this point is more than 1000 feet. The wharf is so constructed as to make it possible to load and unload a vessel at the same time.—Richmond Ind.

CHINA PLANS MUSEUM.

Absorption by America and Europe of many fine specimens of their ancient arts has so aroused the Chinese that a proposal has been made to establish a national museum in Peking. Only recently a quantity of ancient paintings, beautiful old porcelain, colored screens, and a hundred cases of jade have reached Peking from the Jelol summer palace. At present these treasures are housed in the Wuying hall of the palace, and it is suggested that with those from the old palace in Mukden they would form a substantial nucleus for a museum.

By way of preparation for the heavy travel which is expected in connection with the Panama Exposition at San Francisco, the Union Pacific Railroad Company has recently placed an order for 54 locomotives costing about \$1,000,000. Twenty-five of these are of the Pacific type, 15 are Mikados and 14 are of the six-connected type. Forty of the locomotives will go to the Union Pacific, 10 to the Oregon Short Line and 4 to the Oregon-Washington line.

EVAPORATION AND STEAM FLOW.

An investigation of evaporation and steam flow is being carried out by Prof. John F. Hayford of Northwestern University with the aid of a grant from the Carnegie Institution. Instead of using apparatus on a small scale to measure evaporation, Prof. Hayford proposes to consider each of the Great Lakes in turn as an evaporation pan, evaluate the income outgo (other than evaporation) and change of content of the lake, and from these data to determine the daily evaporation in its relation to meteorological conditions. Ultimately the knowledge thus acquired will be applied to the study of the laws of stream flow in the United States,

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Editorial Comment.

The following account of a fish or whale captured off the coast of Florida is given in the Technical World for May:

After a fight lasting thirty-nine hours, in which five harpoons and one hundred and fifty bullets were used, a remarkable monster was caught off Knight's Key, Florida. According to the scientists of the Smithsonian Institution, it is what is known as a whale-shark, and is believed to be the largest fish ever caught.

When captured this giant weighed thirty thousand pounds, which did not include a porpoise weighing fifteen hundred pounds, which it had swallowed. Its length is forty-five feet. A full-grown man could stand upright inside its stomach.

The mouth of the creature is more than three feet wide and forty-three inches deep. The tongue is forty inches long, and it has several thousand teeth much smaller than those of a baby. The tail looks like the caudal appendage of an aeroplane and is ten feet from tip to tip. The hide is three inches thick, and there are no scales. This big whale will be exhibited at the Panama-Pacific Exposition at San Francisco in 1915 to show what Florida fishing waters produce.

This not only shows there is good fishing in Florida waters, but will also furnish an argument for the orthodox church people that Jonah could have been swallowed by the whale. So if he lived for three days inside and he could withstand the action of the gastric acids of the leviathan's stomach, he would have been able to come out alive. However, it is about time to quit disputing about myths and let everybody believe these old stories as he sees fit.

Electrical iron and steel production in Sweden has been on the increase within a recent period. As to the amount turned out in that country, starting with 122 tons in 1908, it rose to 870 tons in 1910 and 18,600 tons in 1912, or the last report. There are upwards of 20 electric furnaces running at present, using in all some 69,000 horse-power. New furnaces are building at Lofoten, Gellivara and Sandviken. The Stora Kopparbergs Company recently purchased a waterfall which gives 150,000 horse-power, and is to build new furnaces in the near future. As regards chrome steel, a new plant was put in use not long ago at Trohatten with two electric furnaces, which reduce ore imported from New Caledonia and South Africa, using the three-phase system. The product contains from 5 to 9 per cent chromium,

and is furnished in four different grades.—Scientific American.

Long after the looting of the New Haven Railroad comes the delayed examination of the methods employed. And long after J. P. Morgan and the others involved are laid to rest comes the ghost of these transactions to haunt the memories of the Wall Street financier. Most people who had the energy and independence to think knew all these things before. But the majority of people were so hide bound by political prejudice that they allowed the priests of the temple of finance to rob them of their birthright and were anxious to assail any one who had the temerity to criticize these ministers in the money temples.

When these great financiers are stripped of their power and the steam roller that the people have given them is taken away how small they seem, in comparison to their former selves. In fact the claim of some of them to eminence is chiefly due to the fact that they managed to keep out of prison and in many cases that was owing to the fact that they were never prosecuted.

One thing that Thomas W. Lawson did for the public was to put his finger upon the particular facts of rottenness in the financial dealings of the high priests in the temple of money. His "Frenzied Finance" riveted the popular attention on particular transactions. And his literary style made readable a lot of facts that would have otherwise proved to be uninteresting. So that while Lawson claims no particular virtue himself he did state the facts in such a way that the mask of many a smug financier was torn away and a snog revealed in what he really was, the while he assumed a pharisaical virtue that he had not. As the years go by and the methods by which these money kings acquired their millions are exposed the only thing to be wondered at is that intelligent people stood for the system so long.

The latest news reports state that Huerta has agreed to resign. How much of truth there may be in this remains to be seen. It however has this one thing in its favor and that is that Huerta has repeatedly said he will not resign. Which probably means that he will. If he does resign and leaves the country one stumbling block will be removed in the way of establishing order in the country. But it will require the protecting hand of stronger governments to establish any kind of a stable government in that forsaken land amongst a people that have no stability of character or industry.

The Conservation Of Fuel and Efficiency In Power Production.

By Percival R. Moses In The Isolated Plant.

Nine hundred per cent waste in the manufacture of power seems to be an incredible statement, yet if the average power plant is studied the percentage of waste will be found to be more nearly two thousand per cent than nine hundred. This condition is startling, and like all matters connected with the conservation of natural resources, so fraught with importance to the future of the Race that it will bear emphasis.

It is only in the manufacture of power ready for use that such immense waste occurs. In the transformation from mechanical to electrical power, and in the utilization of the energy delivered electrically to motors, no such loss occurs. In large motors, a seven per cent waste may occur, which may increase to twenty per cent in small lightly loaded motors; but the important loss is at the start—in the transformation of the latent energy in the fuel into mechanical, useful energy.

This waste is going on every minute of every day in railroad locomotives, central railroad power and lighting stations, and in private power plants in factories and buildings. Every electric light signals to the engineering mind that for every single unit of energy actually transformed into light, between two and three hundred units have been lost irretrievably, and for every unit of energy transformed into mechanical or electric power, twenty to thirty units have been lost.

All this loss is as much a waste of the world's resources as the losses due to fire, earthquake or war; and the gay young blood throwing away thousands of dollars for an evening's amusement is no more a spendthrift of the world's capital than the manufacturer of light, electricity or mechanical power, nor is he any more culpable. Part of this waste, it is true, is unavoidable with our present knowledge and apparatus. The transformation of electric current into light is still, notwithstanding the great advances of the last five years, a most inefficient process. Such losses due to our lack of complete knowledge or means are unavoidable and we rather deserve credit for doing as well as we have done, instead of blame, but in the transformation of the energy contained in fuel into mechanical power and electricity, we are not so blameless.

We know—at least every technically trained engineer knows—that part at least of the present waste is easily avoidable, and the only factor which prevents the stopping of the waste in the selfish interest of the individual. Millions of dollars have been spent in perfecting boilers, furnaces, engines and electrical appliances, with the hope of bettering their efficiency a few per cent. Whole stations have been scrapped to gain ten or so per cent efficiency. Hills have been leveled and mountains tunneled to increase trans-

portation efficiency a few per cent, and millions upon millions have been spent in straightening curves with the same idea.

These are private enterprises and in each case there was a direct benefit looked for corresponding to the investment. The State must expect to obtain its benefit from the conservation of natural resources in the more or less distant future, but unless it does plan ahead as railroads plan their terminals, it will be bankrupt when that time arrives.

It is not time that the state step in and demand that selfish interest be subordinated to the general welfare? It would seem to be high time, for our anthracite resources have been estimated to last only a hundred or so years, and even our bituminous fields must in time disappear. It is not alone the exhaustion of our fuel beds that constitutes the waste. This is, perhaps, but a small proportion of the world's loss. Its greatest loss is the waste of labor in mining unnecessary quantities of fuel and in the labor or materials required to pay for the fuel unnecessarily consumed.

The army thus employed to supply this country's fuel waste is almost as great a loss as a standing army in times of peace, because in each case the labor thus wasted would be otherwise usefully employed in developing the wealth of the country. Although the fact that this waste is easily avoidable is generally known, the methods are not perhaps plain to even the trained engineer, nor is the difference between the interest of the individual and of the community clearly defined, and it is the purpose here to clarify these conditions.

The waste in transforming the latent energy of fuel into mechanical power, from which it may again be transformed into electricity, occurs to the greatest extent where steam is used as the medium for effecting the metamorphosis. In the ordinary electric station either for lighting or railroad service, equipped with modern apparatus, the fuel burned under a set of boilers transfers from 70 per cent to 80 per cent of its energy into the water contained in the boilers, changing this water into steam which, as its egress from the boiler is restricted and as additional quantities are being continuously added, increases its pressure until the outflow equals the quantity manufactured, when the pressure remains stationary. As is well known, in changing from water into steam nearly twenty times as much energy is stored as in increasing the pressure of the steam from one pound per square inch to one hundred and fifty pounds per square inch. When this steam is led to a steam turbine or steam engine, it drops in pressure but still retains the energy stored during the transformation from water into steam, so that only that portion of the fuel's energy is utilized which was stored during the increase of pressure. This

performance is greatly improved by the use of a condenser, allowing the drop in pressure to continue below the pressure of the atmosphere, and by this means the amount wasted is reduced from about two thousand per cent to around one thousand per cent. In particularly highly efficient plants the balance of the energy wasted goes out with the water used for condensing purposes.

If the steam after passing through the turbines or engines would be used to furnish heat for manufacturing purposes or for warming of buildings, the greater part of this waste would be avoided. The reason that this is not done more than it is, is that it does not pay the company operating the central plant to distribute this steam because such plants are usually placed away from the location of big buildings on account of the high value of real estate near such buildings, on the one hand, and on the other hand because of the low cost of delivering fuel to stations along the water front or near the railroad. Such location makes the investment for steam or hot water mains too great for the probable returns from the sale of heat, so the waste from a strictly commercial viewpoint seems necessary. This matter will be discussed more fully later on but, first, other transgressors should be pointed out.

A great proportion, possibly one-half of the larger buildings and nearly all separate mills and factories, have their own power manufacturing plants, usually known as isolated plants to distinguish them from the central electric stations. These plants are frequently highly efficient during that portion of the year in which the steam, after doing its work of driving the engines, is more or less fully utilized in warming the building or in evaporating or drying processes. In some mills where great quantities of steam are needed all the year for dyeing or drying, such as finishing mills, steam laundries, hat factories, sugar mills, etc., the fuel energy transferred to the steam is fully utilized and the only waste occurs in not burning the fuel thoroughly and in the radiation from steam pipes.

Little fault need be found with such plants from the point of view of conservation of resources, provided the easily preventable wastes frequently found are prevented.

The steam supplied by isolated plants not situated so as to be able to utilize the energy contained in the waste or "exhaust" steam is usually a most inefficient energy transformer during the warmer season, and in this period the losses are anywhere from three thousand to five thousand per cent of the energy utilized electrically or mechanically. These isolated plants in many cases do distribute steam to their neighbors where they can, but the number of instances where this is done is insignificant and the period when the supply is needed is restricted.

These isolated plants could be equipped with apparatus for the transformation of the energy in the fuel into electricity or mechanical power, far more efficient than the usual apparatus, and the sole reason why they are not so equipped is that it does not **pay the individual** to do so. In Germany for some years this problem has been recognized and all over the Empire will be found the so-called "lokomobiles," consisting of boiler and engine mounted together; the boiler operating at high pressures with steam superheated many hundreds of degrees. With the result that instead of using from eight to fourteen pounds of coal in practice to make a kilowatt of electricity for a period of one hour, these plants use from two to three pounds of coal with a corresponding reduction in labor of firing.

A great number of engines operating like automobile engines without the interpolation of steam, have been developed for transforming the energy directly from the fuel by burning it in the cylinder of the engine. Where the fuel is coal, such engines are known as producer gas engines, the coal being gasified in an iron shell, brick lined, termed a producer. After cleaning the gas is burned in the engine cylinder. The losses in this type of plant, due to heat going out with exhaust gases, heat carried away by the water used to cool the cylinders, and radiation losses, may be from 400 to 500 per cent of the energy actually available as electricity; but even with this waste only two pounds of coal are used to supply one kilowatt for an hour, instead of from eight to fourteen pounds. Where oil is the fuel, the engines are of the Diesel type where the oil is injected into the engine cylinder into a highly compressed body of air heated by the compression. The oil burns and transforms the latent energy in it into available mechanical energy, which in its turn is transformed efficiently into electricity. This type is even more efficient than the gas engine operated on producer gas, and the waste may only be 350 per cent of the useful energy. Part of the waste of heat in exhaust gases and jacket water of gas and oil engines may be avoided by using these to heat water or make steam for warming, drying or evaporating purposes, thus increasing the efficiency by 35 to 40 per cent.

The great increase in efficiency of fuel utilization made possible by these improvements in engines available to small plants becomes strikingly apparent if the quantity of two pounds of coal required to make a kilowatt for one hour is compared with the largest and most modern central lighting or railroad power station, where the coal used in regular practice is over four pounds per kilowatt hour. Test conditions show much better results than this, but this figure is about the best for a yearly average.

With these wonderfully efficient engines available, why are they not universally used. This query arises unavoidably. There are many answers. Formerly, unreliability, need of special knowledge, lack of standardization—all these and many other charges—were filed against gas and oil engines, but experience and development have put these aside and the real reason

that they are not universally used is that **it does not pay the individual well enough to do so.** They are being used widely and, in places where the manufacture of power is the main consideration, they are rapidly taking their correct place; but in the factory or building where steam is required for part of the year the owner does not wish to incur the double expense nor to give up the extra space required for the gas plant in addition to the steam plant. He frequently objects to two kinds of power equipment and fears the extra, though somewhat imaginary, complication.

It has appeared thus far that, during the season when steam is required for heating, the enormous highly developed central electric station may be and frequently is less efficient in its utilization of fuel than the private power plant, because of its inability to use the by-products of the manufacture of power. On the other hand, the private power plant, unless equipped with the modern high efficiency locomobile or gas engine, is far less efficient than the central electric station during half the year at least.

One remedy is clearly apparent. If the central lighting stations could transfer part of their work to the private plants during the heating season, and the owners of the private plants transfer their load to the central station during the warm season, the efficiency of both in the utilization of fuel would be greatly improved. There is still another period when such transfer might profitably (from the standpoint of the community at least) be made. The use of electricity varies with the time of day and season of the year. It is greatest around 4 to 8 o'clock at night during December and January. It is least during the early hours of the morning.

When power plants operate at much below the capacity for which they are designed, they fall off rapidly in efficiency, so we are confronted with the fact that except during heavy load periods the efficiency is far below the standard. If the private plant could transfer its load to the central station during its inefficient period, except during times in which steam would be required for heating—in the early morning—the efficient utilization of fuel would be still further increased. There are no electrical difficulties in the way of such transfers, yet they are not made and such plants continue to struggle along under the handicap of excessive waste and our resources continue to be thrown away.

Why? Because there is bitter rivalry between the central electric station and the private power plant. The central electric station sees what it considers to be the inevitable growth of larger and larger buildings. It aims to supply these even at very low prices for electricity, and as its only competitor is the private plant it seeks every means of destroying such plants, and where it can do so refuses co-operation. If it thinks co-operation will aid the growth of such plants, in other words, the central electric station has not co-operated with the private plant because it has not thought that, taking all things into consideration, it would pay to do so.

The private power plant owner, even where he can obtain service from a

central station to supplement his own service, does not utilize the central station service when he should do so from the viewpoint of conservation, because it does not pay him to do so at the price charged for electricity.

We have, then, the situation in a nutshell: Part of our natural resources and of our resources of capital and labor are being squandered because it does not pay the individuals to save them. Should not the State step in and say: "Here, Messrs. Power Manufacturers, we are willing you should continue to make power or electricity or steam, but you must do it efficiently even if you lose something by doing so. Hereafter, no one shall be allowed to make power except in the most efficient way. We will establish an Efficiency Board to pass on all plans for power manufacture. You will be required to use such types of apparatus as will keep the use of fuel down to a minimum. We shall establish rates which will make it less burdensome for you, Mr. Private Plant Owner, to shut down your plant when it cannot be run efficiently from our point of view of conservation of fuel. Where it is possible to do so, we will require the Central Electric Stations to distribute their steam for heating, even if they don't make much money by so doing, and if the conditions make this impossible we will require them to co-operate with Private Plants during the winter season so as to fully utilize the capacity of these plants for the supply of electricity and steam to neighbors and thus avoid double use of fuel for making electricity and for making heat."

This is what a state would have to do if the end of its natural resources was in sight. Is it necessary for us to wait until then or shall we do it now and put off that evil day? The matter is not a theoretical one or one of minor importance. In the city of New York alone the avoidable fuel wastes from the great central stations is enough to heat all the large buildings not already provided with private plants and will probably approximate six hundred thousands tons a year. If to this is added the waste due to inefficiency of the thousand odd plants of the city, we would find that the total avoidable waste would be over a million tons a year.

Think what this would mean applied to the whole country. Imagine the labor saved in mining, transportation and hiving of this fuel; in removing ashes and in capital expenditure. Our municipalities already insist that water shall be used economically, even if it is paid for on a meter basis, and the Nation no longer permits its forests and streams to be lavishly destroyed. Other nations regulate the methods of cutting timber and mining coal, so that unnecessary waste will be prevented; so this plea for efficient production and enforced co-operation would not seem to be entirely without warrant.

England seems to have been having some troubles of its own. What with the Ulster Army and the suffragettes and the riot in the House of Commons there seems to be a good deal going on in Merrie England. So that with all her adherence to precedent, even in these peaceful times, there is enough to occupy the attention of her statesmen.

Plans desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 6 story and base. Class C construction, \$65,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the north side of Bush street west of Stockton, having a frontage of 10 feet and a depth of 7 1/2 feet. There will be a total of 36 apartments of two and three rooms. Interior finish will be of pine with elm panels, hardwood floors and beam ceilings. Plans provide for steam heat, elevator service and a vacuum cleaning system. All suites floors and wainscot. Entrance will be with wall beds and private bath rooms. Bath rooms will have tile finished in marble and tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and excavating has been started. Carpentry work will be done by Day Labor. All other parts of the work will be let by contract. Bids will be taken at once.

SAN FRANCISCO—Apartment house, 7 story and base, brick and steel. Cost not stated. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Henry A. Voorman, as guardian. The building will be erected at the northwest corner of Bush and Mason streets, and will cover a considerable ground area. There will be a large number of two and three room suites, all with private bath room and wall beds. Interior will be finished in pine with some hardwood panels and veneer. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and a general contract will be let shortly. Arthur Arlett has secured the contract at \$7,350 for plain and reinforced concrete foundation work.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced brick, \$68,000. Architect, G. Albert Langburgh, 709 Mission street, S. F. Owners, Gaffney Estate. The building will be erected on the north side of Sutter street between Taylor and Jones streets, having a frontage of 60 feet and a depth of 137 1/2 feet. Apartments will be arranged in suites of two and three rooms with wall beds and private bath rooms. Interior finish will be of pine and elm panels with some oak floors. There will be steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base frame. Cost not stated. Architect, M. L. Newsom, 1852 5th avenue, Oakland. Owner J. Asaveida. The building will be erected on 4th avenue near East 18th street, and will contain a number of two and

three room suites. Interior finish will be of pine with some elm panels and oak floors. All apartments will have private bath rooms and wall beds. Bath rooms will be finished in tile and will have composition floors. Plans provide for a hot water system. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and figures are now being taken on the work.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$50,000. Architect, Edward F. Helms, 35th avenue and California street, S. F. Owner's name withheld. The building will be erected on Pine street near Taylor, and has been designed to contain 40 suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat, elevator service, a hot water system and portable vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$26,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, J. E. Reite. The building will be erected at the northwest corner of Franklin and Filson streets, covering an area of 40 1/2 by 82 feet. The building has been designed to contain sixteen suites of two and three rooms, all of which will have private baths and wall beds. Interior finish will be of pine with some elm panels. Bath rooms will have tile wainscot and composition floors. Plans provide for steam heat and a hot water system. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are being taken.

BANKS.

SUNSHINE SOLANO CO., CAL.—Bank, 1 story and base. Class C construction, \$15,000. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owners, First National Bank of Sunshine. The building will cover an area of 24 by 74 feet, and has been designed with foundations and exterior walls of sufficient strength to carry an additional story. Interior will be arranged for a large public space, banking work space, president's office and directors' rooms. Interior finish will be of pine, oak and mahogany. Marble and tile with ornamental plaster and ornamental iron and bronze will be used extensively. Plans provide for coin and safe deposit vaults. Exterior of the building will be faced with red pressed brick. Large granite columns and pilasters will be used. Plans are complete and work has been started by Day Labor. Some subcontracts will be let through the owners.

BRIDGES AND DAMS.

SAN JOSE, SAN JUAN CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor J. G. McMillan, San Jose. Owners, Santa Clara County. The bridge will be erected over Penetenoia Creek near Alum Rock avenue. Plans have been completed and figures are now being taken. Bids will be opened by the Board of Supervisors on June 1st. Plans and specifications can be secured from the County Clerk.

MADERA, MADERA CO., CAL.—Bridges, reinforced concrete and wood. Cost not stated. Engineers, Federal Engineering Co., Central Building, L. A., associated with County Surveyor T. E. Smith, Madera. Owners, Madera County. Bids will be received by the Board of Supervisors of Madera County up to 11 a. m. of June 2nd, 1914, for the erection of seven reinforced concrete bridges in accordance with plans and specifications prepared by the Federal Engineering Co., Central Bldg., L. A. Plans may be obtained at the office of the engineers or from the County Surveyor T. E. Smith of Madera. The structures include two 3-hinge arch bridges—one 145 feet long consisting of two spans over Walker Creek; one 133 feet long of two spans over Gold Creek; and the following concrete girder type bridges: One 600-foot structure over Ash Slough, one 200-foot structure over Cottonwood Creek, one 140-foot structure over Cottonwood Creek, and 50 and 70-foot structures over creeks south of Berendo. R. W. Curtin is County Clerk. Bids will also be received by the Board of Supervisors up to 11 a. m. of Monday, June 2nd, 1914, for constructing a wood and steel bridge 180 feet long over Chowchilla Creek, and also a wood trestle bridge in accordance with plans and specifications on file in the office of County Surveyor T. E. Smith.

STOCKTON, SAN JOAQUIN CO., CAL.—Bridge, reinforced concrete and steel. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Engineer has been instructed to prepare plans for a reinforced concrete bridge to be erected over the Mormon Channel at Sutter street. Working drawings will be completed at rapidly as possible and figures will be taken. Further mention will be made of the work.

DAVENPORT, SANTA CRUZ CO., CAL.—Wharf, timber construction. Cost not stated. Engineer's name not given. Owners, Santa Cruz Portland Cement Co. Representatives of the Thomson Bridge Co. of San Francisco were in Davenport recently taking soundings for a large timber pile wharf which will be erected by the Santa Cruz Portland Cement Co. The structure will be in the neighborhood of 1500 feet long.

Contracts Awarded.

HENDERSON, SHASTA CO., CAL.—Bridge, steel and concrete, \$7,000. Engineer, County Surveyor, Redding. Owners, Shasta County. Contractor, M. B. White, Stockton. Contract price, \$6,425.

REDDING, SHASTA CO., CAL.—Bridge, steel and concrete, \$19,650. Engineer, City Engineer, Redding. Owners, City of Redding. Contractors, Chico Construction Co., Chico. Contract price, \$19,650. Other bids submitted were as follows: Ross Con-

struction Co., Sacramento, \$57,777; F. Rolandi, San Francisco, \$53,450; W. N. Concannon, San Francisco, \$52,785.

CHURCHES.

FRESNO, PRESNO CO., CAL.—Church, 1 story and base, brick, \$36,000. Architect, H. F. Starbuck. Fresno Owners, German Free Lutheran Church of Fresno. The building will be erected at the corner of P and San Diego streets and will cover a considerable ground area. There will be a large main auditorium and Sunday school rooms, pastor's study and social rooms. Interior will be finished in pine with some ornamental plaster. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans also include art glass windows. Plans are now being prepared and figures will be called for shortly.

COURT HOUSES.

PORT ANGELES, CLALLAM CO., WASH.—Court House, 2 story and base, reinforced concrete, \$50,000. Architect's name not given. Owners, Clallam County. The building will be of fireproof construction with reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. Besides the offices for the various county officers the building will contain a large meeting room for the supervisors, two court rooms and the county jail. Interior finish will be of pine and hardwood. Fireproof vaults will be installed. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

ALTURAS, MODOC CO., CAL.—Court house, 2 story and base, reinforced concrete, \$90,000. Architect, F. J. De Longchamps, Reno, Nev. Owners, Modoc County. Contractors, W. N. Concannon Co., Monadnock Bldg., S. F., general construction only. Contract price, \$11,444. Plumbing and heating awarded to Jacob Meyer, Reno, Nev. Contract price, \$7,596.

FACTORIES & WAREHOUSES.

OAKLAND, CAL.—Warehouse, tanks, etc., frame construction. Cost not stated. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, Pinalone Refining Co., Livingston street, Oakland. Included in this work will be a large warehouse, steel and concrete tanks, reservoir, office building, loading shed and a garage. Except for the tanks and reservoir all construction will be of frame and corrugated iron. Plans are being prepared and when complete the work will be done by Day Labor.

PORTLAND, ORE.—Factory, 4 story and base, brick, \$90,000. Architects, McNaughton & Raymond, Title and Trust Bldg., Portland. Owner, Oscar Heintz. The building will be erected on the East Side, overing an area of 100 by 200 feet. Interior finish will be of pine. Plans provide for two large freight elevators, automatic sprinklers, metal window sash and frames and fireproof doors. Exterior will be faced with stock brick. Plans are

complete and figures will be called for shortly.

Contracts Awarded.
SEATTLE, WASH.—Warehouses, 2 1 story, frame and concrete, \$105,147. Architect, Port of Seattle Commission. Seattle. Owners, City of Seattle. Contractors, Dow & Ryden, Melhorn Bldg., Seattle. Contract price, \$105,147.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$8,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Shibeley. The building will be erected on Rich street near Fourth and has been designed to contain three modern flats of five and six rooms. Interiors will be finished in pine and redwood. There will be open fire places in the living rooms with tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are now complete and figures are being taken. A general contract will be awarded.

SAN FRANCISCO—Flats and store, 2 story and base, frame, \$7,000. Architect, William Mooser, Nevada Bank Bldg., S. F. Owner, T. H. Frederickson. The building will be erected on the west side of Fillmore street north of Union, and will have one store on the ground floor and a seven-room flat above. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile mantels. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 3 story and base, frame, \$9,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected on Union near Taylor, and has been designed to contain three modern flats with a private garage. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Entrances will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. De Martini. The building will be erected at the southwest corner of Auburn and Pacific streets, and has been designed to contain three small flats. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Each living room will have an open fire place with tile mantel. Bath rooms will be finished in tile wainscot and will have composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not

stated. Architects, Walker & Sawyer, Milburn Bldg., L. A. Owner, D. F. Hill. The building will be erected at the northwest corner of Sixth and Wall streets, covering an area of 79 by 120 feet. Plans show four stores on the first floor. Besides the hotel entrance and lobby. Upper three floors will contain a total of 110 rooms and 40 baths. Interior will be finished in pine throughout. There will be steam heat, a hot water system and elevator service. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and a contract will be awarded on the percentage basis.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, A. Petri, 335 Pierce street, S. F. The building will be erected on the west side of 11th avenue south of Cabrillo, having a frontage of 25 feet and a depth of 61½ feet. There will be two modern flats of six rooms each. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

SUTHERLIN, ORE.—Hotel, 2 story and base, brick and concrete, \$25,000. Architect, Earl A. Roberts, Selling Bldg., Portland. Owner, F. E. Waite. Contractor, A. E. Shiria, Sutherlin. Contract price, \$25,000.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete. Cost not stated. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Bannan Bros., 6th and Folsom streets, S. F. The building will cover an area of 85 by 127½ feet, and will be of fireproof construction. There will be the usual storage space, machine shop and office. Interior finish will be of pine. A cement floor and steel roof trusses are specified. Metal window sash and frames will be used. There will be a gasoline storage tank of 300 gallons capacity. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who are now taking figures on the work.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, Ross Forsythe. The building will be erected in the 300 block on Presidio avenue, and has been designed to contain seven private garages, each 9 by 24 feet, and arranged around a court which will contain the wash room, machine shop and storage tanks. Interior finish will be of pine. There will be metal window sash and frames. A cement floor will be used. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Brigham City, Utah, Construction.

June 1.

J. H. Wiese, City National Bank Building, Omaha, Neb.
The Morris Co., Evans Building, Washington, D. C.

Parrott Bros. Co., 815 Newhouse Building, Salt Lake City, Utah.

Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.

Casper, Wyo., Construction, May 29.

J. P. Jenkins & Co., Ocala, Fla.

Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.

E. D. Sharp, Chico, Cal.

F. P. Amweg, Marston Building, San Francisco, Cal.

Frank Gallagher, 180 Jessie street, San Francisco, Cal.

J. B. Reite, 110 Jessie street, San Francisco, Cal.

Hiram-Lloyd Building and Construction Co., Odd Fellows Building, St. Louis, Mo.

Liebel-Binney Construction Co., Erie, Pa.

Barnes Bros., Logansport, Ind.

J. P. Unterkfer & Co., Minerva, O.

King Lumber Co., Charlottesville, Va.

George Hinchliff Co., 1408 Security Building, Chicago, Ill.

Kress General Construction Co., Livingston, Mont.

J. H. Wiese, City National Bank Building, Omaha, Neb.

Amelia, Ore., Changes, Freight Lift, Etc., June 15.

Otis Elevator Co., Metropolitan Bank Building, Washington, D. C.

Robert Wetherill & Co., Chester, Pa.

Faunt Le Roy Elevator Co., Baltimore, Md.

Harry A. Cotton, Port Angeles, Wash., item 1, \$2,880; 2, \$550; 3, \$65.

Contracts Awarded.

SAN FRANCISCO—Stables, 5, 1 story, reinforced concrete, \$73,673. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Contractor, Frank M. Garden Co., S. F., general construction, using slate roof, \$73,673. Electric work, Frank M. Garden Co., \$875. Plumbing, W. A. Newsom, \$3,000.

-HALLS & SOCIETY BLDGS-

SAN PEDRO, LOS ANGELES CO., CAL.—Club house, 1 and 2 story, reinforced concrete, \$200,000. Architect, Howard Shaw, Chicago, associated with Myron Hill, Hiberman Bldg., L. A. Owners, Palos Verdes Syndicate. The building will be erected on Portunese Bend north of San Pedro, and has been designed in the Mission style. There will be a large lobby, living room, main and private dining rooms, card rooms, reading and lounging rooms and in the neighborhood of 150 guest rooms, all of which will have private baths. Interior finish will be of pine and hardwood. There will be steam heat and a hot water system. A large open air plunge 60 by 120 feet will also be installed. Exterior of the building will be faced with cement plaster with a red clay tile roof. Plans are now being prepared.

SACRAMENTO, CAL.—Lodge hall, 4 story and base, brick and steel, \$70,000. Architect, Washington J. Miller, 45 Kearny street, S. F. Owners, Sacramento Parlor Native Sons of the Golden West. The building will be erected at the corner of 11th and J streets, covering a large ground area. There will be stores on the first floor and the lodge rooms, ball room and of-

fices on the upper three floors. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for shortly.

OAKLAND, CAL.—City Hall lighting. Cost not stated. Architects, Palmer, Hornbostel & Jones, City Hall, Oakland. Owners, City of Oakland. Plans have been completed for furnishing and installing lighting fixtures in the new Oakland City Hall. Bids will be opened by the City Council on June 4th. Plans and specifications can be secured from the office of the architects.

HOSPITALS

SAN FRANCISCO—Hospital, 2 story and base, reinforced concrete, \$55,000. Architect, John Baur, Sharon Bldg., S. F. Owners, Infirmary for Incurables Association. The building will be erected at the corner of Wood and Geary streets and will contain twelve private rooms and two small wards. Construction will be fireproof with exterior walls, floors and roof of concrete. Interior partitions will be of metal lath and plaster. Plans provide for steam heat, elevator service and a hot water supply. Modern hospital plumbing will be installed. Considerable tile will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO — Hospital furniture, etc. Cost not stated. Architects, City Department of Architecture Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being taken for furnishing and installing furniture, white enamel furniture, china, glass ware, enamelware, cutlery, kitchen utensils, bedding, linen, clothing, X-ray apparatus and surgical instruments for the new City and County Hospital. Bids will be opened on June 29th by the Board of Supervisors.

Contracts Awarded.

MARTINEZ, CONTRA COSTA CO., CAL.—Hospital addition, 2 story and base, brick. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Contra Costa County. Contractors, Boyd, Kerr & McLean, S. F. General construction. Contract price, \$28,752. Plumbing and heating to Timothy Collins, S. F. Contract price, \$2,185. A complete list of these figures appears under the heading of Marin, Contra Costa and Sonoma Counties.

HOTELS.

SAN FRANCISCO—Hotel, 14 story and base, Class A construction, \$450,000. Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Cliff Estate. The building will be erected at the southeast corner of Geary and Taylor streets, and when complete will be one of the largest hotels on the Pacific Coast. Structural steel work has been completed and figures are now being taken for the balance of the work. The structure will be fireproof throughout, and will cover an area of 137½ feet square. Interior will be handsomely finished in pine, hardwoods and metal trim. All guest rooms will

have private baths. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Lobby, office and lounging rooms will have tile floors and ornamental plaster. Exterior of the building will be faced with pressed brick. Segregated figures are being taken for all parts of the work except the structural steel.

CHICO, BUTTE CO., CAL.—Hotel, 7 story and base, brick and steel. Cost not stated. Architect's name not given. Owners, Wendell Miller and F. J. Nottelmann, Chico. The building will be erected at the corner of Main and Third streets and will be arranged for a number of stores on the first floor besides the hotel office and lobby. Upper floors will contain in the neighborhood of 130 guest rooms, a large percentage of which will have private baths. Interior will be finished in pine throughout. There will be steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile and will have composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans will shortly go out for figures.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architects, Western Building Co., Lankershim Bldg., L. A. Owner, G. A. Thiele. The building will be erected on Wall street, having a frontage of 50 feet and a depth of 113 feet. There will be several stores and 76 rooms. Nearly all rooms will have private baths. Plans provide for steam heat and elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken on subcontracts and materials.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Attention of Exposition bidders. Official notice. Your attention is invited to the fact that on various items of work in connection with the construction of the Exposition, which are not of sufficient importance to advertise separately, a bulletin board has been established in the Service Building on the Exposition Grounds on which will be posted from time to time the work on which bids are desired, and this bulletin board will also state the time and place where such bids will be opened.

WILLIAM H. CROCKER.

Chairman of the Buildings and Grounds Committee.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: Henry Rodding, 1 story frame, \$1,200; Liner Silber, 1 story frame, \$2,000; Jo-

seph Reine, 1422 North Van Buren, 1 story frame, \$2,000; Mr. and Mrs. Gus Viola, 738 Oak, repairs and addition, \$3,000; W. A. Fann, 2 story frame, \$8,500; C. C. Henderson, 705 East Anderson, 1 story frame, \$2,000; D. S. Matthews, 1113 East Oak, 1 story frame, \$2,000, and A. T. Peterson, 1010 North Ophir, 1 story frame, \$2,000. Materials are now being purchased.

SACRAMENTO, CAL.—Residence, 2 story and base, hollow tile, \$20,000. Architect, E. C. Hemmings, Sacramento. Owner, Dr. W. A. Briggs. The dwelling has been designed for a twelve-room house and will be erected on 21st street between T and U streets. There will be three baths and sleeping porches. Interior finish will be of pine and hardwood with hardwood and inlaid floors. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the dwelling will be faced with cement plaster. Plans are complete and figures are being taken.

SEATTLE, WASH.—Residence, 2 story and base, brick and terra cotta, \$15,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, Albert J. Rhodes. The dwelling will be erected on 10th avenue near Howe, and has been designed to contain ten rooms and three baths. Interior finish will be of pine and hardwood. Plans provide for a hot water heating system, open fire places and the mantels. Bath rooms will be finished in tile and equipped with showers. There will be a vacuum heating system. Exterior of the house will be faced with pressed brick. Plans are nearly complete and bids will be called for about June 15th.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These two houses will be erected on the east side of Arguello Boulevard near California street, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,500. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, E. Donovan. The dwelling has been designed for a seven-room house with bath and will be erected on 28th avenue between California and Clement streets. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, reinforced concrete. Cost not stated. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday afternoon session of the Board of Public Works for the construction of the Cooper School. C. L. Wold was low on the general construction at \$78,880. The Central Electric Co. were low on the electric wiring, Herman Lawson on the plumbing and J. E. O'Mara on the heating and ventilating. A complete list of these bids will be found under the heading of San Francisco in this issue.

CHICO, BUTTE CO., CAL.—School, 2 story and base, brick, \$20,000. Architect, Chester Cole, Chico, Owners, Oakdale School District. Revised plans for this building are now complete and figures are being taken. Bids will be opened on June 3rd. Plans and specifications can be secured from the architect.

LOS ANGELES, CAL.—Medical college, 2 story and base, brick and frame, \$25,000. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, Dr. Carl Schultz. The building will be erected on 17th street near Magnolia avenue, covering an area of 50 by 150 feet, and will be used temporarily while a larger institution is being constructed. The first floor will be arranged for class rooms and clinic. Upper floors will contain treatment rooms equipped with all modern appliances. Interior finish will be of pine and tile. There will be steam heat and a hot water system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

TUSTIN ORANGE CO., CAL.—School, 1 story and base, brick, \$40,000. Architects, Elwing & Tedford, Trust and Savings Bldg., L. A. Owners, Tustin School District. The building will cover a ground area of 198 by 136 feet, and will contain ten class rooms, manual training and domestic science departments, library and principal's office. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system and modern ventilation. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for about June 1st.

LEMOORE, KINGS CO., CAL.—School, 1 story and base, frame. Cost not stated. Architect, none. Owner, San Jose School District. Plans have been completed for a small frame building of four class rooms. Bids are now being taken and will be opened on May 30th. Plans can be secured from the Clerk of the San Jose School District, Lemoore.

ESCALON, SAN JOAQUIN CO., CAL. School, 1 story and base, brick, \$15,000. Architects, Young & Jeffery, Wolf Bldg., Stockton. Owners, Escalon School District. The building will contain four class rooms and teachers' rooms. Interior finish will be of pine throughout. A central heating system, probably warm air, will be installed. Modern school plumbing will be specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

MANTECA, SAN JOAQUIN CO., CAL.—School, 1 story and base, brick or reinforced concrete, \$20,000. Architects, Young & Jeffery, Wolf Bldg., Stockton. Owners, Manteca School District. Bids opened for this work show W. Bay-singer of Manteca low on all three propositions. No action has been taken by the Board of School Trustees. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California in this issue.

Contracts Awarded.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete. Cost not stated. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Contractor, H. S. Williams, Hearst Bldg., S. F. Contract price not stated.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Playground work concrete swimming pool. Cost not stated. Architect, none. Owners, City and County of San Francisco. The Playground Commission, Temporary City Hall, will open bids on May 28th for construction of a concrete swimming pool in the playgrounds at 19th avenue and Angelica street. Plans and specifications together with full particulars can be secured from the Secretary of the Playground Commission, Temporary City Hall.

SAN FRANCISCO—Water supply system. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans have been completed and figures will be opened on June 11th for constructing an additional water supply system at Fort Winfield Scott. An official proposal for the work appears in another column of this issue.

SAN FRANCISCO—Garbage incinerator plant. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. The Connelly Incinerator Co. were the lowest bidders for furnishing an incinerator plant at the Presidio. Their bid for the work on the owners plans was \$3,750 and they will probably be awarded the contract.

EXETER, TULARE CO., CAL.—Sewer system, vitrified clay pipe, \$15,000. Engineer, City Engineer, Exeter. Owners, City of Exeter. Bonds have been voted for the construction of a new sewer system in Exeter. Construction will be undertaken within a few weeks. Plans and complete particulars can be secured from the City Clerk. Further mention will be made of the work.

KEENE, KERN CO., CAL.—Rock crusher. Cost not stated. Engineer, County Engineer, Bakersfield. Owners, Kern County. The following bids were received by the Kern County Board of Supervisors for the construction of a rock crushing plant to be installed at Keene. The plant will be used in connection with the construction of the State Highways in Kern and adjoining counties. San Francisco Bridge Co., S. F., \$47,863; John R. Cahill Co., S. F., \$47,000; Langford, Felts & Mayers, \$41,777.77; American Machine Works, \$22,000. All bids were referred to the State Highway Commission and no action will be taken

until the June meeting of the Commission. Each contractor furnished plans and specifications.

RECLAMATION DISTRICT NO. 1001, YUBA CO., CAL.—Mechanical equipment. Cost not stated. Engineer, Emory Oliver, Forum Bldg., Sacramento. Owners, Reclamation District No. 1001. Plans have been completed and figures will be opened on May 28th for furnishing mechanical equipment for the new pumping plant in District No. 1001. The work will include pumps, motors, switch boards, auxiliary pumps, gates, valves, etc. Complete information will be furnished by the engineer in charge.

Contracts Awarded.

ORLAND, GLENN CO., CAL.—Division dam, etc. Cost not stated. Engineer, United States Reclamation Service, Orland. Owners, United States Government. Contractor, M. Fisher, S. F. Contract price, \$16,388.30.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores, 1 story and base, brick and frame, \$6,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected in what is known as Car Villa and will contain three small stores. Interiors will be finished in pine throughout. Patent store fronts and plate glass windows will be used. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Stores and offices, 5 story and base, brick and steel. Cost not stated. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Charles Belding Co. The building will be erected at the corner of Weber and San Joaquin streets and will cover a considerable ground area. There will be a number of stores on the first floor and modern offices on the upper floors. Construction will be semi-fireproof. Interior partitions will be of metal lath and plaster. There will be steam heat, elevator service and a hot water supply. Patent store fronts and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Stores and offices, 4 story and base, brick and steel. Cost not stated. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Mr. Cory. The building will be erected at the corner of Fresno and J streets, and will have a frontage of 50 feet on J street and 150 feet on Fresno. There will be a number of stores on the first floor and upper floors will be arranged for offices. Interior finish will be of pine and redwood. There will be elevator service, steam heat, oil burning plant and vacuum cleaning. Patent store fronts and metal window sash and frames will be specified. Interior partitions will be of metal lath and plaster. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and lofts, 6 story and base. Class A construction. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Shirley

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

A deposit of Five (\$5.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

nia, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposal for New Conservatory, State Capitol Park, Sacramento, California."

(Signed) W. F. McCLURE,
State Engineer.

NOTICE TO CONTRACTORS.

PURSUANT to an order of the Board of Supervisors of Fresno County, California, July made and entered in its minutes of the 13th day of May, 1914, notice is hereby given that the said Board will receive up to 2 o'clock p. m. of the 3rd day of June, 1914, sealed proposals for the construction of a sun room and bath room, together with necessary remodeling and other work necessary thereto, at the County Ordinance of said county, all according to plans and specifications on file in the office of the Clerk of the Board of Supervisors in the Court House.

Bids must be addressed to the Clerk of the Board of Supervisors and must be accompanied by a certified check in the sum of ten (10) per cent of the amount of the bid, made payable to the Chairman of the Board, as a guarantee that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract with the County of Fresno, and must be accompanied by plans and specifications, and give sufficient bonds as required by law and orders of the Board of Supervisors, and be conditioned upon the faithful performance of the terms of said contract. The Board reserves the right to reject any or all bids.

Dated this 13th day of May, 1914.
(Seal) D. M. BARNWELL, Clerk

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., May 4, 1914.—SEALED PROPOSALS will be received at this office until 2 o'clock p. m., June 10, 1914, and then opened, for furnishing and installing lighting fixtures in the United States sub-treasury at San Francisco, California, and drawings enumerated and in copies of which may be obtained at this office at the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect.

STATE OF CALIFORNIA.

DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 315 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, which special reference is made, portions of State Highway 11:

From 11 o'clock A. M. June 8th, 1914, to 2 o'clock P. M. at Moine to Hazel Creek P. O. (H-Sba-3-D), about 9.9 miles in length, to be graded.
To Tehama County from the southerly boundary to Corning (H-Gle-7-A), about 8.8 miles in length, to be built of Portland cement concrete.
To Butte County from Lindo Channel to the northerly boundary (H-But-1-A), about 11.2 miles in length, to be built of Portland cement concrete.

To Glenn County from Grant to the northerly boundary (H-Gle-7-A), about 7 miles in length, to be built of Portland cement concrete.
Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineer, at the divisions in which the work is situated. The Division Engineers' offices are at: Fresno, San Joaquin, Stanislaus, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HAROLD B. ELLIS,
NEWELL D. DARTINGTON,
CHARLES F. STERN,
California Highway Commissioner.
AUSTIN B. FLETCHER,
Highway Engineer.
WILSON R. ELLIS,
Secretary.

Dated: May 5, 1914.

NOTICE TO BIDDERS.

NOTICE is hereby given that the Clerk of the Board of Supervisors will receive at his office at Ukiah, California up to 2:30 p. m. of Tuesday, June 2nd, 1914, sealed bids for the construction of Section 1 of the proposed Navarro Grade, as surveyed by R. E. Donohoe.

Plans, plans and specifications for this work are on file in the office of the above named clerk, to which all bidders are hereby referred.

Bids must be sealed and accompanied by a certified check or deposit in cash for 10 per cent of the amount of the bid.

The work is to be completed on or before September 1st, 1914. The successful bidder will be required to give a bond in half the total of the work, and another bond in the same amount for the completion of material men and workmen employed in the contract. The Board reserves the right to reject any and all bids.

J. FAIRBANKS,
Chairman of Board of Supervisors.

NOTICE TO CONTRACTORS.

Bids opened in Milwaukee for this work show Pringle-Dunn & Co. low at \$19,700. A representative of Wisconsin will arrive in this city shortly to consult with the three lowest bidders. Slight changes may be made in the plans and figures taken from the three lowest bidders. An announcement of the award of contract will be made in these columns.

STATE EXHIBIT BUILDING — 2 story, frame and plaster, \$80,000. San Francisco. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Plans and specifications have been completed for the construction of the Washington State Building at the 1915 Exposition. Bids are now being taken and figures will be opened on June 10th. Plans and specifications can be secured from the architect. An official proposal appears under another heading in this issue.

APARTMENT HOUSE—6 story and base. Class C construction, \$65,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg. S. F. Owners, Rousseau Realty Co. The building will be erected on the north side of Bush street west of Stockton, having a frontage of 40 feet and a depth of 76½ feet. There will be a total of 36 apartments of two and three rooms. Interior finish will be of pine with elm panels, hardwood floors and beam ceilings. Plans provide for steam heat, elevator service and a vacuum cleaning system. All suites will have wall beds and private bath rooms. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and excavating has been started. Carpentry work will be done by Day Labor. All other parts of the work will be let by contract. Bids will be taken at once.

APARTMENT HOUSE—7 story and base, brick and steel. Cost not stated. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg. S. F. Owners, Henry A. Voorman, as guardian. The building will be erected at the northwest corner of Bush and Mason streets and will cover a considerable ground area. There will be a large

number of two and three room suites all with private bath room and wall beds. Interior will be finished in pine with some hardwood panels and veneer. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and a general contract will be let shortly. Arthur Arlett has secured the contract at \$7,350 for plain and reinforced concrete foundation work.

APARTMENT HOUSE—6 story and base, reinforced brick, \$68,000. San Francisco. Architect, G. Albert Lahs-burg, 709 Mission street, S. F. Owners, Gaffney Estate. The building will be erected on the north side of Sutter street between Taylor and Jones streets, having a frontage of 60 feet and a depth of 137½ feet. Apartments will be arranged in suites of two and three rooms with wall beds and private bath rooms. Interior finish will be of pine and elm panels with some oak floors. There will be steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, T. M. Herrington, 149 Bellevue avenue, S. F. The dwelling has been designed for a six-room house and will be erected on Rolph street near Munich. Interior finish will be of pine throughout with some hardwood floors. A large open fire place with tile mantel is specified for the living room. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Bath room will have composition floor. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, H. Stern. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on property in Ingleside Terrace. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. A composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with lap siding and shingles. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Joseph Leonard, 55 Cerritos avenue, S. F. Owners, Urban Realty Co. This dwelling will be erected on the company's property in Urbano Boulevard east of Victoria avenue, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the

living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased through the architect.

RESIDENCES—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, J. C. Kirby, 2153-A Market street, S. F. These two houses have each been designed to contain seven rooms and will be erected on 20th avenue near Geary street. Interiors will be finished with pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE ALTERATIONS—2 story and attic, frame, \$7,500. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mr. Schwarzenbek. The dwelling, located on the west side of 7th avenue near Balboa street, will undergo extensive repairs. New interior finish of pine and hardwood will be installed. Other branches included in the work will be plumbing, painting, electric work, plastering and hardwood floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Furnace heat will be installed. Plans are complete and figures will be taken shortly.

FLATS—3 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Shibley. The building will be erected on Rich street near Fourth, and has been designed to contain three modern flats of five and six rooms. Interiors will be finished in pine and redwood. There will be open fire places in the living rooms with tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are now complete and figures are being taken. A general contract will be awarded.

FLATS AND STORE—2 story and base, frame, \$7,000. San Francisco. Architect, William Mosser, Nevada Bank Bldg., S. F. Owner, T. H. Fredrickson. The building will be erected on the west side of Fillmore street north of Union, and will have one store on the ground floor and a seven-room flat above. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile mantels. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not

stated. Architect represented by Guy Cramer, 302 Lachman Bldg., S. F. Owners, State of Illinois. The following firms have applied to Guy Cramer for plans and specifications for the State of Illinois Building: Lange & Bergstrom, Strehlow-Freeze & Peterson, Murphy-Brooks Co., Neil A. McLean, Commary-Peterson, Charles Wright, Grant Fee, Pringle-Dunn & Co., Van Sant-Houghton Co., Pope & Talbot Co.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$60,000. San Francisco. Architect, Edward P. Helms, 5th avenue and California street, S. F. Owner's name withheld. The building will be erected on Pine street near Taylor, and has been designed to contain 40 suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat, elevator service, a hot water system and portable vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

FLATS—3 story and base, frame, \$9,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected on Union near Taylor, and has been designed to contain three modern flats with a private garage. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Entrances will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—3 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. De Martini. The building will be erected at the southeast corner of Auburn and Pacific streets, and has been designed to contain three small flats. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Each living room will have an open fire place with tile mantel. Bath rooms will be finished in tile wainscot and will have composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

GARAGE—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Bannan Bros., 6th and Polson streets, S. F. The building will cover an area of 85 by 167½ feet and will be of fireproof construction. There will be the usual storage space, machine shop and office. Interior finish will be of pine. A cement floor will be used. There will be a gasoline storage tank of 300 gallons capacity. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who are now taking figures on the work.

GARAGE—1 story and base, reinforced concrete. Cost not stated. San

Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, Ross Forsythe. The building will be erected in the 300 block on Presidio avenue, and has been designed to contain seven private garages, each 9 by 24 feet and arranged around a court which will contain the wash room, machine shop and gasoline storage tanks. Interior finish will be of pine. There will be metal window sash and frames. A cement floor will be used. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOSPITAL, 2 story and base, reinforced concrete, \$55,000. San Francisco. Architect, John Baur, Sharon Bldg., S. O. Owners, Infirmary for Incurables Association. The building will be erected at the corner of Wood and Geary streets and will contain twelve private rooms and two small wards. Construction will be fireproof with exterior walls, floors and roof of concrete. Interior partitions will be of metal lath and plaster. Plans provide for steam heat, elevator service and a hot water supply. Modern hospital plumbing will be installed. Considerable tile will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOSPITAL FURNITURE, ETC.—Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being called for furnishing and installing furniture, white enamel furniture, china, glassware, enamelware, cutlery, kitchen utensils, bedding, linen, clothing, X-ray apparatus and surgical instruments for the new City and County Hospital. Bids will be opened on June 29th by the Board of Supervisors.

HOTEL—14 story and base, Class A construction, \$150,000. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Cliff Estate. The building will be erected at the southeast corner of Geary and Taylor streets, and when complete will be one of the largest hotels on the Pacific Coast. Structural steel work has been completed and figures are now being taken for the balance of the work. The structure will be fireproof throughout and will cover an area of 127½ feet square. Interior will be handsomely finished in pine, hardwoods and metal trim. All guest rooms will have private baths. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Lobby, office and lounging rooms will have tile floors and ornamental plaster. Exterior of the building will be faced with pressed brick. Segregated figures are being taken for all parts of the work except structural steel.

MUNICIPAL RAILROAD CONSTRUCTION—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the Stockton street, Columbus avenue and Fort Mason Municipal line have been completed and figures are now being called. Bids will be opened by the Board of Public Works on June 3rd. Plans and speci-

fications together with full particulars of the work can be secured from the City Engineer's office. An official proposal appears in another column of this issue.

RAILROAD CONSTRUCTION — Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans have been completed for a railroad connecting the Fort Mason Tunnel with the Transport Docks. Bids are now being called for and will be opened on June 6th. Rails will be 114 pounds with 127 pound guard rails, redwood ties and rock ballast. Plans can be secured from the office of the Constructing Quartermaster. An official proposal appears under another heading in this issue.

RESIDENCE — 2 story and base, Class A construction, \$150,000 or more. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, Mary L. Phelan. The dwelling, which will be one of the handsomest homes in San Francisco, will be erected on the north side of Washington street west of Octavia. Construction will be of the Class A type throughout with a complete steel frame and brick and terra cotta exterior walls. Interior partitions will be of hollow tile. Hardwood finish and hardwood and inlaid floors will be used. There will be steam heat, oil burning system, a vacuum cleaning plant and all other modern conveniences. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Robert McGahie. The dwelling has been designed for a six-room house with private garage and will be erected on the east side of 16th avenue north of Lake street. Interior will be finished in pine and redwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday afternoon meeting of the Board of Public Works for the construction of the Cooper School. C. L. Wold was low on the general construction at \$78,980. The Central Electric Co. were low on the electric wiring. Herman Lawson on the plumbing and J. E. O'Mara on the heating and ventilating. A complete list of the bids will be found under the heading of San Francisco in this issue.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$26,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, J. E. Reite. The building will be erected at the northwest corner of Franklin and Fulton streets, covering an area of 40½ feet by 82 feet. The building has

been designed to contain sixteen suites of two and three rooms, all of which will have private baths and wall beds. Interior finish will be of pine with some elm panels. Bath rooms will have tile wainscot and composition floors. Plans provide for steam heat and a hot water system. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are being taken.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, A. Petry, 336 Pierce street, S. F. The building will be erected on the west side of 11th avenue south of Cabrillo, having a frontage of 25 feet and a depth of 61½ feet. There will be two modern flats of six rooms each. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These two houses will be erected on the east side of Arguello Boulevard near California street, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,500. San Francisco. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, E. Donovan. The dwelling has been designed for a seven-room house with bath, and will be erected on 28th avenue between California and Clement streets. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

PLAYGROUND WORK — Concrete swimming pool. Cost not stated. San Francisco. Architect, none. Owners, City and County of San Francisco. The Playground Commission, Temporary City Hall, will open bids on May 28th for construction of a concrete swimming pool in the playgrounds at 19th avenue and Angelica street. Plans and specifications together with full particulars can be secured from the Secretary of the Playground Commission, Temporary City Hall.

NEW HALL OF RECORDS FOR COLUSA COUNTY

Colusa, Calif.

Henry C. Smith, Architect
San Francisco

PROPOSED NEW GRAMMAR SCHOOL
Suisun, Calif.

Henry C. Smith, Architect
San Francisco

WATER SUPPLY SYSTEM—Cost not stated. San Francisco. Engineer, Constructing Quartermaster Office, Fort Mason, Owners, United States Government. Plans have been completed and figures will be opened on June 11th for constructing an additional water supply system at Fort Winfield Scott. An official proposal for the work appears in another column of this issue.

GARBAGE INCINERATOR PLANT—Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. The Connolly Incinerator Co. were the lowest bidders for furnishing an incinerator plant at the Presidio. Their bid for the work on the owner's plans was \$3,750, and they will probably be awarded the contract.

STORES—1 story and base, brick and frame, \$6,000. San Francisco. Architect, Paul F. de Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected in what is known as Car 'Ville and will contain three small stores. Interiors will be finished in pine throughout. Patent store fronts and plate glass windows will be used. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

STABLES—5, 1 story, reinforced concrete, \$73,673. San Francisco. Engineer, Constructing Quartermaster Office, Fort Mason, Owners, United

States Government, Contractor, Frank M. Garden Co., S. F., general construction using slate roof, \$73,673. Electric work, Frank M. Garden Co., \$875. Plumbing, W. A. Newsom, \$3,000.

Bids On Wisconsin State Building.

Pringle, Dunn & Co. Will Be Awarded The Contract With Some Slight Changes In Plans.

(By Special Wire).

MILWAUKEE, Wis., May 19th.—Bids were opened on Saturday last at Milwaukee, Wisconsin, for the construction of the Wisconsin State Building at the Panama-Pacific International Exposition. Pringle, Dunn & Co. presented the lowest figure at \$19,700 and have been notified that a representative of the State will arrive shortly to arrange the details of a contract. Some slight changes may be made in the present plans. Murphy-Brooks Co. were second low at \$20,779 and James McLaughlin third at \$21,512. Following is a complete list of all figures received:

Wisconsin State Building.

Northwestern Constr. Co., S. F., \$21,711
H. B. Ward Constr. Co., S. F., 21,635
Poster-Vogt Co., S. F., 23,300
Travers-Mortensen, S. F., 23,352
L. A. Williams Co., S. F., 22,486

Pringle, Dunn Co., S. F., 19,700
W. W. Hayes, S. F., 24,435
Connary-Petersen Co., S. F., 24,725
Van Franz, S. F., 21,822
Van Sant-Inghouten Co., S. F., 24,298
Jas. L. McLaughlin, S. F., 21,112
Murphy-Brooks Co., S. F., 20,779
McLaren & Petersen, S. F., 23,823
Lange & Bergstrom, S. F., 22,600
James L. Brown, Inc., S. F., 26,000
Moore & Burlingame, S. F., 21,688
Charles Wright, S. F., 25,286
W. D. Henderson, S. F., 22,325
Frederick Whitton, S. F., 21,823

BIDS FOR INCINERATOR.

Connolly Incinerator Company Will Probably Be Awarded Contract On Their Own Plans.

Three bids were opened in the office of the Constructing Quartermaster at Fort Mason for constructing an incinerator plant at the Presidio. Bidders furnished their own plans and specifications. The Connolly Incinerator Co. bid \$3,750; John A. Lea, \$4,000, and the Universal Engineering Co. \$13,505.

Building Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Oakland, Cal. Architect, M. L. Newsom, 1823 5th avenue, Oakland. Owner, J. Asanada. The building will be erected on 14th avenue near East 18th street and will contain a number of two and three room suites. Interior finish will

be of pine with some elm panels and oak floors. All apartments will have private bath room and wall beds. Bath rooms will be finished in tile and will have composition floors. Plans provide for a hot water system. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and figures are now being taken on the work.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Hutchinson Bros, 170 13th street, Oakland. Owner's name withheld. The dwelling will be erected in the Piedmont by the Lake Tract, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

RESIDENCE—2 story and base, frame, \$4,500. Oakland, Cal. Architect, none. Owner, P. A. Graham, 2226 Blake street, Berkeley. The dwelling will be erected on Keith avenue, and has been designed for a seven-room house with bath. Interior finish will be largely of pine with some redwood and oak veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, Roger Coit. The dwelling will be erected on Lennox avenue and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Mr. Coit is a well known builder and will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1841 5th avenue, Oakland. Owner, Mr. Jenks. The dwelling has been designed to contain seven rooms, bath and sleeping porch, and will be erected in the Royal Tract. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement

plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. T. Preble. The dwelling will be erected on the Kellogg Property and has been designed to contain seven rooms, bath and sleeping porch. Pine and redwood will be used in the interior finish. Hardwood floors are specified for the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BUNGALOWS—2, 1 story and base, frame, \$2,500 each. Alameda, Alameda Co., Cal. Architects, Elite Planners, 1841 5th avenue, Oakland. Owner, Mr. Seaman. These two houses will each contain five rooms and bath and will be erected in Waterside Terrace. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of tile. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be done by Day Labor. Owner will purchase all materials.

WAREHOUSE, TANKS, ETC.—Frame construction. Cost not stated. Oakland, Cal. Architects, Rignetti & Headman, Phelan Bldg., S. F. Owners, Plinal-Dome Refining Co., Livingston street, Oakland. Included in this work will be a large warehouse, steel and concrete tanks, reservoir, office building, loading shed and a garage. Except for the tanks and reservoir all construction will be of frame and corrugated iron. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$9,000. Piedmont, Alameda Co., Cal. Architect, James H. L. Hommedieu, Syndicate Bldg., Oakland. Owner, W. H. MacKinnon. The dwelling will be erected in Nova Piedmont, a new residence tract recently opened, and will contain eight rooms, two baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$1,500. Piedmont, Alameda Co., Cal. Architect, James H. L. Hommedieu, Syndicate Bldg., Oakland. Owner, J. C. Stevens. The dwelling will be erected in Piedmont Manor and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood

with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, J. A. Munro. The dwelling will be erected on Grand avenue near Rand, and has been designed for an eight-room house with two baths. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Bath room and kitchen will have tile wainscot. Plans are complete and figures are now being taken.

CITY HALL LIGHTING—Cost not stated. Oakland, Cal. Architects, Palmer, Hornbostel & Jones, City Hall, Oakland. Owners, City of Oakland. Plans have been completed for furnishing and installing lighting fixtures in the new Oakland City Hall. Bids will be opened by the City Council on June 4th. Plans and specifications can be secured from the office of the architects.

THEATRE—2 story and base. Class A construction, \$80,000. Oakland, Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, The Bishop Co. The building will be erected at the northwest corner of 14th and Harrison streets and will cover a considerable ground area. Construction will be fire-proof throughout with a complete steel frame, reinforced concrete walls and floors. Plans provide for steam heat and a modern system of ventilation. Interior will be finished in pine and hardwood with ornamental plaster. Exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

FRESNO, MODESTO, STANIS. LAUS AND CENTRAL CALIFORNIA.

STORES AND OFFICES—4 story and base, brick and steel. Cost not stated. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg. Fresno. Owner, Mr. Cory. The building will be erected at the corner of Fresno and J streets, and will have a frontage of 50 feet on J street and 150 feet on Fresno. There will be a number of stores on the first floor and upper floors will be arranged for offices. Interior finish will be of pine and redwood. There will be elevator service, steam heat, oil burning stove and vacuum cleaning. Patent store fronts and metal window sash and

frames will be specified. Interior partitions will be of metal lath and plaster. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

CHURCH—1 story and base, brick, \$20,000. Fresno, Fresno Co., Cal. Architect, H. F. Starbuck, Fresno. Owners, German Free Lutheran Church of Fresno. The building will be erected at the corner of F and San Diego streets and will cover a considerable ground area. There will be a large main auditorium and Sunday school rooms, pastor's study and social rooms. Interior will be finished in pine with some ornamental plaster. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans also include art glass windows. Plans are now being prepared and figures will be called for shortly.

RESIDENCE—2 story and base, frame, \$11,500. Hollister, San Benito Co., Cal. Architect, Edward F. Helms, 5th avenue and California, S. F. Owner, Dr. Curtis. The dwelling has been designed for a country home and will contain eleven rooms, three baths and sleeping porches. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster. A red clay tile roof will be used. Plans are complete and the work is now being done by Day Labor.

SCHOOL—1 story and base, frame. Cost not stated. Lemoore, Kings Co., Cal. Architect, none. Owner, San Jose School District. Plans have been completed for a small frame building of four class rooms. Bids are now being taken and will be opened on May 30th. Plans can be secured from the Clerk of the San Jose School District, Lemoore.

ROCK CRUSHER—Cost not stated. Keene, Kern Co., Cal. Engineer, County Engineer. Bakerfield. Owners, Kern County. The following bids were received by the Kern County Board of Supervisors for the construction of a rock crushing plant to be installed at Keene. The plant will be used in connection with the construction of the State Highway in Kern and adjoining counties: San Francisco Bridge Co., S. F., \$87,963; John R. Cahill Co., S. F., \$17,000; Langford, Felts & Mayers, \$81,777.77; American Machine Works, \$22,000. All bids were referred to the State Highway Commission, and no action will be taken until the June meeting of the Commission. Each contractor furnished plans and specifications.

RESIDENCE—2 story and base, frame. Cost not stated. Fresno, Fresno Co., Cal. Architect, W. T. Bowen, Fresno. Owner, W. W. Hanger. The dwelling will be erected on Wishon avenue and has been designed for a ten-room house with three baths and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have tile wainscot

and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bids For Rock Crushing Plant.

John R. Cahill Co. of San Francisco Low. Action Will Not Be Taken Until June Meeting.

The following bids were received by the Kern County Board of Supervisors for the construction of a rock crushing plant to be installed at Keene. The plant will be used in connection with the construction of the State Highways in Kern and adjoining counties.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BRIDGE—Reinforced concrete and steel. Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Engineer has been instructed to prepare plans for a reinforced concrete bridge to be erected over the Mormon Channel at Sutter street. Working drawings will be completed as rapidly as possible and figures will be taken. Further mention will be made of the work.

RESIDENCES—1 and 2 story, frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: Henry Boddling, 1 story frame, \$1,200; Liner Silber, 1 story frame, \$2,000; Joseph Reine, 1422 North Van Buren, 1 story frame, \$2,000; Mr. and Mrs. Gus Viola, 138 East Oak, repairs and addition, \$3,000; W. A. Fann, 2 story frame, \$8,-

500; C. C. Henderson, 765 East Anderson, 1 story frame, \$2,000; D. S. Matthews, 1143 East Oak, 1 story frame, \$2,000, and A. T. Peterson, 1610 North Ophir, 1 story frame, \$2,000. Materials are now being purchased.

LODGE HALL—1 story and base, brick and steel, \$70,000. Sacramento, Cal. Architect, Washington J. Miller, 15 Kearny street, S. F. Owners, Sacramento Parlor Native Sons of the Golden West. The building will be erected at the corner of 11th and J streets, covering a large ground area. There will be stores on the first floor and the lodge rooms, ball room and office on the upper three floors. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for shortly.

HOTEL—7 story and base, brick and steel. Cost not stated. Chico, Butte Co., Cal. Architect's name not given. Owners, Wendell Miller and F. J. Notelmann, Chico. The building will be erected at the corner of Main and Third streets and will be arranged for a number of stores on the first floor besides the hotel entrance and lobby. Upper floors will contain in the neighborhood of 120 rooms, a large percentage of which will have private baths. Interior will be finished in pine throughout. There will be steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile and will have composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans will shortly go out for figures.

RESIDENCE—2 story and base, hollow tile, \$20,000. Sacramento, Cal. Architect, E. C. Hemmings, Sacramento. Owner, Dr. W. A. Briggs. The dwelling has been designed for a 12 room house and will be erected on 21st street between T and U streets. There will be three baths and sleeping porches. Interior finish will be of pine and hardwood with hardwood and in-laid floors. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the dwelling will be faced with cement plaster. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick, \$30,000. Chico, Butte Co., Cal. Architect, Chester Cole, Chico. Owners, Oakdale School District. Revised plans for this building are now complete and figures are being taken. Bids will be opened on June 3rd. Plans and specifications can be secured from the architect.

SCHOOL—1 story and base, brick, \$15,000. Escalon, San Joaquin Co., Cal. Architects, Young & Jeffery, Wolf Bldg., Stockton. Owners, Escalon School District. The building will contain four class rooms and teachers' rooms. Interior finish will be of pine throughout. A central heating system, probably warm air, will be installed. Modern school plumbing will be specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SCHOOL—1 story and base; brick or reinforced concrete, \$20,000. Manteca, San Joaquin Co., Cal. Architects, Young & Jeffery, Wolf Bldg., Stockton. Owners, Manteca School District. Bids opened for this work show W. Baysinger of Manteca low on all three propositions. No action has been taken by the Board of School Trustees. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California in this issue.

SEWER SYSTEM—Vitrified clay pipe, \$45,000. Exeter, Tulare Co., Cal. Engineer, City Engineer, Exeter. Owners, City of Exeter. Bonds have been voted for the construction of a new sewer system in Exeter. Construction will be undertaken within a few weeks. Plans and complete particulars can be secured from the City Clerk. Further mention will be made of the work.

MECHANICAL EQUIPMENT—Cost not stated. Reclamation District No. 1001, Yuba Co., Cal. Engineer, Emory Oliver, Forum Bldg., Sacramento. Owners, Reclamation District No. 1001. Plans have been completed and figures will be opened on May 28th for furnishing mechanical equipment for the new pumping plant in District No. 1001. The work will include pumps, motors, switch boards, auxiliary pumps, gates, valves, etc. Complete information will be furnished by the engineer in charge.

STORES AND OFFICES—5 story and base, brick and steel. Cost not stated. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Charles Belding Co. The building will be erected at the corner of Weber and San Joaquin streets and will cover a considerable ground area. There will be a number of stores on the first floor and modern offices on the upper floors. Construction will be semi-fireproof. Interior partition will be of metal lath and plaster. There will be steam heat, elevator service and a hot water supply. Patent store fronts and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

Contracts awarded.

BRIDGE—Steel and concrete, \$7,000. Henderson, Shasta Co., Cal. Engineer, County Surveyor, Redding. Owners, Shasta County. Contractor, M. B. White, Stockton. Contract price, \$6,135.

LOS ANGELES AND SOUTHERN CALIFORNIA.

CLUB HOUSE—1 and 2 story, reinforced concrete, \$200,000. San Pedro, Los Angeles Co., Cal. Architect, Howard Shaw, Chicago, associated with Myron Hunt, Hibernian Bldg., L. A. Owners, Palos Verdes Syndicate. The building will be erected on Portuguese Bend north of San Pedro, and has been designed in the Mission style. There will be a large lobby, living room, main and private dining rooms, card rooms, reading and lounging rooms and in the neighborhood of 150 guest rooms, all of which will have private baths. Interior finish will be of pine and hardwood. There will be steam heat and a hot water system. A large open air plunge 60 by 120 feet will also be installed. Exterior of the building will be faced with cement plaster with a red clay tile roof. Plans are now being prepared.

HOTEL—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Western Building Co., Lankershim Bldg., L. A. Owner, G. A. Thiele. The building will be erected on Wall street, having a frontage of 50 feet and a depth of 113 feet. There will be several stores and 76 rooms. Nearly all rooms will have private baths. Plans provide for steam heat and elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken on subcontracts and materials.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles,

Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owner, D. F. Hill. The building will be erected at the northwest corner of Sixth and Wall streets, covering an area of 79 by 120 feet. Plans show four stores on the first floor besides the hotel entrance and lobby. Upper three floors will contain a total of 110 rooms and 40 baths. Interior will be finished in pine throughout. There will be steam heat, a hot water system and elevator service. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and a contract will be awarded on the percentage basis.

MEDICAL COLLEGE—2 story and base, brick and frame, \$25,000. Los Angeles, Cal. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, Dr. Carl Schultz. The building will be erected on 17th street near Magnolia avenue, covering an area of 50 by 150 feet, and will be used temporarily while a larger institution is being constructed. The first floor will be arranged for class rooms and clinic. Upper floors will contain treatment rooms, equipped with all modern appliances. Interior finish will be of pine and tile. There will be steam heat and a hot water system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOL—1 story and base, brick, \$10,000. Tustin, Orange Co., Cal. Architects, Elwing & Tedford, Trust and Savings Bldg., L. A. Owners, Tustin School District. The building will cover a ground area of 198 by 136 feet, and will contain ten class rooms, manual training and domestic science departments, library and principal's office. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system and modern ventilation. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for about June 1.

PORTLAND AND OREGON.

FACTORY—1 story and base, brick, \$90,000. Portland, Ore. Architects, McNaughton & Raymond. Title and Trust Bldg., Portland. Owner, Oscar Heintz. The building will be erected on the East Side, covering an area of 100 by 200 feet. Interior finish will be of pine. Plans provide for two large freight elevators, automatic sprinklers, metal window sash and frames and fireproof doors. Exterior will be faced with stock brick. Plans are complete and figures will be called for shortly.

Contracts Awarded.

Convenient for Builders and Contractors.

Boxes \$2 50 per year and upwards.

Junction Market, Mason and Turk Streets

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

Editorial Comment.

The aeroplane has been used in the last three wars that have occurred and so far it has not demonstrated any particular ability as a fighting machine. The Italians used it in their war with Tripoli and the Bulgarians and the Turks used it in the conflict in Southern Europe. It proved to be a valuable scout as it possesses all the qualities of such an accessory to an army. It has speed almost unlimited, it has the range of vision and can ascend to heights that make it almost invisible itself. But as a bomb-thrower its destructive force is very limited. In the first place its carrying power is very limited. And the vibration of the machine makes it almost impossible to drop a bomb or fire a gun with any degree of accuracy. So that while a bomb that is dropped may kill some of the enemy at the same time it is no more effective than a mortar shell that might be dropped from a battery a couple of miles away.

The dirigible balloon that the Germans have perfected seems to be more effective in this regard. While having less speed it has no vibration in its car and can be used effectively to prevent aeroplanes from coming into its territory. It is, after all, a strange thing to watch the progress of mankind and then to contemplate the perfection of modern engines of war devised for the destruction of other people who happen to inhabit a different political division of the country.

It appears that there are not sufficient names on the referendum petition to prevent the construction of the depot at Third and Townsend streets. As the time for filing the petition has expired there is every reason to hope that the structure will go on and that there will be some accommodation to the public who will visit us next year.

The State Railroad Commission is our great help in time of need. No longer can the Southern Pacific snap its fingers in the face of the public and do as it pleases, give accommodations or not and hold up the people at every turn. The Commission must now be shown, and the heads of the several departments of the Railroad Company are not the insolent autocrats they were in former years.

The referendum like most of our other laws is designed to protect the people from those who would do wrong.

It is a safeguard thrown around the enactment of laws and the granting of franchises. And while it may sometimes be used for improper purposes it is a good thing to have on such legislation, as oftentimes it prevents jokers from being slipped over on the people and improper advantages taken.

The more effective feature of the war against flies would be not their capture, but the measures to be taken to prevent their existing. All flies must die in the course of time, and the ones that die in traps are hardly missed in the world of flydom. Those who die before they are born will go to the greater creoit of the City Beautiful committee. This will be really curing typhoid fever "at the source." Every horse corral probably taken care of, every automobile substituted for a horse, every garbage can covered where before it went uncovered—every possible residence for a fly abolished will mean that by just so much he will not hereafter exist.

For the last generation the young people of Vermont in large numbers have been leaving the state. In forty years the state's population increased only twenty-five thousand.

A thorough survey of the state has just been completed by the Carnegie Foundation, and President Pritchett summarizes the results in the Independent. "There can be no question," he writes, "that the failure of the school system in the past generation to interest the youth of the state in the problems of their own environment has been one large factor in the continuation of emigration."

In a state in which the majority of the people are farmers, the schools have continued to educate young people in academic subjects—that is, to be clerks and bookkeepers. They haven't had a word to say about the fascinating problems of the great laboratory of the out-of-doors, the farms from which the state is getting its living.

The States and the National Government are beginning to learn that this is generally an agricultural country and that all prosperity begins with the soil. So that the farm is at least coming into its own.

Only last week was advertised a series of civil service examinations for the government agricultural departments. Positions of soil chemists, dairy inspector, plant investigators and several different jobs were seeking competent, and offering salaries from two to three thousand dollars per year for such men. As such places mean a life job to the holder, a life in the open with comparatively little expense, and with comparatively little original research the jobs are certainly desirable ones.

Ten years ago there were no such opportunities for young men in these departments. Now the farming industry offers opportunity in its scientific relations with the chemist, the botanist and the soil expert and the government realizes that the main support of its existence is the prosperity of its farms.

The Quantity System Of Figuring On Contracts

**Historical, Modern Competition and Definition,
Advantages, Adaptability and Progress.**

G. Alexander Wright.*

The measurement and description of mechanics' work and the placing of money values against such description is not new. Occasionally, when discussing the quantity system, one hears it spoken of as a "new idea." But it is not new by any means. The practice, however, of making a fixed "quantity" of material and labor the "essence" of the contract, if not new, is certainly "modern."

Historical Aspects of Quantity System.
Historically speaking, there were measures of quantity, areas and distances, in very early times. Ezekiel, the prophet, speaks of a man with a line and a measuring rod in his hand. Someone has said it was just a twelve-foot rod, such for example, as we might use today. Then in Zachariah, reference is made to the length and breadth being taken of Jerusalem.

That the Greek architects took their measurements and made up their estimates of costs is generally admitted. Vitruvius, in his Handbook of Architecture, written about the time of Augustus, mentions as one of the essential qualifications of an architect, that he must be a good arithmetician "to work out measurements and to estimate the cost of buildings." Indeed, in the case of public work in the city of Ephesus, the architect was obliged to give a figure representing the cost of the work, which was retained by the chief magistrate, and honors were conferred upon the architect if, at the end of the job, this estimate of cost had not been exceeded. If, however, the cost materially exceeded the estimate, the architect had to make up the deficiency, and it is said that it was a matter of regret to Vitruvius that there was no such provision in the Roman law. Then, again, among the Greeks, it was customary upon public work to publish itemized detailed accounts of the actual cost of such works, as well as the architect's estimate. Payment by measurement was very common, and we find references to a type of engineer-architects who measured buildings and whose reports finally settled matters—a sort of arbitrator. Here it will be seen therefore, that we have distinct references to the principle of "payment by measurement," the modern equivalent for which is the quantity system, whilst the Greek engineer-architect accords very close, to the quantity surveyor of today.

Enough has been said to show that the measuring or we say "quantity" surveyor has existed, certainly from the time of the Greeks and Romans. The quantity system as we know it today had its origin some eighty years ago when competing bidders met and one of their number was selected to take off the quantities and furnish a copy to each of his competitors.

Better methods in time prevailed until the system was evolved such as I expect to see adopted in the United States, i. e., compensation to the contractor through definite measurement being made the basis of the contract.

Competition, so called, among contractors is comparatively a modern innovation. The words "so called" are used intentionally, for under the prevailing conditions, competition intelligently and conservatively conducted is the exception, and not the rule. Our methods today are largely gambling methods when it comes to ascertaining the quantities of materials which go to make up a structure and which must, of course, be accurately ascertained before an intelligent, satisfactory bid can be made. So true is this that it is a matter of common knowledge, that fully 50 per cent of the contracts let are the result of error, and further, that the more capable and careful a bidder is to get in all his items, the less chance he has of securing a contract, profitable or even otherwise. The lowest bid, the one generally accepted, is usually anything but the most accurate.

One of the greatest inconsistencies also in competitive estimating lies in the fact that no sooner are bidders invited to give a price on a job than they seem to compete among themselves to see who can take off the least quantity of material, etc., and it is surprising how well some of them succeed.

The quantity system is not, as some persons have supposed, merely the taking off of a list of items by one person, for one other person's use, nor does it consist solely of the listing of items by individual contractors with varying methods and uncertain accuracy, owing in part to the fact that contractors are seldom, if ever, allowed proper time in which to make up an accurate bid. It must not be overlooked that some "training" is also essential to the accurate preparation and classification of quantities.

The Meaning of Quantity System.

What the quantity system does mean, however, is the careful measurement by an independent person specially trained in this special kind of work, and the present age is undoubtedly the age of the specialist. This specialist or quantity surveyor proceeds with his work somewhat differently to the average contractor, for he follows certain recognized rules in taking off, abstracting and billing, with a view to eliminating error. He uses also certain uniform standards of measurements and expression. Every written word or figure is preserved for future reference. His checking and rechecking methods to ensure accuracy must be studied to be appreciated by those to whom the quantity system is unknown. A record is made of every item, however small, having a money value. These items are then all classified and arranged, each under its proper trade or department in methodical order. Guess-work methods are unknown to the quantity surveyor, whilst his accuracy and attention to details is well worthy of commendation.

The surveyor who does this work is a professional man similar to the engineer and the architect. He should, in fact, have, and usually has had

some experience at least in the work of these professions, and in addition, a practical experience acquired in the field, in actual superintendence of construction work.

Such a surveyor then upon commencing to take off the quantity from an architect's or engineer's drawings, readily detects any ambiguities, or discrepancies which exist, through hasty preparation or otherwise. Attention of the architect or engineer is at once called to such matters by the quantity surveyor as he goes along. Being so detected, such ambiguities and uncertainties can be, and are, corrected and adjusted, so that by the time the drawings and specifications reach the bidder for estimating purposes, all doubts have been cleared up, and every thing has been made so plain and accurate, that the possibility of error in quantities can be practically disregarded.

This document, prepared exclusively in the surveyor's office, is then either printed or similarly reproduced, and a fac simile copy supplied free of cost to each bidder, who inserts his unit price opposite each item, and readily foots up the money cost in dollars and cents, and which really is all that he should be asked to do. The quantities of material and labor then set forth in this document, or bill of quantities, represents the limit of what the contractor will be called upon to perform or furnish in order to complete his contract. In short, the bid becomes a proposal to do a certain "fixed quantity" of work, indicated in the quantities, no more and no less. The contract to be drawn accordingly. This then very briefly is the main underlying principle of the quantity system of estimating, a definite quantity of work for a definite price, and payment according to a well defined systematized method of measurement, and the entire elimination of those well-known conditions and elements which now compel bidders to take chances, and for which all parties usually suffer in the end, the owner included.

The Wastes of American Practices.

Most of us are familiar with these wasteful, unsatisfactory methods and sometimes, even pernicious practices, which are followed today in bidding upon and carrying out the work. These injure both parties to a contract, and they arise largely from bidders' mistakes in figuring, because accuracy has to be so often sacrificed for an ill-advised speed. A large proportion of these mistakes occur in the hurried figuring of the "quantity" by bidders. Some of us, when we have the opportunity of looking behind the scenes, so to speak, become appalled at the resultant effects of existing practices, such as the enormous waste in time and money in senseless figuring, disputes, harassing conditions, hard feeling, lack of confidence, delays suits at law and so forth, nearly all of which may be avoided by adopting more conservative methods in our preparatory work before contracts are let. Further, interpretation of plans and

specifications being, in common fairness to both parties to the contract, he made wherever possible before a contract is let, and not be left until afterwards, nor to be done "as directed." Under the quantity system, where the quantities are made the basis of the contract, this becomes practically imperative. Regarding interpretations, one might be excused for saying that it would seem, as engineers or architects, to be a question of policy, as well as fairness whether we should continue to even assume the responsibility of deciding things already contracted for, according to our "judgment." If our judgment is to govern what a contractor must do, would it not be better to consider those things which can be considered, and then determine them finally before a contract is let? Many an architect and engineer has suffered professionally through assuming to exercise judiciary powers unnecessarily. But to return, notwithstanding the fact that over 40 per cent of the entire population of our cities are dependent directly or indirectly upon the construction of buildings, yet the methods generally followed to determine the important question of contract cost are those used generations ago; they come to us as a tradition from the period when tallow candles were used. Whilst we have made wonderful strides in constructive methods and materials, and, let us hope, in design, little or no attention has been given to standardizing estimating methods. We seem to have been too busy "speeding up" to regard seriously the advantages of accuracy when it comes to spending money on construction. In the end, of course, it is the owner, the financier, who suffers. There are, however, indications as a result of the movement initiated in San Francisco, that more conservatism and a closer adherence to business principles are going to be preferred by the moneyed interests in place of the guess work and gambling methods which they have overlooked in the past.

A contract, according to Blackstone, is "an agreement upon sufficient consideration to do, or not to do, a particular thing." The lowest bidder today will scarcely admit that the contract consideration is sufficient, or that his contract obligations are limited to do any one particular thing. It would also seem that architects or engineers who permit an unduly low bidder to sign up for a piece of work are courting trouble, and in such cases, where they have constituted themselves sole arbiters of the contract, their judicial power, if exercised, is open to criticism.

The principle of measure and value, or payment by measurement, usually designated as the quantity system, is based upon equity and square dealing. On large work it is used in Germany, France, Ireland, England, Australia, Scotland, and even South Africa, where some thousand of miles or more north of Cape Town we find not only an Institute of Architects, but an Institute of Quantity Surveyors, and it is a significant fact, that in no instance where the system has been once established has it ever been abandoned for their former haphazard methods, and which corresponds with those we have employed for generations past and still use.

Among the advantages and improved methods of estimating afforded by the quantity system may be mentioned:

First: The enormous saving of time and money now wasted by numerous bidders all doing the same thing, going over the same ground.

Second: Safer bids will be made, as the volume of work to be performed is clearly indicated by the bill of quantities which is the essence of the contract.

Third: No expense to the bidder, the owner pays for his own quantities "knowingly," and they benefit him as well as the contractor. The owner pays now, but this fact is not emphasized or brought to his attention, and so he does not know it. The percentage added to a bidder's net cost is not all profit, a certain portion of such percentage is absorbed in running his business and similar overhead charges, which ultimately are, of course, paid by the owner.

Fourth: Saving of disputes arising from extra claims which often occur through vagueness of drawings and omissions, or other error in specifications.

Fifth: Better opportunity for the careful competent bidder. With the quantity system the bidders all work up from the same basis. The incompetents cannot omit or forget the painting, glass or other items, and so take work away from more careful or competent bidders.

Sixth: Better work and more harmony will result, for the reason that if no part of the work has been omitted there will be less temptation to "let up" on the work, and which usually results in dissatisfaction, if not friction or worse.

Seventh: Misunderstanding reduced to a minimum. The Bill of Quantities is the "interpreter" of what is intended, a sort of clearing house for the drawings and specifications.

Eighth: Neither party to the contract can obtain any advantage over the other on quantity or description of work.

Ninth: No disputes with sub-bidders, it being clearly stated what each trade is to furnish.

Tenth: Contractors having much less figuring to do can then devote more time and give more attention to buildings in hand, and especially in supervising and directing their sub-contractors.

Eleventh: Owners and architects would be less liable to have inferior contractors as the lowest bidders.

Twelfth: Fewer extras. These are usually a trouble to all concerned. Should any occur, they can be easier adjusted if the schedule prices govern in such case.

Thirteenth: The architect or engineer, if he so desires, can have the advantage of collaboration with the professional Quantity Surveyor, who also would be available when preliminary figures are required, which information is now so often furnished by the contractors, thereby creating an undesirable obligation.

Fourteenth: No change or re-organizing of architects' or engineers' offices necessary, whilst much detail work now involved when taking figures, will be taken care of by the Quantity Surveyor's office.

Fifteenth: When contracts are signed, the drawings and specifications

will previously have been made as complete as it would be possible to make them, thereby avoiding subsequent inconvenience to the contractor and his foreman on the job, and doing away largely with inquiries at the architect's office by contractors during progress of the work.

Adaptation to American Needs.

The particular system suggested for our use should be one best adapted to American needs and sentiment, a practical system which would meet our special requirements and endorsement. Such a system has been under consideration for some years past, one that is expected to meet with general approval and adoption, at least until experience or wiser heads suggest something better. For many reasons it would be undesirable to accept the English system in either of its forms. That is to say as a "system" for general use. The great principal it stands for, however, viz: that of giving, as well as receiving a square deal, can be both accepted and used with much advantage to both owner and contractor. It suggests no haphazard or guess-work methods, which is true business and fair to all.

Now, very briefly: How can this system be adopted? It takes time of course to get rid of old customs or old habits, however bad they may be. But considerable progress has already been made, and the outlook all over the country favoring better methods is now certainly encouraging. At the inception of this movement, however, in 1881, it was not easy to find anyone willing, even to admit, that betterment in estimating conditions were necessary or even possible, and there were fewer people still who knew anything about the quantity system. Happily we are a progressive people, and things are not done today as they were twenty or thirty years ago. Indeed, it is now very generally recognized that estimating and certain contract conditions are about as bad as they can be. Quite recently it was stated by an experienced contractor whose opinions both deserve and command respect, that if a bidder figured to do everything just exactly as it was called for, he would not get one job in fifty, and the reasons why are well known to those in the business.

After once the principle and the safety of the quantity system is understood, (and the words "safety first" should become a national slogan), after its many advantages are recognized, its equity between owner and contractor becomes immediately manifest.

To adopt the system generally, the organization referred to hereafter, advocates that the United States Government and every state and county in the Union, should furnish, free of cost, to every bidder detailed bills of quantities, setting forth clearly and squarely exactly what quantity and nature of work it is that a bidder will, if successful, be required to perform in order to properly complete the contract. The next step, it is thought, will be that municipalities will follow the same practice. The advantages obtained will quickly become known in every locality among private owners and the building community, and the present practice, which is already tottering, will be a thing of the past, and we shall be all wondering why such a labor saving, sensible method has

hitherto been neglected in the present day and in our generation.

The Quantity Surveyor.

Accuracy and honesty are the quantity surveyor's chief essentials apart from his professional ability. It seems, therefore, that the practice of quantity surveying should be legalized in each state, somewhat similar to that of the public accountant, through examination and subsequent issue of licenses to persons thus qualified and wishing to practice. The furnishing of surety company's bonds by the quantity surveyor has been suggested in some quarters to guarantee his accuracy and honesty, but it would seem that until a similar guarantee is demanded from other technical practitioners, the expediency and efficiency of this course may fairly be questioned.

It may be stated perhaps that to still further advocate the adoption of better estimating methods and more satisfactory contract conditions, an organization was formed last year known as the American Institute of Quantity Surveyors, which is doing much good work along these lines. Its membership is open to all architects, engineers, contractors and others (including owners) who are in sympathy with the efforts being made to bring about better conditions. The dues are merely nominal including the official bulletin every month which gives the progress of this movement throughout the United States, whilst its columns are open to all for suggestions or inquiries regarding the work of the organization in general, or the quantity system in particular.

Progress of System in America.

It may perhaps be only fair to add (with due modesty, however, let us hope) that to San Francisco belongs the credit of being the first city in the United States in which a systematic effort was ever made to bring about better estimating conditions such as the quantity system affords. This movement commenced many years ago. In 1891, when in the month of April, an informal address and discussion took place before members of the Builders' Association of California (now the General Contractors' Association.)

Immediately following this came an address entitled "The Quantity System of Estimating" in the Academy of Sciences Building before the San Francisco Chapter of the American Institute of Architects. Much interest having been aroused, no opportunity was afterward lost of sustaining it. Articles were contributed to architectural and building journals in the East and elsewhere. "Better estimating methods" was the slogan consistently urged for years. In 1905 a paper on this subject was given and discussed before the Technical Society of the Pacific Coast. The conflagration of 1906 somewhat disturbed the progress of the work temporarily, but it was soon resumed and brought once again to the front. It has since grown until now the movement has spread from the Pacific to the Atlantic and from Boston to New Orleans. Everywhere today the subject is being received by engineers and contractors, as well as by architects with the greatest interest. I can testify to this, having but recently completed a tour of some 14,500 miles undertaken solely for the purpose of meeting the leading architects, contractors and engineers of our large

cities, and of personally still further advocating higher contract ideals and better methods, such as always follows the adoption of the quantity system of estimating.

*Consulting architect, San Francisco, and president of the Technical Society of the Pacific Coast.

HIGHEST BUILDING WEST OF MISSISSIPPI.

The highest building west of the Mississippi has just been completed in Seattle, Wash. The tower rises 450 ft. above street level, and is so conspicuous that it is already being used as a beacon by mariners in making their way on Puget sound, and it is planned to have it illuminated at all hours of the night to make it available for this use night and day. The building covers a lot that is 180 by 120 feet. The main structure is 21 stories high, and to this a tower adds 12 stories. In addition to this there are two stories below street level. The height to the lantern at the top of the tower is equivalent to 42 stories. The foundation rests on 1,376 concrete piles driven to a depth of 50 feet below the surface. In building the foundation 4,000 barrels of cement and more than 1,000 tons of steel were used. On the foundation piles a total weight of 76,560 gross tons will be carried, the steel for the superstructure alone weighing 4,732 gross tons.—Exchange.

RUINS OF ANCIENT TIHUANACU.

Indicating a Civilization in Bolivia Antedating that of Ancient Egypt.

A city so old that even the legendary lore of the Incas, who traced an unbroken line of kings back to the eleventh century, is dumb concerning the people who built it; a city which a thousand years ago had been so long dead that even song, story and tradition had forgotten every vestige of its history when Columbus discovered the "New World." Such is the ancient city of Tiahuanacu, whose ruins are crumbling surely, but very slowly, into dust not far from the southern shore of Lake Titicaca, in Bolivia.

"The little present-day village of Tiahuanacu is located on the railroad which connects La Paz, the modern capital of Bolivia, with the part of Guayaquil on Lake Titicaca, and may be reached in about two hours from the former place. The ruins of ancient Tiahuanacu, covering an area of about a square mile, are not over a half mile from the village"—write Edward Albes in the Monthly Bulletin of the Pan American Union, Washington, D. C.

"A traveler stopping in the little town, and ignorant of the proximity of the ruins, would be astounded to observe the number of beautifully cut stones built into parts of adobe huts of the most primitive character, and sometimes forming portions of a small patio. A doorway to a dilapidated, thatch-roof hut, may have a lintel or jamb formed by an artistically carved stone. In the walls of the little Catholic Church and in those enclosing its yard, and even in the paving, may be seen these smooth stones. The pedestal on which is mounted the stone cross in front of the church is

made up of them, while on either side of the gateway to the inclosure stands a carved stone idol whose lines, marred by the ravages of time, still show the artistic skill of the ancient sculptors who wrought them."

Thus the ruins of the ancient city have furnished much of the material to build the village of today, and while the strict utilitarian may find no fault with this work of destroying the artistic monuments of a hoary antiquity to cater to present needs, to the student of archaeology it seems almost like desecration. The Bolivian Government has recently enacted a law which forbids the carrying off or willful destruction of that portion of the ruins which vandal hands have left intact.

The ruins themselves include the remnants of temples, palaces, and great structures of what once must have been a large and densely populated city. Not a vestige remains of the dwellings and less pretentious houses in which this population must have lived. These were naturally of a more temporary character, and the relentless agents of destruction, working through countless centuries, have obliterated all traces.

The question which confronts the archaeologist is—how a population sufficiently numerous to accomplish the building of such a city have maintained itself in this region? The ruins are located 13,000 feet above the level of the sea on a vast plateau where the constant cold prevents the maturing of corn or other grain. At present potatoes, cocoa, and some other edible roots are grown, but the region sustains only a scanty mountain population. The city once covered a large area, the great structures were built by skilled masons. One stone is 36 feet long by seven feet wide and weighs 170 tons, another is 26 feet by 16, and 6 feet thick. Only the monoliths of ancient Egypt equal those found in Tiahuanacu. The movement and placing of such monoliths point to a dense population, to an organized government, and consequently to a large agricultural area with means of transportation from various directions. The only tenable explanation is that at the time when Tiahuanacu flourished the Andes were from 2,000 to 3,000 feet lower than at present. Geologists hold that in the Jurassic and even in the Cretaceous period there were no Andes and that through a gradual upheaval they have been formed in more recent geological times. The bones of a mastodon have been discovered in Bolivia at an altitude of 13,000 feet above the sea, and such an animal could not have existed at such an elevation. Skeletons of gigantic anteaters have been found in the deserts of Tarnpaca, and these could only have existed in regions of arboreal vegetation. These, and other geological facts, support the theory that the ancient city of Tiahuanacu existed when the Andes were much lower than at present, perhaps when the cave man or Britain was fighting for his life with cave bear, wild boar, and mastodon, and sketching their rude pictures on the walls of his primitive, subterranean dwelling.

The business man who does not advertise because he tried it once, and failed, should throw away his cigar because the light went out.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$16,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaughy. The building will be erected at the corner of Army and Serpentine streets, and has been designed to contain a number of two and three room suites. All apartments will have wall beds and private bath rooms. There will be a central heating system and hot water supply. Bath rooms will have composition floors and tile wainscot. Interior will be finished in pine and redwood. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$20,000. Architect, L. M. Hausmann, Sharon Bldg., S. F. Owner, I. S. Poorman. The building will be erected on the south side of O'Farrell street, east of Jones, covering an area of 22½ by 60½ feet. There will be nine apartments of two and three rooms. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, elevator service and a hot water supply. All suites will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken under advisement. A contract will be awarded shortly.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, E. P. Antonovich, 333 Kearny street, S. F. Owner, W. E. Trefts. The building will be erected at the corner of Green and Steiner streets and has been designed to contain suites of two and three rooms with wall beds and private bath rooms. Interior finish will be of pine, redwood and elm panels. Some oak floors will be used. There will be a central heating system and hot water supply. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 6 story and base. Class C construction. Cost not stated. Architect, J. R. Miller, Lick Bldg., S. F. Owner's name withheld. The building will be erected on Ellis street between Jones and Leavenworth. There will be a number of suites arranged in two, three and four rooms. Interior finish will be of pine with elm panels and some oak floors. Plans provide for steam heat, elevator service, hot water system and vacuum cleaning. All suites will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed

brick. Plans are complete and figures have been taken under advisement. An award of contract will be made this week.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected in the southern part of the city and has been designed to contain 21 modern apartments of two and three rooms with private baths and wall beds. Interiors will be finished in pine and redwood. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$16,000. Architect, E. P. Antonovich, 333 Kearny street, S. F. Owner, F. J. Clark. The building will be erected on the east side of Lapidge street near 18th and will contain six suites of three and four rooms. Interior finish will be of pine throughout with some hardwood floors. All suites will have wall beds and private bath rooms. Plans provide for a central heating system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Apartment house, 2 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mrs. C. Dorn. The building will be erected on the east side of Pierce street south of Page, and has been designed to contain four suites of four rooms and bath each. Interior will be finished in pine, redwood and elm panels. Some hardwood floors will be used. Plans provide for a hot water system. Bath rooms will be finished in tile and will have composition floors. All suites will have wall beds and private bath rooms. Exterior of the building will be covered with shiplap and pressed brick veneer. Plans are complete and figures are now being taken.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$15,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Carl and Theo. Rulfs. These two buildings will be erected on the east side of Franklin street south of Clay. Each building has been designed to contain six suites of four rooms and bath. Each building will have a frontage of 30 feet and a depth of 85 feet. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water system. Portable vacuum cleaners will be installed. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the buildings will be covered with cement plaster. Plans are nearly com-

plete and figures will be taken this week.

BEIKKELEY, ALAMEDA CO., CAL.—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owner, E. L. Lamb, 1126 Poplar street, Oakland. The building will be erected on the east side of College avenue south of Haste, and has been designed to contain two, three and four room suites with private baths and wall beds. Interior finish will be largely of pine with some elm panels and hardwood floors. There will be steam heat, a hot water supply and vacuum cleaning system. Bath rooms will be finished in tile and will have composition floors. Entrance will be of marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$30,000. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner's name withheld. This building has been mentioned here a number of times before. Plans have been revised and figures are again being taken. The building will be erected at the corner of Perkins and Grand avenue and will contain a number of two and three room suites. There will be steam heat, a hot water supply and vacuum cleaners. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected at the corner of Market and 11th streets and will contain a number of two and three room suites. Interiors will be finished in pine throughout. Plans provide for steam heat, a hot water supply and portable vacuum cleaners. Bath rooms will have tile wainscot and composition floors. All suites will have wall beds and private bath rooms. There will be stores on the first floor. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architects.

PORTLAND, ORE.—Apartment house, 3 story and base, brick, \$28,000. Architect, none. Owner, H. O. Triplett, 510 Lewis Bldg., Portland. The building will be erected on Harrison street between 11th and 12th streets, covering an area of 35 by 100 feet. There will be a total of 18 apartments of two and three rooms. Interior finish will be of pine and elm with some hardwood floors. Plans provide for steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

Contracts Awarded.

SEATTLE, WASH.—Apartment house, 5 story and base. Class A construction, \$150,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, D. R. McKay. Contractors, W. T. Butler Contracting Co., Central Bldg., Seattle. Contract price, \$150,000.

SANTA MONICA, LOS ANGELES CO.,

CALA—Apartment house, 3 story and base. Class C construction, \$36,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins. Contractors, The Broadway Construction Co., Security Bldg., L. A. Contract price, \$36,000.

CHURCHES.

SAN FRANCISCO—Church, 2 story and base. Class C construction, \$75,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Second Church of Christ, Scientist. The building will be erected at the corner of Dolores and Cumberland streets, and will cover a considerable ground area. There will be a large main auditorium, Sunday school rooms and reading rooms. Interior will be finished in pine throughout. Plans provide for steam heat and a modern system of ventilation. Art glass will be used. Ornamental plaster is also specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be taken within the next two or three weeks. Further mention will be made of the work.

MT. OLIVET, SAN MATEO CO., CAL.—Columbarium, 1 story and base, reinforced concrete, \$100,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Mt. Olivet Cemetery. The building has been mentioned here before when the architect was first commissioned to prepare plans. The structure will be fireproof throughout. Interior will be finished in Onen stone and marble. Special plumbing fixtures, lighting fixtures and heating will be installed. Marble and tile will be used extensively. Exterior of the building will be faced with cement plaster. Plans are now complete and figures will be taken within a week or ten days.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,500. Architect, Paul D. De Martini, 2133 Powell street, S. F. Owner's name withheld. The building will be erected on the north side of Filbert street between Polk and Larkin streets, and has been designed to contain three flats of five and six rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are now being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, W. S. Rhodes, 3372 15th street, S. F. Owner's name withheld. The building will be erected on 20th street between Dolores and Guerrero, and has been designed to contain two flats of six rooms and bath each. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Entrance will be finished in tile. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, \$1,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, Gertrude I. Pierson. The building will be erected on the north side of Cortland avenue near Moultrie, and will be arranged for a store on the first floor and two five-room flats above. Interiors will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Page street between Shrader and Stanyan streets. Each flat will contain six rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be large open fire places in each of the living rooms. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2, 3 story and base, frame, \$5,000 each. Architect, L. Traverso, 854 Union street, S. F. Owner, E. Torreggino. These two buildings will be erected on adjoining property on the east side of Jasper Place north of Green street. Each building will have a frontage of 22½ feet by a depth of 58 feet 3 inches. There will be three flats in each consisting of five rooms and bath. Interiors will be finished in pine and redwood. There will be gas grates and tile mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, Gertrude I. Pierson. The building will be erected on the north side of Highland avenue west of Holly Park, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, John McCormick. The building will be erected on 5th avenue at the corner of C street, and has been designed to contain two flats of six rooms and bath each. Pine and redwood with elm panels will be used in the living rooms and dining rooms. Hardwood floors will be used in the principal rooms. There will be open

fire places and tile mantels. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete and steel, \$30,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the Western Addition, and will cover a large ground area. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Steel roof trusses will be used. Besides the usual storage space plans provide for a machine shop and offices. Interior will be finished in pine. There will be metal window frames and sash and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

OALAND, CALA—Garage, 2 story and base, frame, \$5,000. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, J. H. Fuller. The building will be erected on Bellevue avenue and will contain storage space for three machines. Interior finish will be of pine. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Canal Circular No. 854.

The general purchasing officer of the Panama Canal will open bids June 11, 1914, under circular No. 854 for furnishing oil handling plants, which include four steam-driven, horizontal, duplex, noncondensing, double-acting pumps, two for the Atlantic plant and two for the Pacific plant, which will be used for handling fuel oil from oil ships to storage tanks, from storage tanks to steamers and from storage tanks to tanks which supply shops and power houses. The normal capacity of the pumps is 1,200 barrels per hour of crude oil against a total head of 150 pounds per square inch, and 400 barrels per hour against a total head of 250 pounds per square inch. Equipment also includes cast iron pipe and fittings, valves, gaskets, etc. Proposals will also be asked for a 225-gallon per minute centrifugal pump unit, complete, with motor, automatic starting apparatus, float switch, foot valves and certain piping for insulation at the Barven wireless station, Radio, C. Z. The pump shall be designed to lift 225 gallons of water per minute against a total head of 150 feet.

The Canal Circular will also contain a request for bids for furnishing 243,810 square feet of paving brick and 6,630 lineal feet special brick for use on pier No. 1, head wall and quay wall, Balboa terminals. Included in the circular will also be a request for furnishing three altitude gauges and one compound gauge to be installed in the Miraflores pumping station No. 2 and in the Mt. Hope Miraflores filter building for the purpose of indicating the height of water in the wash water tanks. Bids will also be asked for furnishing 200 untreated piles 80 feet long.

Army Work Authorized.

The quartermaster general has directed the construction quartermaster of the Letterman General Hospital, San Francisco, Cal., to call for bids for installing a 5-ton ice machine in the power plant.

Puget Sound, Fireproofing Building.

The bid of C. H. Schaar, 721 Twenty-first avenue, Seattle, Wash., \$9,000 in amount, has been accepted for fireproofing pattern shop at the Puget Sound navy yard.

Balanced Valves.

Abstract of proposals for balanced valves for U. S. Reclamation Service, Boise project, Arrowrock dam, opened at Los Angeles, Cal.:

Item 1, 7 valves, lump price and weight per valve; 2, 3 valves, lump price and weight per valve; 3, 7 valves, lump price and weight per valve; 4, 3 valves, lump price and weight per valve; 5, 2 valves, lump price and weight per valve; 6, lump bid on items 1, 2, 3, and 4.

Joshua Handy Iron Works, San Francisco, Cal., delivery Sunnyvale, Cal., item 1, \$23,170, 42,974 lbs; 2, \$11,466, 44,089 lbs; 3, \$23,534, 46,682 lbs; 4, \$11,757, 47,797 lbs; 5, \$5,350, 42,725 lbs; 6, \$6,417; item 5, \$6,211 if included with items 1, 2, 3, and 4.

Power & Mining Machinery Co., New York City, delivery Cudahy, Wis., item 5, \$6,890, 41,635 lbs; 7, \$71,016; weight of items 1, 2, 3, and 4 \$81,000 lbs; item 5 only if other items are accepted.

Stacey-Schmidt Mfg. Co., York, Pa., delivery York, Pa., item 1, \$26,381; 49,000 lbs; 2, \$12,977, 50,000 lbs; 3, \$26,900, 50,600 lbs; 4, \$13,153, 51,600 lbs; 5, \$7,500, 48,450 lbs; 6, \$76,823.

Coffin Valve Co., Neponset, Mass., delivery Neponset, Mass., item 1, \$29,100, 49,300 lbs; 2, \$17,700, 56,560 lbs; 3, \$28,550, 48,950 lbs; 4, \$14,450, 48,200 lbs; 5, \$9,050, 48,950 lbs; 6, \$32,600; lump bid on items 1, 2, 3, 4, and 5, \$30,400.

Bethlehem Steel Co., South Bethlehem, Pa., delivery South Bethlehem, Pa., item 1, \$30,150, 43,780 lbs; 2, \$15,110, 44,930 lbs; 3, \$30,455, 46,070 lbs; 4, \$15,100, 47,280 lbs; 5, \$10,400, 43,370 lbs; lump bid on items 1, 2, 3, 4, and 5, \$35,320.

Pittsburgh Valve, Foundry & Construction Co., Pittsburgh, Pa., delivery Pittsburgh, Pa., item 1, \$29,862, 48,000 lbs; 2, \$13,958, 48,800 lbs; 3, \$20,541, 50,200 lbs; 4, \$14,248, 51,400 lbs; 5, \$8,427, 47,250 lbs; 6, \$88,619.

Platt Iron Works, Dayton, Ohio, delivery Dayton, Ohio, item 1, \$33,200, 47,000 lbs; 2, \$16,700, 48,500 lbs; 3, \$33,900, 51,000 lbs; 4, \$17,000, 52,500 lbs; 5, \$11,100, 46,500 lbs; 6, \$93,500; lump bid on items 1, 2, 3, 4, and 5, \$102,000.

Best Mfg. Co., Pittsburgh, Pa., delivery Verona, Pa., item 1, \$36,295, 47,850 lbs; 2, \$18,747, 48,700 lbs; 3, \$26,820, 52,350 lbs; 4, \$19,450, 52,250 lbs; 5, \$9,865, 47,500 lbs; 6, \$95,000.

Rosedale Foundry & Machine Co., Pittsburgh, Pa., delivery at Pittsburgh, Pa., item 1, \$34,000, 50,000 lbs; 2, \$16,400, 51,000 lbs; 3, \$33,700, 52,000 lbs; 4, \$16,600, 51,000 lbs; 5, \$9,995, 50,000 lbs; 6, \$97,900; item 5, \$9,295 if included with items 1, 2, 3, and 4.

Union Iron Works, San Francisco, Cal., delivery San Francisco, Cal., item 1, \$26,812, 45,805 lbs; 2, \$18,037, 46,843 lbs; 3, \$20,959, 47,416 lbs; 4, \$18,120, 48,444 lbs; 5, \$11,000, 45,550 lbs; 6, \$105,101.

The Exeter Machine Works, Pittsburgh, Pa., delivery Arrowrock dam, item 1, \$39,000, 52,000 lbs; 2, \$18,704, 53,800 lbs; 3, \$39,700, 52,300 lbs; 4, \$18,791, 54,500 lbs; 5, \$11,736, 52,000 lbs; 6, \$13,054; lump bid on items 1, 2, 3, 4, and 5, \$125,748.

The Wm. Cramp & Sons Ship & Engine Building Co., Philadelphia, Pa., delivery Philadelphia, Pa., item 1, \$39,900, 47,000 lbs; 2, \$19,110, 48,000 lbs; 3, \$41,000, 48,200 lbs; 4, \$19,600, 49,200 lbs; 5, \$13,300, 46,500 lbs; 6, \$114,600.

The Westinghouse Machine Co., East Pittsburgh, Pa., delivery East Pittsburgh, Pa., item 1, \$41,040, 45,000 lbs; 2, \$18,610, 40,000 lbs; 3, \$41,040, 47,000 lbs; 4, \$18,610, 48,000 lbs; 5, \$11,290, 45,000 lbs; 6, \$115,300.

The Pelton Water Wheel Co., San Francisco, Cal., delivery San Francisco, Cal., item 1, \$38,772.54, 41,750 lbs; 2, \$18,442.65, 46,500 lbs; 3, \$39,781.25, 48,000 lbs; 4, \$19,032.80, 50,000 lbs; 5, \$11,812.20, 41,500 lbs; 6, \$116,008.64.

Norberg Mfg. Co., Milwaukee, Wis., delivery Milwaukee, Wis., item 5, \$10,300, 50,000 lbs; 6, \$135,000; weight of items 1, 2, 3, and 4, \$1,060,000 lbs.

Seattle Construction & Dry Dock Co., Seattle, Wash., delivery Seattle, Wash., item 1, \$4,650, 51,500 lbs; 2, \$18,820, 52,000 lbs; 3, \$11,030, 52,250 lbs; 4, \$18,900, 51,650 lbs; 5, \$11,500, 51,470 lbs; 6, \$119,400.

S. Morgan Smith Co., York, Pa., delivery York, Pa., item 1, 55,000 lbs; 2, 56,700 lbs; 3, 56,800 lbs; 4, 58,400 lbs; 5, \$11,400, 51,400 lbs; \$129,900.

Poole Engineering & Machine Co., Baltimore, Md., delivery Baltimore, Md., item 1, \$43,000, 46,500 lbs; 2, \$18,100, 46,350 lbs; 3, \$45,500, 50,000 lbs; 4, \$19,850, 50,850 lbs; 5, \$13,450, 46,000 lbs; 6, \$121,100.

Washington Iron Works, Seattle, Wash., delivery Seattle, Wash., item 1, \$13,400, 48,000 lbs; 2, \$20,100, 49,000 lbs; 5, \$12,000, 47,500 lbs.

Otis Elevator Co., New York City, delivery Harrison, N. J., or Yonkers, N. Y., item 1, \$43,500, 44,125 lbs; 2, \$21,325, 46,000 lbs; 3, \$44,425, 46,630 lbs; 4, \$21,700, 48,505 lbs; 5, \$14,300, 43,125 lbs; 6, \$123,875; item 5, \$11,900 if included with items 1, 2, 3, and 4.

Minneapolis Steel & Machinery Co., Minneapolis, Minn., delivery Minneapolis, Minn., item 6, \$124,000; exception taken to leakage test.

Fulton Engine Works, Los Angeles, Cal., delivery Los Angeles, Cal., item 1, \$12,320, 49,000 lbs; 2, \$20,308, 51,000 lbs; 3, \$44,172, 53,000 lbs; 4, \$20,653, 51,000 lbs; 5, \$12,818, 51,000 lbs; 6, \$126,443.

Camden Iron Works, Camden, N. J., delivery Camden, N. J., item 5, \$11,600, 50,000 lbs; 6, \$129,000.

Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Chicago, Cal., Construction, June 10.
California Construction Co., Monadnock Building, San Francisco, Cal.

Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.
E. D. Sharp, Chico, Cal.

F. P. Amweg, Marston Building, San Francisco, Cal.
Frank Gallagher, 180 Jessie street, San Francisco, Cal.

J. B. Reite, 110 Jessie street, San Francisco, Cal.
Welch Bros., 15th and Jefferson streets, Oakland, Cal.

Wm. H. Henning, Examiner Building, San Francisco, Cal.

B. J. Duffy, University State Farm, Cal.

Falmberg & Mattson, 831 Connecticut street, Astoria, Ore.

San Francisco, Cal., Lighting Fixtures, June 10.

Edward F. Caldwell & Co., 36 W. 15th street, New York City.

Mitchell-Vance Co., 836 Broadway, New York City.

Wahle-Phillips Co., 551 W. 52nd street, New York City.

R. Williamson & Co., 88 W. Washington street, Chicago, Ill.

Stirling Bronze Co., 109 W. 25th street, New York City.

David J. Braun Mfg. Co., Washington and Union streets, Chicago, Ill.

Edward Schroeder, 200 5th avenue, New York City.

Frank Adam Electric Co., 904 Pine street, St. Louis, Mo.

Giese Manufacturing Co., Philadelphia, Pa.

Horn & Brannan Manufacturing Co., 427 N. Broad street, Philadelphia, Pa.

Gaites, Peace & Co., 661 Manhattan avenue, Brooklyn, N. Y.

Minnesota Chandeliers Co., 371 Jackson street, St. Paul, Minn.

Enos & Watkins, 36 W. 37th street, New York City.

Rivers Brass & Bronze Co., 332 7th avenue, New York City.

Harter Manufacturing Co., 1136 W. Austin avenue, Chicago, Ill.

Gas Fixture & Brass Co., High avenue and E. 4th street, Cleveland, Ohio.

F. Storsberg Co., 20 Atlantic street, Newark, N. J.

Wilson-Maitman Electric Co., 30 S. Charles street, Baltimore, Md.

The Home Light Co. of America, 1955 Park avenue, New York City.

Reading Chandelier Works, 503 Penn street, Reading, Pa.

Cassidy & Son Manufacturing Co., 133 W. 23rd street, New York City.

-HALLS & SOCIETY BLDGS-**Contracts Awarded.**

ALAMEDA, ALAMEDA CO., CAL.—Lodge hall, 2 story and base, frame, \$13,000. Architect, William Dufour.

2326 Santa Clara avenue, Alameda. Owners, Eagles' Hall Association. Contractors, Delaney & Randlett.

2302 Central avenue, Alameda. Contract price, \$13,000.

HOSPITALS

SAN FRANCISCO—Hospital addition, 5 story and base. Class A construction. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford University. The present Lane Hospital, located on Webster street between Clay and Sacramento, will be enlarged by the construction of a five-story addition. The new portion of the building will contain wards, private rooms and lecture rooms. Construction will be fireproof with a complete steel frame and brick exterior walls. Interior will be finished in pine and metal. Modern hospital plumbing and fixtures will be installed. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for during the present month.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$30,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Mission street between 17th and 18th streets, and will cover a considerable ground area. There will be stores on the first floor and about 65 guest rooms on the upper floors. Interior will be finished in pine throughout. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Hotel, 15 story and base, Class A construction, \$190,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, J. Sokolov. The building will be erected on the west side of Powell street, 90 feet north of Post, and will have a frontage of 46 feet and a depth of 80 feet. Construction will be fireproof throughout with a complete steel frame, brick exterior walls and hollow tile interior partitions. Plans provide for a total of 140 guest rooms and 140 baths. Interior finish will be of pine and hardwood. There will be elevator service, vacuum cleaning, hot water supply and steam heat. Exterior will be faced with pressed brick and terra cotta. Bids are now being taken on the structural steel and other parts of the work will be figured within a week or ten days.

SAN FRANCISCO—Hotel, 6 story and base, brick and steel, \$50,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Taylor street near Sutter, and will contain in the neighborhood of 120 guest rooms, all of which will have private baths. Interior will be finished in pine and hardwoods. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. Entrance will be finished in marble. Some ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

SAN FRANCISCO—Hotel, 6 story and base, Class C construction, \$40,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Dr. F. C. Keck. The building will be erected at the corner of O'Farrell and Leavenworth streets, and has been designed to contain 80 rooms, all of which will have private baths. Interior will be finished in pine and hardwood. There will be steam heat, elevator service and a hot water system. There will be one store besides the hotel lobby on the first floor. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are nearly ready for figures and bids will be called for within a week.

SAN FRANCISCO—Hotel, 5 story and base, Class C construction. Cost not stated. Architect, A. W. Burgren, Holbrook Bldg., S. F. Owner's name withheld. The building will be erected on Jones street near Leavenworth, covering an area of 45 by 120 feet. There will be a total of 80 guest rooms and 40 baths. Interior finish will be of

pine throughout. Plans provide for steam heat, elevator service and a hot water system. Bath rooms will have tile wainscot and composition floors. Some ornamental plaster will be used. Exterior of the building will be faced with pressed brick. Plans will be ready for figures within a week.

SAN FRANCISCO—Hotel, 7 story and base, Class C construction, \$75,000. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Ellis street east of Mason, having a frontage of 52 feet and a depth of 100 feet. There will be a total of 84 guest rooms and 70 baths. Interior will be finished in pine and hardwood with some ornamental plaster in the lobby. There will be steam heat, elevator service, hot water system, vacuum cleaning, metal window sash and frames. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for shortly.

ARCATA, HUMBOLDT CO., CAL.—Hotel, 4 story and base, brick and steel, \$50,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Arcata Hotel Co. The building will be erected on one of the most important business corners and will be arranged for stores, hotel office, lobby and public dining room on the first floor. Upper floors will contain 80 guest rooms and a number of public and private baths. Interior will be finished in pine throughout. There will be steam heat, elevator service and a hot water supply. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will close on June 12th.

RAILROAD CONST., STATIONS AND EQUIPMENT.

Contracts Awarded.

SAN DIEGO, CAL.—Railroad station, 1 and 2 story and base, reinforced concrete, \$210,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Santa Fe Railroad Co. Contractor, W. Simpson, San Diego. Contract price, \$210,000.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Exposition Natatorium, 1 story, frame and plaster, \$14,000 to \$15,000. Architect, Carl Werner, Phelan Bldg., S. F. Owners, Neptune Amusement Co., Monadnock Bldg. The building will be erected in the Concessions Division of the Exposition Grounds and will cover an area of 90 by 120 feet. There will be a large auditorium seating over 1,000 people, swimming tanks of tile, the largest of which will be 50 by 60 feet. Plans provide for a complete steam heating system and special water filters. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and out for figures. Bids will be opened on June 12th. Plans and specifications can be secured from the architect.

SAN FRANCISCO—Exhibit building, 1 story, frame and plaster. Cost not stated. Architect, C. W. Dickey, Central Bldg., Oakland. Owners, Territory of Hawaii. The building has been men-

tioned here a number of times before when the architect was first commissioned to prepare plans. The style of architecture will typify the country. Interior of the building has been arranged for display rooms and reception hall. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Exhibit building, 1 story, frame and plaster. Cost not stated. Architect, M. E. Metzinger, Dayton, Ohio. Owners, State of Ohio. Plans for the building which will be constructed for the State of Ohio have been completed and forwarded to this city for figures. Plans can be secured from either the Director of Works, Service Bldg., or from the Commissioner, D. B. Torpey, who is now at the Palace Hotel. The building has been designed for display space and reception rooms. Exterior will be covered with cement plaster on metal lath. Bids will be opened on June 4th.

Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL—Residence, 2 story and base, frame, \$3,000. Architect, George Anderson, 6046 Lawton avenue, Oakland. Owner, T. Anderson, 6046 Lawton avenue, Oakland. The dwelling has been designed for seven-room house with bath and sleeping porch and will be erected on Lawton avenue near Gray. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are com-

plete and the work will be done by Day Labor.

OAKLAND, CAL—Residence, 2 story and base, frame, \$4,000. Architect, Frederick Soderberg, Union Savings Bank Bldg., Oakland. Owner, Charles H. Burman. The dwelling will be erected on Mandana Blvd. near Paloma, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Hardwood and inlaid floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and floors, and will be equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, William A. Le Baron, 1029 45th avenue, Oakland. These two houses will be erected on Wentworth avenue near 54th avenue, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

PIEDMONT, ALABAMA CO., CAL—Residence, 1 story, attic and base, frame, \$10,000. Architect, Albert Parr, Foxcroft Bldg., S. F. Owner, Edgar H. Vance. The dwelling will be erected on Blair avenue between Highland and Bonita, and has been designed to contain ten rooms, several baths and a sleeping porch. A garage will also be erected on the lot. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room, library and den. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will be finished in tile and will have showers. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

PIEDMONT, ALABAMA CO., CAL—Residence, 1½ story, attic and base, frame, \$12,000. Architects, Milwan Bros., Delger Bldg., Oakland. Owner, Mrs. Stelle. The dwelling has been designed for a ten-room house with three baths and sleeping porch. The owner has a large lot on Park Way at the corner of Monte avenue. A garage will be erected in the rear. Interior will be finished in pine and hardwoods with hardwood and inlaid floors in the principal rooms. Plans provide for a central heating system, probably warm air, a vacuum cleaning system, open fire places and automatic water heaters. Bath rooms will have tile floors and wainscot and will be equipped with showers. Tile will also be used in the kitchen. Exterior of the dwelling will be covered with shingles. Plans are being prepared.

BERKELEY, ALABAMA CO., CAL—Residence, 2 story and base, concrete and steel, \$10,000. Architect, none.

Owner, S. A. Buchanan, 2947 Magnolia street, Berkeley. The dwelling will be erected at the northwest corner of Hillgard and La Verde, and has been designed to contain seven rooms and bath. There will be reinforced concrete walls and roof slabs and steel beams. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 1 story and base, frame, \$10,000. Architect, Samuel Arnold, Sharon Bldg., S. F. Owner, Z. P. Smith. The dwelling will cover an area of 48 by 70 feet with a wing in which will be a large art gallery 24 by 47 feet. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will be finished in tile and equipped with showers. A private garage will be erected in the rear of the lot. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for within a week.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Kruse. The dwelling will be erected in Thousand Oaks, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans have been revised and new figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. The following Day Labor jobs are reported as about to be started in San Jose: A. De Smet, 398 North 11th street, five-room cottage; F. O. Nelson, 249 South 13th street, six-room cottage; John Harter, East 12th street, five-room cottage; John Waihei, 180 North 12th street, two-room addition, and 1 Santaro, southwest Virgil and Locust avenue, 2 story store and flat. Materials are now being purchased.

WATSONVILLE, SANTA CRUZ CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, W. H. Weeks, 75 Post street, S. F. Owner, Roy Eaton. The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior

of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

WATSONVILLE, SANTA CRUZ CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owner, Dr. Wayland. The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Showers will be used in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

PALO ALTO, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Haehl. The dwelling will contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some elm. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot and will be equipped with a shower. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

TOLENSA, SOLANO CO., CAL.—Residence, 1 story and base, frame, \$2,000. Architect, O. B. Evans, 2567 Mission street, S. F. Owner, C. Anderson. The dwelling has been designed for a six-room house with bath and will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. A large open fire place will be used in the living room. Mantels will be of tile. An automatic water heater is specified. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and the work is now out for figures.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, hollow tile construction, \$20,000. Architects, Richards-Neustadt Co. Wright and Callender Bldg., L. A. Owner, Mrs. E. M. Neustadt. The dwelling will contain twelve rooms, three baths and sleeping porch. Interior will be finished in pine, hardwoods and white enamel. Hardwood and inlaid floors will be used in the principal rooms. Plans provide for steam heat and a hot water system. Vacuum cleaning is also specified. Open fire places will be used. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be faced with cement plaster. Plans are complete and the work will be carried out by the Richards-Neustadt Co., Wright and Callender Bldg.,

Contracts Awarded.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and offices, 2 story and base. Class C construction, \$15,000. Architect, C. E. Gottschalk. Phelan Bldg., S. F. Owner, James D. Phelan. The building will be erected on the north side of Sutter street east of Powell, and will contain one store on the first floor. Upper floor will be arranged for offices. Foundations and walls are designed heavy enough to carry additional stories. Interior finish will be of pine and hardwood. A cement floor will be used on the first floor. There will be patent store fronts. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

SAN FRANCISCO—Store fixtures. Cost not stated. Architect, William H. Crim, Jr., 125 Kearny street, S. F. Owners name withheld. Plans are now being prepared for elaborate store fixtures for a new drug store which is to be opened in the Physicians' and Surgeons' Building at the corner of Powell and Sutter street. The work will require marble, tile, cabinet work, hardwood interior finish, ornamental plaster and art glass. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Stores, 1 story and base. Class C construction, \$10,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Waterfront Realty Co. Plans have been completed for a building to be erected at the corner of Clay and East streets. There will be six stores. Interiors will be finished in pine throughout. Patent store fronts, marble wainscot and plate glass windows are specified. Exterior will be faced with pressed brick. Bids have been taken and a contract will be awarded in a few days.

HUGHSON, STANISLAUS CO., CAL.—Stores, 1 story and base, brick, \$6,000. Architect, W. H. Weeks, 75 Post street, S. F. Owner, George A. Kennedy. The building will contain two modern stores. Interior finish will be of pine and redwood. Plans provide for plate glass display windows and patent store fronts. A marble base will be used. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

PORTLAND, ORE.—Stores and offices, 4 story and base. Class A construction, \$100,000. Architect, Aaron H. Gould, Henry Bldg., Portland. Owners, Ferrell Investment Co., Contractors, Boylston-Arnold Co., Panama Bldg., Portland. Contract price, \$100,000.

THEATRES.

FRESNO, FRESNO CO., CAL.—Theatre, \$50,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, T. C. White. The building will be erected on a corner of 1 street and will be fireproof throughout with a complete steel frame reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwoods and metal. Plans provide for steam heat, a modern system of ventilation and vacuum cleaning. The first floor will contain the theatre and several stores, while the upper floors will be arranged for modern offices. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

OAKLAND, CAL.—Theatre, 2 story and base. Class A construction, \$50,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Roger Colt. The building will be class A throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior will be finished in pine, hardwoods and metal trim. Plans provide for a steam heating system, vacuum cleaning and modern ventilation. There will be one store besides the theatre on the first floor. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and the architect is now taking figures on the work.

FREIGHT LIFT AND PUMP PLANT—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals for furnishing and installing this office at 3 o'clock p. m., June 10, 1914, and then opened for miscellaneous changes, hydraulic lift, pumping plant, etc., at the U. S. Indian warehouse at Astoria, Ore., in accordance with specification and drawings, copies of which may be obtained at this office, at the discretion of the supervising architect, O. WENDEROTH, supervising architect.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Monday, June 8, 1914, said bids then and there to be publicly opened and read for furnishing all material, except glass, for the Green House Superstructure of a building to be known as the New Conservatory, State Capitol Park, Sacramento, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Greenhouse Superstructure, State Capitol Park, Sacramento, California." (Signed) W. F. McClure, State Engineer.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., May 2, 1914.—SEALED PROPOSALS will be received at this office until 3 o'clock p. m., June 10, 1914, and then opened for furnishing and installing lighting fixtures in the United States substructure at San Francisco, Cal., in accordance with the specifications and drawings enumerated therein, copies of which may be obtained at this office, at the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

EXPOSITION NATATORIUM—1 story, frame and plaster, \$14,000 to \$15,000. San Francisco, Architect, Carl Werner, Phelan Bldg., S. F. Owners, Neptune Amusement Co., 318 Mondrino Bldg., S. F. The building will be erected in the Concessions Division of the Exposition Grounds, and will cover an area of 90 by 120 feet. There will be a large auditorium seating over 1,000 people, swimming tanks of tile, the largest of which will be 30 by 60 feet. Plans provide for a complete steam heating system and special water filters. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and out for figures. Bids will be opened on June 15th. Plans and specifications can be secured from the architect.

EXHIBIT BUILDING—1 story, frame and plaster. Cost not stated. San Francisco, Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Territory of Hawaii. The building has been mentioned here a number of times before when the architect was first commissioned to prepare plans. The style of architecture will typify the county. Interior of the building has been arranged for display rooms and reception hall. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

EXHIBIT BUILDING—1 story, frame and plaster. Cost not stated. San Francisco, Architect, M. E. Metzinger, Dayton, Ohio. Owners, State of Ohio. Plans for the building which will be constructed for the State of Ohio have been completed and forwarded to this city for figures. Plans can be secured from either the Director of Works, Service Bldg., or from Commissioner D. B. Torrey, who is now at the Palace Hotel. The building has been designed for display space and reception rooms. Exterior will be covered with cement plaster on metal

lath. Bids will be opened on June 4th. **EXHIBIT BUILDING**—2 story, frame and plaster, \$80,000. San Francisco, Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. The following firms have applied for plans and specifications for the Washington State exhibit building from the office of Architect A. F. Heide, 203 Maskey Bldg., S. F. Bids will close at 12 o'clock, noon, June 10th. Bids should be at Mr. Heide's office on or before June 6th, so same can be forwarded to Seattle: W. W. Hayes, L. A. Williams, Northwestern Construction Co., F. L. Hanson, Monson Bros, Larsen & Sampson, Knowles & Reichley, Lester H. Stock, J. L. Brown, J. Monk, J. Hannah, Foster-Vogt, Van Sant Houghton Co., Murphy-Brooks Co., Pierre Zucco Co.

APARTMENT HOUSE—2 story and base, frame, \$16,000. San Francisco, Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaughy. The building will be erected at the corner of Army and Serpentine streets, and has been designed to contain a number of two and three room suites. All apartments will have wall beds and private bath rooms. There will be a central heating system and hot water supply. Bath rooms will have composition floors and tile wainscot. Interior will be finished in pine and redwood. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$20,000. San Francisco, Architect, L. M. Hausman, Sharon Bldg., S. F. Owner, J. S. Fournier. The building will be erected on the south side of O'Farrell street east of Jones, covering an area of 22½ by 60½ feet. There will be nine apartments of two and three rooms. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, elevator service and a hot water supply. All suites

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., May 2, 1914.—SEALED PROPOSALS will be opened in this office at 3 p. m., June 18, 1914, for the construction complete (including mechanical equipment, interior lighting fixtures and approaches) of the United States post office at Hanford, Cal. The building is one-story, with a mezzanine and basement, with a ground area of approximately 4,515 square feet; stone, stucco, and terra cotta facing; composition and the roof of first floor of fireproof construction. Drawings and specifications may be obtained from the custodian of site at Hanford, Cal., or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken under advisement. A contract will be awarded shortly.

APARTMENT HOUSE—3 story and base, frame, \$10,000, San Francisco. Architect, E. P. Antonovich, 333 Kearny street, S. F. Owner, W. E. Trefts. The building will be erected at the corner of Green and Steiner streets, and has been designed to contain suites of two and three rooms with wall beds and private bath rooms. Interior finish will be of pine, redwood and elm panels. Some oak floors will be used. There will be a central heating system and hot water supply. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Plans are complete and figures are being taken.

APARTMENT HOUSE—6 story and base, Class C construction. Cost not stated. San Francisco. Architect, J. R. Miller, Lick Bldg., S. F. Owner's name withheld. The building will be erected on Ellis street between Jones and Leavenworth. There will be a number of suites arranged in two, three and four rooms. Interior finish will be of pine with elm panels and some oak floors. Plans provide for steam heat, elevator service, hot water system and vacuum cleaning. All suites will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures have been taken under advisement. An award of contract will be made this week.

APARTMENT HOUSE—3 story and base, frame, \$20,000, San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected in the southern part of the city, and has been designed to contain 21 modern apartments of two and three rooms with private baths and wall beds. Interiors will be finished in pine and redwood. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, frame, \$10,000, San Francisco. Architect, E. P. Antonovich, 333 Kearny street, S. F. Owner, F. J. Clark. The building will be erected on the east side of Lapidge street near 18th, and will contain six suites of three and four rooms. Interior finish will be of pine throughout with some hardwood floors. All suites will have wall beds and private bath rooms. Plans provide for a central heating system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Own-

er, Mrs. C. Dorn. The building will be erected on the east side of Pierce street south of Page, and has been designed to contain four suites of four rooms and bath each. Interior will be finished in pine, redwood and elm panels. Some hardwood floors will be used. Plans provide for a hot water system. Bath rooms will be finished in tile and will have composition floors. All suites will have wall beds and private bath rooms. Exterior of the building will be covered with shiplap and pressed brick veneer. Plans are complete and figures are now being taken.

APARTMENT HOUSES—2, 3 story and base, frame, \$15,000, San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Carl and Theo Rulis. These two buildings will be erected on the east side of Franklin street south of Clay. Each building has been designed to contain six suites of four rooms and bath. Each building will have a frontage of 30 feet and a depth of 55 feet. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water system. Portable vacuum cleaners will be installed. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the buildings will be covered with cement plaster. Plans are nearly complete and figures will be taken this week.

RESIDENCE—2 story and base, frame, \$7,500, San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Dr. Louis Gross. The dwelling will be erected in Jordan Park, and has been designed to contain eight rooms, three baths and sleeping porch. A garage will also be erected on the rear of the lot. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame, \$20,000. Oakland, Cal. Architect, Joseph Cinen. 45 Kearny street, S. F. Owner's name withheld. This building has been mentioned here a number of times before. Plans have been revised and figures are again being taken. The building will be erected at the corner of Perkins and Grand avenue and will contain a number of two and three room suites. There will be steam heat, a hot water supply and vacuum cleaners. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$20,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected at the corner of Market and 11th streets, and will contain a number of two and three room suites. Interiors will be finished in pine throughout. Plans provide for steam heat, a hot water supply and portable vacuum cleaners. Bath rooms will have tile wainscot and composition floors. All suites will have wall beds and private bath rooms. There will be stores on the first floor. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architects.

RESIDENCE—2 story and base, frame, \$3,000. Oakland, Cal. Architect, George Anderson, 6046 Lawton avenue, Oakland. Owner, T. Anderson, 6046 Lawton avenue, Oakland. The dwelling has been designed for a seven room house with bath and sleeping porch. George Anderson, 6046 Lawton avenue near Gray. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, Frederick Soderberg, Union Savings Bank Bldg., Oakland. Owner, Charles H. Burman. The dwelling will be erected on Mandana Boulevard near Paloma, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Hardwood and inlaid floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have the wainscot and floors and will be equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. Oakland, Cal. Architect, none. Owner, William A. Le Baron, 1629 45th avenue, Oakland. These two houses will be erected on Wentworth avenue near 51th avenue,

and each has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—1 story, attic and base, frame, \$10,000. Piedmont, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Edgar L. Vance. The dwelling will be erected on Blair avenue between Highland and Benita, and has been designed to contain ten rooms, several baths and a sleeping porch. A garage will also be erected on the lot. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room, library and den. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will be finished in tile and will have showers. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—1 1/2 story, attic and base, frame, \$12,000. Piedmont, Alameda Co., Cal. Architects, Milwan Bros., Delger Bldg., Oakland. Owner, Mrs. Stelle. The dwelling has been designed for a ten-room house with three baths and sleeping porch. The owner has a large lot on Park Way at the corner of Morrie avenue. A garage will be erected in the rear. Interior will be finished in pine and hardwoods with hardwood and inlaid floors in the principal rooms. Plans provide for a central heating system, probably warm air, a vacuum cleaning system, open fire places and automatic water heaters. Bath rooms will have tile floors and wainscot and will be equipped with showers. Tile will also be used in the kitchen. Exterior of the dwelling will be covered with shingles. Plans are being prepared.

RESIDENCE—2 story and base, concrete and steel, \$10,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, S. A. Buchanan, 2947 Magnolia street, Berkeley. The dwelling will be erected at the northwest corner of Hillgard and La Verde, and has been designed to contain seven rooms and bath. There will be reinforced concrete walls and roof slabs and steel beams. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—1 story and base, frame, \$10,000. Piedmont, Alameda Co., Cal. Architect, Samuel Arnold, Sharon Bldg., S. F. Owner, Z. P. Smith. The dwelling proper will cover an area of 48 by 70 feet with a wing in which will be a large art gallery 21 by 47 feet. Interior finish will be of pine and hardwood with hardwood floors in

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and base, frame, \$15,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. L. Lamb, 1126 Poplar street, Oakland. The building will be erected on the east side of College avenue south of Haste, and has been designed to contain two, three and four room suites with private baths and wall beds. Interior finish will be largely of pine with some elm panels and hardwood floors. There will be steam heat, a hot water supply and vacuum cleaning system. Bath rooms will be finished in tile and will have composition floors. Entrance will be of marble and tile. Exterior of the building will

Plans are being prepared and figures will be called for within a week.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Smith, First National Bank Bldg., Berkeley. Owner, E. K. Kruse. The dwelling will be erected in Thousand Oaks, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans have

been revised and new figures are being taken.

THEATRE—2 story and base, Class A construction, \$80,000. Oakland, Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Roger Coit. The building will be class A throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior will be finished in pine, hardwoods and metal trim. Plans provide for a steam heating system, vacuum cleaning and modern ventilation. There will be one store besides the theatre on the first floor. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and the architect is now taking figures on the work.

GARAGE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, J. H. Fuller. The building will be erected on Bellevue avenue and will contain storage space for three machines. Interior finish will be of pine. Exterior will be covered with cement plaster on

metal lath. Plans are complete and figures are being taken.

COLLEGE TENNIS COURTS—Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owners, Regents of the University of California. Bids are now being called for constructing the Hearst Tennis Courts on the grounds of the University of California at Berkeley. Plans and specifications can be secured from the office of the Comptroller at Berkeley. Bids must be in the hands of the Regents of the University not later than 1 o'clock a. m. on June 11th. An official proposal appears in another column of this issue.

Contracts Awarded.

LODGE HALL—2 story and base, frame, \$12,000. Alameda, Alameda Co., Cal. Architect, William Dufour, 2326 Santa Clara avenue, Alameda. Owners, Eagles' Hall Association. Contractors, Delaney & Randlett, 2303 Central avenue, Alameda. Contract price, \$13,000.

Building Contracts Awarded.

SAN JOSE AND THE SANTA CLARA VALLEY

RESIDENCES—1 and 2 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. The following Day Labor jobs are reported as about to be started in San Jose: A. De Smet, 389 North 11th street, five-room cottage; F. O. Nelson, 249 South 15th street, six-room cottage; John Harter, East 12th street, five-room cottage; John Wahl, 180 North 12th street, two-room addition, and L. Santoro, southwest Virginia and Locust avenue, 2 story store and flat. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000, Watsonville, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owner, Roy Eaton. The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Watsonville, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owner, Dr. Wayland. The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Showers will be used in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Palo Alto, Santa Clara Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Haehl. The dwelling will contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some elm. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot and will be equipped with a shower. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

COLUMBARIUM—1 story and base, reinforced concrete, \$100,000, Mt. Olivet, San Mateo Co., Cal. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Mt. Olivet Cemetery. The building has been mentioned here before when the architect was first commissioned to prepare plans. The structure will be fireproof throughout. Interior will be finished in Onen stone and marble. Special plumbing fixtures, lighting fixtures and heating will be installed. Marble and tile will be used extensively. Exterior of the building will be faced with cement plaster. Plans are now complete and figures will be taken within a week or ten days.

SCHOOL—2 story and base, reinforced concrete, \$80,000, Santa Cruz, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Santa Cruz School District. The building has been designed to contain fourteen class rooms, assembly hall seating 600 people, domestic science and manual training departments and principal's office. Interior finish will be of pine and hardwood with maple floors in the class rooms. Plans provide for steam heat, oil burning system, program clocks and vacuum cleaning system. Exterior will be faced with cement plaster. Working drawings will be complete and ready for figures within ten days.

LOS ANGELES AND SOUTH-ERN CALIFORNIA.

RESIDENCE—2 story and base, hollow tile construction, \$20,000. Pasadena, Los Angeles Co., Cal. Architects, Richards-Neustadt Co., Wright and Callender Bldg., L. A. Owner, Mrs. E. M. Neustadt. The dwelling will contain twelve rooms, three baths and sleeping porch. Interior will be finished in pine, hardwoods and white enamel. Hardwood and inlaid floors will be used in the principal rooms. Plans provide for steam heat and a hot water system. Vacuum cleaning is also specified. Open fire places will be used. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be faced with cement plaster. Plans are complete and the work will be carried out by the Richards-Neustadt Co., Wright and Callender Bldg., SCHOOL—1 story and base, reinforced concrete, \$50,000. Holtville, Imperial Co., Cal. Architects, Allison

& Allison, Hibernian Bldg., L. A. Owners, Holtville School District. The building has been designed in the Mission style and will contain twelve class rooms, assembly hall and principal's office. Interior will be finished in pine throughout. There will be a modern system of heating and ventilating. Exterior of the building will be covered with cement plaster. A red clay tile roof will be used. Plans are now being prepared.

SCHOOLS—4, 1 and 2 story, brick, \$100,000. Alhambra, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Alhambra School District. An eight-room building will be erected at Ramona Acres, a four-room building on Fair Oaks avenue, and three-room primary buildings at the Garfield avenue and Maruengo avenue school sites. The Ramona Acres and Fair Oaks buildings will have concrete foundations, hollow tile exterior walls and interior partitions, pine joists and floors, modern school plumbing, heating plant, cement plaster exterior and tile roof. The primary buildings will have brick walls, hollow tile partitions, tile roof and heating plant. Plans are being prepared.

STORES AND LOFTS—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Shirley C. Ward. The building will be erected at the northwest corner of 7th and Grand streets, covering an area of 100 by 100 feet. Construction will be fireproof throughout with a complete steel frame, reinforced concrete floors, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for steam heat, elevator service and vacuum cleaning. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

STORES AND OFFICES—7 story and base, reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Citizens' National Bank of Pasadena. This work has been mentioned here when the architects were first instructed to prepare plans. The building will be erected on a corner site and will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. The bank will occupy the entire first floor and upper floors will be used for offices. Interior finish will be of pine and hardwood with ornamental plaster in the banking rooms. There will be steam heat, elevator service and vacuum cleaning. Special bank fixtures, vaults and safe deposit vaults will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

APARTMENT HOUSE—3 story and base. Class C construction, \$36,000. Santa Monica, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins, Contractors. The Broadway Construction Co., Security Bldg., L. A. Contract price, \$36,000.

RAILROAD STATION—1 and 2 story and base, reinforced concrete, \$210,000

San Diego, Cal. Architects, Bakewell Brown, 251 Kearny street, S. F. Owners, Santa Fe Railroad Co. Contractor, W. Simpson, San Diego. Contract price, \$210,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—3 story and base, brick, \$28,000. Portland, Ore. Architect, none. Owner, H. O. Triplett, 510 Lewis Bldg., Portland. The building will be erected on Harrison street between 11th and 12th streets, covering an area of 35 by 100 feet. There will be a total of 18 apartments of two and three rooms. Interior finish will be of pine and elm with some hardwood floors. Plans provide for steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by lay labor. Materials are now being purchased.

Contracts Awarded.

STORES AND OFFICES—4 story and base. Class A construction, \$100,000. Portland, Ore. Architect, Aaron H. Gould, Henry Bldg., Portland. Owners, Ferrell Investment Co., Contractors, Boyajohn-Arnold Co., Panama Bldg., Portland. Contract price, \$100,000.

SEATTLE AND WASHINGTON.

COURT HOUSE—2 story and base, reinforced concrete, \$50,000. Port Angeles, Clallam Co., Wash. Architect's name not given. Owners, Clallam County. The building will be of fireproof construction with reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. Besides the offices for the various county officers the building will contain a large meeting room for the supervisors, two court rooms and the county jail. Interior finish will be of pine and hardwood. Fireproof vaults will be installed. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RESIDENCE—2 story and base, brick and terra cotta, \$15,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, Albert J. Rhodes. The dwelling will be erected on 10th avenue near Howe, and has been designed to contain ten rooms and three baths. Interior finish will be of pine and hardwood. Plans provide for a hot water heating system, open fire places and tile mantels. Bath rooms will be finished in tile and equipped with showers. There will be a vacuum cleaning system. Exterior of the house will be faced with pressed brick. Plans are nearly complete and bids will be called for about the Diminon Government, is capitaliz-

Contracts Awarded.

APARTMENT HOUSE—5 story and base. Class A construction, \$150,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, D. R. McKay. Contractors, W. T. Butler Contracting Co., Central Bldg., Seattle. Contract price, \$150,000.

HARDENING CONCRETE FLOORS.

[Consul Albert Halstead, Birmingham.]

The Chemical Trade Journal for April 15 contains the following:

A new hardening material for the surface of concrete floors contains 20 per cent of iron dust or iron flour. It is added to the dry cement in the proportion of 15 to 25 pounds to each 100 used with two parts of sand. This pounds and one part of the mixture is preparation is applied as a top coat to a thickness of $\frac{1}{2}$ to 1 inch. It forms a hard and durable floor, claimed to be waterproof and not slippery, and is also used for making new concrete adhere to old in repairing.

FOREST FIRES HARM SOIL FERTILITY.

A definite relation between the amount of humus, or vegetable matter in the soil, and its crop-producing power as shown by yields of corn, is given in figures just issued by the department of agriculture. The department therefore advocates the use of various methods to introduce the required humus into the soil.

Experts of the forest service states that the soils of the whole country, and particularly of the south, have lost and are losing immense amounts of this source of soil fertility through forest fires which apparently do little immediate damage but rob the soil of accumulations of humus. In many parts of the southeast, land is being cleared for farming, and where such forest land has not been burned there is a large percentage of vegetable matter which provides considerable fertility and a good texture. Moreover, this soil has a greater capacity to absorb and retain moisture, and thus is less likely to be washed and gullied under heavy rains. For these reasons, leaving out of account the damage to standing timber, the department's authorities are agreed that fire should be rigidly kept out of woodlands.

CHROMIUM IRON ORE INDUSTRY EXPANDING.

California Product Increased 27 Per Cent in 1913.

Many years ago the chromite iron ore industry centered in the Atlantic coast States, especially Maryland and Pennsylvania, where much of this ore was used in the manufacture of chemicals; but in later years the only chrome ore produced in the United States has come from the Pacific coast. According to J. S. Diller, of the United States Geological Survey, in a report on the production of chromic iron ore in 1913, from "Mineral Resources," California has been the only producing State for nearly a decade. The marketed product in 1912 was 261 long tons, valued at \$2,753, a gain of nearly 70 per cent over the production of 1911, but in 1913 the sales amounted to 255 long tons, valued at \$2,254, a gain of nearly 27 per cent in quantity compared with the output of 1912. Practically the whole output in 1913 came from one mine near Dunsmuir, in Shasta County.

Chromite is one of the most difficult minerals to fuse. It will stand a temperature of about 2,180 degrees C., and this marked resistance to heat makes it

valuable for refractory purposes, furnace hearths, chrome bricks for lining furnaces, etc. A large amount is consumed in the manufacture of pigments, dyes, and various chemical compounds, as well as for tanning, in which it imparts to the leather softness and durability under exposure to dampness.

The most rapidly growing use of chromite is metallurgical, in the manufacture of steel alloys. Chromium gives to steel a marked degree of hardness and if added in the proper proportion does not produce brittleness. Chromium steel alone or alloyed with tungsten or molybdenum is used for making high-speed tools. It is also used for armor plates and armor-piercing projectiles, and for these purposes it is generally alloyed with nickel, vanadium, or manganese.

LANDS IN LASSEN FOREST OPENED TO HOMESTEAD ENTRY.

The Secretary of Agriculture has approved the reports of experts of the Forest Service and of the Bureau of Soils on the Hat Creek land classification project within the Lassen National Forest. The project embraces an area of 91,675 acres, of which 25,246 acres are in private ownership. An area of 58,274 acres was classified as non-agricultural, and the final classification as to 6,745 acres was suspended. This area will be re-classified after the sale and removal of the timber in order to determine what part of it is agricultural.

An area of 1,410 acres was found to be chiefly valuable for agriculture under present conditions and will be listed with the Department of the Interior for restoration to entry under the Forest Homestead Law at once. These lands are in Township 32 north, 4 and 5 east; 33 north, 5 east; 34 north, 4 and 5 east; 36 north, 5 east.

No information can be given at the present time as to when the lands will be restored to entry. When they are restored to entry notice to that effect will be posted in the Sacramento U. S. Land Office and advertised in the local newspapers.

FOREST FIRE SEASON GETS EARLY START.

The first reports of forest fires have begun to come in to Washington from the national forests, and they indicate to the federal officers an early start of the fire season with unfavorable weather conditions from the very beginning. In the northwest there was less snow on the mountains at the end of the winter than for many years past. Railroad rights of way which were last year deep in snow are reported clear now and dry enough to burn readily.

From the Canadian border to Mexico the reports are similar, and there have already been extensive fires in California and Arizona.

The chief forester reports, however, that the fire-fighting forces of the Service are organized better than ever before, particularly in respect to the fire detection system of lookout stations. By means of these stations fires are reported quickly and accurately so that the control may be on the ground at the earliest possible moment.

In those states where the greatest danger threatens, special efforts are being made by the government fore-

sters and by cooperative fire protection associations organized among timberland owners to secure care with fire on the part of campers, prospectors, loggers, and by railroads. The northwest forestry and conservation association with headquarters at Portland, Oregon, is one of the leaders in this campaign.

LARGE CHROMIC IRON ORE DEPOSITS IN CALIFORNIA.

Deposits of chromic iron ore occur in Maryland and the adjacent portion of Pennsylvania, in North Carolina, and in Wyoming, but the only deposits operated in the United States within recent years are in California. Numerous deposits have been reported in 32 counties of that State according to the United States Geological Survey, and many of them could be worked if the demand for the ore and its value warranted exploitation. The available deposits, with much in reserve, largely exceed the local demand for refractory material in a field extending as far east as the Rocky Mountains.

The production of chromic iron ore in the eastern portion of the United States, where the demand is greatest, ceased years ago. The supply is now obtained wholly by importation, mainly from South Africa. On the other hand, the Pacific coast supplies all its own demands by home production. Possibly with the completion of the Panama Canal the California product will also invade eastern markets.

Copies of the report on chromic iron ore may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

NEW USES FOR ASBESTOS-CEMENT SHEETS.

Consul W. Henry Robertson, of Manchester, reports that the daily press of that English city recently contained an article relating to the growing demand for asbestos-cement sheets. The journal referred to mentioned, among the purposes for which this new fire-proof and moisture-proof material has already been employed, its use (both inside and outside) in erecting bungalows, tuberculosis sanatoria, army service depots, barracks, hangars, schools, shooting boxes and motion-picture houses, while several vessels now in service have the berths and saloon walls and ceilings lined with these sheets.

CIRCULAR GIVES FOREST FACTS.

Striking facts regarding our forest resources, their value and their waste, are condensed in an eight-page illustrated circular of the American forestry association just issued. The lumber industry is said to employ 735,000 people, to whom are paid annually \$367,000,000 in wages, the worth of products being \$1,250,000,000. The forests of the country cover 550,000,000 acres.

An average of 70 human lives are sacrificed annually in forest fires, says the circular, and a loss occurs of \$25,000,000, damage from insects and tree diseases, which follow fire, costs each year \$50,000,000. The cost of destruction resulting from floods is not estimated, but is given as "countless millions."

But the circular expresses hope more than pessimism. As well as the colored pictures showing the forest fire, the effects of the fire, and the damage caused by floods, it shows also forests planted and grown under intensive management, and the national forest ranger scouting for fires on the mountain lookout station. The effective patrol here referred to has reduced "forest fire losses to as low as one-tenth of one cent an acre." It is pointed out that by planting forests an annual income could be derived in the country of \$65,000,000; and by preservation treatment upon timber each year \$100,000,000 could be saved.

PLEA FOR THE GOTHIC IN CHURCH ARCHITECTURE.

Secular Influences, Former Church Control and Beauty of the Gothic Style.

H. C. Whitthouse, Architect, Hutton Building, Spokane, Wash.

This is a day and age of restlessness, haste and, incidentally, of new styles and fads. In secular affairs one architectural style follows another and chaos seems the result. Where does the church stand amid this confusion of styles? Is she uninfluenced by these fads and fancies? No, she has wandered from one to the other and at times seems to be but the echo of secular life. Shall we, in these our most important structures, build for the moment to satisfy a fad that will last probably half a dozen years?

Let us consider the architecture of our churches today: The ecclesiastical art we possess today in architecture, painting and sculpture we owe directly to the church. In the Middle Ages Christianity was the dominant power and the church the dictator—without her art could not have existed. The church reached the high water mark of its supremacy and domination in art in the sixteenth century. Following the decline of power of the church in art came the confusion of many styles, none clearly defined. This has been going on to a greater or less degree ever since. However, there is a wonderful and encouraging improvement in style lately and in some parts of the country we can frankly say that examples of our most recent works in ecclesiastical architecture rival those of the mediæval builders. This is by no means true of every work—only a small percentage. The faulty work today seems but a study of the profiles of mouldings, outlines of arches and details of decorations of the mediæval churches instead of the basic principles underlying the Gothic art.

The restoration of the Gothic in England, after taking root, was weak and lifeless. Forms were copied but principles ignored. Today the churches are consistent; they are based on the true conception of the church and Gothic principles. To be sure, they cannot compare in richness with the older works, but the true spirit is there. We can do no better than this.

As stated before, the church reached the height of its supremacy in the sixteenth century. Up to this time the church had been developing from one Gothic period to another and reached its height in the Perpendicular period. Strange as it may seem, the world to-

day does not possess a single example of ecclesiastical architecture built entirely in this period. The Canterbury cathedral is typical of the English cathedral and the various periods of the Gothic style that most of these structures possess. The east end of Canterbury was completed in the early or Lancet period; the nave and tower were completed in the Perpendicular period.

This period of the styles was the result of years of study and development and when it became ripe for use as a typical church style, it was crushed and utterly swept away. However, the period of the style was perfected and came into unusual use, and its beauty fell like a garment over the cruder Norman and early English cathedrals. It was logical in construction, thoroughly ecclesiastical in feeling and purely rational. There seems no limit to the possibilities of its growth. Here is one reason for the perpetuation of this beautiful style.

But let us consider another point: We must know one thing, and that is that an architectural style cannot be developed from nothing. It must be the result of years of development. Take, for instance, the Greeks: The inspiration for their early works was a motif of simple rounded stone columns and lintels. From this fundamental principle of all building construction they developed a style, adapting it to their needs and uses and in its climax producing the beautiful architecture which the world has perpetuated and adapted through the ages. We cannot, in our architecture, start from the point the Greeks did as we are in advance of this. We are living in an age of far more advanced constructive knowledge. We must pick up the architecture of the Greeks where they left it and apply it to our modern needs and requirements.

Let us consider the last point; the beauty of the Gothic. The Greeks built their temples to house their gods and goddesses. The mediaeval builders built their churches in which to worship one Deity and to hold communion. Compare the long horizontal lines of the Greek temple with the tall perpendicular lines of the Gothic. The Greek temple was a perfect type, and why? They are built beautifully, permanently and wholly for the protection of their idols. The mediaeval builders built their churches in which to worship God. Nearly every line pointed heavenward, towers, pinnacles, arches and all. Lastly, it was the architecture of a Christian church. Let us take up this great and unfinished style, vary it and add what is necessary to perfect it to meet our modern requirements, and complete something which shall be an honest means whereby we glorify God.

NEW TYPES OF BUILDINGS FOR OUR SCHOOLS.

School Architecture in California is a new and handsome booklet just issued. It is intended to help the school trustees of the State in building and improving their school houses.

It was compiled under the direction of State Superintendent Hyatt, by a committee of architects, viz: Lewis P. Hobart, Charles S. Kaiser, J. W. Woodlett, J. J. Donovan and C. H. Cheney. It

contains 64 pages, includes 77 cuts, and has a cover designed by the State Architect's office, showing a typical one-story California school house, with red roof and wide sheltering porches, against a brilliant sunset sky.

The object of the bulletin is to show in graphic form some excellent examples of the different types of school buildings that are being constructed today in California, so as to build up in the minds of the people a distinct ideal of what modern school houses ought to be. Its tendency is toward better conditions for the boys and girls and finer landscapes for the Golden State. — Richmond Record-Herald.

TOWN OF CONCRETE.

Houses Poured in Sections of One Story at a Time.

A small city of concrete houses is being poured at Midland, Pa., by the Pittsburgh Crucible Steel company for its employees. The houses, two stories in height, are of four rooms each and cost complete about \$1,100 each. This includes a charge of \$25 to cover the expense of the forms, which represent and expenditure of about \$3,000.

Clean looking, with white exterior, the houses are plain, but far from unattractive in appearance. Across the front of each home extends a railed concrete porch, from which three steps lead to the lawn. The front door opens directly into the living room 15 by 16½ feet, from which is taken the space which is required for a three foot stairway leading to the upper floor. Back of the living room is a kitchen 15 by 15½ feet. The dividing partition is of solid concrete and contains the chimney, which extends through the roof.

In pouring the house the steel forms for the first floor are set, and that part of the structure is cast as a monolith. When the mixture has set to sufficient strength the molds are removed and used in pouring the second story, which contains two rooms, corresponding in size to those on the lower floor.

The great sanitary advantage of the house lies in the fact that it may be washed like a paved street from roof to doors with a hose.—Exchange.

THE BROOKLYN BRIDGE.

NEW YORK, May 22.—(Bridge) one years ago today Brooklyn Bridge, for a long time the greatest structure that spanned any river, was opened for traffic. The only celebration was the flying of flags from the Manhattan and Brooklyn ends. In its thirty-one years the great suspension bridge had earned close to \$24,000,000 in tolls for the city, according to estimates based on the earnings of \$23,224,573.31 up to one year ago. The greatest source of revenue is from street cars. An average of about 4,000, at revenue of ten cents a car, pass over the bridge every day.—Exchange.

STATE PIPING INSPECTORS EARN GOOD SALARIES.

The California State Civil Service Commission announces an examination for Piping Inspector, to be held in Sacramento, San Francisco and Los Angeles on June 27, 1914, to provide register of eligibles from which to make certification to fill vacancies as they may occur in positions as Piping

Inspector in the service of the State. These positions pay from \$150 to \$200 per month, and call for inspection of contract work or supervision of day labor work in the various State institutions under the direction of the State Department of Engineering.

Applicants must have a thorough knowledge of all kinds of piping and be able to supervise the installation of piping layouts from working drawings.

The examination will include the following subjects: Arithmetic, Reading of Plans, Knowledge of Piping, Report Writing, Training and Experience, and Personality and Fitness.

Application blanks and further information may be secured from the State Civil Service Commission, State Capitol, Sacramento.

Applications must be properly executed and filed with the Commission on or before June 22, 1914.

UNITED STATES CIVIL SERVICE EXAMINATION.

SENIOR HIGHWAY ENGINEER, MALE

(\$2,220 to \$3,000).

HIGHWAY ENGINEER, MALE

(\$1,800 to \$2,100).

June 20, 1914.

The United States Civil Service Commission announces an open competitive examination for senior highway engineer and highway engineer, for men only. From the register of eligibles resulting from this examination certification will be made to fill a large number of vacancies in these positions in the Office of Public Roads, Department of Agriculture, and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The duties of these positions will involve superintending the construction of roads of various types throughout the United States. In addition the employees will be called upon to inspect roads and investigate road building materials, as well as administrative organization, methods of management, etc., in connection for the purpose of reporting upon systems by which the best administration, construction, and maintenance of the country system may be secured. The inspecting of roads locally and giving advice in regard to their improvement, and the giving of addresses at road meetings will also be included as part of the duties of these positions.

Eligibles resulting from this examination will be divided into two grades. The first grade will be designated senior highway engineer, with salaries ranging from \$2,220 to \$3,000 a year. The second grade will be designated highway engineer, with salaries ranging from \$1,800 to \$2,100 a year.

Competitors will not be assembled for examination, but will be rated on the following subjects, which will have the relative weights indicated:

Subjects.	Weights
1. Education, and experience in highway engineering	80
2. Experience in other engineering lines	10
3. Experience in delivering lectures and addressing meetings. .	10

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Editorial Comment.

Building construction in San Francisco for the month of May went along with about an equal pace with the preceding three months, the total of permits granted and contracts filed being \$3,564,959. Of this \$430,992 was for brick and concrete; \$661,263 for frame construction, and \$114,700 for alterations and additions. Also during the month the Panama-Pacific Exposition Company let \$428,314 worth of contracts; \$120,160 for streets and sewers, \$139,623 for State construction and \$84,742 for federal buildings; within the city limits. This total averages with the preceding months of the year, the total for the past five months being as follows:

January, 1914	\$1,928,563
February, 1914	2,331,866
March, 1914	3,507,763
April, 1914	2,795,350
May, 1914	2,564,959
For the month of May for the past ten years the record is as follows:	
May, 1905	\$1,511,625
May, 1906	621,054
May, 1907	4,381,431
May, 1908	3,070,230
May, 1909	3,029,609
May, 1910	2,789,204
May, 1911	2,326,562
May, 1912	3,153,910
May, 1913	2,816,935
May, 1914	2,564,959

It will thus be seen that the record is about the same as last year. For the years succeeding the fire the month of May fouted up pretty good totals. Until 1912 only a record of private construction was kept. Compared to other cities of the country is at least holding its own, so while business is quiet with us it is so every where and we have no cause to complain.

Mr. Lassen is reported to be in eruption. Considering facts of seismic history the past ten or fifteen years have been the most remarkable since history began. More violent earthquakes and eruptions have been chronicled than has ever occurred within an equal time before, but that may be because the means of reporting them are so much more effective.

The geological history of the high Sierra recount many lava flows and eruptions. The present canyon of the mountain streams have been cut through volcanic rock that many times filled their former courses. The mountains from the Tehachapi to Mt. Shasta are dotted with old craters and the mountain lakes are often craters or fissures from which issued the great lava streams that covered the country for thousands of square miles. The basalt cliffs north of Oroville are the lower

terminus of some of the old flows. The drift mines of the mountain counties are the old channels of the rivers before the lava flow obliterated the streams. And it is only natural that in this day we should have some echo of the old and dying activity that in former ages reared the mountain walls and left the snowy peaks that mark the highest points of the Sierra.

The Panama canal is shortly to be opened to the world's commerce. The opening has been hastened by the congestion of freight due to the closing of the Tehuantepec railway on account of the Mexican revolution. Ships of 5000 tons burden can now pass and in all probability the canal will soon be accommodating the necessities of commerce and relieve the congestion of freight at the Isthmus.

Teak Forests in Java cover 1,480,000 acres, and, as the area reafforested is two and a half times as large as the area felled in a given time, this magnificent stock of timber is continually increasing. A pest of the Java teak plantations is alang grass (*Imperata arundinacea*). In order to prevent the incursions of this plant, as hoeing is too expensive, the foresters sow a leguminous plant, *Leucaena glauca*, between the rows of teak seedlings. This chokes the alang, keeps the soil clean, and enriches the soil in humus and nitrogen, and ultimately disappears with the increase of the forest cover.

This is the month of wedding bells and the newspapers are filled with pictures of brides to be. Apropos of this time the following account of the plight of a native of Georgia may be of interest:

Atlanta, Ga., March 14.—State Game Warden Davis was rather startled a day or so ago when he received a hunting license from a north Georgia county, on the back of which the following was written:

"My dere ser:
"I don't want this sorter license. I thot I was a gettin' a Marriage license, sumbody sent me to mr. . . . and sed he wood gimme a license, mandy was so mad when I got back with this here huntin license she woodnt have me. she sed I didn't hav sent anuff to git a marriage license, so she ups and runs of with bill jonson and I am in a hel of a fixt. I wants my munny back, unless this hear license will let me shoote bill johnson.

"yours most truly, sam Jackson."

THERE'S NOTHING TO HOLD HIM BACK.

I hear the Jinglo loudly shout:

"Now, on to Mexico!"

"There are no strings on you," says I.

"So just shut up and go!"

—Tennyson J. Daft.

New Ideas For Municipal Charters--- The Recall.

By Wm. J. Locke.

It is now universally conceded that every modern municipal charter based on either the Commission or Business Manager Plan of Government should contain provisions for exercising the initiative, referendum and recall, so as to provide logical and necessary safeguards against possible abuse of the concentrated power which these systems involve. Direct legislation and the recall have undoubtedly come to stay. When the machinery for their operation has been repaired and properly regulated they will undoubtedly be recognized as most desirable auxiliaries to our system of popular government. How can we consistently praise of government by the people if we deny the right of direct legislation? It would appear most illogical to deny the people's right to do directly those things which they may authorize their representatives to do for them. Would it not be most unreasonable to endow the creature with power which we deny to its creator, or, in other words, to concede the servant more authority than possessed by the master? However, it has been difficult for us to harmonize our ancient ideas of municipal government in a democracy with systems which thus involve the concentration of great power in few hands; in fact, they would have found but little favor in the United States were it not for these provisional safeguards whereby the people reserve to themselves the right to legislate directly whenever they may deem it necessary, and also to dismiss an elected official when for any reason he becomes unsatisfactory. By providing such governmental machinery the danger from the abuse of power is almost eliminated.

Probably the one feature of this new idea in government which has been subjected to the most use and also to the most abuse is the "recall," and as a result it has come in for much criticism. A little investigation of some of the numerous cases in which the recall has been invoked shows that the criticism is justified, and that the method of procedure which has been universally adopted for its exercise is sadly in need of improvement.

In the first place the basis upon which a recall election is founded is unquestionably weak. It rests on a very poor foundation, to-wit: a petition. Those who know anything of the various methods resorted to for obtaining signatures to petitions will undoubtedly admit the truth of this statement. As a result, the average petition is not regarded as a very significant document. The fact that a name appears on a petition is not at all indicative of the real sentiments of the signer, for it is common knowledge that many signatures are obtained under misrepresentation, and others through coercion. Many persons will sign a petition merely to enable the solicitor to earn the few cents which is often paid for each name secured; others will do it to oblige a friend or accommodate a customer, while others again will sign merely to

get rid of a bore. In other words, it has developed that there are many people who may be induced to attach their signature to any kind of a petition, merely because they lack the moral courage to refuse. It is the natural disposition to be accommodating, besides it is the "easiest way," as it avoids explanation or argument. Therefore, I would repeat the statement that a petition is not a very significant document. As a matter of fact, it merely represents so much work on the part of the person or persons who solicited the signatures, nothing more.

Another defect in the present method of exercising the recall lies in the fact that it gives power to the minority which it denies the majority. For instance, a petition containing the signatures of from 15 to 25 per cent of the voters compels the council to call a special election, notwithstanding the fact that perhaps 50 per cent or more of the voters are absolutely opposed to it. This is not right. Those who want an official retained in office should have the same right of petition as those who desire his recall, and if an equal or greater number of voters wish to keep him in office and are opposed to submitting the question to a special election, their wishes should be given as much consideration as those of the others. In the United States, the business of government is conducted on the theory that the majority should rule; therefore, how can we consistently uphold a law that allows the minority to do something which the majority opposes? The signature of a citizen, like his vote, should have no more weight than that of another citizen.

Another serious defect lies in the fact that the present recall laws in California, except those of a few charter cities, impose a great and manifest injustice on the official sought to be recalled, for the reason that it is necessary for him to get a positive majority of all votes cast in order to retain his office, whereas a mere plurality will suffice to elect any of his opponents. The new charter of Los Angeles County contains this defect, and, commenting on the attempted recall of Supervisor Norton, the Los Angeles Express says:

It is one of the anomalies of the recall that the official against whom it is directed alone must receive a majority of the votes cast. In the present case, it is easily conceivable that Norton might receive twice the vote cast for any one of his opponents and yet be recalled and one of those opponents chosen in his stead.

Assume, for example, that 10,000 votes are cast in the approaching election. The issue to be decided is really divided into two parts: First, shall Norton be recalled? Second, if he shall be recalled, who of his five opponents shall be elected to his office? There might be cast 19,500 votes against the recall of Norton and 20,500 in favor of his recall with the result that he would automatically be ousted from his place. Those voting for his recall might so

divide their votes that the leader among the five candidates would receive but 5,500 votes, and yet be elected to his office in face of the fact that 19,500 votes were cast for Norton's retention.

It is essential that a positive majority of all the votes shall be cast for Norton. He alone must receive such a majority. A plurality will suffice to elect any of his opponents in the event that the recall should be sustained.

The Los Angeles Tribune, in referring to the matter has this to say:

"In this campaign he fights under a disadvantage, since on the question whether or not he shall be recalled, he must, in order to retain his office, poll a vote larger than that of all his opponents combined, for they naturally stand as a unit in favor of the recall."

The California Outlook for April 11, 1914, also contains an article showing this injustice which exists in the present laws relating to the recall.

These defects in the present method of exercising the recall may be easily remedied. The objections to the present method of petition may be overcome by using a different method for securing signatures. For example, instead of taking the petition around to the voters to get signatures, why not require the voters to go to the petition? Copies of the petition could be left in a number of public places throughout the city and the voters notified through the press or otherwise that they may go to any of the places designated, within a specified time, and attach their signature. No valid objections could be raised to such a plan. It certainly is not any more unreasonable than the present requirement in regard to elections, in which case the voter is obliged to go to the polls on election day instead of having the ballot box brought to him. Undoubtedly it would be a more difficult matter to secure signatures under such a plan, but surely that should not be a valid objection necessarily. Signatures obtained by such a method would certainly be more significant and more truly indicative of the real sentiments of the signer. For these reasons it would undoubtedly be much better to adopt such a method, even if it would be necessary to make a considerable reduction in the number of signatures required. Ten signatures obtained under such a plan would be worth fifty secured by the present method. To be sure the names of those who now sign under misrepresentation or coercion, or just to be obliging, would not be found on a petition under those conditions, but that would hardly be a calamity. There is an old saying that "quality is better than quantity." Unless the voters would be willing to go to a little trouble such as this would involve, it would be quite evident that they were not very anxious to have the official recalled. There is nothing involved in the method proposed that would make the recall prohibitive or even more difficult. If public sentiment was sufficiently strong to demand the recall of a certain officer, the re-

quired number of signatures would undoubtedly be secured.

It will interest our readers to know that this suggestion has been adopted into the charters of Long Beach and Vallejo in this State. It has also been adopted in the new charter of the City of Springfield, Ohio, which charter, by the way, is said by the committee of the National Municipal League to be the best municipal charter yet framed.

The second defect referred to in the method used at present for exercising the recall may be cured by permitting counter petitions, and requiring that the proponents of the recall shall not only secure the specified percentage of signatures to their petition, but that they shall also secure a greater number of signatures than those signing against the recall. In other words, the submission of counter petitions should be provided and as much weight and consideration should be given to one petition as another. If a majority of the voters petition for retaining the officer, that should end the matter without the necessity of resorting to a special election.

That a small minority of voters should be empowered to compel a city to undergo the turmoil and expense of a special election when the majority do not want it, is unwise, unjust and un-American. The signature of one citizen, as well as his vote, should have no more power than the signature of another citizen. When it comes to voting the majority rule, but in the case of a recall petition the minority rule; and not only do they rule, but the majority are not even considered, they have nothing whatever to say about it. No matter what the circumstances may be, a special election must be called if the minority insist upon it.

Not long ago a recall petition was filed against an official of the City of Dallas. A number of leading citizens who were confident that the recall would fail, attempted to dissuade the proponents from insisting upon a special election, but without avail. As a last resort they got out a counter petition to which they secured the signatures of over one-half the voters of the city pledging themselves to vote against the recall. This was extralegal, there being no provision of law for it. It was done simply to convince those proposing the recall that a special election would be futile. Fortunately they were successful in persuading the withdrawal of the petition. Now, then, here is an illustration of the effect of a counter petition. Is it not striking proof of the need of such a provision of law? I will add, in passing, that such a provision has been incorporated into the charter of Long Beach; also into the charter of Vallejo in regard to the initiative.

Another thing that should be borne in mind is the fact that a recall election makes it necessary for the officer attacked to devote several months of his time to a political campaign instead of giving attention to the public duties for which he was elected. The work of his department invariably comes to a standstill and the whole city gets embroiled in a bitter controversy. This fact alone should be sufficient evidence of the folly of permitting a small minority to call a special election in spite of the wishes of the majority.

Another advantage of the plan here suggested is this: It would remove to

a large extent one of the greatest objections to the method of exercising the recall, to-wit: the warring between candidates before the recall itself has been decided. It is the general consensus of opinion that the question of recalling an officer should be absolutely divorced from the question of considering other candidates for the office. It has been found that unless this is done other issues will be introduced and the merits of the recall proposition lost sight of; in fact, the issue develops into an ordinary political campaign.

There is no question but that the initiative, referendum and recall may be considered as permanent fixtures of our system of government. They should not be regarded, however, as weapons of attack to be used on the slightest provocation, but rather as protective measures to be resorted to only when all other means have failed. From Pacific Municipalities.

REQUIREMENTS FOR GOOD ILLUMINATION IN AN INDUSTRIAL PLANT.

From The Isolated Plant.

The requirements which must be met in the design of a satisfactory lighting installation for an industrial plant are four:

First—Sufficient light of proper quality on the work;

Second—A moderate intensity of light over adjacent area and on the walls;

Third—Absence of glare;

Fourth—A system which is simple, reliable, easy of maintenance and low in operating cost.

Light on the Work.

An obvious requirement for satisfactory illumination is that the quantity of light on the work be sufficient. Better lighting facilities, along with practically all other improvements in industrial plants are installed for the purpose of ultimately decreasing the unit cost of production to a minimum. From an economic standpoint, however, it is very difficult, if not impossible, to determine the proper intensity of light for a given class of work. This intensity depends upon the cost of producing light, the number and wages of the employees and the value of their output, as well as upon the nature and fineness of the work and the possible reduction in spoilage. Owing to the difficulties encountered in evaluating these quantities, estimates of the intensity of illumination required for any class of work have usually been based on other than purely economic considerations.

Unquestionably, the intensity of light in any part of a factory should never fall so low that accidents may be justly attributed to this cause. Considered only from the standpoint of safety to employees, 0.25 foot-candles may, in most instances, be taken as the lower limit of permissible intensity in an industrial plant.

Required Intensity.

The upper limit of useful intensity of artificial light may be conservatively estimated at from 50 to 100 foot-candles. Illumination of this order is sometimes required for operations involving fine detail, rapidly moving machinery and black surfaces, such, for example, as are common in the shoe industry. After the apparent bright-

ness of an object has reached a certain magnitude, a further increase of intensity does not appreciably aid vision. The necessary volume of incident light will, of course, depend upon the coefficient of reflection of the object illuminated, but even for fine work on very dark goods, intensities of the order of those stated above are considered satisfactory. Such intense illumination is usually required over but a limited area and, therefore, can best be supplied by the use of small lamps and reflectors placed close to the work.

While from 0.25 to 100 foot-candles may be considered as the extreme range of intensity for artificial lighting in factories, the great majority of installations will fall within much narrower limits, between approximately 1 and 6 foot-candle. Many tables have been published designating the proper intensity of illumination for various classes of work, but this necessary intensity depends so largely upon the nature and distribution of the lighting units and upon local conditions as well as on the work to be performed that such tables should be used only with the greatest caution. Furthermore, as stated above, such estimates are at best based merely on what is now considered good practice in plants where illumination tests have been conducted; there is no definite assurance that either a higher or lower intensity of light would not tend toward a more economical operation of the plant. As a matter of fact, the cost of adequate illumination for an industrial plant is so low in comparison with the value of the output dependent upon it that in many cases intensities considerably higher than those now supplied will be found profitable. Tables which give values of illumination recommended for various locations should be understood as merely an approximate guide; one of the most useful of these is given in the 1912 report of the Industrial Lighting Committee of the National Electric Light Association. No table of intensities is included in this bulletin, but the illustrations discussed on succeeding pages will indicate the order of intensity now considered satisfactory in the various industries considered.

A new vacuum cleaner, designed to be operated by water power in a sink or bath tub, consists of two suction pumps driven by a water wheel, and a chamber in which the dust is collected to be washed away by the waste water.

China imports wood pulp from Great Britain, Sweden, Norway, and Germany, many.

Fully one-third of the coal consumed in Berlin is in briquet form.

An English scientist has produced minute diamonds by exploding a powder made of cordite and carbon.

Several railroads are replacing brass passenger car fittings with bronze, as the latter metal is less affected by weather and coal gas and more easily kept clean.

A vast area of New Zealand which a volcano devastated a quarter of a century ago, is being re-forested with larch trees, convict labor doing the work.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These some items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, C. E. Gottschalk, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Lombard street near the Exposition Grounds, and has been designed to contain a number of two and three room suites with baths. Interiors will be finished in pine and redwood. There will be steam heat and a hot water supply. All suites will have wall beds. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$25,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, M. S. Show. The building will be erected on the north side of Bush street west of Hyde, on a lot with a frontage of 34 feet 4 inches and a depth of 137 1/2 feet. There will be twenty-five apartments of two and three rooms. Interiors will be finished in pine with some elm panels and oak floors. Plans provide for steam heat, an automatic elevator, and hot water supply. All apartments will have private baths and wall beds. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with red pressed brick. Plans are complete and in the hands of the owner who is now taking figures for the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$16,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Mr. Kevell. The building will be erected at the corner of 26th and Capp streets, covering an area of 10 by 120 feet. There will be one store on the first floor and a total of 16 suites of 2, 3 and 1 rooms on the upper floors. Interior finish will be of pine and redwood. All suites will have wall beds and private bath rooms. There will be gas steam radiators and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are nearly complete and a contract will be awarded shortly.

SAN FRANCISCO—Apartment house, 1 story and base, reinforced concrete, \$25,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Green and Hallen. The building will be erected on O'Farrell street, and has been designed to contain 24 suites of three rooms each. Interior will be finished in pine and redwood with some elm panels and hardwood floors. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. All apartments will be equipped with wall beds. Exterior of the building will be faced

with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 6 story and base, reinforced brick, \$68,000. Architect, G. Albert Lansburgh, 769 Mission street, S. F. Owners, Gaffney Estate. C. P. Moore Building Co. or Fred Hansen will be awarded a contract within the next few days for this work. All bids are now under advisement in the architect's office. Further mention will be made of the work.

OAKLAND, CAL.—Apartment house, 2 story and base, frame. Cost not stated. Architect, Erwin Schaefer Plaza Bldg., Oakland. Owner, Joseph Bajer. The building will be erected on West street between 36th and 37th streets, and will cover a considerable ground area. There will be a total of eight apartments of three rooms each. Interior will be finished in pine and elm. Some hardwood floors will be used. There will be a central heating system and a hot water supply. Portable vacuum cleaners will be installed. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared and when complete work will be done by Day Labor.

SEATTLE, WASH.—Apartment house, 3 story and base, brick and steel, \$100,000. Architects, Weld & Thomas, Hoge Bldg., Seattle. Owner, Mr. Wheeler. The building will be erected at the northwest corner of 6th avenue and Spring street. There will be between 110 and 115 rooms which will be arranged in suites of two and three rooms with bath. Interior finish will be of pine with some hardwood veneer. Plans provide for steam heat, an automatic elevator and hot water supply. Vacuum cleaning system will also be installed. There will be wall beds in all apartments. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within ten days.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$12,000 each. Architect, Charles J. Rousseau, 45 Kearny street, S. F. Owners' names withheld. The two buildings will be erected for different owners on adjoining property on Franklin street between Clay and Washington streets. Each building will have a frontage of 30 feet and a depth of 85 feet. There will be six apartments in each consisting of four rooms. Interior will be finished in pine and hardwoods. All suites will have private bath rooms and wall beds. There will be steam heat, a hot water supply and vacuum cleaners. Exteriors will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be taken at once.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$15,000. Architect, none. Owner, I. R. Kissell, 1723 Polk street, S. F. The building will be

erected on the north side of California street, between Larkin and Polk streets, and has been designed to contain twelve suites of two and three rooms. There will be a central heating system and hot water supply. Portable vacuum cleaners will be installed. Entrance will be finished in marble. Interior finish will be of pine with some elm panels and hardwood floors. Each apartment will have a private bath and wall beds. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by day labor.

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—Apartment house alterations. Cost not stated. Architect, Anthony Blinner, 433 3rd street, San Bernardino. Owner, Mrs. Bertha Rolfe. The work will consist of extensive alterations to a two-story frame building located at 370 D street. There will be new interior finish, partitions, plumbing and electric work. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken. Bids will close on June 15th.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel, \$36,000. Architects, Noonan & Murphy Co., Douglass Bldg., L. A. Owner, Mrs. Jessie E. Ellis. Contractors, Noonan & Murphy Co., Douglass Bldg., L. A. Contract price, \$36,000.

SAN FRANCISCO—Apartment house, 4 story and base. Class C construction, \$98,000. Architect, J. R. Miller, Lick Bldg., S. F. Owners, Santa Christina Investment Co. Contractor, C. A. Brady, 180 Jessie street, S. F. general construction only. Contract price, \$98,000. Note: Subfigures are now being taken on all parts of the work except the brick work.

BANKS.

Contracts Awarded.

PASADENA, LOS ANGELES CO., CAL.—Bank and offices, 6 story and base, reinforced concrete, \$80,000. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Citizens' National Bank of Pasadena. Contractors, F. O. Engstrom Co., 5th and Seaton streets, L. A. Contract price, \$80,000.

BONDS.

TULARE, TULARE CO., CAL.—The Tulare Power Company will soon issue \$1,000,000 of 6 per cent bonds for the purpose of raising money to extend the power lines of the company. It is planned to build and equip a modern hydro-electric generating plant on the Tulare River.

PETALUMA, SONOMA CO., CAL.—Voting for a new high school building and site. The \$10,000 bonds carried three to one. The Carpenter Tract was favored as the site.

MONTEREY, MONTEREY CO., CAL.—This city will, at the next municipal election, vote on the proposition of bonding itself for \$100,000 to build a municipal wharf located between the Del Monte Bath House and the Southern Pacific Depot.

SANTA ROSA, SONOMA CO., CAL.—The proposed \$65,000 bond issue for a reinforced concrete school and to secure additional grounds for the Lincoln School was defeated by a majority of 75.

DIXON, SOLANO CO., CAL.—By a majority of 159 votes, bonds for a \$60,000 school building carried. In favor 285, against 126.

OAKLAND, ALAMEDA CO., CAL.—A proposed bond issue of \$1,500,000 will be submitted to the voters this fall for the purpose of raising funds to complete and furnish with modern equipment the schools of this city.

OAKLAND, ALAMEDA CO., CAL.—The proposition of voting bonds in the sum of \$500,000 for the construction, completion, equipping and furnishing of the Municipal Auditorium will be voted in this city on June 12th.

SACRAMENTO, CAL.—The sale of \$18,000 worth of city water extension bonds was made by the city to Wright & Kimbrough.

SANTA CRUZ, SANTA CRUZ CO., CAL.—A meeting of the city commissioners and a water committee appointed by the mayor have decided on calling a special water bond election for \$150,000, the money to be used in laying a new and short supply pipeline from Laguna creek and the construction of necessary storage reservoirs.

MAYFIELD SCHOOL DISTRICT, CAL.—Bonds will be voted June 19th in the sum of \$20,000 for the purchase of a school site, for building a school building and supplying same with the necessary equipment.

MODESTO, STANISLAUS CO., CAL.—For the second time bonds are to be issued by the Modesto Irrigation District in the sum of \$610,000 for the development of the irrigation district.

AUBURN SCHOOL DISTRICT, PLACER CO., CAL.—Bonds in the sum of \$47,000 will be voted in this city June 16th for the purpose of raising funds for the erection of a high school building and for furnishing same with the necessary apparatus.

BAKERSFIELD SCHOOL DISTRICT, KERN CO., CAL.—Bonds of \$40,000 for purchasing school building sites and making school improvements were voted in this city and carried by a vote of 268 to 5.

BENICIA SCHOOL DISTRICT, SOLANO CO., CAL.—Sealed bids for the sale of bonds amounting to \$18,000 will be received by the Board of Supervisors on July 6th.

MONTAGUE, SISKIYOU CO., CAL.—The \$15,000 school bond election held there was defeated. There were 25 votes for the issue and 47 against.

DINUBA, TULARE CO., CAL.—The initiative petition to call an election on the proposed \$1,000,000 bond issue for good roads was rejected here on June 4th, there being less than 600 of the 715 signers registered voters. Preparations for a new petition have been made, and it is believed that the Board of Supervisors will again consider the matter.

Reports of the special school bond elections held in Benicia and Tolenas school districts and Rio Vista high school district showed that bonds in the following amounts carried: Rio Vista High School, \$60,000; Benicia, \$18,000; Tolenas, \$1,800.

BRIDGES AND DAMS.

VISALIA, TULARE CO., CAL.—Bridge, steel and concrete, \$27,000. Engineer, County Surveyor Byron Lovelace, Visalia. Owners, Tulare County. County Surveyor Byron Lovelace is preparing plans and specifications for a new steel bridge to be erected over Kings River near Dinuba. The cost of the structure is estimated at \$27,000. Bids will be called for shortly.

SAN JOSE AND HOLLISTER, SANTA CLARA AND SAN BENITO COS., CAL.—Bridges, timber and reinforced concrete. Cost not stated. Engineers, County Surveyors of Santa Clara and San Benito Counties. The counties of San Benito and Santa Clara have arrived at an understanding in the joint county bridge matter, and plans have been ordered prepared by the two County Surveyors for the Sargents bridge over the Pajaro River, which will cost \$18,000, and for a bridge over the San Felipe River near the Dunne ranch. Bids will be called for shortly.

YUBA CITY, BUTTE CO., CAL.—Bridge, steel and reinforced concrete, \$60,000. Engineer, E. L. Cope, Yuba City. Owners, Butte County. The Butte County Board of Supervisors accepted the plans and specifications for the Butte Slough bridge at Yuba City as prepared by E. L. Cope. Bids will be received on June 28th. The bridge will be of the reinforced concrete type, 1320 feet long, and has been estimated to cost \$60,000. Full particulars can be secured from the County Clerk of Butte County.

BRIDGE—Reinforced concrete, \$2,000 San Jose, Santa Clara Co., Cal. Engineer, County Surveyor J. C. McMillan, San Jose. Owners, Santa Clara County. Contractor, John Doyle, San Jose. Contract price, \$1,881. A complete list of these figures will be found under the heading of San Jose and the Santa Clara Valley in this issue.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete, \$2,000. Engineer, County Surveyor J. G. McMillan, San Jose. Owners, Santa Clara County. Contractor, John Doyle, San Jose. Contract price, \$1,881. A complete list of these figures will be found under the heading of San Jose and the Santa Clara Valley in this issue.

Contracts Awarded.

FLAVEL, ORE.—Docks, timber pile construction, \$150,000. Engineer's name not given. Owner, S. P. and S. Co. Contractors, Guthrie-McDougal Co., Lewis Bldg., Portland. Contract price, \$150,000.

COQUITLAM, B. C.—Bridge, steel and concrete, \$500,000. Engineer's name not given. Owners, Province of British Columbia. Contractors, Armstrong, Morrison & Co., Vancouver, B. C. Contract price, \$500,000.

MADERA COUNTY CAL.—Bridges. Steel and timber. Cost not stated. Engineer, County Surveyor F. E. Smith. Madera. Owners, Madera County. Contractors, Williston & Son, Tobin steel bridge at Raymond. Contract price, \$6,142. Edward Layne, Madera, timber bridge at Gertrude. Contract price, \$1,484. A complete list of the figures submitted will be found under the heading of Fresno, Stanislaus and Central California in this issue.

SOLEDA, MONTEREY CO., CAL.—Bridge, steel and reinforced concrete, \$60,508. Engineer, County Surveyor. Salinas. Owners, Monterey County. Contractors, W. N. Concannon Co., Mo-

nadnock Bldg., S. F. Contract price, \$60,508.

CHURCHES.

BERKELEY, ALAMEDA CO., CAL.—Church, 1 story and base, frame. Cost not stated. Architect, Eugene K. Martin, 2192 Shattuck Avenue, Berkeley. Owners, First Baptist Church of Berkeley. The building will be erected at the corner of Dana and Haste streets and will cover a considerable ground area. There will be the main auditorium, Sunday school rooms and a pastor's study. Interior finish will be of pine and redwood with some ornamental plaster in the main auditorium. Plans provide for a central heating system. Art glass will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for within a few days.

SAN FRANCISCO—Church, 1 story and base, brick and steel, \$80,000. Architect, Edgar A. Mathews, Phelan Bldg., S. F. Owners, Christian Scientist Church. The building will be erected on Haight street near the Park, and will contain a large main auditorium, smaller meeting rooms, reading rooms and study rooms. Interior finish will be of pine and ornamental plaster. There will be steam heat. Exterior of the building will be faced with pressed brick. Plans are now nearly ready for figures.

Contracts Awarded.

RICHMOND, CONTRA COSTA CO., CAL.—Church, 1 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Contractor, James McLaughlin, 244 Kearny street, S. F. Contract price not stated.

CHURCH—1 story and base, frame, \$10,000. Richmond, Contra Costa Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Contractor, James McLaughlin, 244 Kearny street, S. F. Contract price not stated.

COURT HOUSES.

SAN FRANCISCO—City Hall, 4 story, dome and base.—Class A construction, \$4,500,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans and specifications have been completed for the interior stone work for the new City Hall. Bids will be opened by the Board of Public Works on June 24th. Plans and specifications can be secured from the City Department of Architecture, Temporary City Hall. An official proposal appears in another column of this issue.

FACTORIES & WAREHOUSES.

Contracts Awarded.

ICE AND COLD STORAGE PLANT—5 story and base, reinforced concrete, \$450,000. Seattle, Wash. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, \$450,000.

SEATTLE, WASH.—Ice and cold storage plant, 5 story and base, reinforced concrete, \$450,000. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, \$450,000.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Jail and emergency hospital completion. Class A construction. Cost not stated. Architects, City Department of Architecture. Temporary City Hall, S. F. owners. City and County of San Francisco. Plans have been completed for additional jail work and for the completion of the emergency hospital in the new Hall of Justice and City Jail building on Washington street. All construction will be of the class A type. Bids are now being called for by the Board of Public Works and will be opened on June 11th. An official proposal appears in another column at this issue.

RED BLUFF, TEHAMA CO., CAL.—Jail construction, 2 story and base, reinforced concrete. Cost not stated. Architect, R. A. Herold, Sacramento. Owners, Tehama County. The following bids were opened by the Board of Supervisors for the construction of the new County Jail:

Jail Building.

W. M. Concanon Co.	\$26,977
Mathews Const. Co.	28,700
Keating & Holt	27,150
Teichert & Ambrose	26,690

Steel Cells and Jail Bars.

Ralston Iron Works	\$26,212
Hawley Jail Co.	22,022
W. G. West Co.	24,963

Bids were taken under advisement until Friday, June 11th.

STOCKTON, SAN JOAQUIN CO., CAL.—Fire house, 2 story and base, concrete and frame. Cost not stated. Architect, City Engineer Compton, Stockton. Owners, City of Stockton. The building will be erected on property recently purchased on California street between Jefferson and Jackson streets. Plans provide for room for engine and apparatus equipment on the first floor and living quarters for the men on the second floor. Interior will be finished in pine and redwood. There will be steam heat and a hot water system. Bath rooms will be equipped with showers. Exterior of the building will be faced with cement plaster. Special electrical work will be specified. Plans are now being prepared.

FLATS.

SAN FRANCISCO—Flats addition, 2 story and base, frame, \$2,500. Architect, none. Owner, Thomas Ekroos, 915 Hampshire street, S. F. The work will consist of a two-story addition to the present one-story building at the southeast corner of Hampshire and 21st streets. New portion of the building will contain two modern five-room flats. Interiors will be finished in pine and redwood with hardwood floors in the living rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, H. C. Keenan, 300 Webster street, S. F. The building will be erected on the west side of 18th avenue north of California street, covering an area of 27 by 53 feet. There will be two modern flats of five and six rooms.

Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for a large open fire place in each of the living rooms. Mantels will be of tile. Automatic water heaters will be installed. Bath and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Flats, 3 story and base, frame, \$12,000. Architect, none. Owner, John Dempiak, 1553 Washington street, S. F. The building will be erected near the corner of 10th and Grove streets, and has been designed to contain eight flats of four and five rooms. Interiors will be finished in pine, redwood and elm. Some hardwood floors will be used. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

GOVERNMENT WORK AND SUPPLIES.

Blighting American Builders.

[From Army and Navy Register, May 23.]

It has been surmised in comment on these pages that it would not be long before the administration would come to a realization that there is nothing to be gained, in a political way, and still less in an industrial way, by awarding contracts for military-naval material to foreign manufacturers. The Secretary of the Navy has sought to impress Congress and the people by means of statements made before the naval committees and in bulletins issued to the newspapers that he is accomplishing real marvels in the direction of saving in the public funds by placing naval contracts with European bidders or in using the figures of the foreigners to beat down the American manufacturers to lower proposals than would be possible without the employment of such a cudgel. There is no doubt that there has been in the Navy Department a substantial saving in the appropriations for the naval establishment by the acceptance of foreign bids or by bringing the American bidders to the foreign price. It did not take long, however, as has been predicted in these columns, for the administration to discover that the placing of orders abroad was a diversion of American money into foreign treasuries and a deprivation of American workmen of an opportunity for employment, since this policy resulted directly in the discharge of employees at plants which would otherwise have been enabled to retain them on profitable work. The same results, detrimental to private concerns, were attributable to placing orders for ship construction at navy yards and increasing the amount of work done at the manufacturing arsenals, powder factories, and other governmental plants.

It has now been left to the Secretary of War to change this policy and to check, if not abandon, the practice

which threatened to injure American industrial conditions. Mr. Garrison has been wise enough to foresee the damage which was being done the administration by a reckless design to make a record in government work by contract. But the conditions attending the particular incident indicating a change in policy are such as to justly subject the administration to criticism from abroad.

Bids were recently invited for four tugs for the Panama Canal and special efforts were made to induce European shipbuilders to enter the competition. The invitation for proposals was circulated widely at home and abroad and our consular representatives in foreign parts were instructed to give publicity regarding the prospective contract among foreigners who were possible bidders. The lowest bid came from a Dutch concern, as might have been expected, and under the usual circumstances it would have been promptly accepted, but Mr. Garrison recommended, and the President approved the recommendation that the order for the tugs be placed at home, with the result that the contract has been made for two tugs instead of four, although the government will be obliged to pay \$50,000 more to the American shipbuilder than it would have paid for the two tugs had the Dutch proposal been accepted. The defect in the transaction is confined to the fact that this government made such a determined effort to interest foreign shipbuilders in the contract and then found it necessary to reject the lower foreign bid and accept the higher American bid for less than the number of tugs desired. The comparative prices in favor of the European firm were to be expected; they were a certainty, indeed, judging from the experience of the Navy Department, and in rejecting the foreign bids it is only natural that the foreigners shall entertain a grievance, having gone to the expense of preparing estimates upon what appeared to be our assurance of the consideration of the proposals on a basis of relative price.

At the same time, there is nothing to be said otherwise against the action of Secretary Garrison and the President. It is time that there should be an appreciation of the harm that has been wrought by a tariff law that makes it possible for foreign manufacturers and shipbuilders to come into competition with American firms which pay higher wages to American workmen than are paid abroad and which can only hope to meet successfully the foreign rivals by a reduction in the cost of labor. Mr. Garrison has been sagacious in his recommendation in this matter, and his adoption of a policy that refuses to make use of foreign bidders to beat down American prices is an example which should not be lost on the Navy Department.

Vandalia South Canal.

Department of the Interior, U. S. Reclamation Service, Milk River project, Montana, Vandalia South Canal, second unit, earthwork and structures—proposals received at Malta, Mont., specifications No. 263:

- Ed L. Tebbis, Taggart, Jurgens & Knipe, Glasgow, Mont.
- James O'Connor, 231 Park avenue, Council Bluffs, Iowa.
- Dooling Bros., Tampico, Mont.
- Temple & Siroky, Malta, Mont.
- C. F. O'Neill, Yankton, S. Dak.

6. A. L. Markhus, Polson, Mont.
7. Threet Bros. & Jolley, Lovell, Wyo.
8. Security Bridge Co., Box 1004,
Minneapolis, Minn.

Schedule 1.

Item 1, 135,000 cu yds excavation, class 1—Bid 1, 14c; 2, 14.3c; 3, 14.4c; 4, 14.9c; 5, 15.9c; 6, 30c.
2, 50 cu yds excavation, class 2—Bid 1, 14c; 2, 60c; 4, 35c; 5, 45c; 6, 30c.
3, 10 cu yds excavation, class 3—Bid 1, 14c; 2, 11.30c; 4, 60c; 5, 41.25c; 6, 50c.
4, 25,000 sta. yds overhaul—Bid 1, 2c; 2, 3c; 3c; 4, 2c; 5, 6c, 2c.
Total schedule 1—Bid 1, \$19,408.40; 2, \$19,843; 3, \$19,940; 4, \$20,638.50; 5, \$22,000; 6, \$22,120.

Schedule 2.

5, 10,000 yds excavation, class 1—Bid 6, 55c; 7, 50c; 8, 50c.
6, 200 cu yds excavation, class 2—Bid 6, 50c; 7, 50c; 8, 70c.
7, 10 cu yds excavation, class 3—Bid 6, 11.25c; 7, \$1.50; 8, \$1.
8, 1,000 sta. yds overhaul—Bid 6, 2c; 7, 2c; 8, 2c.
9, 1,000 cu yds puddling—Bid 6, 60c; 7, 50c; 8, 50c.
10, 300 cu yds concrete—Bid 6, 11.25c; 7, \$1.50; 8, \$1.30.

11, Placing 18,000 lbs reinforcing steel—Bid 6, 2c; 7, 1.5c; 8, 1.5c.
12, 100 sq yds grouted paving—Bid 6, \$1.90; 7, \$3; 8, \$1.50.
13, 20 cu yds screened gravel—Bid 6, \$3.40; 7, \$4; 8, \$2.

14, Laying 40 lin ft 12-in corrugated iron pipe—Bid 6, 25c; 7, 20c; 8, 25c.

15, Laying 100 lin ft 24-in do—Bid 6, 40c; 7, 40c; 8, 38c.

16, Laying 300 lin ft 36-in do—Bid 6, 65c; 7, 90c; 8, 50c.

17, Laying 90 lin ft 12-in vitrified pipe—Bid 6, 30c; 7, 20c; 8, 35c.

18, Laying 200 lin ft 18-in do—Bid 6, 45c; 7, 30c; 8, 15c.

19, Laying 150 lin ft 24-in do—Bid 6, 60c; 7, 70c; 8, 50c.

20, Laying 70 lin ft 30-in do—Bid 6, 80c; 7, \$1; 8, 60c.

21, Laying 25 lin ft 36-in do—Bid 6, \$1.25; 7, \$1.25; 8, \$75c.

22, Erecting 600 lbs structural steel—Bid 6, \$3.5c; 7, 2c; 8, 3c.

23, Erecting 320 lin ft metal flumes, diams 3 ft 2 in and 3 ft 10 in—Bid 6, 50c; 40c; 8, 40c.

24, \$5,000 ft. B. M. lumber for bridges, etc—Bid 6, \$15; 7, \$20; 8, \$28.50.

25, 50,000 ft. B. M. lumber for turnouts, etc—Bid 6, \$19; 7, \$25.5; 8, \$21.

26, Driving 120 lin ft piles—Bid 6, \$1.80; 7, \$1; 8, 40c.

Total schedule 2—Bid 6, \$13,674.75; 7, \$13,850.75; 8, \$14,144.25.

Electrical Apparatus.

The following bids were opened under specification No. 291-F at the office of the Reclamation Service, Los Angeles, Cal., for furnishing electrical apparatus for the Okanagan project, Wash.:

Item 1, two 187 K. V. A. generators; 2, three 125 K. V. A. transformers; 3, two 200-H. P. induction motors; 4, two generator switchboard panels; 5, switchboard for pumping plant; 6, three electrolytic lightning arresters; 7, wire and insulators, A. No. 4, 16,500 V. per ft; B. No. 6, 5,000 volt per ft; C. No. 4, 2,000 volt per ft; D. 6,600 V wall bushings each.

Allis-Chalmers Co., Milwaukee, Wis., item 1, \$3,190, weight 12,750 lbs; 2, \$1,960, weight 2,800 lbs; 6, \$620, weight 4,350 lbs; 4, \$1,200, weight, 1,650 lbs; 5, \$960, weight 2,800 lbs; 6, \$620, weight 1,200 lbs. Delivery, item 1, 45 days; 2,

70 days; 3 and 6, 75 days; 4 and 5, 85 days; lump bid for items 1 to 6 inclusive, \$9,157. Delivery items 1, 4, 5, and 6 at Milwaukee; 2 and 3 at East Norwood, Ohio.

Crocker-Wheeler Co., Ampere, N. J., item 1, \$4,150, weight 11,000 lbs; 2, \$2,124, weight 5,500 lbs; 3, \$2,100, weight 5,500 lbs. Time, item 1, 105 days; 2, 67 days; 3, 100 days; delivery at Ampere.

General Electric Co., Schenectady, N. Y., item 1, \$4,632, weight 12,500 lbs; 2, \$1,575, weight 4,300 lbs; 3, \$1,759, weight 4,000 lbs; 4, \$982, weight 2,200 lbs; 5, \$1,115, weight 2,800 lbs; 6, \$478, weight 1,100 lbs; 7, A, 10.5c; B, 13c; C, 5c; D, \$5.50; time, item 1, 80 days; 2 and 6, 555 days; 3, 75 days; 4 and 5, 40 days; 7, 60 days; lump bid for items 1 to 6 inclusive, \$9,989; combination for items 1, 3, 4, 5, and 6, \$8,459. Deliver items 1, 3, 4, 5, and 7. Schenectady; 2 and 6, Pittsfield, Mass.

Westinghouse Electric & Mfg. Co., East Pittsburgh, Pa., item 1, \$4,800, weight 16,000 lbs; 2, \$1,500, weight 4,900 lbs; 3, \$2,205, weight 7,000 lbs; 4, \$1,000, weight 3,200 lbs; 5, \$1,800, weight 6,100 lbs; 6, \$640, weight 1,550 lbs; 7, A, 14.2c; B, 40.8c; C, 11.1c; D, \$9.05. Time, item 1, 100 days; 2, 80 days; 3, 4, 6, and 7, 75 days; 5, 85 days; lump bid items 1, 2, 3, 4, and 6, \$9,400. Delivery at East Pittsburgh.

Pittsburgh Transformer Co., Pittsburgh, Pa., item 2, \$1,250, weight 3,300 lbs; time, 60 days; delivery Pittsburgh, Pa.

Wagner Electric Mfg. Co., St. Louis, Mo., item 2, \$1,374, weight 5,170 lbs; 3, \$2,170, weight 8,100 lbs. Time, item 2, 70 days; 3, 90 days.

Nixon, Kimmel Co., Spokane, Wash., item 2, \$1,386, weight 4,000 lbs; time 35 days; delivery St. Louis.

San Francisco, Cal., Interior Decorations.

The following bids were received by the custodian recently for interior decoration and painting at the U. S. custom house, San Francisco, Cal.:

A. Lincoln Cooper, 627 Madison avenue, New York City, \$10,000; 11 weeks.
Isidor R. Kissel, 1723 Polk street, San Francisco, Cal., \$10,000; 3 weeks.

La Grange, Ore., Screens.

The following bid was received by the supervising architect, Treasury Department, Washington, D. C., for furnishing door and window screens for the U. S. post office at La Grange, Ore.:
Willier Mfg. Co., Milwaukee, Wis., \$728.

Puget Sound, Dredging.

The contract for dredging at the U. S. navy yard, Puget Sound, has been awarded to the Erickson Construction Co., Seattle, Wash., at 65c per cu ft; total \$40,000.

Mare Island, Heating Plant.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for heating plant at the naval hospital, Mare Island navy yard:

Item 1, heating plant installation complete; 2, installing boilers, etc., but no piping connections; 3, oil-burning equipment, complete.

Babcock & Wilcox Co., Philadelphia, Pa., item 1, \$12,651; 2, \$8,301; 3, \$4,404.

Robert Palmer, Jr., San Francisco, Cal., item 1, \$11,387.

J. C. Johnson Co., San Francisco, Cal.,

item 1, \$8,730; 2, \$10,750; 3, \$746.

J. E. O'Meara, San Francisco, Cal.,

item 1, \$9,900; 2, \$7,400; 3, \$6,750.

Reclamation Service, Hydraulic Apparatus.

Abstract of bids for hydraulic apparatus, advertisement No. 294-F, Okanagan reclamation project, Washington, opened at Los Angeles, Cal.:

Item 1, 1 250-horsepower turbine; 2, 1 300-horsepower turbine; 3, 2 governors; 4, 1 gate valve; 5, services of erecting engineer, per day; 6, items 1, 2, 3, and 4.

Pelton Water Wheel Co., San Francisco, Cal., (delivery San Francisco), item 1, \$2,357, 70 days, weight 14,000 lbs; 2, \$3,668, 90 days, weight 24,000 lbs; 3, \$1,200, 40 days, weight 1,650 lbs; 4, \$204, 30 days, weight 1,200 lbs; 5, \$12.80; 6, \$6,241.

S. Morgan Smith Co., York, Pa., (delivery York, Pa.), item 1, \$3,600, 90 days, weight 20,000 lbs; 2, \$4,185, 90 days, weight 30,500 lbs; 3, \$1,090, 90 days, weight 4,500 lbs; 4, \$235, 90 days, weight 2,300 lbs; 5, \$15; 6, \$8,500.

Orland Irrigation Project.

The Secretary of the Interior has authorized the reclamation service to execute contract with Moses Fisher of San Francisco for erecting the diversion dam and other structures of the East Park feed canal, Orland irrigation project, California. The work involves the excavation of about 6,000 cubic yards of material, 4,000 cubic yards of concrete work, the placing of 49,300 pounds of reinforcing steel and 30,500 feet, board measure, of lumber, and erecting 14,150 pounds of metal work. The contract price is \$46,388.20. The feed canal is twenty miles long, and its purpose is to divert water from the head of Stony Creek into East Park reservoir. This will increase the volume of storage water in the reservoir and permit the extension of the project to cover a total of 20,000 acres. The Orland project is one of the most successful of the government works, and the present irrigated farms are among the most highly cultivated in that portion of California. The government work here already has transformed a region formerly cropped only in wheat into an intensively cultivated agricultural district.

HALLS & SOCIETY BLDGS—

PORTLAND, ORE.—Lodge hall, 4 story and base, brick and steel, \$50,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Knights of Columbus Hall Association. The building will be erected at the corner of Park and Taylor streets, covering an area of 50 by 100 feet. The building will contain a large gymnasium, billiard hall, hall rooms, library, auditorium, music room, bowling alley and offices for the executive staff. Interior will be finished in pine and hardwoods. There will be steam heat, elevator service and vacuum cleaning system. Gymnasium will contain a large swimming pool. Exterior of the building will be faced with pressed brick and cut stone. Plans are now being prepared.

OAKLAND, CAL.—City Hall lighting fixtures. Cost not stated. Architects, Palmer, Hornbostel & Jones, City Hall, Oakland. Owners, City of Oakland. Only two sets of figures were received for furnishing and installing the light-

ing fixtures in the new City Hall. The Roberts Mfg. Co. of San Francisco bid \$6,350 and the Maxwell Hardware Co. of Oakland bid \$6,995. Bids were referred to the Commission of Public Works.

HOSPITALS

SAN FRANCISCO—Hospital ice plant. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans and specifications have been completed by the Constructing Quartermaster's Office at Fort Mason for furnishing and installing a five-ton ice making plant at the Letterman General Hospital at the Presidio. Bids for this work will be opened on June 16th at 11 a. m. Plans and specifications can be secured from the office of the Constructing Quartermaster. An official proposal appears in another column of this issue.

NAPA, NAPA CO., CAL.—Hospital dairy buildings, \$16,985. Architect, State Architect George B. McDougall. Sacramento. Owners, State of California. Bids opened on June 3rd by the State Board of Control show H. A. Klyce of San Francisco low at \$16,985. He will probably be awarded the contract. A complete list of these bids will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

STOCKTON, SAN JOAQUIN CO., CAL.—Hospital dairy building, reinforced concrete, \$14,590. Architect, State Architect George B. McDougall. Sacramento. Owners, State of California. H. A. Klyce of San Francisco presented the lowest bid for constructing new dairy buildings at the Stockton State Hospital and will probably be awarded the contract. A complete list of the figures received by the State Board of Control will be found under the heading of Sacramento, Stockton and Northern California in this issue.

TALMAGE, MENDOCINO CO., CAL. Gas holder and tank. Cost not stated. Architect, State Architect George B. McDougall. Sacramento. Owners, State of California. Bids received on June 1st by the State Board of Control for this work show the Western Pipe and Steel Co. of San Francisco low at \$5,285. They will probably be awarded the contract. A complete list of the figures will be found under the heading of Sacramento, Stockton and Northern California in this issue.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$100,000. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Treadwell Realty Co. The building will be erected at the northwest corner of Fillmore and Eddy streets, covering a large ground area. The first floor will be arranged for stores as well as the hotel lobby and entrance. Upper floors will contain a large number of hotel rooms, a large percentage of which will have private baths. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Metal window sash and frames and patent stone fronts are specified. Exterior of the building will

be faced with pressed brick and terra cotta. Plans are nearly ready for figures.

BERKELEY, ALAMEDA CO., CAL.—Hotel alterations, 3 story, frame, \$5,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, A. J. Weeks. The building, located at the northwest corner of Telegraph avenue and Bancroft Way, will undergo extensive alterations. The first floor will be rearranged for seven stores and upper floors will have new interior finish, plastering and plumbing. New electrical work will also be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Theo. A. Eisen & Son, Wilcox Bldg., L. A. Owner, I. L. Levy. The building will be erected on the west side of Figueroa street south of Pico, having a frontage of 95 feet and a depth of 111 feet. There will be five stories besides the hotel lobby on the first floor. Upper floors provide for a total of 84 guest rooms and 40 baths. Interior will be finished in pine throughout. Plans provide for steam heat, elevator service, a hot water system and patent stone fronts. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Electric installation and equipment. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids are now being called for furnishing A. C. buses, D. C. projector feeder and riser system. Bids will be opened for this work on June 11th. Plans and specifications can be secured on application to the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Press building, 1 story, frame and plaster construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for a building to be devoted to the exclusive use of the press which will be erected on the Exposition Grounds. There will be work rooms, telegraph department and lounging room. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken. Bids will be opened on June 18th. An official proposal appears in another column of this issue.

SAN FRANCISCO—Ferry building, 1 story, frame and steel. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on June 18th for constructing a union ferry building on the Exposition Grounds. Construction will be of steel and frame. Exterior will be covered with cement plaster on metal lath. Plans are complete and out for figures. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost not stated. Architect, H. H. Hohenfeldt, 210 Narbonne Bldg., St. Louis, Mo., represented locally by R. S. Bogle, 311 Merchants' National Bank Bldg., S. F. Owners, State of Missouri. Plans for the exhibit palace which is to be erected at the Panama-Pacific International Exposition in this city have been completed and copies of the same forwarded to R. S. Bogle for local contractors. Bids are now being taken and will be opened in St. Louis on June 25th. An official proposal appears in another column of this issue.

Contracts Awarded.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost, \$43,950. Architects, Albert Pretzinger and Edw. P. Musselman, Reibold Bldg., Dayton, Ohio. Owners, State of Ohio. Contractors, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$12,980.

RAILROAD CONST., STATIONS AND EQUIPMENT.

MODESTO, STANISLAUS CO., CAL.—Passenger station, 2 story and base, reinforced concrete. Cost not stated. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The building will be designed in the Mission style of architecture and will provide for two waiting rooms, office and baggage room. Interior finish will be of pine throughout. There will be a central heating system, probably steam heat, with an oil-burning plant. Modern plumbing and electric work will be installed. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures will be called for shortly.

Contracts Awarded.

LEWISTON, IDAHO—Railroad shops, etc., reinforced concrete construction, \$60,000. Engineer, Engineering Department Northern Pacific R. R. Co. Owners, Northern Pacific Railroad Co. Contractors, E. J. Rounds Construction Co., Walker Bldg., Seattle Contract price, \$60,000.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher. The dwelling will be erected in Forest Hill and will be surrounded by large grounds. The dwelling has been designed for an eight-room house with two baths and a sleeping porch. Interior finish will be largely of pine with some redwood and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile and will be equipped with showers. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S.

P. The dwelling has been designed for a seven-room house and will be erected on the west side of Jordan avenue north of Geary street. Interior finish will be of pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot and composition floors will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. These two houses will each contain seven rooms and bath and will be erected on adjoining property on the west side of 12th avenue south of Anza street. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Composition floors will be used in the bath rooms. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mrs. Jenks. The dwelling has been designed for an eight-room house with bath and sleeping porch and will be erected in the Boyd Tract. Interior will be finished in pine and some hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architects, United Home Builders, 1762 Broadway, Oakland. Owners, United Home Builders, 1762 Broadway, Oakland. The dwelling has been designed for a six-room house and will be erected on Haddon Road north of Excelesior avenue. Interior finish will be mostly of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. McCauley. The dwelling has been designed for a five-room house with bath and sleeping porch, and will be erected in the Melrose District. Pine and redwood finish will be used. There will be some oak floors. A large open fire place will be a feature of the living room. Mantel will be of tile. An automatic water

heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with shingles. Plans are being prepared and when complete the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 1½ story and base, frame, \$12,000. Architects, Milwain Bros., Deiger Bldg., Oakland. Owner, Mrs. E. E. Stelle. The dwelling will be erected on Park Way at the corner of Monte avenue, and has been designed to contain ten rooms, three baths and sleeping porches. A large private garage will be erected on the rear of the property. Interior of the house will be finished in pine and hardwoods with hardwood and inlaid floors in the principal rooms. There will be a central heating system, probably hot water, and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. Automatic water heaters will be installed. Exterior of both the dwelling and garage will be covered with shingles. Plans are complete and the work has been started by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, H. H. Keys, Central Bank Bldg., Oakland. Owner, Charles Fisher. The dwelling will be erected at the corner of Lincoln avenue and Hilbard street, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN LEANDRO, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owners, Huff Estate. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 1½ story and base, frame, \$3,500. Architect, H. H. Guttererson, 80 Post street, S. F. Owner, Mr. Penniman. The dwelling will be erected in Berkeley Heights, and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and elm panels with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and will be equipped with showers. Exterior of the dwelling will be covered with shingles and shiplap. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architects,

ing will be erected on Haddon Road, Elite Planners, 1844 5th avenue, Oakland. Owner, S. F. Hankin. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors and beam ceilings will be used. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and a shower. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architects. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, H. H. Guttererson, 80 Post street, S. F. Owner, John Howell. The dwelling will be erected in North Berkeley, and has been designed for a seven-room house with two baths and sleeping porch. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Exterior of the house will be covered with shingles. Plans are now being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Residence, 1 story and base, frame, \$2,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owners, Abbott and Chincock. The dwelling has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place with tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

SACRAMENTO, CAL.—Residences, 4, 1 story and base, frame, \$3,500 each. Architect, none. Owner, E. A. Pierce, Forum Bldg., Sacramento. These houses will be erected on adjoining property in York Court, and each has been designed to contain six-rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SACRAMENTO, CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: H. M. Earle, 3028 Magnolia avenue, 2 story six-room house, \$2,500; I. L. Johnson, 1219 33rd street, 1 story five-room house, \$1,700; and O. H. Moore, 2962 35th street, 1 story five-room house, \$1,500. Materials are now being purchased.

HILLSBOROUGH, SAN MATEO CO.,

CAL.—Residence, 3 story and base, reinforced concrete, \$250,000 to \$300,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Marriete Pullman Carolan. The dwelling will be erected on the Carolan Estate and will be fireproof throughout. Occupying the center of large grounds which will be laid out in formal gardens, the dwelling will be one of the handsomest homes on the peninsula. Interior finish will be largely of hardwoods. Hardwood and inlaid floors will be used extensively. There will be a central heating system, vacuum cleaning and a hot water supply. Elevator service and dumb waiters will be installed. All bath rooms will be finished in tile. There will be open fire places and tile and marble mantels. A garage, stables and kennels will also be erected on the property. A contract for the excavating and reinforced concrete work has been awarded to the Clinton Fireproofing Co., Mutual Bank Bldg., S. F., for \$12,350. Plans for the other parts of the work will be out for figures shortly.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: F. G. Cook, 554 North Miller street, 1 story six-room cottage, \$2,000. Lewis Co., 415 South 3rd street, 1 story five-room house, \$1,500, and Mrs. Emma S. Yender, 226 South 23rd street, 1 story four-room cottage, \$300.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, A. Howard Peterson, Blake Bldg., Oakland. Owner, C. Anderson. The dwelling will be erected on the west side of 25th avenue north of Judah, and has been designed for a seven-room house with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath with a brick veneer base. Plans are complete and the work will be done by Day Labor.

SISSON, SHASTA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, James W. Placheck, Acheson Bldg., Oakland. Owner, Dr. Burnett. The dwelling has been designed for a seven-room house and will include the doctor's office. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$14,000. Architect, E. Mathewson, Forsyth Bldg., Fresno. Owner, Arthur Goodfellow. The dwelling will be erected in the Hazelwood Tract, and has been designed for a fourteen-room dwelling with several baths and sleeping porch. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath

rooms will be finished in tile and will be equipped with showers. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being revised and figures will be called for shortly.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,200. Architects, Thomas & Oliver, Fantasies Bldg., Oakland. Owner, Alfred Cords, 609 Walla Vista avenue, Piedmont. The dwelling will be erected in Nova Piedmont, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will be finished in tile and equipped with a shower. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—Residence, 2 story and base, frame, \$3,600. Architect, Anthony Blinner, 433 3rd street, San Bernardino. Owner, W. J. Kinley. The dwelling has been designed to contain seven rooms and bath. Interior will be finished in slashed grained Oregon pine throughout. There will be open fire places and imitation stone mantels. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster and shakes. Plans are now being prepared.

SCHOOLS.

OAKLAND, CAL.—School dormitory, 2 story and base, brick and steel. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. NOTICE TO BRIDGE BUILDERS.

Proposals for Constructing Reinforced Concrete Bridge.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 4 o'clock a. m. on Monday, June 15, 1914, for the construction of a reinforced concrete bridge on the County road at Woodside between the properties of the Fonger and J. A. Hooper in the Third District. Plans, specifications and specifications prepared by the county surveyor and adopted by the Board of Supervisors on Monday, May 25, 1914, which said plans and specifications are now on file in the office of the clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank, in a sum equal to at least ten per cent of bid, made payable to the order assigned to the Clerk of the Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract was awarded, shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county, in an amount not exceeding the contract price to be given to the contractor in a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids. The undersigned, NASH, County Clerk and ex-Officio Clerk of the Board of Supervisors of the County of San Mateo, State of California. Dated, May 25, 1914.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Filmore and Chestnut Streets, San Francisco, California, at 9:00 A. M. Thursday, June 18th, 1914, until 5 P. M. Lighting Buses and D. C. Projector Feeder and Riser System in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which will be held by the committee. Successful bidder signing and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price who will be required for faithful performance of the contract. The sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and submit a new contract in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Filmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and specifications must submit a bond which will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (4)

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., May 2, 1914—SEALED PROPOSALS will be opened in this office at 4 P. M. of May 13, 1914, for construction complete (including mechanical equipment, interior lighting fixtures and plumbing) of a new building for a post office at Hanford, Cal. The building is one-story, with a mezzanine and basement, with a ground area of approximately 10,000 sq. ft. The walls are stucco, and terra cotta facing; composition and tile roof; first floor of fireproof construction. Plans and specifications may be obtained from the custodian of site at Hanford, Cal., or at this office, in the discretion of the Supervising Architect, A. W. WENDEROTH, Supervising Architect. (2)

Construction complete (including mechanical equipment, interior lighting fixtures and approaches) of the United States post office at Brigham City, Utah. Two-story building; ground area approximately 10,000 sq. ft. The walls are stucco and brick facing; composition roof. Drawings and specifications may be obtained from the custodian of site at Brigham City, Utah or at this office, in the discretion of the Supervising Architect, A. W. WENDEROTH, Supervising Architect. (2)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

ELECTRIC INSTALLATION AND EQUIPMENT—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids are now being called for furnishing A. C. buses and D. C. projector feeder and riser system. Bids will be opened for this work on June 11th. Plans and specifications can be secured on application to the Director of Works. An official proposal appears in another column of this issue.

PRESS BUILDING—1 story, frame and plaster construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for a building to be devoted to the exclusive use of the press which will be erected on the Exposition Grounds. There will be work rooms, telegraph department and lounging room. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken. Bids will be opened on June 18th. An official proposal appears in another column of this issue.

FERRY BUILDING—1 story, frame and steel. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on June 18th for constructing a union ferry building on the Exposition Grounds. Construction will be of steel and frame. Exterior will be covered with cement plaster on metal lath. Plans are complete and out for figures. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

RESIDENCE—2 story and base, frame, \$6,000. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher. The dwelling will be erected in Forest Hill and will be surrounded by large grounds. The dwelling has been designed for an eight-room house with two baths and a sleeping porch. Interior finish will be largely of pine with some redwood and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile and will be equipped with showers. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, E. B. Young, 251 Kearny street, S. F. Owner, Thomas Seoble, 363 14th avenue, S. F. The dwelling has been designed for a seven-room house and will be erected on the west side of Jordan avenue north of Geary street. Interior finish will be of pine and hard-

wood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot and composition floors will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

RESIDENCES—2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. These two houses will each contain seven rooms and bath and will be erected on adjoining property on the west side of 12th avenue south of Anza street. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Composition floors will be used in the bath rooms. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, C. E. Gottschalk, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Lombard street near the Exposition Grounds and has been designed to contain a number of two and three room suites with baths. Interiors will be finished in pine and redwood. There will be steam heat and a hot water supply. All suites will have wall beds. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—4 story and base, brick and steel, \$25,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, M. S. Shaw. The building will be erected on the north side of Bush street west of Hyde on a lot with a frontage of 34 feet 4 inches and a depth of 137 1/2 feet. There will be twenty-five apartments of two and three rooms. Interiors will be finished in pine with some elm panels and oak floors. Plans provide for steam heat, an automatic elevator, and hot water supply. All apartments will have private baths and wall beds. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with red pressed brick. Plans are complete and in the hands of the owner who is now taking figures for the work.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Mr. Revelli. The building will be erected at the corner of 26th and Capp streets, covering an area of 40 by 120 feet. There will be one store on the first floor and a total of

16 suites of two, three and four rooms on the upper floors. Interior finish will be of pine and redwood. All suites will have wall beds and private bath rooms. There will be gas steam radiators and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are nearly complete and a contract will be awarded shortly.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$25,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Green and Hallen. The building will be erected on O'Farrell street, and has been designed to contain 24 suites of three rooms each. Interior will be finished in pine and redwood with some elm panels and hardwood floors. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. All apartments will be equipped with wall beds. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

APARTMENT HOUSE—6 story and base, reinforced brick, \$68,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Gaffney Estate, C. P. Moore Building Co. or Fred Hansen will be awarded a contract within the net few days for this work. All bids are now under advisement in the architect's office. Further mention will be made of the work.

CITY HALL—4 story, dome and base. Class A construction, \$4,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans and specifications have been completed for the interior stone work for the new City Hall. Bids will be opened by the Board of Public Works on June 24th. Plans and specifications can be secured from the City Department of Architecture, Temporary City Hall. An official proposal appears in another column of this issue.

JAIL AND EMERGENCY HOSPITAL COMPLETION—Class A construction. Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for additional jail work and for the completion of the emergency hospital in the new Hall of Justice and City Jail building on Washington street. All construction will be of the class A type. Bids are now being called for by the Board of Public Works and will be opened on June 17th. An official proposal appears in another column of this issue.

FLATS ADDITION—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Thomas Ekroos, 915 Hampshire street, S. F. The work will consist of a two-story addition to the present one-story building at the southeast corner of Hampshire and 21st streets. New portion of the building will contain two modern five-room flats. Interiors will be finished in pine and redwood with hardwood floors in the living rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath and

rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, H. C. Keenan, 300 Webster street, S. F. The building will be erected on the west side of 18th avenue north of California street, covering an area of 27 by 58 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for a large open fire place in each of the living rooms. Mantels will be of tile. Automatic water heaters will be installed. Baths and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

HOSPITAL ICE PLANT—Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans and specifications have been completed by the Constructing Quartermaster's Office at Fort Mason for furnishing and installing a five-ton ice making plant at the Letterman General Hospital at the Presidio. Bids for this work will be opened on June 16th at 11 a. m. Plans and specifications can be secured from the office of the Constructing Quartermaster. An official proposal appears in another column of this issue.

HOTEL—5 story and base, brick and steel, \$100,000. San Francisco. Architects, Reid Bros. California-Pacific Bldg., S. F. Owners, Treadwell Realty Co. The building will be erected at the northwest corner of Fillmore and Eddy streets, covering a large ground area. The first floor will be arranged for stores as well as the hotel lobby and entrance. Upper floors will contain a large number of hotel rooms, a large percentage of which will have private baths. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Metal window sash and frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly ready for figures.

SUBSTATION—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. A new substation will be erected at the corner of 8th and Minna streets. Construction will be fireproof throughout with a steel frame, reinforced concrete walls and floors. Interior will be finished in pine. Special equipment will be furnished by the owners. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

PAVING—Cost not stated, San Francisco. Engineer, City Engineer. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last Wednesday meeting of the Board of Public Works for the Stockton, Columbus and Fort Mason paving show F. Rolandi low at \$125.-773.10. He will probably be awarded

the contract. A complete list of the bids received will be found under the heading of San Francisco in this issue.

STORES—2 story addition, Class C construction, \$20,000. San Francisco. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owner, Joseph Shooing Co. The present building on Stevenson street west of Fifth, covering an area of 22 by 75 feet will have a two-story addition. Upper floors will be arranged for lofts and the first floor for stores. Interior will be finished in pine throughout. There will be patent store fronts. Exterior will be faced with cement plaster. Plans are now complete and figures are being taken.

COMMERCIAL CLUB ALTERATIONS—\$150,000. San Francisco. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, San Francisco Commercial Club. The present club rooms on the 14th floor of the Merchants' Exchange will be enlarged and entirely refinished and furnished. Included in the work will be new interior finish, plastering, art glass, electric work and plumbing. Only preliminary plans have been prepared and details of the work will be published later.

THEATRE—1 story, frame and plaster, \$15,000. San Francisco. Architect, E. P. Antonovich, 333 Kearny street, S. F. Owner's name withheld. The building will be erected on the Exposition Grounds and will have a seating capacity of 750 people. Interior will be handsomely finished in pine and ornamental plaster. There will be a modern system of ventilation. Special electrical equipment will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans will be ready for figures about July 1st.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architect, H. H. Hohenschild, 310 Navarre Bldg., St. Louis, Mo., represented locally by R. S. Bogle, 311 Merchants' National Bank Bldg., S. F. Owners, State of Missouri. Plans for the exhibit palace which is to be erected at the Panama-Pacific International Exposition in this city have been completed and copies of the same forwarded to R. S. Bogle for local contractors. Bids are now being taken and will be opened in St. Louis on June 25th. An official proposal appears in another column of this issue.

APARTMENT HOUSES—2, 3 story and base, frame, \$12,000 each. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owners' names withheld. These two buildings will be erected for different owners on adjoining property on Franklin street between Clay and Washington streets. Each building will have a frontage of 30 feet and a depth of 85 feet. There will be six apartments in each consisting of four rooms. Interiors will be finished in pine and hardwoods. All suites will have private bath rooms and wall beds. There will be steam heat, a hot water supply and vacuum cleaners. Exteriors will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be taken at once.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, none. Owner, I. R. Kissell, 1723 Polk street, S. F. The building will be erected on the north side of California street between Larkin and

Polk streets, and has been designed to contain twelve suites of two and three rooms. There will be a central heating system and hot water supply. Portable vacuum cleaners will be installed. Entrance will be finished in marble. Interior finish will be of pine with some elm panels and hardwood floors. Each apartment will have a private bath and wall beds. Bath rooms will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

CHURCH—1 story and base, brick and steel, \$80,000. San Francisco. Architect, Edgar A. Mathews, Phelan Bldg., S. F. Owners, Christian Scientist Church. The building will be erected on Haight street near the Park and will contain a large main auditorium, smaller meeting rooms, reading rooms and study rooms. Interior finish will be of pine and ornamental plaster. There will be steam heat. Exterior of the building will be faced with pressed brick. Plans are nearly ready for figures.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, Howard Peterson, Blake Bldg., Oakland. Owner, C. Anderson. The dwelling will be erected on the west side of 25th avenue north of Judah, and has been designed for a seven-room house with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath with a brick veneer base. Plans are complete and the work will be done by Day Labor.

OILING MACADAM ROADS—Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Bids will be opened on June 20th for oiling all macadam roads in the Presidio and Fort Winfield Scott. Specifications for this work can be secured from the office of the Constructing Quartermaster at Fort Mason. An official proposal appears in another column of this issue.

Contracts Awarded.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architects, Albert Pretzinger and Edw. F. Musselman, Reibold Bldg., Dayton, Ohio. Owners, State of Ohio. Contractors, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$13,980.

APARTMENT HOUSE—4 story and base. Class C construction, \$98,000. San Francisco. Architect, J. R. Miller, Lick Bldg., S. F. Owners, Santa Christina Investment Co. Contractor, C. A. Brady, 180 Jessie street, S. F., general construction only. Contract price, \$98,000. Note: Subfigures are now being taken on all parts of the work except the brick work.

Mrs. A. Henze has filed a complaint with the Board of Public Works stating that the building located at No. 746 Kansas street, San Francisco, is a fire trap and very dangerous. The matter is being investigated by the Building Department.

City Bids Opened.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mrs. Jenks. The dwelling has been designed for an eight-room house with bath and sleeping porch and will be erected in the Hoyd Tract. Interior will be finished in pine and some hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BUNGALOW—1 story and base, frame, \$3,000. Oakland, Cal. Architects, United Home Builders, 1762 Broadway, Oakland. The dwelling has been designed for a six-room house, and will be erected on Haddon Road north of Excelsior avenue. Interior finish will be mostly of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have the wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

BUNGALOW—1 story and base, frame, \$2,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. McCauley. The dwelling has been designed for a five-room house with bath and sleeping porch, and will be erected in the Melrose District. Pine and redwood finish will be used. There will be some oak floors. A large open fire place will be a feature of the living room. Mantel will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with shingles. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—1½ story and base, frame, \$12,000. Piedmont, Alameda Co., Cal. Architects, Milwain Bros., Dolger Bldg., Oakland. Owner, Mrs. E. E. Stelle. The dwelling will be erected on Park Way at the corner of Monte avenue and has been designed to contain ten rooms, three baths and sleeping porches. A large private garage will be erected on the rear of the property. Interior of the house will be finished in pine and hardwoods with hardwood and inlaid floors in the principal rooms. There will be a central heating system, probably hot

water, and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. Automatic water heaters will be installed. Exterior of both the dwelling and garage will be covered with shingles. Plans are complete and the work has been started by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, H. H. Keys, Central Bank Bldg., Oakland. Owner, Charles Fisher. The dwelling will be erected at the corner of Lincoln avenue and Hibbard street, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,500. San Leandro, Alameda Co., Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owners, Huff Estate. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

RESIDENCE—1½ story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, H. H. Guttererson, 80 Post street, S. F. Owner, Mr. Penningman. The dwelling will be erected in Berkeley Heights, and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and elm panels with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have the wainscot and will be equipped with showers. Exterior of the dwelling will be covered with shingles and shiplap. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, S. J. Rankin. The dwelling will be erected on the Haddon Road and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors and beam ceilings will be used. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and a shower. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architects. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$1,000. Berkeley, Alameda Co.,

Cal. Architect, H. H. Guttererson, 80 Post street, S. F. Owner, John Howell. The dwelling will be erected in North Berkeley, and has been designed for a seven-room house with two baths and sleeping porch. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with shingles. Plans are now being prepared.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owner, Joseph Bauer. The building will be erected on West street between 35th and 37th streets, and will cover a considerable ground area. There will be a total of eight apartments of three rooms each. Interior will be finished in pine and elm. Some hardwood floors will be used. There will be a central heating system and a hot water supply. Portable vacuum cleaners will be installed. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared and when complete work will be done by Day Labor.

CHURCH—1 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owners, First Baptist Church of Berkeley. The building will be erected at the corner of Dana and Haste streets and will cover a considerable ground area. There will be the main auditorium. Sunday school rooms and a pastor's study. Interior finish will be of pine and redwood with some ornamental plaster in the main auditorium. Plans provide for a central heating system. Art glass will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for within a few days.

PLATS—3 story and base, frame, \$12,000. Oakland, Cal. Architect, none. Owner, John Dempniak, 1658 Washington street, S. F. The building will be erected near the corner of 10th and Grove streets, and has been designed to contain eight flats of four and five rooms. Interiors will be finished in pine, redwood and elm. Some hardwood floors will be used. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

CITY HALL LIGHTING FIXTURES—Cost not stated. Oakland, Cal. Architects, Palmer, Hornbostel & Jones, City Hall, Oakland. Owners, City of Oakland. Only two sets of figures were received for furnishing and installing the lighting fixtures in the new City Hall. The Roberts Mfg. Co., of San Francisco, bid \$6,350, and the Maxwell Hardware Co., of Oakland, bid \$6,995. Bids were referred to the Commission of Public Works.

HOTEL ALTERATIONS—3 story, frame, \$5,000. Architect, W. H. Rath Jr., First National Bank Bldg., Berkeley, Owner, A. J. Weeks. The building, located at the northwest corner of Telegraph avenue and Bancroft Way, will undergo extensive alterations. The first floor will be rearranged for seven stores and upper floors will have new interior finish, plastering and plumbing. New electrical work will also be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SCHOOL DORMITORY—2 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened on June 2 by the State Board of Control show H. A. Klyce of San Francisco low at \$11,330 for constructing the new dormitory building for the Industrial School for the Adult Blind. He will probably secure the contract. A complete list of the bids as opened will be found under the heading of Oakland and Alameda County in this issue.

SCHOOL PLUMBING—Cost not stated. Oakland, Cal. Architect, J. J. Donovan, City Hall Bldg., Oakland. Owners, City of Oakland. Plans and specifications are now complete for the rough and finished plumbing to be installed in the Garfield School, Emerson School, and the Manual Training and Commercial High School. Bids for this work will be opened on June 16th by the Board of Education. Plans and specifications can be secured from the architect.

RESIDENCE—2 story and base, frame, \$4,200. Piedmont, Alameda Co., Cal. Architects, Thomas & Oliver, Pantazes Bldg., Oakland. Owner, Alfred Cord, 609 Walla Vista avenue, Piedmont. The dwelling will be erected in Nova Piedmont, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will be finished in tile and equipped with a shower. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STORES—1 story and base, brick, \$5,000. Berkeley, Alameda Co., Cal. Architect, Alvin J. Stern 1512 Broadway, Oakland. Owner, W. Greuner. The building will be erected at the corner of University and San Pablo avenues, and has been designed to contain three modern stores. Interior finish will be of pine throughout. Patent store fronts and plate glass windows will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. Materials are now being purchased through the architect.

Contracts Awarded.

STORES AND LOFTS—3 story and base. Class A construction, \$60,000. Oakland, Cal. Architect, C. W. Dickman, Central Bank Bldg., Oakland. Owners, Nellie E. Blood, Jessie L. Appleton and Alliance Land. Contractor, P. J. Walker, Monadnock Bldg., S. F. Contract price, \$60,000. Note: Subfigures are now being taken on the work.

Lighting Fixtures For Oakland City Hall.

Roberts Mfg. Co. of San Francisco Low Bidder—Bids Referred to Commission of Public Works.

Only two bids were received by the Oakland City Council for lighting fixtures for the new City Hall. The Roberts Mfg. Co. of San Francisco bid \$6,350 and the Maxwell Hardware Co. of Oakland bid \$6,995. Bids were referred to the Commission of Public Works.

Bids For Building School For Blind.

H. A. Klyce Low For Constructing Dormitory Building For School For Adult Blind, Oakland.

(By Special Wire).

SACRAMENTO, CAL., June 2nd, 1914.—Twenty sets of figures were opened by the State Board of Control at their Tuesday meeting for the construction of a brick and steel dormitory building for the Industrial School for the Adult Blind at Oakland. H. A. Klyce of San Francisco was the lowest bidder at \$11,330 and will probably be awarded the work.

SAN JOSE & SANTA CLARA CLARA VALLEY.

RESIDENCE—3 story and base, reinforced concrete, \$250,000 to \$300,000. Hillsborough, San Mateo Co., Cal. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Harriette Pullman Carolan. The dwelling will be erected on the Carolan Estate and will be fireproof throughout. Occupying the center of large grounds which will be laid out in formal gardens, the dwelling will be one of the handsomest homes on the peninsula. Interior finish will be largely of hardwoods. Hardwood and inlaid floors will be used extensively. There will be a central heating system, vacuum cleaning and a hot water supply. Elevator service and dumb waiters will be installed. All bath rooms will be finished in tile. There will be open fire places and tile and marble mantels. A garage, stables and kennels will also be erected on the property. A contract for the excavating and reinforced concrete work has been awarded ea the Clinton Fireproofing Co., Mutual Bank Bldg., S. F., for \$42,350. Plans for the other parts of the work will be out for figures shortly.

RESIDENCE—1 and 2 story, and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: I. G. Cook, 850 North Miller street, 1 story six-room cottage, \$2,000; Lewis Co., 445 South 3rd street, 1 story five-room house, \$1,500, and Mrs.

Emma S. Yender, 226 South 23rd street, 1 story four-room cottage, \$300.

BRIDGES—Timber and reinforced concrete. Cost not stated. San Jose and Hollister, Santa Clara and San Benito Co., Cal. Engineers, County Surveyors of Santa Clara and San Benito Counties. The counties of San Benito and Santa Clara have arrived at an understanding in the joint county bridge matter, and plans have been ordered prepared by the two County Surveyors for the Sargents bridge over the Pajaro River which will cost \$18,000, and for a bridge over the San Felipe River near the Dunne ranch. Bids will be called for shortly.

Contracts Awarded.

BRIDGE—Steel and reinforced concrete, \$60,508. Soledad, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County Contractors, W. N. Concannon Co., Monadnock Bldg., S. F. Contract price, \$60,508.

BRIDGE WORK AT SAN JOSE.

John Doyle Will Construct Reinforced Concrete Bridge Over Penetencia Creek, San Jose.

A contract has been awarded to John Doyle, of San Jose, for \$1,881 for constructing a reinforced concrete bridge over Penetencia Creek, San Jose. Plans were furnished by County Surveyor J. G. McMillan. The following bids were received:

Ralston Iron Works\$36,212 Hawley Jail Co. 22,022 W. C. West Co. 21,963

Bids were taken under advisement until Friday, June 12th.

HOSPITAL DAIRY BUILDING—Reinforced concrete, \$11,550. Stockton, San Joaquin Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. H. A. Klyce of San Francisco presented the lowest bid for constructing new dairy buildings at the Stockton State Hospital and will probably be awarded the contract. A complete list of the figures received by the State Board of Control will be found under the heading of Sacramento, Stockton and Northern California in this issue.

GAS HOLDER AND TANK—Cost not stated. Talmage, Mendocino Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids received on June 1st by the State Board of Control for this work show the Western Pipe and Steel Co. of San Francisco low at \$5,285. They will probably be awarded the contract. A complete list of the

figures received will be found under the heading of Sacramento, Stockton and Northern California in this issue.

SCHOOL ADDITION—1 story and base, brick. Cost not stated. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, City of Stockton. Plans have been completed for a four-room addition to the present building located at the corner of Washington and Monroe streets. Interior will be finished in pine. There will be a warm air system of heating, oil burning furnace. Metal tile and tar and gravel roof is specified. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

SCHOOL HEATING SYSTEMS—Cost not stated. Stockton, San Joaquin Co., Cal. Architects, Stone and Wright, 24 South California street, Stockton. Owners, City of Stockton. Bids are now being called for furnishing and installing warm air heating systems with oil burning furnaces in all of the new Stockton school buildings. Plans and specifications can be secured from the architects. Bids will be opened in about a week or ten days.

SCHOOL—1½ story and base, frame, \$15,000. Sacramento, Cal. Architect, C. C. Cuff, Sacramento. Owners, North Sacramento School District. Plans are now being prepared for a new building to be erected in the Haglins-Grant Tract. There will be four class rooms and an assembly hall. Interior finish will be of pine and redwood. Maple floors will be used in the class rooms. Plans provide for a warm air system of heating, modern school plumbing and blackboards. Exterior of the building will be covered with cement plaster on metal lath. Bids will be called for as soon as plans and specifications can be completed.

RESIDENCE—2 story and base, frame, \$5,000. Sisson, Shasta Co., Cal. Architect, James W. Planché, Acheson Bldg., Oakland. Owner, Dr. Burnett. The dwelling has been designed for a seven-room house and will include the doctor's office. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BRIDGE—Steel and reinforced concrete, \$60,000. Yuba City, Butte Co., Cal. Engineer E. L. Cope Yuba City. Owners Butte County. The Butte County Board of Supervisors accepted the plans and specifications for the Butte Slough bridge at Yuba City as prepared by E. L. Cope. Bids will be received on June 29th. The bridge will be of the reinforced concrete type, 1250 feet long and has been estimated to cost \$60,000. Full particulars can be secured from the County Clerk of Butte County.

FIRE HOUSE—2 story and base, concrete and frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, City Engineer Compton, Stockton. Owners, City of Stockton. The building will be erected on property recently purchased on California street between Jefferson and Jackson streets. Plans provide for room for engine and apparatus equipment on the first floor

and living quarters for the men on the second floor. Interior will be finished in pine and redwood. There will be steam heat and a hot water system. Bath rooms will be equipped with showers. Exterior of the building will be faced with cement plaster. Special electrical work will be specified. Plans are now being prepared.

POWER PLANT—1 story, reinforced concrete. Cost not stated. Fall River, Shasta Co., Cal. Engineer's name not given. Owners, California Power and Manufacturing Co. Charles E. Kormel has arrived at Fall River, Shasta County to superintend the construction of the California Power station. A 400 horse power plant will be installed at the present time, but the company has water rights giving an available 100,000 horse power, which will be developed shortly.

Contracts Awarded.

SCHOOL—2 story and base, brick, \$30,000. Chico, Butte Co., Cal. Architect, Chester Cole, Chico. Owners, Oakdale School District. Contractor, E. D. Sharp, Chico, general construction only. Contract price, \$29,335.

PUMPING PLANT MACHINERY—\$35,790. Reclamation District No. 1001. Sutter Co., Cal. Engineer's name not given. Owners, Reclamation District No. 1001. Contractors, The Electric and Machine Equipment Co., Stockton. Contract price, \$35,790.

Bid On Dairy Buildings At Stockton Hospital.

H. A. Klyce Low for Work at Stockton State Hospital—Only Three Bids Were Received.

(By Special Wire.)

SACRAMENTO, June 4, 1914—Only three sets of figures were received, by the State Board of Control today for the construction of Dairy Buildings at the Stockton State Hospital, H. A. Klyce of San Francisco presented the low figure at \$11,590. The other figures follow:

Dairy Buildings, Stockton.

H. A. Klyce	\$11,590
L. G. Burgren	17,670
William A. Newsom	19,666

No formal award was made but the low man will undoubtedly be awarded the contract.

LOS ANGELES AND SOUTHERN CALIFORNIA.

ICE RINK—1 story, steel and reinforced concrete, \$100,000. Los Angeles, Cal. Architect, Ernest Horstman, 1 W. Hellman Bldg., L. A. Owners, the Jefferson Grand Arena Co. The building will be erected at the corner of Jefferson street and Grand avenue, covering an area of 300 by 181 feet. There will be a main rink of 85 by 214 feet with benches and concession stands. Interior will be finished in pine. Roof will be carried on steel trusses. Plans include complete ice making machinery. Exterior will be faced with cement plaster. Plans are now being prepared.

HOTEL—4 story and base, brick and steel. Cost, not stated. Los Angeles, Cal. Architects, Theo A. Eisen & Son, Wilcox Bldg., L. A. Owner, I. L. Levy. The building will be erected on the west side of Figueroa street south of Pico, having a frontage of 95 feet and a depth of 111 feet. There will be five stores besides the hotel lobby on the first floor. Upper floors provide for a total of 84 guest rooms and 10 baths. Interior will be finished in pine throughout. Plans provide for steam heat, elevator service, a hot water system and patent electric fronts. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SCHOOL—2 story and base, rein-

forced concrete, \$50,000. San Fernando, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Morningside School District. The building will contain eight standard size class rooms, assembly hall, domestic science and manual training departments, principal's office, teachers' rooms and library. Interior will be finished in pine. There will be a central heating system, oil-burning plant, modern school plumbing, program clocks and a vacuum cleaning system. Maple floors will be used in the class rooms. Composition blackboards are specified. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now being prepared.

COLLEGE—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architects, Richards-Neustadt Co., Wright and Callender Bldg., L. A. Owners, University of Southern California. The building will be erected at the corner of Los Angeles and 16th streets, covering an area of 80 by 140 feet. There will be offices, clinic rooms, lecture rooms, class rooms and laboratories. Interior will be finished in pine. Metal lath and plaster partitions are specified. Plans provide for steam heat. Exterior of the building will be faced with cement plaster trimmed with artificial stone. Plans are complete and figures are being taken by Prof. L. E. Ford, Los Angeles Investment Bldg., L. A.

APARTMENT HOUSE ALTERATION—Cost not stated. San Bernardino, San Bernardino Co., Cal. Architect, Anthony Binner, 133 3rd street, San Bernardino. Owner, Mrs. Bertha Rolfe. The work will consist of extensive alterations to a two-story frame building located at 570 D street. There will be new interior finish, partitions, plumbing and electric work. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken. Bids will close on June 15th.

RESIDENCE—2 story and base, frame, \$3,600. San Bernardino, San Bernardino Co., Cal. Architect, Anthony Binner, 133 3rd street, San Bernardino. Owner, W. J. Kinley. The dwelling has been designed to contain seven rooms and bath. Interior will be finished in slash grained Oregon pine throughout. There will be open fire places and imitation stone mantels. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster and shakes. Plans are now being prepared.

SCHOOL—1 story and base, frame, \$2,000. Rialto, San Bernardino Co., Cal. Architect, Anthony Binner, 3rd street, San Bernardino. Owners, Rialto School District. The building will contain two class rooms. Interior will be finished in pine. Gas grates will be used for heating. Composition blackboards are specified. Exterior of the building will be covered with rustic. Plans are complete and figures will be opened on June 20th.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick and steel, \$35,000. Los Angeles, Cal. Architects, Noonan & Murphy Co., Douglas Bldg., L. A. Owner, Mrs. Jessie E. Ellis. Contractors, Noonan & Murphy Co., Douglas Bldg., L. A. Contract price, \$36,000.

BANK AND OFFICES—6 story and base, reinforced concrete, \$30,000. Pasadena, Los Angeles Co., Cal. Architects, Parkins and Bergstrom, Security Bank Bldg., L. A. Owners, Citizens National Bank of Pasadena. Contractors, F. O. Engstrom Co., 3th and Seaton streets, L. A. Contract price, \$30,000.

SCHOOL—2 story and base, brick, \$10,000. Mayer, Yavapai Co., Ariz. Architect, W. S. Elliott, Prescott. Owners, Mayer School District. Contractor, Joe Pettit, Prescott. Contract price, \$9,000.

PORTLAND AND OREGON.

LODGE HALL—4 story and base, brick and steel, \$50,000. Portland, Ore. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Knights of Columbus Hall Association. The building will be erected at the corner of Park and Taylor streets, covering an area of 50 by 100 feet. The building will contain a large gymnasium, billiard hall, ball rooms, library, auditorium, music room, bowling alley and offices for the executive staff. Interior will be finished in pine and hardwoods. There will be steam heat, elevator service and vacuum cleaning system. Gymnasium will contain a large swimming pool. Exterior of the building will be faced with pressed brick and cut stone. Plans are now being prepared.

SCHOOL—2 story and base, frame, \$12,000. Molalla, Ore. Architect, P. Chapell Brown, Mohawk Bldg., Portland. Owners, Molalla School District. The building has been designed to contain eight standard sized class rooms and an assembly hall. There will be steam heat and modern school plumbing. Interior finish will be of pine throughout. Composition blackboards will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

CONVENT—4 story and base, reinforced concrete, \$125,000. Portland, Ore. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Sisters of the Good Shepherd. The building will be erected on the property bounded by Congress, Bryant, Albina and Dekum streets, and will cover an area of 210 by 145 feet. A U-shaped plan has been carried out. There will be a number of class rooms, dormitories and a chapel. Interior will be finished in pine throughout. Some art glass is specified. Plans provide for steam heat, modern plumbing and electric work and a hot water system. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

DOCKS—Timber pile construction, \$150,000. Flavel, Ore. Engineer's name not given. Owner, S. P. and S. Co., Contractors, Guthrie-McDonald Co., Lewis Bldg., Portland. Contract price, \$150,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—5 story and base, brick and steel, \$100,000. Seattle, Wash. Architects, Weld & Thomas, Hoge Bldg., Seattle. Owner, Mr. Wheeler. The building will be erected at the northwest corner of 6th avenue and Spring street. There will be be-

tween 110 and 115 rooms which will be arranged in suites of two and three rooms with bath. Interior finish will be of pine with some hardwood veneer. Plans provide for steam heat, an automatic elevator and hot water supply. Vacuum cleaning system will also be installed. There will be wall beds in all apartments. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within ten days.

STORES AND LOFTS—6 story and base, steel and reinforced concrete. Cost not stated. Seattle, Wash. Architect, Louis Mendel, Oriental Bldg., Seattle. Owners, John F. and James B. O'Shea. The building will be erected at the southeast corner of 5th avenue and Pine street, and will cover a large ground area. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. There will be passenger and freight elevators, steam heat and a vacuum cleaning system. Metal window sash and frames will be used. Interior finish will be of pine. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be taken on a general contract within twenty days. Further mention will be made of the work.

Contracts Awarded.

BRIDGE—Steel and concrete, \$300,000. Coquillam, B. C. Engineer's name not given. Owners, Province of British Columbia, Contractors, Armstrong, Morrison & Co., Vancouver, B. C. Contract price, \$300,000.

RAILROAD SHOPS, ETC.—Reinforced concrete construction, \$60,000. Lewiston, Idaho. Engineer, Engineering Department Northern Pacific R. R. Co. Owners, Northern Pacific Railroad Co. Contractors, E. J. Rounds Construction Co., Walker Bldg., Seattle. Contract price, \$60,000.

CITY HALL MARBLE WORK.

The contract for interior marble work for the new City Hall, has been awarded to Joseph Musio Sons-Keenan Company for the amount of \$234,860.

This is the largest single contract for marble work ever let on the Pacific Coast, and the artistic treatment of the public offices and corridors is particularly effective.

The Joseph Musio Sons-Keenan Co. have extensive marble plants in this City and Los Angeles and have just completed the interior marble work for the Oakland City Hall, the amount of this contract being \$105,000.

They have also under way the exterior and interior marble work for the Hobart Building. In the execution of which it is contemplated to make a record for prompt delivery and artistic workmanship.

METAL RAILROAD TIES.

About 70 per cent of the ties in use on the federal railways of Switzerland are metal. Metal ties were first used on the Swiss roads in 1881, since which time they have gradually replaced to a large extent the wooden ties. Iron ties are especially recommended on the Swiss roads where a good quality of gravel is available for ballast.—American Machinist.

Local Firm Enters On A New Field.

Rolph, Mills & Co. Will Represent Alvey Manufacturing Co. on This Coast in Future.

The Alvey Manufacturing Company of St. Louis, Mo., manufacturers of all kinds of conveying machinery, has actively entered this market by securing the firm of Rolph, Mills & Co., Rialto Building, as their Pacific Coast agents.

Rolph, Mills & Co., which is composed of Thomas Rolph and H. B. Mills, is a well known and established firm of manufacturers agents, having offices in San Francisco, Seattle and Los Angeles, handling some of the best accounts on the Coast, among which are Messrs. Joseph T. Ryerson & Son of Chicago, the Sloss-Sheffield Steel & Iron Company, Birmingham, the Pennsylvania Wire Glass Company, Philadelphia, The Hawaii Hardwood Co., Ltd., of Pahoa, T. H., and the American Perfettile Company, Philadelphia.

In connection with the Alvey Manufacturing Company's agency, they have secured the co-operation of William E. Spink, an engineer who makes a specialty of planning and installing conveying machinery lay-outs for the economical handling of all kinds of products and freight. Rolph, Mills & Company, therefore, are in a position to quote manufacturers' prices direct or prices on the equipment installed. They are also in a position to give expert service and advice in regard to all freight handling problems.

Among the many kinds of equipment handled by this firm are included straight and spiral chutes, gravity and spiral conveyors, movable platforms, belt conveyors, automatic lifts and overhead trolleys, as well as special equipment for breweries, creameries, canneries, etc.

This firm's responsibility and experience insures the best and most efficient service for any one intrusting business to them.

FOREST NOTES.

Students of the Oregon agricultural college are working at the forest nursery on the Sluslaw forest. The arrangement is said to be mutually satisfactory since the students gain experience in forest nursery practice and their assistance lowers the cost of nursery work.

Manufacturers have found that red alder from the Pacific Coast is a suitable material for clothespins. Alder makes a white, smooth, springs pln. as a result of this fact, a clothespin factory, said to be the first on the Pacific coast, may be established at Portland, Oregon.

NOTICE OF DISSOLUTION OF PARTNERSHIP.

A Dissolution of Partnership has been filed between M. HONOLKE and H. LEMM under the name and style of North Star Iron Works, located at No. 1311 Harrison street. Has been dissolved by mutual consent.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the **Building and Industrial News** contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the **Building and Industrial News** containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Peerless Ironing Board. Disappears in the Wall

The Peerless Ironing Board is perfect in compactness and convenience. Inexpensive but very valuable for apartments, flats and residences. Helps to rent or sell more quickly at better prices.

Prices \$7.50 and \$8.00

The Peerless Combination Ironing Board and Kitchenette Table combines the ironing board with a disappearing table in the most compact, inexpensive and convenient form. Invaluable for the small kitchen.

Price \$10.00

Write for circular. Agents wanted.

THE Safe Deposit Vaults of the BANK OF ITALY

Are Open Every Day of the Year

Including Sundays and Holidays

From 8 A. M. Until Midnight. Especially
Convenient for Builders and Contractors.

Boxes \$2 50 per year and upwards.

Junction Market, Mason and Turk Streets

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

have taken over the following agencies formerly represented by the above companies.

"Duplex", "Ideal" and "Van Dorn" Steel Joist Hangers, Post Caps and Bases.

"Paschall" Sidewalk Light Construction—All kinds.

"J. C. E." Welsh Quarries—For Floors, Mantels, etc.

"Universal"—"Anti-Slip" and "Carborundum" Safety Stair Treads.

"Kinneer," Steel Rolling Doors and Shutters.

"Dririte" Cabinet Laundry Dryers.

"Fenestra" Steel Sash—For Factories, Garages, Schools, etc.

"Drouve" Straight-Push Window Operating Devices.

"Drouve" Anti-Pluvius Skylights.

"Grant" Pulleys, Pivot Lifts and Casement Devices.

"Turner" Drawer Slides.

"Home" Safety Window Guards.

"Merritt" Steel Lockers and Shelving—For Garages, Schools, Gymnasiums, etc.

"Phoenix" Sanitary Metal Tile — For Bathrooms, Kitchens, etc.

"American" Rotary Vacuum Cleaning Plants—For Office Buildings, Residences, etc.

"Hill" Clothes Dryers—For Yards, Balconies and Roofs.

"Hustler" Ash Sifters—Save Coal.

"The Window" Coal Chute—Ornamental and Necessary.

Asbestos Theatre Curtains.

"Beaver Board",—The Superior Modern Wallboard.

"Cabot's" Deafening and Sheathing "Quilt."

Building Papers, Deadening Felts, etc., of all kinds.

"All-Metal" Doors, Windows and Trim.

"Liquid Stone", The Paint Eternal.

"Wainright" Concrete Curb and Corner bar.

"Graphilatium" for Roofs.

"Herringbone" Expanded Steel and Ingot Iron Lath.

"Hannon", "Hub" and "Goodwin" Metal Corner Bead.

"Best's" Keene's Cement—For Gauging Plaster and Finishing.

"Caenstone" Cement—For Making Artificial Caen-Stone.

"Victoria" Keene's Cement (Imported) For Artificial Marble and Tile.

"La Farge" Non-Staining Cement.

"Cabot's" Mortar Color Pulp.

"Whnlebone" and "Crimped" Metal Wall Ties.

"Rutty" Metal Wall Plugs....

"Hercules" Waterproofing Cement Compounds.

"Cabot's" Mortar Color Pulp.

"Cabot's" Creosote Shingle Stains.

"Cabot's" Cement and Brick Waterproofing Stains.

"Cabot's" "Conservo" Wood Preservative.

"Con-ser-tex" Canvas Roofing — For Sleeping Porches and Decks.

"Rubber-Mica" Ready Roofing.

The Ruberoid Roofing.

"Rextile" Rubber Shingles.

"Diamond" Ball bearing Door Hangers.

"Metalcrete" concrete Hardner.

"Ironite" concrete Hardner.

Wood rolling doors and partitions.

Venitian Blinds.

"White House" Kitchen Furniture.

A number of new agencies will shortly be added to the above list.

Editorial Comment.

THE POWER OF SELF.

One ship drives east, another drives west.

While the selfsame breezes blow;
'Tis the set of the sails and not the gales.

That bids them where to go.
Like the winds of the sea are the ways of Fate.

As we voyage along through life,
'Tis the set of the soul that decides its goal.

And not the calm or the strife.
—Ella Wheeler Wilcox.

The occupation of school teacher has been one that has been undervalued by the people generally in this country. Generally speaking people have regarded it as a question of dollars and cents and have driven a hard bargain with the teacher and endeavored to get the most for their money. There has been no union among teachers and as a result the occupation has been taken up almost exclusively by women. Now the importance of the occupation is becoming to be realized and in the different states funds are being provided for pensions for those who have served a certain length of time and a retirement fund for teachers who have reached a certain age.

In this connection Andrew Carnegie has provided a fund to be used for the benefit of the Teaching Profession generally.

The eighth annual report of the president of the Carnegie Foundation for the Advancement of Teaching, shows a total endowment of \$15,325,000, and an expenditure for the year ending September 30th, 1913, of \$658,431. Of this \$519,440 was distributed in retiring allowances to professors, and \$80,949 in pensions to their widows, a total of \$600,389. Thirty-three allowances were granted this year, making the total in force 403, the average annual payment to an individual being \$1,703. The total distribution from the beginning has been \$2,836,927. The educational work of the Foundation was separately endowed in January, 1913, by a gift of \$1,250,000 from Mr. Carnegie through the Carnegie Corporation of New York. This body, which is endowed with one hundred and twenty-five million dollars for "the advancement and diffusion of knowledge and understanding," has five ex-officio trustees, of whom one must always be the president of the Carnegie Foundation for the Advancement of Teaching.

The fund devoted to this purpose is a creditable use to put money and an intelligent charity. While, the profession of teaching should be sufficiently remunerative to prevent the persons engaged in it from becoming dependent

the fact is that it is not and the gift of a fund to be used to take care of superannuated and dependent teachers reaches a class that would be hard to reach by general legislation.

William Randolph Hearst has answered ten questions put to him by a German editor on the Canal Tolls question. The inquiry naturally arises as to whether Hearst has acquired a German newspaper, for certainly no sane man would ever ask Hearst a question and expect to get an intelligent and unbiased answer.

Reports from the East from personal friends of Ex-President Roosevelt state that the South American fever has left its mark upon him and that it is doubtful whether or not he will ever be the same man again.

Certainly he is a great example of the strenuous life. Originally in poor health he spent some years as a plainsman in Wyoming and built up a rugged constitution. Since then he has been a marvel of activity and his two trips through unknown and dangerous jungles of tropical Africa and South America are only incidents in a life as crowded with action as the tales of Ulysses and Agamemnon.

The head of the Pullman Company has again been before the Railroad Commission as to the manner of conducting its business with the public. One thing that Commissioner Eshelman insists on and that is that the porters be paid sufficient wages to enable them to live without depending on tips from the traveling public. No other way can any uniformity of treatment be secured. For as it is now it is said that the porters receive a wage equal to the average monthly loss of articles on the sleepers for which they must pay. The company makes an inventory of all things contained in the car at each trip and if any thing is lost or stolen the porter is held accountable. So that the general average just about makes the porter's salary and he is compelled to depend on the public for his living. Under such conditions there can be no uniformity of treatment of the public. If the company pays a living wage then there should be uniformly courteous treatment and if such is not accorded the company could always secure better men for their employ.

Mt. Lassen has the center of the stage just at present. It is the dying result of the long period of eruptions that have spread successive lava flows over the high Sierras in ages past and left the summit dotted with craters and mountain lakes. It is another of nature's wonders close at hand that one may study without going out of the State.

The Landscapist As The Architects Conferee.

Qualifications of the Landscapist, Architects Problem and Nature's Endowment.

H. E. Rasmussen.*

It is a recognized fact that to achieve the best results, one must specialize; hence the efficiency obtained in commercial and industrial lines by the American nation. True, some genius like an Edison may master all trades, but this is the exception and not the rule. With the progress of modern business, we find it necessary to create new trades and professions. The efficiency engineer, whose work has been applauded by the heads of governments and industrial concerns, is a striking example.

The building of a home, a true home where harmony reigns and implants itself perhaps unconsciously to the inmates, is a greater and more worthy task than the building of great industries. Do the American homes equal those of old Europe? They may equal them in costliness and do surpass them in mechanical devices for comfort and cleanliness, and yet home in America has not the same meaning as in the old country."

The real home is the place of all places with which you are in full sympathy, built to suit your own tastes and particular fancies; a refuge of peace with "nerve soothing surroundings." Have you built such homes, Mr. Architect, for your clients, or have you mainly aimed at surpassing your competitor in extravagance and grandeur and thereby having missed the essential? The medical profession has found that certain colors have a soothing and curative effect on patients suffering from various diseases, thus proving that the surroundings of a home, if beautified by a specialist, is an incentive to good health and happiness. The architect unfortunately too often overlooks this important part of the work entrusted to his care, or attempts to plan the work for which he cannot spare the time to acquire the special knowledge required if he excels in his own particular profession, or his indifference to the surroundings of the home he is about to build, oftentimes causes him to err in selecting the man to do the work. He often selects an Eastern landscape architect, who has no knowledge of local conditions and no interest in its development; or worse still, engages a dealer in plants whose sole object is to dispose of any surplus stock without regard to the effect when planted.

The Qualifications of a Landscapist.

To become a successful landscapist in any particular place, one must familiarize himself with the soil and changing seasons before he is able to operate or advise. For instance, a landscapist from the east is no more capable of giving advice on conditions as they exist here than an architect from the torrid zone would be capable of advising on the architecture and heating systems of the north.

The landscapist must have many qualities to rightly perform his duties. He must be an artist with strong imagination in order for him to see the completed work in his mind's eye. His is a picture which takes at least a

decade to finish, it grows under his care, he must know his material, the plants, and how each one develops and their inter-relation regarding their color and shape. He must have an eye to the graceful lines which will harmonize with the architecture of the building and surrounding landscape. He must have knowledge of botany, and chemistry sufficient for him to analyze the soil and determine which is best suited for each kind of plant. He must have sufficient knowledge of engineering and architecture to work out his scheme in harmony with the architect and engineer; he must love his work sufficiently in order that he does not neglect his aim. The true aim of an artist is to create the very best under the circumstances, instead of mere economical advantages to himself. He must also possess a certain knowledge of human nature and tact in order to become intimate and familiarize himself with the likes and dislikes of the home-builder, and then plant a garden in accordance with the individual tastes. Is the landscapist regarded here by the architect and home-builder with due consideration, in view of the knowledge he must possess in addition to his being a practical man? He is not! and I think to a great extent through faults of his own, or rather those in the trade, a trade where organization and co-operation have taken but little root.

The Problem Before the Architects.

I well appreciate the fact that the architects have difficulty in choosing the right man, few landscape architects having graduated or passed examinations. The only way is to choose a man who has proved himself successful in obtaining results in a given locality. If he has succeeded in producing favorable results on a small area, he is likely to succeed on a larger scale, because it is as a rule more difficult to lay out a small piece of ground to get the desired effect than one which is not so congested.

In my opinion the home-builder often commits a serious error in erecting too large a residence for the size of the ground, which gives the place the appearance of being top-heavy, and the money expended on the building is out of all proportion to that spent on beautifying the surroundings. No matter how beautiful the design of a house, everyone must admit it takes the skill of the well-trained landscapist to bring out the beauties of the architect's work. However, we are pleased to note the younger generation is inclining more and more towards the outdoor life, and the development of school gardens will encourage this tendency.

Let me sum up, what in my opinion is necessary to bring about the proper relationship between the home-builder, architect and landscapist:

1. That all three get together from the first, the landscapist's business being to help the home-builder choose his site after having learned his requirements, or to tell the home-seeker

the possibilities of the ground already chosen.

2. That at least one-fifth of the entire cost of the home be devoted to the beautifying of the grounds.

3. That the proportion of the site of the building to that of the grounds be duly considered by all three, and the position and elevation of the buildings be determined.

4. That the landscapist be put in charge of the clearing and excavating from the first, with a view to preserving any top soil present, and the most economical way of disposing of any poor bottom soil, which is now in most cases spread over the entire lot.

5. Plans of the garden to be submitted to the architect to ensure proper harmony with the building, such plans to include permanent planting plans.

6. Care of the grounds to be allotted to the landscapist for at least six months after the completion of the planting.

This arrangement, which could easily be based on business lines, would result in infinitely better and truer homes and save needless expenditure and worry to all parties concerned.

Each home costing say \$5,000 ought to be thus considered, and let me add, in planning a city or town, a landscapist conversant with climatic conditions and the soil would often be able to advise in grading and save a community thousands of dollars, and much more in a number of cases, to say nothing of results obtained regarding beauty and harmony in street planting, etc. This has been done in Canadian cities, and in Denver the architects have to some extent taken into consideration the landscapist and treated him with some semblance of respect for his trade, with the result of establishing a most beautiful city.

Each town of 10,000 inhabitants should be able to maintain a local landscapist and treat him so that he can respect himself. For larger undertakings, such as parks, cemeteries, golf links, etc., a larger local firm's assistance may be required.

The Possibilities Attended by Nature.

I have perhaps severely criticised both architect and home-builder, and if so, it is because I so clearly see the immense opportunities afforded us by nature in this beautiful Pacific Coast; opportunities unequalled in any other civilized part of the world. Here, indeed, in my opinion, is the cradle for the future race, if the Caucasian race is to retain its present supremacy. It is largely dependent on our attitude toward life if this is to be so; and you architects of the west, together with the man of pecuniary influence, have it almost in your hands to mold this up-growing new American race, in which not the dollar alone will predominate, but the more refined qualities in man will come to be recognized. Exert this influence and become not only builders of brick and wood, but one of human flesh and mind; and help create the structure of human society in

which there shall be room for happiness and peace.

You are able here in a new country to lay the foundation without the obstacles one has to contend with in the old established communities, and it is realized more, day by day, that you are working on historic territory, and that a happy, care-free people once occupied these shores.

With our modern scientific equipment for producing, together with the natural advantages, here indeed in the locality where a new race composed of all the best who have fled from the old countries with their various social and economic forms of oppression could be built, dominating the world, not by the power of arms, but by setting an example in living a scientific life, with human happiness as its aim. Numerous signs are here that a start is made toward that end, for no where are such playgrounds and boulevards connecting natural parks, the maintenance of which could be improved upon; also the planting plans bear evidence that they were not made by a man conversant with the possibilities and climate of the northwest, many eastern effects having been produced with "hardy" wild roses, which have an excuse in the east with temperatures often below zero, but not here where softer evergreens, with flowering shrubs and bulbous plants and perennials to give color to early spring, would be a ten-fold improvement, to say nothing of the planting of hybrid roses. In fact, roses of all kinds, to which this climate offers the ideal conditions. Roses may here be blooming outdoors nine months of the year, and many varieties classed among the evergreens retaining their leaves during the greater part of the winter.

The possibilities are not only to have parks as fine as Europe, but the creation of a distinct western type of landscape architecture. The Pacific highway, now under construction, should carry with it a high artistic and humane spirit. Let fruit trees to suit each locality be planted by the wayside, affording the touring millionaire, as well as the passing tramp, the opportunity of gathering the luscious fruits free of charge, and, as in Saxony, the remainder of the harvest paying for the maintenance of the road under proper care, to say nothing of the artistic effect.

More than anything, the establishment over the land of school gardens will bring about almost the love for nature, so if for no other reason, Mr. Architect, let the business aspect appeal to you to get on the right line. Good gardens will be requested before long, and the architect able to give them will get the business. The home-builder will soon detect whether you have properly considered this question, or he will himself take it in hand.

If I have been wrong in any of my assertions, I hope the architects of the northwest will take up the question with me in public for discussion. If not, I trust their organization will consider my contention, and, as an already well organized body, help establish a new worthy craft, that of landscape architecture. The two organizations, when properly established, each one in co-operation with each other, would build new real homes and with them a new race.

*Manager of Seattle Landscape and Nursery Company, Seattle.

GENERAL SAFETY SUGGESTIONS.

State Industrial Accident Commission Gives Valuable Pointers to Employers as to Rules to be Observed in Factories and Places of Employment.

In response to a general request from the employers of California for suggestions which will enable them to guard machinery so as to prevent accidents, the Industrial Accident Commission has issued in four parts a brief statement covering certain fundamental requirements relative to safety as observed in other states and in foreign countries.

Belts and Pulleys.

Belts and pulleys should be so located, wherever possible, as not to be dangerous to employees, or should be properly enclosed, fenced or otherwise protected. In all cases the point, if exposed to contact, should be guarded where the belt, rope or chain runs on the pulley, sheave or sprocket.

Guard all horizontal belts, ropes or chains driving machinery or shafting, seven feet or less from the floor, where exposed to contact.

In guarding overhead belts or rope drives, unless so guarded that persons cannot pass under them, the width of the guard should not be less than the width of the belt or rope drive and the length should not be less than the distance between the outer faces of the two pulleys. It should cover outer faces of the two pulleys or sheaves and extend upward to such a point, and be attached in such a way that in case the belt breaks, it will withstand the whipping force of the belt.

In rooms, or parts of rooms used exclusively for transmission machinery, such as the ground floor of saw mills and the basements of paper mills or flour mills, it has been found practical to define certain passageways for the use of oilers and millwrights and to guard the pulleys, belts and shafts along these passageways.

All loose pulleys should be furnished with a permanent belt-shifter, so located as to be within easy reach of the operator. The belt-shifter should be so constructed as to make it impossible for the belt to creep from the loose pulley back on the tight pulley. All belt-shifters should be equipped with a lock or other efficient device to prevent the shifter from being accidentally shifted.

Pulleys should be so placed as to allow the width of the belt between two pulleys, or between the pulley and the shaft banger, or a hook should be provided, or a guard placed adjacent to the pulley to prevent the belt from leaving the pulley.

Part Two.

Set Screws. All set screws on moving parts, where exposed to contact, should be countersunk or protected by a solid collar, or a headless set screw should be used. No part of the set screws should project above the surface.

Shafting. All revolving shafting less than seven feet above the floor lines should be boxed or railed off, as revolving shafting is always a menace to those whose clothing might come in contact with it.

Projecting keys in shafting should be guarded or cut off.

Gears. All gears, where exposed to contact, should be entirely enclosed or equipped with a flange guard which will enclose the teeth of the gears. On large gears, such as those on heavy shears and punches, the guard should be such as to cover them to a height of seven feet above the floor.

Where it is impracticable to cover the gears, a boxed frame of metal or wood should be installed, completely shutting off the machinery gears. It is necessary that all guards should be kept in place except when the machinery is shut off for repairs.

Part Three.

Grinding Wheels, Hoods and Guards. Wheels should be handled with the greatest care in unpacking, storing, delivering, etc., and should never be left standing on the ground or wet places.

Great care should be used in mounting wheels; never force a wheel on the arbor. It is advisable to use relieved flanges, compressible washers between wheel and flange, and to obtain a perfect bearing at the outer edge of the flange. Vibration should be avoided at all times.

A protective hood, or guard, should be provided, wherever practicable, and the nut on the end of the arbor should be guarded. Cast iron hoods should be avoided as they have often been known to break when struck by a bursting wheel. The guard should be adjusted close to the wheel and extended over the top of the wheel to a point thirty degrees beyond a vertical line drawn through the center of the wheel. Wheels used for wet grinding should not be left partly immersed in the water.

Foremen should examine every emery wheel each day and see that the bearings are tight and well oiled, and that it is operated within proper speed limits, and is safe in every way.

Table of Grinding Wheel Speeds.

Diameter of Wheel in Inches.	Revolutions per Minute for surface of 4000 ft.	Revolutions per Minute for surface of 6000 ft.	Revolutions per Minute for surface of 8000 ft.
1	15379	19699	22918
2	7689	9549	11459
3	5093	6366	7639
4	3820	4775	5730
5	3056	3829	4584
6	2546	3183	3829
7	2183	2728	3271
8	1910	2387	2865
10	1528	1910	2292
12	1273	1592	1910
14	1091	1364	1637
16	955	1194	1432
18	849	1061	1273
20	764	955	1116
22	694	868	1012
24	637	796	955
26	586	732	879
28	546	683	819
30	509	637	761
32	477	596	716
34	449	561	674
36	421	531	637

The revolutions per minute at which wheels are run is dependent on conditions and in actual practice from 4,000 to 6,000 feet per minute up to as high as 7,500. It is recommended that for most grinding operations revolutions should not exceed 6,000 feet. As a wheel wears down the speed is in-

creased to maintain the same surface speed and great care must be exercised when new wheel is provided to avoid over-spreading.

Part Four.

Ladders. Ladders should, wherever possible, be stationary; if movable, they should be provided with either sharp points at the foot, or wide, rough surface feet so as to prevent slipping. Ladders for use in oiling overhead shafting, where necessary to rest same on the shafting, should be arranged to hook over said shafting.

Stairways. Stairways should not be built at a sharper angle than fifty degrees. For over fifty degrees, ladders should be used instead. All stairways should be equipped with hand rails. Where the stairway is not built next to a wall or partition, rails should be placed on both sides.

Platforms and Runways. All elevated walks, runways or platforms, except on loading or unloading side of platforms, if four feet or more from floor level, should be provided with a guard rail. A toe board should be provided to prevent material from falling off.

Passageways—Keep Clear. All pas-

sageways and gangways should be kept smooth and in good repair and free from nails or obstructions over which persons may stumble and fall.

Swinging Doors — Windows. All swinging doors in stairways and all doors swinging both ways in general passageways should be provided with windows. One window should be provided for each section of double swinging doors. Both sides of the doors should be provided with adequate light, either natural or artificial during the hours of active operation in the department in which said swinging doors are located. The windows must be kept free from dirt or other obstruction to the vision.

In order to accommodate boys or girls, the bottom of the windows should not be more than forty-eight inches from the floor. The size of the window which is recommended should be not less than eight inches by twenty-four inches. Guards should be placed over the window to protect the glass from being broken by protruding parts on trucks, etc.

Further information can be obtained from the Industrial Accident Commission, 525 Market street, San Francisco.

pline throughout. There will be a central heating system and hot water supply. All apartments will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 5 story and base, steel and reinforced concrete. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the south side of O'Farrell street east of Hyde, and has been designed to contain a total of 24 suites of two and three rooms. There will be a complete steel frame, reinforced concrete walls and metal lath partitions. Interior finish will be of pine with some elm panels. Plans provide for steam heat, an automatic elevator and hot water supply. Some hardwood floors will be used. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

OAKLAND, CAL.—Apartment alterations and additions, frame construction. \$5,000. Architect, none. Owner, P. A. Soderstrand, 1086 24th street, Oakland. The work will include new plumbing, plastering, painting, electric work and interior finish. Wall beds will also be installed. Considerable exterior work will also be required. Plans are in the hands of the owner and he will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$75,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, William Hendrickson, trustee. The building will be erected on the north side of Sutter street west of Taylor street. The building will contain a total of 24 suites of two and three rooms, besides a large lobby and amusement room. Interior finish will be of pine, oak and other hardwoods. Hardwood floors will be used in the living rooms. There will be steam heat, automatic passenger and freight elevators, a vacuum cleaning system and hot water supply. All apartments will have wall beds and private bath rooms. Bath will be finished in tile and will have composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for at once.

Contracts Awarded.

SAN FRANCISCO—Apartment house, 3 story and base, \$16,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Mr. Revill. Contractors, Ratto & Ratto, S. F. Contract price, \$11,000. Note: This price does not include the lumber or mill work or plastering.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction, \$50,000. Architect, L. T. Mayo, Story Bldg., L. A. Owner, R. J. Dunn. Contractor, L. T. Mayo, Story Bldg., L. A. Contract price, \$50,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction, \$36,000. Architect, none. Owner, Elias A. Sheddony. Contractors, The L. F. S. Syndicate, Los Angeles Investment Bldg., L. A. Contract price, \$36,000.

Firms dealing news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 story and base. Class C construction, \$15,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Walter S. Sullivan. The building will be erected at the corner of Sacramento and Taylor streets, covering an area of 40 by 90 feet. Interior will be arranged for a number of two and three room suites, all of which will have wall beds and private bath rooms. Pine and elm panels will be used for interior finish together with some hardwood floors. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 6 story and base. Class C construction. Cost not stated. Architect, Benj. G. Mcougall, Sheldon Bldg., S. F. Owner, H. A. Voorman. The building will be erected at the northwest corner of Bush and Mason streets, covering an area of 68 feet 3 inches by 90 feet. Upper floors have been arranged for a two and three-three suites of two and three rooms. Interior will be finished in pine with some hardwood veneer. All apartments will have private baths and wall beds. Plans provide for steam heat, elevator service and a hot water and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken on all parts of the work except the plain and reinforced concrete work which has been awarded to Arthur Arlett for \$7,350.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, John Bianchi, 3702 Folsom street, S. F. The building will be erected at the southeast corner of Cortland avenue and Folsom street, covering an area of 41 by 46 feet. There will be eight apartments of four rooms each. Interior finish will be of pine and redwood. Each apartment will have an open fire place with brick mantel. There will be private baths and wall beds. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Apartment house, 7 story and base. Class A construction. Cost not stated. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner's name withheld. The building will be erected on a corner lot in the Fifty Vara District, and has been arranged for but six apartments, one to each of the first five floors while the upper two floors will contain but one apartment. There will be a complete steel frame, brick exterior walls, faced with pressed brick and terra cotta, hollow tile and metal lath and plaster interior partitions and concrete floors. Interior decoration and finish will be to suit the tenants. Each apartment will have three baths. Hardwood trim and hardwood and inlaid floors will be used extensively. There will be steam heat, elevator service, vacuum cleaning and a hot water supply. Plans are nearly ready for figures.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. S. Schwartz, Haywards. Owner, John D. Garrison. The building will be erected at the corner of 41st and Manila streets, and will contain a number of two and three room suites. Interior finish will be of

BONDS.

SUNNYVALE SCHOOL DISTRICT. Santa Clara Co.—Sealed proposals will be received by the Board of Supervisors on the 6th day of July for the purchase of bonds in the amount of \$25,000.

PAYKAN SCHOOL DISTRICT. Sonoma Co.—An election will be held here on June 27th for the purpose of voting bonds in the amount of \$3,000, same to be used in raising funds for a new school building and other improvements.

WRIGHTS SCHOOL DISTRICT. Santa Clara Co.—Bonds in the sum of \$1,800 will be voted here on June 20th, funds to be used for the construction of a school building and the purchase of the necessary equipment.

SPARKS, Nev.—On petition of 100 citizens, asking that street and sewer bonds of \$25,000 be authorized, a bond election has been set for July 18th.

BAKERSFIELD. Kern Co.—State highway bonds to the amount of \$180,000 were ordered purchased by the Board of Supervisors. These bonds will cover the expense of building the State highway from a point 13 miles south of Bakersfield to Rose station.

PETALUMA, Sonoma Co.—The Board of Supervisors here has decided to advertise for bids on the Petaluma School Bonds. The bonds are for \$110,000, the money to be used in the construction of a school building.

BERKELEY, Alameda Co.—This city will soon call a bond election for voting bonds in the amount of \$1,750,000 to meet the immediate needs in the school department, for a civic center, and for harbor improvements.

FALLON, Nevada.—The Churchill Chamber of Commerce has appointed a committee to have a proposal for a \$50,000 Lincoln Highway bond issue put on the November ballots.

SANTA CRUZ, Santa Cruz Co.—The City Council has unanimously voted to call a bond election for \$150,000 for the purpose of extending municipal water system.

OAKLAND, Alameda Co.—The Auditorium bonds carried by 137 votes. There were 15,849 for the bonds and 7,719 against. The bonds are for \$500,000 to complete the building, bringing the total cost up to one million dollars.

BRIDGES AND DAMS.

CLATSOP CO., ORE.—Bridges, five, steel and concrete. Cost not stated. Engineer, State Highway Commission, Court House, Astoria. Owners, Clatsop County. Bids will be opened on June 22nd for the construction of the following described bridges. Plans and full particulars can be secured by addressing the Highway Commission, County Court House, Astoria.

No. 1. 125-foot steel bridge with piers and approaches in Nehalem Valley near station 29 on the State Highway survey.

No. 2. 125-foot steel bridge with piers and approaches on Nehalem Valley road over Nehalem river near station 217 on the State Highway survey.

No. 3. 80-foot steel bridge with piers and abutments on Seaside to Tillamook road near station 422 on the State Highway survey.

No. 4. 68-foot steel bridge with abutments over North Fork of the Clatskanie river, two miles from Olney.

No. 5. 80-foot steel bridge with piers and approaches over Youngs river about four miles from Olney.

PORTLAND, ORE.—Bridge, steel and concrete. Cost not stated. Engineer, State Highway Commission, Portland. Owners, State of Oregon. The new bridge will be 277 feet long, consisting of two spans, one 200 feet and the other 77 feet long. Plans are complete and figures will be opened on June 24th. Plans can be secured from the Commission, Court House Bldg., Portland.

MADERA, MADERA CO., CAL.—Bridges, 8, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Madera. Owners, Madera County. Proposals will be opened on June 20th for furnishing designs and constructing eight steel and reinforced concrete bridges in Madera County. Complete information can be secured from the County Clerk at Madera. An official proposal for this work appears in another column of this issue.

SAN JOAQUIN RIVER, CAL.—Dredging. Cost not stated. Engineer, Major S. A. Cheney, Custom House. S. F. Owners, United States Government. Bids are now being called for dredging the San Joaquin River and Stockton Channel. Bids will be opened on June 25th. Full particulars can be secured from the engineer in charge. An official proposal appears in another column of this issue.

CHURCHES.

SAN FRANCISCO.—Church, 1 story and base, frame, \$15,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Mary's Star of the Sea. The building will be erected at the northwest corner of Geary and 8th avenue, and will contain the main auditorium seating in the neighborhood of 700 people and Sunday school rooms. Interior finish will be of pine with some ornamental plaster in the auditorium. Art glass windows are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Church, 3 story and base. Class C construction, \$50,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owners, First Baptist Church of Berkeley. The bidding has been mentioned in the columns before. A site at the corner of Dana and Haste streets has been secured and a building covering 95 by 115 will be erected. The main auditorium will be 75 by 80 and Sunday school rooms and a social hall will occupy a like amount of space. Interior finish will be of pine with ornamental plaster. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken at once.

COURT HOUSES.

SEATTLE, WASH.—Court House, 3 or 5 story and base. Class A construction, \$950,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. Plans have been completed for the new County Building which is to cover an entire block in Seattle. Bids are to be submitted on two alternate propositions, but in either case must not exceed the amount of \$950,000. The first proposition will call

for a three-story building covering the entire site with a five-story central portion. The second proposition will call for a five-story building over the entire lot and a seven-story central portion. Plans and specifications with complete instructions can be secured from the architect.

FACTORIES & WAREHOUSES.

RICHMOND, CONTRA COSTA CO., CAL.—Stables and garage, 1 story, frame and corrugated iron. Cost not stated. Engineer, Engineer Department Standard Oil Co., Standard Oil Bldg., S. F. Owners, Standard Oil Co. Property at the corner of Berryessa and Green streets has recently been purchased and a large stable covering an area of 100 by 160 feet will be erected. There will be a cement floor and exterior will be covered with corrugated iron. Plans are complete and construction will be started at once by Day Labor.

FLATS.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$5,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Whison. The building will be erected on Collins street near Geary, and has been designed to contain four flats of five rooms each. Interiors will be finished in pine and redwood with some oak floors. There will be an open fire place in each living room. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO.—Flats, 3, 2 story and base, frame, \$4,000 each. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster street, S. F. These buildings will be erected on the north side of Hayes street west of Central avenue, each covering an area of 25 by 60 feet. There will be two modern flats in each building. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the principal rooms. Each living room will have an open fire place and tile mantel. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$4,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, F. Gottlicher. The building will have a frontage of 25 feet and a depth of 52 feet. There will be two flats of five rooms each. Interiors will be finished in pine throughout. There will be a large open fire place in each living room. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic with a brick veneer base. Plans are complete and figures are being taken.

SAN FRANCISCO.—Flats, 2, 2 story and base, frame, \$5,000 each. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster street, S. F. These buildings will be erected on the west side of Central avenue south of Hayes and each will contain four flats of four

and five rooms. Interiors will be finished in pine with some elm panels and hardwood floors. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

OAKLAND, CAL.—Flat and store, 2 story and base, frame, \$4,500. Architect, James W. Plachec, Acheson Bldg., Berkeley. Owner, G. Dehenedetti. The building will have a frontage of 41 feet and a depth of 24 feet. There will be one store on the first floor. Upper floor will be arranged for a flat of six rooms. Interior will be finished in pine throughout. Some hardwood floors will be used. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Flat, 2 story and base, frame, \$6,500. Architect, James W. Plachec, Acheson Bldg., Berkeley. Owner, Mrs. Eugene Ehrst. The building will be erected on Herkeley Way, and has been designed to contain four high class flats. Interiors will be finished in pine, redwood and hardwood veneer. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are now being taken.

GOVERNMENT WORK AND SUPPLIES.

Brigham City, Utah, Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures, and approaches) of the U. S. post office at Brigham City, Utah:

Bid 1, Martin E. Anderson, Brigham City, Utah.

Bid 2, J. H. Wiese, City National Bank Building, Omaha, Neb.

Bid 3, George A. Whitmeyer & Sons, Ogden, Utah.

Proposal No. 1 (using light-colored limestone for all stonework, except where granite is required)—Bid 2, \$53,870; 3, \$50,234.

Proposal No. 2 (using light-colored sandstone for all stonework, except where granite is required)—Bid 1, \$53,870; 2, \$53,130.

For alternate No. 1 (substituting Keene's cement for hard plaster on walls in the first and second stories, as specified) add—Bid 1, \$460; 2, \$800; 3, \$205.

For alternate No. 2 (painting plastered surfaces of all finished rooms in first and second stories, as specified), add—Bid 1, \$600; 2, \$1,200; 3, \$959.

For alternate No. 3 (substituting plaster cove for molded cornice in public lobby, as specified), deduct—Bid 1, \$410; 2, \$200; 3, \$210.

For alternate No. 4 (substituting brick for certain stone facing, as specified), deduct—Bid 1, \$1,900; 2, \$1,625; 3, \$1,025.

For alternate No. 5 (substituting marble for wood wainscoting and finishing the ceiling with beams, panels, etc., in the public lobby, as specified), add—Bid 1, \$1,160; 2, \$760; 3, \$490.

Amount included in the proposal for furnishing and installing of all interior lighting fixtures—Bid 1, \$290; 2, \$800; 3, no bid.

Centrifugal Pumps.

Bids were opened by the U. S. Reclamation service, Los Angeles, Cal., for furnishing centrifugal pumps as follows:

Item 1, two 6 second ft horizontal centrifugal pumps; 2, 2 foot valves; 3, 2 gate valves.

Charles C. Moore & Co., San Francisco, Cal., item 1, \$2,450, 60 days; 2, \$379, 40 days; 3, \$145, 40 days; weight, item 1, 5,000 lbs; 2, 1,000; 3, 875.

C. F. Braun & Co., San Francisco, Cal., item 1, \$2,619, 63 days; weight, 5,500 lbs.

Byron Jackson Iron Works, San Francisco, Cal., item 1, \$3,251, 70 days; 2, \$175, 70 days; 3, \$144, 70 days; weight, item 1, 7,000 lbs; 2, 600; 3, 450.

George B. Adair & Son Co., Seattle, Wash., item 1, \$3,988.15, 75 days; 2, \$65, 10 days; 3, \$118.40, 10 days; weight, item 1, 10,000 lbs; 2, 250 lbs; 3, 400 lbs.

Perine Machinery Co., Seattle, Wash., item 1, \$4,298, 90 days; weight, 6,000 lbs; 3, \$66, 30 days; weight, 470 lbs.

Henry R. Worthington, New York City, item 1, \$4,496, 98 days; 2, \$260, 28 days; 3, \$90, 28 days; weight, item 1, 18,100 lbs; 2, 1,100; 3, 600.

Pelton Water Wheel Co., San Francisco, Cal., item 1, \$4,600, 120 days; 2, \$306, 90 days; 3, \$142, 15 days; weight, item 1, 6,300 lbs; 2, 500; 3, 700.

Casper, Wyo., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures, and approaches) of the U. S. post office at Casper, Wyo.:

Bid 1, King Lumber Co., Charlottesville, Va.

Bid 2, C. R. Inman, Casper, Wyo.

Bid 3, J. P. Jenkins & Co., Ocala, Fla.

Bid 4, George Hinchiff Co., 1408 Security Building, Chicago, Ill.

Bid 5, J. H. Wiese, City National Bank Building, Omaha, Neb.

Proposal No. 1 (contemplating the use of light-colored limestone for all exterior stonework, except where red sandstone and granite are required, and based on drawings, etc., mentioned in paragraph 65 of the specifications)—Bid 1, \$54,000; 2, \$49,785; 3, \$60,000; 4, \$53,300; 5, \$56,830.

Proposal No. 2 (contemplating the use of light-colored sandstone for all exterior stonework, except where red sandstone and granite are required, and based on drawings, etc., mentioned in paragraph 65 of the specifications)—Bid 1, \$54,000; 3, \$61,400.

Proposal No. 3 (contemplating the use of light-colored limestone for all exterior stonework, except where red sandstone and granite are required, and based on drawings, etc., mentioned in paragraph 67 of the specifications)—Bid 1, \$50,900; 3, \$55,400; 4, \$52,300; 5, \$45,130.

Proposal No. 4 (contemplating the use of light-colored sandstone for all exterior stonework, except where red sandstone and granite are required, and based on drawings, etc., mentioned

in paragraph 67 of the specifications)—Bid 1, \$51,400; 3, \$56,800.

For alternate No. 1 (substituting Keene's cement for hard plaster in connection with all walls, as specified), add—Bid 1, \$500; 3, \$560; 4, \$220; 5, \$1,500.

For alternate No. 2 (painting plaster surface of finished rooms throughout the building, as specified), add—Bid 1, \$700; 3, \$950; 4, \$850; 5, \$1,600.

For alternate No. 3 (substituting terra cotta for wood cornice, tin parapet coping, and stone keys, etc., as specified), add—Bid 1, \$2,500; 3, \$2,000; 4, \$3,400; 4, \$3,250; 5, \$2,475.

For alternate No. 4 (substituting nonfireproof for fireproof construction of the first floor, as specified), deduct—Bid 1, \$500; 2, \$1,800; 4, \$1,800; 5, \$500. Amount included in the proposal for all work specified under "Lighting fixtures"—Bid 1, \$600; 2, \$600; 3, \$1,300; 4, \$600; 5, \$1,200.

PRESIDIO OF SAN FRANCISCO.—Administration building, 3 story and base, reinforced concrete. Cost not stated. Engineer, Constructing Quartermaster, Fort Mason, Owners, United States Government. Authorization has been received from the War Department to prepare plans for a building 100 by 300 feet which will house the Government's display at the Exposition and which will later be used as a general administration building for the Presidio. The structure will be of reinforced concrete and will be erected on the central axis of the interior Parade grounds. Bids will not be called for within two months. Further mention will then be made of the work.

SAN FRANCISCO.—Water supply system. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Bids opened by the Constructing Quartermaster for the construction of an additional water supply system at Fort Winfield Scott show Pringle-Dunn Co. low at \$4,453. Bids for furnishing and installing oil burners at the Letterman General Hospital show S. P. Johnson low at \$1,484. A complete list of these figures will be found under the heading of San Francisco in this issue.

—HALLS & SOCIETY BLDGS—

ELMHURST, ALAMEDA CO., CAL.—Country club, 1 and 2 story, frame and plaster, \$25,000. Architect, Edward G. Garden, Phelan Bldg., S. F. Owners, Sequoit Country Club. The building will be erected in the center of a large tract, and has been designed in the Mission style. There will be large social rooms, banquet room, parlors, cafe, smoking rooms and kitchen. Interior finish will be of pine and redwood. There will be a central heating system and large open fire places. Mantels will be of brick and stone. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOSPITALS

CALIFORNIA.—Hospitals, 1 and 2 story and base, frame and reinforced concrete. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans and specifications have been approved for the construction of a number of new buildings at the various state institutions. Approval of these plans has

been given by the State Board of Control and money in the amount of \$117,000 has been set aside.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, reinforced concrete, \$25,000. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Polk street near Bush, and will contain stores on the first floor besides the hotel lobby. Upper floors will contain in the neighborhood of 50 guest rooms and a number of public baths. Interior finish will be of pine throughout. There will be steam heat and a hot water system. Bath rooms will be finished in tile and will have composition floors. Patent store fronts and marble wainscot are specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Hotel, 7 story and base. Class C construction, \$75,000. Architect, L. B. Dutton, Chronicle Bldg., S. F. Owner, A. W. Malby. The building will be erected on the south side of Ellis street east of Mason, having a frontage of 52 feet and a depth of 100 feet. There will be stores besides the lobby on the first floor. Upper floors will contain 84 rooms and 70 baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, vacuum cleaning and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Contracts Awarded.

ONTARIO, SAN BERNARDINO CO., CAL.—Hotel, 2 story and base, frame and plaster, \$35,000. Architects, Butler Bros., Mason Bldg., L. A. Owners, Ford Bros. Contractors, Butler Bros. Construction Co., Mason Bldg., L. A. Contract price, \$35,000.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$30,000. Architects, Weston Building Co., Lanker-smith Bldg., L. A. Owner, G. A. Theile. Contractor, George M. Easton, 436 West 30th street, L. A. Contract price, \$30,000.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, \$14,964. Architect, A. F. Hedde, 46 Kearny street, S. F. Owners, State of Washington. Bids opened on June 10th for this work show Dannuvant-Houghton-Van Sant Co., Hooker-Lent Bldg., S. F., low at \$14,964. They will probably be awarded the contract. A complete list of the figures for this work will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, Ctos not stated. Architect, State Architect, Topeka, Kan. Owners, State of Kansas. A report from President Reid of the Kansas Committee at Topeka, Kan., states that the three lowest men will meet with the members of the Committee and the Kansas State Architect in this city on June 30th to confer on the award of contract for the Kansas State building to be erected

at the Panama-Pacific Exposition. All three men are reported as being San Francisco men.

Contracts Awarded.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, \$89,000. Architect, James E. Dibelka, Chicago. Owners, State of Illinois. Contractors, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$89,000. The original figures of the two lowest bidders, Lange & Bergstrom and the Denell Construction Co., were \$96,000 and \$95,000, respectively. Some changes were made in the original specifications and the two low men were asked to refigure.

SAN FRANCISCO—Turkish building, 1 and 2 story, frame and plaster, \$40,000. Architect's name not given. Owners, Turkish Government. Contractors, Northwest Construction Co., Merchants' Exchange Bldg., S. F. Contract price, \$40,000.

POST OFFICES.

WILLOWS, GLENN CO., CAL.—Post Office, 1 story and base, reinforced concrete. Cost not stated. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, United States Government. Mr. Faville has donated the plans for this building and the Government has approved a site, also donated. Interior of the building will be finished in pine throughout. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Bids will probably be called for through the office of the Supervising Architect at Washington, D. C. Further notice will be given in these columns.

CHICO, BUTTE CO., CAL.—Post Office, 1 and 2 story, brick, stone and steel. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened in Washington for this work on June 9th show B. J. Duffy of San Francisco low as follows, \$76,230 for limestone and \$76,230 for sandstone. He will probably be awarded the contract. A complete list of these figures will be found under the heading of Sacramento, Stockton and Northern California.

IDAHO FALLS, IDAHO—Post Office, 2 story and base, stone and brick. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed for this building, and show a two-story structure with fireproof construction except the first floor. The building will cover an area of approximately 5,535 square feet. Interior will be finished in pine. There will be steam heat. Exterior will be faced with pressed brick. Plans are now out for figures and bids will be opened on July 10th. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad construction. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Bids opened for the construction of a railroad connecting the Fort Mason Tunnel with the Army Transport Docks show the Contra Costa Construction Co. low at \$27,932. They

will probably be awarded the work. A complete list of the bids received will be found under the heading of San Francisco in this issue.

MUIRWOODS, MARIN CO., CAL.—Railroad station and inn, 2 story, frame and plaster, \$25,000. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Mill Valley and Mt. Tamalpais Scenic Railroad. The new building will replace the old Inn recently destroyed by fire. There will be a large waiting room, office and restaurant. Interior will be finished in rustic style with a large stone fire place. Exterior will be covered with field stone and cement plaster on metal lath. Plans are being prepared, but construction will not be started for several months.

SAN FRANCISCO—Railroad work, overhead construction. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for overhead construction on the Municipal Railroads under contract No. 25 show H. S. Tittle low at approximately \$40,000. The Bay Cities Engineering Co. and the Power Equipment Co. were the only other bidders.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,500. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Thomas Whalen. The dwelling has been designed for a six-room house with bath and will be erected on 13th avenue south of Balboa street. Interior finish will be of pine and redwood with some hardwood floors. There will be an open fire place in the living room. Mantel will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and shingles. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The dwelling will be erected in the Crocker Amazon Tract, and has been designed for a six-room dwelling with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shiplap. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architects, Rigbetti & Headman, Phelan Bldg., S. F. Owner, Laura S. Nathan. The dwelling will be erected on Jones street south of Glover, and has been designed for a ten-room house with three baths and sleeping porch. Interior finish will be of pine and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors will be used in the living room, dining room, library and reception hall. A garage will also be erected on the lot. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of both the garage and dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame,

Cost not stated. Architect Sidney E. Newsum, Nevada Bank Bldg., S. F. Owner, E. B. Davis. The dwelling has been designed for a twelve-room house, and will be erected in the Claremont Tract. Pine and hardwood interior finish will be used. Plans provide for sleeping porches and three bath rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Hardwood and inlaid floors will be used in the principal rooms. Bath rooms will be finished in tile and will be equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and bids will be called for within a few days.

OAKLAND, CAL.—Residence additions and alterations, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mr. Parker. The work will include new interior partitions, plastering, electric work, plumbing, painting, interior finish and hardwood floors. Open fire places and tile mantels will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence additions and alterations, 2 story and base, frame, \$2,000. Architect, none. Owner, H. Escherich, 2529 Hilegas avenue, Berkeley. The work will consist of new interior finish, plastering, painting, plumbing and electric work. There will be new open fire places and tile mantels. Bath room will be equipped with an automatic water heater. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

OAKLAND, CAL.—Residences, 2, 2 story and base, frame, \$4,000 each. Architect, none. Owner, E. A. Stewart, 616 41st street, Oakland. These two houses will be erected on Ramona avenue and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner, Mr. Jesse A. Berger. The dwelling has been designed for a seven-room house with bath, and will be erected on East 21st street. Interior finish will be largely of pine with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and will be equipped with an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,200. Architect, none. Owners, Summer and Randall, 1249 1st avenue, Oakland. The dwell-

ing has been designed for a seven-room house and will be erected on Evans street west of Webster. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. L. Olsen. The dwelling will be erected in East Piedmont Heights and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, M. P. Brach. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected at the southwest corner of Hampel and Greenwood streets. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at the office of the board, between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 1st day of July, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit: The furnishing and installing of machinery for Municipal Asylum Plant located at Florida street and Treat avenue.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, and must be commenced on or before (15) calendar days and completed within one hundred and twenty (120) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check, certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposals must be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, **RICHARD J. CLINE, Secretary.**

NOTICE FOR PROPOSALS.

NOTICE is hereby given that sealed proposals will be received by the City Commission of the City of Sacramento, at the Council Chamber thereof, in the City Hall Building on I street, between Ninth and Tenth streets, of the said City of Sacramento, between the hours of **10:30 o'clock a. m. and 1:30 o'clock p. m., on Tuesday, June 23, 1914**, for furnishing all material, labor, appliances and apparatus necessary for the erection and entire completion of a reinforced concrete sewage pumping station, and constructing the same at the northeast corner of the said Ninth and Riverside avenues in accordance with the drawings and specifications on file in the office of the City Engineer.

All such proposals must comply with the requirements of the new Charter of the City of Sacramento, effective July 1, 1912, and bidders are hereby cautioned that no bid which fails to comply therewith can be considered.

Bids must be submitted upon printed forms prepared by the City, copies of which, together with a circular of instructions, will be supplied free upon application to the undersigned.

The successful bidder must give bond to the City of Sacramento in the sum of \$25,000, conditioned for the faithful performance of the contract and containing the stipulations prescribed in Section 103 of the new Charter.

A certified check made payable to the City Clerk for not less than ten per cent of the aggregate of the proposal must accompany each bid.

The right to reject any and all bids reserved to the City by the provisions of said Charter.

M. J. DESMOND,
City Clerk of the City of Sacramento,
County of Sacramento, State of California. Office: City Hall, Sacramento, California.

NOTICE FOR PROPOSALS.

NOTICE is hereby given that sealed proposals will be received by the City Commission of the City of Sacramento, at the Council Chamber thereof, in the City Hall Building on I street, between Ninth and Tenth streets, of the said City of Sacramento, between the hours of **10:30 o'clock a. m. and 1:30 o'clock p. m., on Tuesday, June 23, 1914**, for furnishing and installing within pumping station, to be erected at the intersection of Franklin avenue and the Riverside Road (so called), in the City of Sacramento, complete pumping machinery and equipment with all necessary auxiliaries, appliances, attachments, and tools for the complete and efficient operation of said pumping station according to the plans and specifications on file in the office of the City Engineer.

The capacity of the pumping plant will be 100 gallons per day, and the plant must be completed before December 1, 1914.

All such proposals must comply with the requirements of the new Charter of the City of Sacramento, effective July 1, 1912, and bidders are hereby cautioned that no bid which fails to comply therewith can be considered.

Bids must be submitted upon printed

ed forms to be prepared by the city, copies of which, together with a circular of instructions, will be supplied free upon application to the undersigned.

The successful bidder must give bond to the City of Sacramento in the sum of \$25,000 conditioned for the faithful performance of the contract and containing the stipulations prescribed in Section 103 of the new Charter.

A certified check made payable to the City Clerk for not less than ten per cent of the aggregate of the proposal must accompany each bid.

The right to reject any and all bids reserved to the City by the provisions of said Charter.

M. J. DESMOND,
City Clerk of the City of Sacramento,
County of Sacramento, State of California. Office: City Hall, Sacramento, California.

NOTICE TO CONTRACTORS.

SEALED proposals will be received at the office of the California Transportation Company at Front and M streets, City of Sacramento, on **June 19, 1914, at 10 a. m.** for the construction of a reinforced concrete wharf with a superstructure as shown on plans, and in accordance with specifications on file in the office of the City Engineer of the City of Sacramento. Bidders will be requested in submitting their proposals to place a check in an amount equal to ten per cent of their bid, certified to by some responsible bank, as an evidence of good faith. **E. J. ANDERSON,**
Pres. California Transportation Company.

NOTICE TO CONTRACTORS.

Office & Works: 31-37 Hawthorne St., bet. Howard & Folson Sts., San Francisco, Cal.

Over Fine Gold Creek, 20 miles northeast of Madera, Madera Co., Cal., in section 1, T. 9 S., R. 21 E., 133 feet long. Roadway 16 feet wide.

Over Fine Gold Creek, about 35 miles northeast of Madera, Madera Co., Cal., in section 31, T. 8 S., R. 22 E., 155 feet long. Roadway 16 feet wide, will be received by the Board of Supervisors of the County of Madera, State of California, at the office of the County Clerk, in the Court House, in the City of Madera, County of Madera, State of California, up to 10 o'clock a. m. June 20th, 1914.

The elevations of the ground lines and the roadway grade will be furnished by the County Surveyor.

The bridges must be designed to conform with the Standard Specifications of the State Highway Commission of the State of California. Complete bridges as to loading capacity.

The Honorable Board of Supervisors of said County will pay the customary engineering fees based on the contract price for such plans upon which the contracts are awarded.

There will be no fills included in this work, except the back filling of all excavations necessary to construct the bridges; ballasting will be included but no floor surfacing.

In all cases except the 140-foot bridge above, there exist old timber trestles on the sites which the contractor will be required to remove using what material desired, but the remaining material continues to be the property of the County of Madera.

Each competitor shall submit, together with his Plans and Specifications, a segregated estimate of the cubic yards of excavation, cubic yards of concrete (classified) and the number of pounds of steel entering into the construction of each of the several bridges.

All specifications must include a clause requiring Contractors to furnish liability insurance.

By order of the Board of Supervisors of Madera County, State of California, made and entered on the 4th day of June, 1914.

W. R. CURTIN,

County Clerk and ex-officio Clerk of the Board of Supervisors of Madera County, State of California.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that the Pittsburg Grammar School Board of the Pittsburg Grammar School District in the County of Contra Costa, State of California, will receive written proposals or bids up to 12 o'clock noon on the 27th day of June, 1914, for the construction of a grammar school building on the lot of land situate, lying and being in the block bounded by Black Diamond street on the west, Eighth street on the north, Tenth street on the south and the property of the Southport Land and Commercial Company on the east, said building a frontage of 500 feet on Black Diamond street, and frontages of 250 feet on Eighth and Tenth streets respectively in the City of Pittsburg in said Pittsburg Grammar School District, County of Contra Costa, State of California.

Also for a heating and ventilating plant, equipment and apparatus for the same. Bids for said heating and ventilating plant and equipment to be received by the board for the construction of said building.

W. Cornelius, Merchants' National Bank Building, 623 Market street, San Francisco, is the architect for said Pittsburg Grammar School Board.

The Pittsburg Grammar School Board will require the Contractor to construct, erect and complete the said building within five (5) months from the date of signing the contract, there of, unless prevented by strikes or other unavoidable delays.

Each proposal or bid must be accompanied by a check or bond. The check

must be certified by a responsible bank payable to the order of the said Pittsburg Grammar School Board in the sum of Ten (10) per centum of the amount of the proposal or bid.

After the award and execution of the agreement, or if all proposals or bids shall be rejected, the said Pittsburg Grammar School Board will return each bidder the check herein required to accompany said bid.

If bond accompanies proposal or bid, the bond shall be in the sum of twenty-five (25) per centum of the amount of the proposal or bid.

The Pittsburg Grammar School Board reserves the right to reject any and all bids.

A. H. JONGENEEL, Clerk.

ATTENTION ARCHITECTS.

THE Kentfield School Trustees invite the submission of sketches showing the floor plans, front and elevations for a four-room Mission style school building to be located on the school lot near the Stadium, Tamalpais Center. Plans should be drawn with the idea of future additions to the building to a size of 1000 ft. building completed with plumbing, ventilating, bathing, etc., must not exceed \$12,500. Plans to be forwarded to the Clerk of the School Trustees, Mr. T. W. West, at Kentfield, not later than June 20th, 1914. For further information apply to the clerk of the Board.

JOE BROOKS,

GEO. E. BENNETT,

Clerk.

NOTICE TO CONTRACTORS.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, 9:00 A. M. Tuesday, June 23rd, 1914, for Chairs For Exposition Auditorium Building and Festival Hall in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per centum of the amount of the bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing of \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

PROPOSALS FOR INTERIOR STONE WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 25th day of June, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit: Interior stone work for the City Hall.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be completed within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within three hundred and eighty (380) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$50,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of

the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.
RICHARD J. CLINE,
Secretary.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Superintending Architect's Office, Washington, D. C. May 19, 1914.—SEALED PROPOSALS will be opened in this office at 3 P. M., June 18, 1914, for the construction complete (including mechanical and approaches) of the United States post office at Hanford, Cal. The building is one-story, with a mezzanine and basement, with a ground area of approximately 1,550 square feet; stone, stucco, and terra cotta facing; composition and tile roof; first floor of fireproof construction. Drawings and specifications may be obtained from the custodian of site at Hanford, Cal. or at this office, in the discretion of the Supervising Architect, O. WENDE-ROTH, Supervising Architect. Construction complete (including mechanical equipment, interior lighting fixtures, and approaches) of the United States post office at Brigham City, Utah, two-story building; ground area, 3,700 square feet; first floor fireproof; stone and brick facing; composition roof. Drawings and specifications may be obtained from the custodian of site at Brigham City, Utah, or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

of tile or brick. Hardwoods floors will be used in the living room, dining room library and reception hall. A garage will also be erected on the lot. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of both the garage and dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

STATE EXHIBIT BUILDING — 2 story, frame and plaster, \$14,964. San Francisco. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Bids opened on June 10th for this work show Dunnivant-Houghton-Van Sant Co., Hooker-Lent Bldg., S. F. low at \$4,964. They will probably be awarded the contract. A complete list of the figures for this work will be found under the heading of San Francisco in this issue.

STATE EXHIBIT BUILDING — 2 story, frame and plaster. Cost not stated. San Francisco. Architect, State Architect, Topeka, Kan. Owners, State of Kansas. A report from President Reid of the Kansas Committee at Topeka, Kan., states that the three lowest men will meet with the members of the Committee and the Kansas State Architect in this city on June 30th to confer on the award of the contract for the Kansas State building to be erected at the Panama-Pacific Exposition. All three men are reported as being San Francisco men.

APARTMENT HOUSE — 5 story and base. Class C construction, \$45,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Walter S. Sullivan. The building will be erected at the corner of Sacramento and Taylor streets, covering an area of 40 by 50 feet. Interior will be arranged for a number of two

and three room suites, all of which will have wall beds and private bath rooms. Pine and elm panels will be used for interior finish together with some hardwood floors. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—6 story and base. Class C construction. Cost not stated. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, H. A. Voorman. The building will be erected at the northwest corner of Bush and Mason streets, covering an area of 68 feet 9 inches by 90 feet. Upper floors have been arranged for a total of twenty-three suites of two and three rooms. Interior will be finished in pine with some hardwood veneer. All apartments will have private baths and wall beds. Plans provide for steam heat, elevator service and a hot water and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken on all parts of the work except the plain and reinforced concrete work, which has been awarded to Arthur Arlett for \$7,350.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, John Bianchi, 3702 Folsom street, S. F. The building will be erected at the southeast corner of Cortland avenue and Folsom street, covering an area of 41 by 46 feet. There will be eight apartments of four rooms each. Interior finish will be of pine and redwood. Each apartment will have an open fire place with brick mantel. There will be private baths and wall beds. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—7 story and base. Class A construction. Cost not stated. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner's name withheld. The building will be erected on a corner lot in the Fifty Vara District, and has been arranged for but six apartments, one to each of the first five floors while the upper two floors will contain but one apartment. There will be a complete steel frame, brick exterior walls, faced with pressed brick and terra cotta, hollow tile and metal lath and plaster interior partitions and concrete floors. Interior decoration and finish will be to suit the tenants. Each apartment will have three baths. Hardwood trim and hardwood and inlaid floors will be used extensively. There will be steam heat, elevator service, vacuum cleaning and a hot water supply. Plans are nearly ready for figures.

APARTMENT HOUSE—5 story and base, steel and reinforced concrete. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monarch Bldg., S. F. Owner's name withheld. The building will be erected on the south side of O'Farrell street east of Hyde, and has been designed to contain a total of 24 suites of two and three rooms. There will be a complete steel frame, reinforced concrete walls

and metal lath partitions. Interior finish will be of pine with some elm panels. Plans provide for steam heat, an automatic elevator and hot water supply. Some hardwood floors will be used. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

CHURCH—1 story and base, frame, \$15,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Mary's Star of the Sea. The building will be erected at the northwest corner of Geary and 8th avenue, and will contain the main auditorium seating in the neighborhood of 700 people and Sunday school rooms. Interior finish will be of pine with some ornamental plaster in the auditorium. Art glass windows are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, Paul F. de Mott, 125 Powell street, S. F. Owner, Mr. Wilson. The building will be erected on Collins street near Geary and has been designed to contain four flats of five rooms each. Interiors will be finished in pine and redwood with some oak floors. There will be an open fire place in each living room. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—3, 2 story and base, frame, \$4,000 each. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster street, S. F. These buildings will be erected on the north side of Hayes street west of Central avenue, each covering an area of 25 by 60 feet. There will be two modern flats in each building. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the principal rooms. Each living room will have and open fire place and tile mantel. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

FLATS—2, story and base, frame, \$4,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, F. Gottlicher. The building will have a frontage of 25 feet and a depth of 52 feet. There will be two flats of five rooms each. Interiors will be finished in pine throughout. There will be a large open fire place in each living room. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic with a brick veneer. Plans are complete and figures are being taken.

FLATS—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster street, S. F. These buildings will be erected on the west side of Central avenue south of Hayes, and each will contain four flats of four and

five rooms. Interiors will be finished in pine with some elm panels and hardwood floors. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Interiors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

ADMINISTRATION BUILDING—3 story and base, reinforced concrete. Cost not stated. Presidio of San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason, Engineers, United States Government. Authorization has been received from the War Department to prepare plans for a building 100 by 500 feet which will house the Government's display at the Exposition and which will later be used as a general administration building for the Presidio. The structure will be of reinforced concrete and will be erected on the center axis of the Presidio Parade grounds. Bids will not be called for within two months. Further mention will then be made of the work.

HOTEL—3 story and base, reinforced concrete, \$25,000. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Polk street near Bush, and will contain stores in the first floor besides the hotel lobby. Upper floors will contain in the neighborhood of 50 guest rooms and a number of public baths. Interior finish will be of pine throughout. There will be steam heat and a hot water system. Bath rooms will be finished in tile and will have composition floors. Patent store fronts and marble wainscot are specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

HOTEL—7 story and base. Class C construction, \$75,000. San Francisco. Architect, L. R. Dutton, Chronicle Bldg., S. F. Owner, A. W. Maltby. The building will be erected on the south side of Ellis street east of Mason, having a frontage of 52 feet and a depth of 100 feet. There will be stores besides the lobby on the first floor. Upper floors will contain 84 rooms and 70 baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, vacuum cleaning and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, H. Stern. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected in Ingleside Terraces. Interior finish will be of pine and redwood with some hardwood veneer and oak floors. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile and will be equipped with shower bath. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Emil Nelson,

580 Jersey street, S. F. The dwelling will be erected on 15th avenue north of Anza street and has been designed to contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be an open fire place and the mantel. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOWS—2, 1½ story and base, frame, \$2,000 each. San Francisco, Architect, none. Owner, N. J. Nelson, 4278 23rd street, S. F. These houses will be erected on Eureka street south of 22nd, and each will contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RAILROAD CONSTRUCTION—Cost not stated. San Francisco, Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Bids opened for the construction of a railroad connecting the Fort Mason Tunnel with the Army Transport Docks show the Contra Costa Construction Co. low at \$27,982. They will probably be awarded the work. A complete list of the bids received will be found under the heading of San Francisco in this issue.

APARTMENT HOUSE—4 story and base, brick and steel, \$75,000. San Francisco, Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, William Hendrickson, trustee. The building will be erected on the north side of Sutter street west of Taylor street. The building will contain a total of 24 suites of two and three rooms, besides a large lobby and amusement room. Interior finish will be of pine, oak and other hardwoods. Hardwood floors will be used in the living rooms. There will be steam heat, automatic passenger and freight elevators, a vacuum cleaning system and hot water supply. All apartments will have wall beds and private bath rooms. Baths will be finished in tile and will have composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for on one.

WATER SUPPLY SYSTEM—Cost not stated. San Francisco, Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Bids opened by the Constructing Quartermaster for the construction of an additional water supply system at Fort Winfield Scott show Pringle-Dunn Co. low at \$14,53. Bids for furnishing and installing oil burners at the Letterman General Hospital show S. F. Johnson low at \$1,454. A complete list of these figures will be found under the heading of San Francisco in this issue.

RAILROAD WORK—Overhead construction. Cost not stated. San Fran-

cisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for overhead construction on the Municipal Railroads under contract No. 25 show H. S. Tuttle low at approximately \$40,000. The Bay Cities Engineering Co. and the Power Equipment Co. were the only other bidders.

STREET MACHINERY—Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on July 1st by the Board of Public Works for furnishing and installing machinery in the Municipal Asphalt Plant. Plans can be secured from the City Engineer. An official proposal appears in another column of this issue.

STORES—1 story and base, reinforced concrete, \$5,000. San Francisco, Architect, none. Owner, Jens Nissum, 5 Montgomery street. The building will be erected on Mission street near 23rd and will contain one store. Interior will be finished in pine. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

STORES—4 story and base, Class C construction. Cost not stated. San Francisco, Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. Hulda Floodberg. The building will be erected on the west side of Powell street between Sutter and Post and will have a frontage of 21 feet by a depth of 101 feet. There will be one store on the first floor. Upper floors will be arranged for club rooms and will be fitted up to suit the tenants. There will be steam heat, elevator service and a hot water supply. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are nearly complete and figures will be called for shortly.

STORE ALTERATIONS—2 story and base, Class C construction. Cost not stated. San Francisco, Architect, Walter J. Mathews, 927 Broadway, Oakland. Owner, George T. Marye. This work will consist of the remodeling of the Marye Building at the corner of City Hall avenue and Market street so as to conform with the new Civic Center streets. The rear portion of the building is being wrecked and the front portion will be rearranged for store with lofts above. Robert DeWare & Son have a contract for the brick work and all other parts of the work are now being figured.

Contracts Awarded.

STATE EXHIBIT BUILDING—2 story, frame and plaster, \$89,000. San Francisco, Architect, James B. Dihelka, Chicago. Owners, State of Illinois. Contractors, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$89,000. The original figures of the two lowest bidders, Lange & Bergstrom and the Denell Construction Co., were \$96,000 and \$95,000 respectively. Some changes were made in the original specifications, and the two low men were asked to refigure.

TURKISH BUILDING—1 and 2 story, frame and plaster, \$40,000. San Francisco. Architect's name not given. Owners, Turkish Government, Contractors, Northwest Construction Co., Mer-

chants' Exchange Bldg., S. F. Contract price, \$40,000.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Mr. Revilli, Contractors, Ratto & Ratto, S. F. Contract price, \$11,000. Note: This price does not include the lumber or mill work or plastering.

CITY HALL MARBLE WORK.

The contract for interior marble work for the new City Hall, has been awarded to Joseph Musto Sons-Keenan Company for the amount of \$234,860.

This is the largest single contract for marble work ever let on the Pacific Coast, and the artistic treatment of the public offices and corridors is particularly effective.

The Joseph Musto Sons-Keenan Co. has extensive marble plants in this City and Los Angeles and has just completed the interior marble work for the Oakland City Hall, the amount of this contract being \$105,000.

They have also under way the exterior and interior marble work for the Hobart Building, in the execution of which it is contemplated to make a record for prompt delivery and artistic workmanship.

Architectural Club Wins Scholarship.

Local Club Members Carry Away All Three Prizes in Annual Scholarship Competition.

Each year for three successive years a member of the San Francisco Architectural Club has won the thousand dollar Ecole Beaux Arts Scholarship prize offered by the Architectural League of the Pacific Coast. In this year's competition the first, second and third prizes were won by members of the local club. P. J. Weber, employed by Shea & Lofquist, won the much coveted first prize; F. Allamand Jr., employed by the Toyland concession at the Exposition, second and Fred M. Kramer, employed by Bliss & Faville, won third place.

The Architectural League of the Pacific Coast was organized in 1909, with clubs in San Francisco, Los Angeles and Seattle, and each year since the League has offered an annual scholarship prize of one thousand dollars using the problems prepared by the New York Society of Ecole Beaux Arts in awarding the same. This year's problem consisted of the design of a Custom House for the United States and required the preparation of complete floor plans, one section and the facade. Judges were selected from among the members of the New York Society of Ecole Beaux Arts, which includes such well known members of the architectural profession as Cass Gilbert, Paul Cret and Henry Bacon.

Architectural Clubs included in the League of the Pacific Coast are those of the University of California, San Francisco, Los Angeles, Portland, Seattle and Denver. Members from each of these submitted designs and the local club takes great pride in the fact that all three winning designs were worked up in its atelier. The patrons of the San Francisco Architectural Club's atelier are Architects John Baur,

Arthur Brown Jr., and L. Bourgeois, to whom much credit is due for their valuable criticism of the students work.

C. L. Harrison of the San Francisco Architectural Club won the 1913 scholarship and Edward L. Frick won the 1912 scholarship. Edward L. Frick has been in Paris for the last two years and this year was awarded the Grand Prix at the Ecole Beaux Arts out of a class of over nine hundred students, an honor which has not been conferred upon an American student in Paris in over fifteen years.

A large number of the designs submitted in this year's competition, including the three winning designs, are now on display in the rooms of the San Francisco Architectural Club, 126 Post Street, where they may be viewed by the public.

Two Local Firms Low On Illinois Building.

Local Representative Cramer of Chicago Receives Advice That Low Men Will Be Figure Work.

Guy Cramer, local representative of the Illinois State Building Committee, 302 Lachman Bldg., has received word from Chicago, where bids for the construction of the Illinois Building at the Panama-Pacific Exposition were opened, to the effect that Lange & Bergstrom and the Denell Constr. Co. are the two lowest bidders. Mr. Cramer's advice further states that it will probably be necessary to make some revisions in the plans and specifications and that the work will be re-figured by several of the lowest bidders.

The Illinois State Building was designed by the State Architect, James B. Dibelka of Chicago, and will cost in the neighborhood of \$90,000. Included in the work are iron stairways, metal windows, concrete foundations and other materials of a more permanent nature than has been specified in the other buildings.

Bids Opened For Government Work.

Bids Opened For a Water Supply System at Fort Winfield Scott and for Oil Burner System.

Bids were received recently by the Constructing Quartermaster at Fort Mason for constructing a new water system at Fort Winfield Scott. Pringle-Dunn & Co. were low at \$4,460. S. F. Johnson presented the low figure for installing an oil burning system at the Letterman General Hospital at \$1,484. Following is a complete list of the bids:

Water System, Fort Winfield Scott.	
R. C. Gonnill.....	\$ 4,460
Turner Co.....	5,750
Pringle-Dunn & Co.....	4,453
Contra Costa Constr. Co.....	4,686
M. Murphy.....	11,800
W. P. Scott.....	7,540
D. Rogers Co.....	5,857
Oil Burners at Letterman Hospital.	
T. J. Jarvis.....	\$2,746.00
American Heat & Power Co.....	1,527.25
S. F. Johnson.....	1,484.00

Bids For Railroad Work, Fort Mason.

Contra Costa Construction Co. Will Be Awarded Work for Fort Mason Tunnel Railroad Construction.

Six sets of figures were opened in the office of the Constructing Quartermaster at Fort Mason for constructing railroad tracks connecting the Fort Mason Tunnel and the Army Transport Docks. Contra Costa Construction Co. presented the lowest figure at \$27,892 and they will probably be awarded the contract.

Railroad Construction, Fort Mason	
Contra Costa Construction Co.....	\$27,892
H. L. Petersen & Grier.....	35,000
Carnahan & Mulford.....	34,839
Mahoney Bros.....	30,000
Blake & Bilger Co.....	33,935
Pringle-Dunn & Co.....	36,300

Washington State Building Bids.

Dunnivant-Houghton-Van Sant Co. of San Francisco Low Men and Will Be Awarded Contract.

(By Special Wire)
SEATTLE, WASH., June 11, 1914.—Bids were opened today by the Washington Commission to the Panama-Pacific Exposition for the construction of the Washington State Building in San Francisco. Dunnivant-Houghton-Van Sant Co., of San Francisco, presented the lowest figure at \$44,964 and will probably be awarded the contract as the bid is well within the amount available.

The Washington State Building will be a two-story and a half structure of frame and plaster, designed by Architect A. F. Heide of San Francisco. A complete list of the bids as opened follows:

Washington State Exhibit Building.	
Dunnivant-Houghton-Van Sant Company	
T. E. Young.....	\$44,964
Baker & Welsh.....	45,971
Lester H. Stock.....	46,374
Strehlow, Freese & Peterson.....	47,973
L. A. Williams & Son.....	48,200
James McLaughlin.....	49,450
Boyd, Kerr & McLean.....	49,995
W. W. Hayes.....	50,872
W. A. Newsom.....	50,933
James S. Sampson.....	51,400
A. F. Devereaux.....	51,993
Monson Bros.....	52,700
Foster-Vogt Co.....	52,987
Lange & Bergstrom.....	53,458
J. D. Hannah.....	54,910
F. L. Hanson.....	56,000
Sound Eng. & Constr. Co.....	56,900
J. H. Ryckman.....	59,900
Murphy, Brooks Co.....	59,980
Knowles & Relchley.....	64,978

City Bids Opened.

Bids were opened at the Wednesday afternoon session of the Board of Public Works for furnishing overhead electric work for the Municipal Railroads under Contract No. 25. H. S. Tittle presented the low figure while

the Bay Cities Engineering Co. and the Power Equipment Co. were the only other bidders. The contract will approximate \$40,000.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, E. B. Davis. The dwelling has been designed for a twelve-room house and will be erected in the Claremont Tract. Pine and hardwood interior finish will be used. Plans provide for sleeping porches and three bath rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Hardwood and in-laid floors will be used in the principal rooms. Bath rooms will be finished in tile and will be equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and bids will be called for within a few days.

RESIDENCE ADDITIONS AND ALTERATIONS—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mr. Parker. The work will include new interior partitions, plastering, electric work, plumbing, painting, interior finish and hardwood floors. Open fire places and tile mantels will be installed. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE ADDITIONS AND ALTERATIONS—2 story and base, frame. \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, H. Escherich, 2529 Hillegas avenue, Berkeley. The work will consist of new interior finish, plastering, painting, plumbing and electric work. There will be new open fire places and tile mantels. Bath room will be equipped with an automatic water heater. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

RESIDENCES—2, 2 story and base, frame, \$4,000 each. Oakland, Cal. Architect, none. Owner, B. A. Stewart, 616 41st street, Oakland. These two houses will be erected on Ramona avenue and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner, Mr. Jesse A. Berger. The dwelling has been designed for a seven-room house with bath and will be erected on East 21st street. Interior finish will be largely of pine with hardwood floors. In the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath

room will have tile wainscot and will be equipped with an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owners, Summer and Randall, 1249 1st avenue, Oakland. The dwelling has been designed for a seven-room house and will be erected on Evans street west of Webster. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. Piedmont, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. L. Olsen. The dwelling will be erected in East Piedmont Heights and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1845 5th avenue, Oakland. Owner, M. P. Brasch. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected at the southwest corner of Hampel and Greenwood streets. Interior will be finished in west corner of Hampel and Greenwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Oakland, Cal. Architect, C. S. Schwartz, Hayward. Owner, John D. Gadrison. The building will be erected at the corner of 41st and Manila streets, and will contain a number of two and three room suites. Interior finish will be of pine throughout. There will be a central heating system and hot water supply. All apartments will have wall beds and private bath rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

APARTMENT HOUSE ALTERATIONS AND ADDITIONS—Frame construction, \$5,000. Oakland, Cal. Architect, none. Owner, P. A. Soderstrand, 1086 24th street, Oakland. The work will include new plumbing, plastering, painting, electric work and interior finish. Wall beds will also be installed. Considerable exterior work will also be required. Plans are in

the hands of the owner and he will do the work by Day Labor.

CHURCH—3 story and base. Class C construction, \$30,000. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owners, First Baptist Church of Berkeley. The building has been mentioned in these columns before. A site at the corner of Dana and Haste streets has been secured and a building covering 95 by 115 will be erected. The main auditorium will be 75 by 80 and Sunday school rooms and a social hall will occupy a like amount of space. Interior finish will be of pine with ornamental plaster. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken at once.

FLAT AND STORE—2 story and base, frame, \$4,500. Oakland, Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, G. Debenso. The building will have a frontage of 41 feet and a depth of 24 feet. There will be one store on the first floor. Upper floor will be arranged for a flat of six rooms. Interior will be finished in pine throughout. Some hardwood floors will be used. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

FLATS—2 story and base, frame, \$6,500. Berkeley, Alameda Co., Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Mrs. Eugene Ehret. The building will be erected on Berkeley Way, and has been designed to contain four high class flats. Interiors will be finished in pine, redwood and hardwood veneer. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are now being taken.

COUNTRY CLUB—1 and 2 story, frame and plaster, \$25,000. Elmhurst, Alameda Co., Cal. Architect, Edward G. Garden, Phelan Bldg., S. F. Owners, Sequoia Country Club. The buildings will be erected in the center of a large tract and have been designed in the Mission style. There will be large social rooms, banquet room, parlors, cafe, smoking rooms and kitchen. Interior finish will be of pine and redwood. There will be a central heating system and large open fire places. Mantels will be of brick and stone. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—1 story and base, frame, \$3,700. Oakland, Cal. Architect, none. Owner, E. J. Lawler, 461 12th street, Oakland. The dwelling will be erected on Kelley avenue and will contain eight rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner.

er who will do the work by Day Labor.

SCHOOL, DAIRY BARN—Frame and concrete. Cost not stated. Berkeley, Alameda Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans are complete and figures are now being called for on the construction of a dairy barn for the State Institution of the Blind at Berkeley. Plans can be secured from the office of the State Engineer. Bids will be opened on July 9th.

RESIDENCE—2 story and base, frame and plaster, \$30,000. Piedmont, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Dr. Graham. The dwelling will contain in the neighborhood of fourteen rooms, three baths and sleeping porch. The design is in the Mission style. Interior finish will be of pine and hardwood with hardwood and inlaid floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. A vacuum cleaning and hot water system will also be installed. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the building will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are being taken.

SCHOOL ADDITIONS AND ALTERATIONS—Frame construction. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owners, City of Berkeley. Bids will be opened on June 16th for finishing two rooms at the Hawthorne School, finishing three rooms at each the Jefferson and the Oxford Schools. Full particulars can be had from the Berkeley Board of Education. On June 23rd bids will be opened for a four-room art school addition to the school on Kittredge street. Construction will be of frame.

SEWER PIPE—Cost not stated. Oakland, Cal. Engineer, City Engineer. Oakland. Owners, City of Oakland. Bids will be opened on June 18th for furnishing the city with sewer pipe for the coming year. Plans and specifications can be secured from the City Engineer.

PORTLAND AND OREGON.

BRIDGES—Piers, steel and concrete. Cost not stated. Clatsop Co., Ore. Engineer, State Highway Commission, Court House, Astoria. Owners, Clatsop County. Bids will be opened on June 22nd for the construction of the following described bridges. Plans and full particulars can be secured by addressing the Highway Commission, County Court House, Astoria:

No. 1. 125-foot steel bridge with piers and approaches in Nehalem Valley near station 29 on the State Highway survey.

No. 2. 125-foot steel bridge with piers and approaches on Nehalem Valley road over Nehalem river near station 217 on the State Highway survey.

No. 3. 80-foot steel bridge with piers and abutments on Seaside to Tillamook road near station 422 on the State Highway survey.

No. 4. 65-foot steel bridge with abutments over North Fork of the Clatskanie river, two miles from Olney.

No. 5. 80-foot steel bridge with piers and approaches over Youngs river about four miles from Olney.

BRIDGE—Steel and concrete. Cost not stated. Portland, Ore. Engineer, State Highway Commission, Portland. Owners, State of Oregon. The new bridge will be 277 feet long, consisting of two spans, one 200 feet and the other 77 feet long. Plans are complete and figures will be opened on June 24th. Plans can be secured from the Commission, Court House Bldg., Portland.

CONVENT—4 story and base, reinforced concrete, \$125,000. Portland, Ore. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Own-

ers, Sisters of the Good Shepherd. The building will be erected on the property bounded by Congress, Bryant, Albia and Hickum streets, and will cover an area of 210 by 145 feet. Construction will be fireproof. There will be large dormitories, a number of class rooms, dining rooms, kitchen, chapel and office. Interior will be finished in pine throughout. Plans provided for steam heat and elevator service. Exterior of the building will be faced with pressed brick. Separate bids are now being taken for the general contract and for the heating and ventilating.

SEATTLE AND WASHINGTON.

COURT HOUSE—3 or 5 story and base. Class A construction, \$950,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. Plans have been completed for the new County Building which is to cover an entire block in Seattle. Bids are to be submitted on two alternate propositions, but in either case must not exceed the amount of \$950,000. The first proposition will call for a three-story building covering the entire site with a five-story central portion. The second proposition will call for a five-story building over the entire lot and a seven-story central portion. Plans and specifications with complete instructions can be secured from the architect.

POST OFFICE—2 story and base, stone and brick. Cost not stated. Idaho Falls, Idaho. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed for this building and show a two-story structure of nonfireproof construction except the first floor. The building will cover an area of approximately 3,525 square feet. Interior will be faced with pressed brick. Plans are now out for figures and bids will be opened on July 10th. An official proposal appears in another column of this issue.

Contracts Awarded.

ICE RINK—2 story and base, steel and brick, \$150,000. Seattle, Wash. Architect's name not given. Owners, Patrick Bros., Vancouver, B. C. Contractors, Manhattan Co., Central Bldg., Seattle. Contract price, \$150,000.

A WORLD CAPITAL.

All Nations to Co-operate in the Building of an Ideal International City.

A grandly idealistic project has recently been launched by an international organization known as the "World Conscience Society." The details and plan were conceived and perfected after ten years of altruistic labor and study on the part of Hendrik Christen Anderson, an American-Scandinavian sculptor residing in Rome, assisted by some 40 sculptors, artists, engineers, architects, and scientists, and has for its object the establishment of an ideal world city where all international activities are to have their home and inspiration.

A review of the massive and beautifully illustrated volume which embodies the plan in its details was recently published in the Monthly Bulletin of the Pan American Union. "This proposed international city"—writes the reviewer—"is to be a city of light,

health, wide avenues, parks, playgrounds, fountains, lagoons, and noble buildings. It is to be a city without slums, a city of efficiency, convenience and beauty. Not only in structure, plan, and equipment will it be the ideal city, but it is intended to become the intellectual, artistic, and practical international capital of the world; a clearing house for the various social, cultural, scientific and political aspirations of humanity.

"As designed it will cover some 10 square miles of ground. Its architectural plans are so drawn that it can be built at almost any spot accessible to the sea that the nations may choose. While there is ample room within the limits of the city for the homes of the permanent inhabitants and the necessary business and manufacturing plants, the heart of the city is composed of buildings adapted to the unification of international interests. These are grouped into three centers devoted respectively to science, art, and physical culture. The scientific center is connected with the center of art by the broad Avenue of Nations, flanked on either side by palaces which will house ambassadors and delegates representing their respective nations. It has for its crowning motif the gigantic Tower of Progress, which rises to the height of 1,000 feet or more. On the summit of this tower will be installed a wireless telegraphy plant and on the lower floor of its colossal base will be found a world printing press.

"The tower rises in the midst of a circular space set apart for international congress buildings for medicine, surgery, hygiene, law and criminology, electricity and invention, agriculture and transportation, all of which are provided with halls, libraries, museums, and accessory offices. To the northeast is the International Hall of Justice and to the southwest the Temple of Religions. Completing the conception stand an international bank or clearing house and a world reference library. While in gardens near by are found the international institutes of higher learning. The art center is connected with the physical culture by means of gardens devoted to horticulture, natural history, zoology and botany. An imposing Temple of Art, forming the chief monument of the city, has been planned with spacious halls and galleries for sculpture and painting, surrounding a vast auditorium. The physical center is intended to facilitate a world reunion of athleticism and to promote the scientific development of the human form in all nations. A vast stadium is its central feature. Near it is a large natatorium, gymnasium for men and women, and open fields and athletic quadrangles for international exhibitions and contests."

The estimated cost of creating such a city, according to the author of the plan, would not be over \$100,000,000, a sum that would not severely tax the resources of the governments of the world if equitably distributed. The International Committee of the organization is to determine the site and location of the city at its meeting next year. Numerous places have been mentioned, such as the Dutch Coast near The Hague; the Riviera, near Cannes; Turin, near Brussels; St. Germain on Lake, near Paris; the Marmora coast near Constantinople; the New Jersey coast, near Lakewood; the

Isthmus of Panama; and recently the Island of Cuba. Many leaders in art, science, education and world politics in the various countries of the civilized globe are taking an active interest in the movement, and the meeting of the International Committee next year will create a world-wide interest.

F. W. Schaer Opens Demonstrating Rooms

Space in the Santa Marina Building Open to Public and Daily Demonstrations are Made.

F. W. Schaer Co. has opened demonstrating offices at 112 Market Street, San Francisco, representing the Ex-cello Mfg. Co., Chicago, manufacturers of vacuum cleaning systems, Radku Mfg. Co., Chicago, manufacturers of gas instantaneous hot water heaters, O. W. Roberts Mfg. Co., Chicago, manufacturers of electric washing and wringing machines and the Eclipse Stove Co., Mansfield, Ohio, manufacturers of gas stoves and ranges.

The Ex-cello vacuum cleaning system is a modernized process. The separation of dust, dirt and bacteria from the air being absolutely perfect, allowing the use of any standard exhauster with reciprocating or positive blower type. The machine also furnishes compressed air when wanted and empties automatically into the sewer. This last named feature does away with the unsanitary process of emptying the dirt, dust and bacteria by hand. The Ex-cello system is a new process of cleaning and sanctioned by the leading architects in Chicago and New York.

The line of gas stoves and ranges is the most modern and complete on the market and these goods are available to large buyers as well as small, at a very nominal cost.

The safety heater, which is an instantaneous gas heater, is automatic and safe in every respect. It is worked on the process of most heaters, but maintains many advantages over its competitors. One feature is the guaranteeing of absolute safety against explosions and asphyxiations.

The washing and wringing machine is very simple and fool proof, being run by a 1/4-h. p. motor and equipped with a solid rubber wringer and trays. It is most modern in every respect.

Messrs. F. W. Schaer Co. maintain a complete demonstrating line at their sales offices in the Santa Marina Building and would be pleased to demonstrate to the public any of their machines. They are also in a position to submit the lowest prices on all goods.

WORK IN THE BUREAU OF ARCHITECTURE OF THE BOARD OF PUBLIC WORKS.

Full sized details are being prepared as the work progresses on the following buildings: Polytechnic High School, Glen Park School, Edison School, Columbus School, Harbor Police Station, Relief Home Chapel, Engine House No. 48, and the Washington Irving School.

The following is a brief report on work being carried on at the present time:

Marshall School—Drawings for pro-

posed auditorium completed and contracts awarded.

Auxiliary Fire Alarm Station—Construction work now progressing.

City and County Jail—Plans and specifications for the completion of the morgue, to be located in this building, are entirely completed and construction is under way. Bids will be called for on remaining portion at an early date.

Polytechnic High School—Specifications being prepared for metal furring and lathing. Plans and specifications being revised for electrical work.

Oriental School—Contracts awarded and construction under way.

Washington Irving School—Contracts awarded and work progressing rapidly.

Engine House No. 12.—Plans and specifications completed; contracts awarded; work will begin at once.

Cooper School—Plans and specifications completed; bids received and contracts awarded.

San Francisco Hospital—Contracts for yard work and lighting fixtures awarded; screen bids received and contract awarded.

Civic Center—Plans progressing rapidly for the improvement of public square and general Civic Center scheme.

Municipal Car Barn—Designs prepared for Municipal Car Barn at 17th street, between Mariposa and York streets and delivered to Engineer's Department.

CONSTRUCTION WORK ABROAD.

CHINA.

[Consul General George E. Anderson, Hongkong.]

Ichang Wenhsein Railway.

An engineer engaged in survey work on the section of the Szechwan-Hankow Railway from Ichang to Wanhsein—known as the American section—reports that the location survey of that line has been completed to Kweichow, representing about two-fifths of the entire line. The present line is an entirely new survey which follows the Yangtze River closely instead of running back some distance in the interior from the river.

The new survey from Ichang to Kweichow is 53 miles in length as compared with about 99 miles of line represented by the old survey once adopted by the old Szechwan Railway Co. The new survey, however, contemplates running two long tunnels—one 17,000 feet—and an enormous amount of bridging. The grade by the new survey is comparatively slight, the maximum being 1½ per cent. The key to the entire new route is the long tunnel referred to, which would be located about 11 miles from Ichang. The plans and estimates of this portion of the line are substantially complete, and a reconnaissance survey of the unsurveyed portion of the entire line is being made. It is anticipated that construction work will soon commence.

In this connection attention is called to the fact that the chief engineers of the several sections of this Hankow system agreed several months ago that in all contracts for the construction of bridges or similar steel structures bids will be received on all the sections from firms of any nationality, basing their decision upon the general contract which allows any manufacturer to replace a standard section of any such structure as called

for in designs with one of its own standards, provided it is at least as large or larger, no allowance in price being made for any such increase in size or weight. This privilege is of value where specifications are drawn upon one standard, like the metric system, and bids are submitted on another as in feet and inches or in pounds or tons.

Reclamation and Harbor Work at Hongkong.

The reclamation of a large amount of marine land and the ultimate deepening of a considerable portion of the harbor of Hongkong so as to accommodate the largest size vessels, which have used it with difficulty at times, are in process of final arrangement in the colony.

The reclamation scheme involves filling in that area of Hongkong Harbor inclosed within a line drawn from East Point, a well-known promontory extending from the east side of the island of Hongkong into the harbor at a point some distance within the principal entrance known as "Y-yee-mun," to a point opposite Arsenal Street, about one mile distant to the north and toward the principal portions of the city of Victoria. The area reclaimed will average about a fourth of a mile in width. The earth and material for filling will come largely from the leveling of Morrison Hill and East Point Hill, the former an elevation of about 190 feet in height and about 900 feet long and 450 feet wide on an average and the latter a similar elevation some what smaller. The water in the marine area to be reclaimed ranges as deep as two fathoms in places but usually runs from a maximum of 1½ fathoms to the shore.

Greater Facilities Needed.

Deepening Hongkong harbor has been receiving the attention of colonial authorities as well as the shipping interests of the colony for some time, and it is thought that some definite action in this line will be taken shortly. While there is an abundance of water for ordinary vessels coming into the harbor, especially since the policy of the port always has been to furnish accommodations for vessels coming through the Suez Canal as the standard of what is required in the port, several of the trans-pacific vessels have been in difficulties at certain places in the harbor when fully loaded. It has therefore been felt for some time by shipping people that something would have to be done. For a time it was proposed to deepen the port and construct new wharves in connection with the reclamation scheme above described, but it has been decided that deep water is too far distant from the shore in the locality involved to make such a plan feasible, for the present time at least.

MUNICIPAL PAPER WORKS AT DENVER.

Employment has been given to a great many transient men and some women in the new industry of baling the waste paper of the city, three carloads of which have been recently sold at a fair price. Paper is collected from the large stores and from receiving cans on the street corners, is sorted, baled and shipped to market at about the rate of a carload a month. While not a big financial benefit to the city, this method of handling the paper serves the double purpose of getting

rid of the waste paper without cost and at the same time furnishing work to jobless men. The revenue from this paper industry now supports the families of the men employed at it, and in addition adds a little to the general fund of the department.—Exchange.

TO STUDY ROAD CONDITIONS IN 100 COUNTIES.

Department of Agriculture, in Co-operation With States to Seek Data Looking Toward Standardized System of Local Road Management.

WASHINGTON, D. C., June 11, 1914.—Detailed studies of local road building systems in 100 counties are now being carried on by the Department of Agriculture in co-operation with the State highway departments and local road authorities.

The purpose of this study is to discover the points of excellence and defects in existing local methods of building and maintaining roads which will aid the State authorities to put local road management on a systematized basis. The co-operating State authorities have been asked to designate counties that present typical and exceptional features as to topography, character of road materials, methods of construction and maintenance, administrative organization, methods of road financing, and traffic conditions. From these lists 100 counties will be selected, and in these counties the Division of Road Economics will make intensive studies.

This investigation is prompted by the fact that there is at present very little knowledge as to the most effective and economical methods by which a county can develop its roads. At present the methods of financing local road improvements vary from calling on farmers for a certain number of days labor in lieu of a road tax, or the use of county prisoners in road construction, to bond issues or maintenance of roads from dram-shop license funds.

The Department will study all of these systems with the view to determining what system or combination of systems works best in actual practice.

There is, moreover, at present no standard system of keeping accounts for road building and maintenance, and as a result, while some counties know to a penny the purpose for which money was spent, others have no definite check or reporting system. Among various counties with the same conditions, cost of excavation or other labor is anything but uniform, and many counties, because of the absence of definite knowledge, fail to use local and cheap materials and construct roads which are unnecessarily expensive for their purpose, or which will wear out before the bond issues are redeemed. The investigation will include a careful study of the use of convict labor in road construction.

In connection with the scientific study, the Department's highway engineers will advise freely with local officials as to improvements, and thus give each county visited the advantage of direct co-operation, engineering supervision and assistance.

These investigations, it is believed will yield important economic data bearing especially on the benefits and burdens of road improvement and

showing the extent to which financial outlay under given typical conditions is justifiable.

The heads of State highway departments are manifesting great interest and are co-operating cordially in this work. These data when obtained will be published and thus made accessible to all county and state road officials.

BRANCHING OUT.

The Foster-Vogt Co., Sharon Bldg., Concrete Contractors, have lately branched out into General Contracting and have undertaken some very large works, amongst which we note that they are now constructing the Oregon and the Indiana State Buildings at the Exposition.

The "Builder" bespeaks for Foster-Vogt Co. the favors of the architects and owners when needing the services of a General Contractor.

IRON ORE FOR 200 YEARS.

There is still a considerable amount of iron ore in the ground, as shown by a report on the world's resources presented at the International Geological Congress at Stockholm. It was estimated that the total actual supply of iron ore existing in deposits that can be worked at an economic profit amounts to 22,405,000,000 long tons, representing 16,192,000,000 tons of iron.

This total would supply the requirements of the world for considerably less than two centuries, even were the present rate of output not exceeded on the average. However, the potential resources of the world not yet developed are estimated to amount to 123,377,000,000 tons of ore. The output of iron ore in 1912 is estimated at 146,000,000 tons for the ten principal countries.

TWO BIG DAMS ON NILE.

Two irrigation dams will be built by the Egyptian government, one on the Blue Nile and the other on the White Nile. The structures, it is reported, will be larger than the Asuan dam, and the estimated cost ranges from \$15,000,000 to \$17,500,000.

ORDER PLACED FOR OIL PIPE LINE

An order has been placed for the enormous pipe which will be installed between Martinez and Coalinga for the purpose of transporting oil from the southern city to Martinez. The actual cost of the pipe, including the installation will be in excess of \$1,000,000. The pipe will weigh about 30,000,000 pounds and will require 750 flat cars to bring it to California from Youngstown, Ohio, where it is to be made.

The pipe will not be shipped all at once, but will be sent out in sections as it is completed. The railroad officials state that this shipment will open the way for future large shipments. The order was for 115 miles of 8 inch pipe and for 57 miles of ten-inch—Richmond Ind.

SURVEY STATIONS SHOT UPON FACE OF CLIFF.

A great deal of ingenuity was required in making the survey for the new state highway across the face of Storm King Mountain, a steep promontory that juts out to the Hudson

River at a point a short distance up the river from West Point, N. Y. In many instances it was necessary to lower men and instruments over the cliffs with ropes in order to make the required cross sections. But for a distance of about 100 feet it was found impossible to use even this strenuous method, as the surrounding rock formations were inaccessible, and the engineers adopted a novel method for getting the measurements across the face of this part of the cliff. A field gun was obtained from the West Point Military Academy. This was loaded and fired at points selected on the face of the cliff, the projectiles used being cans of paint. The cans broke when they hit the cliff and the paint formed distinct targets on which the engineers could train their instruments. The location and elevation of each target were then found by triangulation and the taking of vertical angles. This highway is to take the place of the present road over the mountain, which reaches a height of 1,316 feet and is a long and somewhat dangerous route both for horses and automobiles. The engineers estimate that the four miles of highway past Storm King Mountain will cost \$100,000 a mile.—Popular Mechanics.

TENEMENT HOUSES ERECTED IN 1913.

The Records of the Building Department of the Board of Public Works show the following relative to the construction of tenement houses for the year 1913:

Number of tenement houses erected in 1913, 217.

Number of houses for three families not controlled by the State Tenement House Law, 60. Number of houses for four families not controlled by the State Tenement House Law, 30. Houses erected for two families, 292.

Permits for tenement houses erected from January 1st to May 1st, 1914 show that 61 have been issued. There were also eight lodging houses and eleven hotels erected under the Tenement House Law from January 1st to May 1st, 1914.

LARGE TREES DISAPPEARING.

The giant forest monarchs of British Columbia are by far too valuable to be allowed to live as curiosities for their majestic size and beauty. Still their race is by no means extinct. The regrettable thing about them is that since they are the production of centuries, during which the soil was not needed for any other purpose, it is unlikely that future generations will have the opportunity of seeing timber of equal size.

ARTIFICIAL RUBBER A BY-PRODUCT OF STEEL MAKING.

[Commercial Agent Erwin W Thompson.]

At a recent meeting of the Iron and Steel Institute in London, the president read a paper on by-products in steel manufacture. He discussed the utilization of blast furnace gases for operating gas engines and for illumination and heating, and the later developments in making nitric acid from these gases, and also the manufacture of bricks and cement from slags. All these matters have been under dis-

cussion for a number of years, but a new idea was presented at this meeting looking toward the synthetic production of India rubber from coke oven gases. The president's words were: "It was being sought to obtain from it the hydrocarbons, the derivatives of which were found in India rubber, and experiments that had been made permitted the foreshadowing of the manufacture of artificial rubber."

FOREST NOTES.

Approximately 750 acres on the Oregon national forest were planted with young trees this spring.

On the Deerlodge national forest in Montana one lookout station has the record of reporting accurately, by distance and direction, a fire that was sixty miles away.

Nearly 3 million young trees are being set out this spring on the national forests of northern Idaho and Montana. On the St. Joe national forest in Idaho three thousand acres will be planted.

Ranchers within and adjacent to the Sierra national forest, California, have formed a co-operative association for the prevention of forest fires. They need to use fire in clearing land for farming, and will do it on a community basis, with all members present to prevent the fire's spread.

The Canal Tolls Repeal Bill has passed the Senate by a vote of 50 to 35 and William Randolph Hearst is again in the minority. This measure has taken on some peculiar phases. The men who have been consistently with the people have stood with the President in favor of the repeal. While Hearst and Underwood and the reactionaries generally have been howling their heads off because of the surrender to the railroads. After all it will perhaps be found to be of minor importance, as the President says.

That rubber tires have more endurance than steel rims is one of the facts developed by recent tests made by a tire manufacturer. The test method was to put a tire on a steel rim and force air into the tire till something gave way. The rims were not mounted and reinforced by the wheels. The tests were severe. Some tires were inflated to four hundred pounds to the square inch. Not a single tire gave away, but the rims collapsed and in some cases were twisted into actual "figure eights." One tire was tested fourteen times, breaking rim after rim.

My Experience With The Law.

By Simon T. Stern
Of the New York City Bar.

Reprinted from The Docket.

I am a plumber; that is, I was a plumber, with a tiny shop on the outskirts of the city, until the law stepped in and took a hand in my affairs. My establishment was not especially impressive. I had about a thousand dollars' worth of stock and five hundred dollars in the bank—the savings of ten years. My name was over the door and I owed no man a dollar.

For a decade I had worked at my trade; first as apprentice, afterwards as journeyman, and at last I graduated into the ranks of master plumbers as my own boss: "John Williams, Plumber and Gas-Fitter, Jobbing a Specialty." How proud my young wife was when the shingle was first flung forth to the gaze of passers-by!

One cold winter's morning, Jos Murtagh crossed the threshold of my shop. I had known him casually for some years as a sort of combination builder and politician. I had heard he was about to build a beautiful residence not ten blocks from my shop. Joe passed for the wealthiest citizen in our section of the city. He ran an automobile, entertained lavishly, and his wife and two grown daughters were always dressed in the best of style.

"Say, John," he greeted me bluntly, "I want you to do the plumbing in our new home. The family will live there. We're going to have the best of everything and I've picked you to do my plumbing." Carelessly he tossed a set of blue prints on my desk and invited me to submit an estimate.

Up to that time I had been doing repair work and odd jobs. For some time I had been thinking of taking on contracts—as soon as my resources would permit. That time had now arrived, apparently. As far as I knew him, Joe Murtagh was a responsible citizen, and I felt pleased at the distinction of starting my real career with his house.

Several days later I wrote that I could furnish and install his plumbing plant for fifteen hundred dollars. I had figured close because I wanted his work. My labor and the wages of the men on the job would cost me at least five hundred and fifty dollars. The material necessary footed up seven hundred and fifty dollars more. That left two hundred dollars for my profit after I was through paying my men and paying my wholesale house for the materials.

When Joe got the figure he told me I was too high. He had another plumber, he said, who was willing to do it for fifty dollars less; but he would close with me if I reduced my bid by that sum. It cut my profit twenty-five per cent, and I said I could not afford to do it. Finally we compromised at fourteen hundred and seventy-five dollars. The irony of it! In the beginning we were haggling over twenty-five dollars!

The contract was signed at an architect's office. It was a lengthy document, with lots of printed matter. I laughed, and asked Murtagh why he couldn't give two lines on a slip of paper saying how much he wanted to

and I would sign it, saying I would do the work for that sum. He insisted that that wasn't doing the thing in good legal shape; above all things in the building game I must learn to do things according to law. So we signed the paper, most of which was Greek to me.

Every other line it called Joe the party of the first part and me the party of the second part. I was the party of the second part, all right! In it, Joe agreed to pay me five hundred dollars when I had the pipes in, and the rest when I was finished. There was one clause in it that at the time I scarcely noticed. Each time I wanted my payment, I must go to Joe's architect and get a certificate from him that I was entitled to it. When I called Joe's attention to the hundreds of words, he said it was all red tape. It was merely a form. He used it in all his building. So did everybody else. "You do your job, I pay. So hurry along, my boy. Order your supplies from the wholesale house and get to work."

It was the first time I had run into debt to my supply people. But I had always paid in cash, and they were willing to extend a line of credit on the strength of the contract when I showed it to them. The first part of the work—roughing out, we call it—I knew I could finish in two weeks. I agreed to pay them three hundred out of my first payment and the rest when Joe settled up.

The job went smoothly. I roughed out the house and went to Joe's office to collect. He handed me a check with a smile, saying: "You see, I didn't even ask for that architect's certificate."

"Why should you?" was my rejoinder. "The work is honest. That architect of yours hasn't been near the building since I started."

"I wanted him only for the plans anyway," Joe told me. "When it comes to details, a practical contractor like yourself knows more than a thousand architects."

Three weeks later the building was ready for the fixtures. I ordered up the bath tubs and lavatories and fittings from my supply people and finished up. When I turned on the water, I was ready for my nine hundred and seventy-five dollars. I went down town and asked Joe for it.

This time there was no check for me. Instead he told me to go down to his architect and get the certificate. But I insisted that I must have something on account. I had used up all my ready cash paying my laborers, and my supply house had demanded their payment now that I was through. But Joe wouldn't listen. He insisted on the letter of the contract, and I went to the architect's.

The architect's clerk told me that his boss was off on a fishing trip down South. Frankly, I didn't believe a word of it. The very next day I went back and caught him—caught him unashamed, smiling rather at his cleverness in almost putting me off. He professed extreme busyness and promised to inspect the work as soon as he could. For three weeks I got no satisfaction. In the meantime, you may be sure, my business was suffering. My cash was all gone and my supply people were growing impatient. But that architect took his time about it, and Joe wouldn't give me a cent until I got that certificate.

In answer to my persistence, the architect finally went over the job, and found about a hundred faults! mythical, most of them, and the rest trivial beyond measure; but he insisted that I correct them. What was I to do? I corrected every objection he made—at the expense of half my profit. Profit? Already I saw disaster. I would have been only too happy to get enough for my supply people and to replenish my actual outlay for labor.

I appealed to Joe. I told him my supply house had threatened to sue. "Let 'em sue," he told me. "For a few dollars you can get some lawyer to shove the case off until they're tired. When they take a judgment, turn your stuff over to your wife and let 'em fight. They can't do anything. Before you get through, they'll be glad to settle for half."

"But I owe them the money—fairly." "You don't owe nothing until the law says so. Make them prove it. Make 'em bring every driver to court and swear the day, hour, and minute when he delivered stuff to you. Make 'em prove every valve. That's the law. The law is, if they can't prove it, you don't owe it. If a feller gets funny with me, I tell him to sue. Why don't you sue me?" he added with a smile.

That's how I came into the sheltering arms of the law. I visited a lawyer and told him my story. He advised me to file a mechanic's lien, and I wanted to know if that would bring me my money.

"It will, if they haven't put mortgages on ahead of you."

"Do you mean to say the law permits mortgages to come ahead of my lien?"

He did. He also said there might be arrears of taxes and water charges and other things, and said we ought to search the title. He made the search and I made my first discovery. Joe Murtagh did not even own the property! It belonged to a building corporation. Joe's wife was the president and a director; and Joe's two daughters were the other directors. We found two mortgages. The first one was for five thousand dollars, and was evidently straight. It was given to a bank for savings.

But the second mortgage didn't look right to me. It had been given to a man by the name of Jack Ripley, of Someplace, South Carolina. It was for six thousand dollars—eleven thousand dollars altogether; more than the whole house was worth.

My lawyer explained that the entire transaction looked dishonest, but there was nothing unusual about it. In order to protect himself from his creditors, a builder often formed a family corporation and gave a friendly mortgage to a friendly relative. I thought of Joe Murtagh when my lawyer added: "That corporation and that mortgage are created by law. They may be fake, but the law doesn't treat them as fake until you prove it. Do you know why they gave that mortgage to somebody in South Carolina? That means that you will be put to considerable expense to serve him with papers. You made your contract with Joe Murtagh. You can sue him and get a judgment."

"What do I want with a judgment unless it's good? I want my money—that's all. It's coming to me. That house belongs to Joe Murtagh as much as this right hand belongs to me. He

is going to live in it. Do you mean to tell me the law permits him to file a piece of paper making a corporation with his own family as directors, and keep me out of my money?"

"It's done every day for fifty dollars. It's up to you to prove that incorporation 'fraudulent. Then your lien comes in."

"Back of eleven thousand dollars' worth of mortgages, six thousand dollars of which are pure fake?"

"No; the law will help you there. You can set that mortgage aside. But you must serve papers on Jack Ripley in South Carolina."

"That's easy. We find out where he lives, and send a copy of the papers to somebody by mail, and let them hand the papers to Jack Ripley, fraudulent mortgage."

"The law won't permit it to be done that way. That's the reason they gave that mortgage to a man who does not live in New York State. You cannot hand the papers to anybody out of the State. You must advertise your summons in a newspaper for six weeks—so the law provides."

"What'll that cost?"

"Oh, it runs from fifty dollars to a hundred dollars—cash. Legal advertising is one of the richest kinds of political graft. A judge selects the newspapers, and the prevailing party selects the judge. There are all kinds of papers with a circulation of four hundred copies which exist only for the publication of summonses and legal notices—all politics. Jack Ripley is very apt to read a notice published in the Fire Chief's Fireside Companion of East Broadway, New York, isn't he? But if the judge picks that paper, in it goes. Legal notices are never read—they're just printed and paid for. You'll have to publish in two papers—about fifty dollars each."

"That was a facer. 'Why,' I asked, 'can't I go up to a policeman and just tell him to arrest the man who defrauded me? Joe Murtagh told me he owned that house. He signed the contract as if he were the owner. Why must I serve Jack Ripley in South Carolina, when the man who did all the wrong is right here? He formed that fake corporation. He drew that mortgage. He defrauded me.'"

"You can't," my lawyer assured me. "It isn't that kind of fraud. The law distinguishes. The very prosaic man who steals a loaf of bread goes to the workhouse—that's the kind of fraud the law chastises summarily. But the other thing is different—at any rate the law of it is different. It is what the law calls a civil fraud. You sue him for fraud in the civil court. You can get a civil order of arrest."

"What's the difference, as long as he goes to jail?"

"He doesn't go to jail," the lawyer continued. "Technically he goes there. Actually he hands Mr. Sheriff a bond. The bond goes to jail. Murtagh simply guarantees that he will honor you by appearing in court and listening to you when the case is tried. That's all he must do. If he is there in court, the bond is satisfied."

"I see. He doesn't go to jail until the case is won and we get a fraud judgment against him. Then I get him arrested, eh?"

"Yes; civilly arrested."

"That 'civilly arrested' began to get on my nerves. The entire proceeding seemed to be one mass of civility. I

inquired whether Joe Murtagh would even then see the inside of a cell. 'Certainly not,' was the response. 'He gives a new bond—that's all. All he must do is to stay in the jail limits for six months.'"

"Then he is in jail, after all."

"Technically, yes. But his cell is commodious enough. The jail limits means merely he must stay within the county of New York for six months. He can wander abroad as long as he stays in New York. In other words, for six months he is denied the privilege of journeying to Europe or the North Pole. After that he goes wherever he pleases. The bond has been satisfied."

There was only one thing to do, after all. We filed that lien. We filed it against the family corporation and against Jack Ripley of South Carolina. We began the suit, when we found that Jack was Mrs. Murtagh's own brother. It cost me eighty-four dollars to see my summons published in the Fire Chief's Fireside Companion, and it took us a week to get a copy of that widely circulated sheet. If Jack Ripley ever saw that notice, he gave no sign.

The law taught me something new every day. It wasn't three weeks before the law took my lien away from me. Joe Murtagh filed another bond. I learned that he could wipe my lien off the property if he filed a bond with two sureties. The same judge that designated the Fire Chief's paper approved that bond. He couldn't help himself. The law compelled him to approve it as long as they swore they owned real estate.

Joe produced a district leader and a real estate speculator, and they swore they owned three flats. In vain my lawyer called the attention of the judge to the fact that there were more mortgages on the three flats than there were on the Murtagh house. The law wiped off my lien and gave me a bond with two bondsmen who were perfect strangers to me—and in spite of my objection.

Did the law help me to collect that bond? This is what happened. The case hung fire for two years. By the end of that time the Murtagh house had been sold in the open market and Jack Ripley had satisfied his mortgage. The money for the house went to the corporation, and Mrs. Murtagh, as treasurer, signed a check and gave it to her husband. He drew the papers—all of them. He got the money—all of it. He simply produced documents and his women folks signed them wherever he told them to. And yet the law has it that Joe Murtagh had nothing to do with that incorporation.

We got a judgment against those bondsmen. Did they own real estate by the time we got the judgment? Not they. They had transferred their property the day after they swore they owned it! My lawyer tried to get them punished, but the law stepped in and said the transaction was all right as long as they owned that property the day they swore they owned it. That very afternoon they could give it away and they could not be punished.

Of course I could bring a new action against the people—that time in Illinois—to whom they had transferred it. And I could get more summonses published in that political paper as long as I had fifty dollars with which to pay. And maybe after another year

or so I could get a new judgment against them. Apparently the law did all it could for me when it forced me to give up my good lien and accept a rotten bond.

Of course the law isn't always so impotent. My wholesale house fared better. They took a judgment against me for what I owed them. And because I was honest, and refused to form a family corporation, or make fraudulent transfers, Mr. Sheriff came along and cleaned me out. He took everything, I possessed—my shop, my stock, my bank account. All he left me was a set of plumber's tools, which the law declared exempt.

I am making a living with them ever since as a journeyman. Not long ago I worked as a laborer on one of four large apartment hotels being built by the Joseph Murtagh Realty Company. Mrs. Murtagh is president; she is still signing papers wherever her husband puts his finger. Miss Murtagh is secretary. Miss Vivie Murtagh is treasurer. Poor old Joe isn't even a stockholder. But the family corporation keeps him supplied with funds sufficient to run a stable of automobiles and to wear fine clothes and live like a prince. He is a technical pauper, while I am a real one. We have one thing in common—it was the law that made both of us.

New Improvements In Mulvaney Beds.

Economy of Space Marks One of Many New Points of Wall Bed Now Attracting Much Attention.

By referring to the advertising columns of this issue, our readers will find the announcement of a new wall bed, the patent of H. C. Mulvaney, whose name it bears.

This bed has several new improvements in addition to the conveniences which have made the wall bed a necessary feature of almost every apartment building.

By specifying the Mulvaney wall bed, Architects can save from eight to ten inches of the space ordinarily required for wall beds, which, in a building of limited size is an important consideration. For buildings already completed, or where it is not desirable to frame in a recess, the Mulvaney Wall Bed is made in cabinet style built to line with door casing, etc.

Another important feature of the Mulvaney Wall Bed is a ventilating system which insures the circulation of fresh air at all times.

The H. C. Mulvaney Wall Bed embodies an absolutely new principle in its construction; there being no complicated parts to get out of order, making it an ideal bed; specially adapted for sleeping porches, residences and in fact, any place where a bed is required.

The company also manufactures a roll under or disappearing bed which fills a long felt want. Mr. Mulvaney has established offices in the Underwood Building, 525 Market Street, with courteous attendants prepared to demonstrate the desirable features of this bed at all times.

Owners, Architects and Contractors are cordially invited to inspect this bed.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Editorial Comment.

Building operations for the month of May went along with about an even pace with last year. Of something like 75 cities making reports to the American Contractor, Chicago, the total amount of building permits amount to practically the same thing as that of May, 1913. Particulars are shown in the following table:

City	May, 1914.	May, 1913.
Akron	\$ 399,656	\$ 584,380
Albany	569,565	399,665
Atlanta	732,299	771,657
Baltimore	1,032,200	835,147
Berkeley	151,000	180,800
Boston	674,968	2,614,400
Buffalo	1,124,000	1,568,000
Chattanooga	78,400	70,390
Chicago	6,019,150	8,916,900
Cedar Rapids	321,000	293,000
Cincinnati	1,181,715	790,572
Cleveland	2,201,820	1,958,025

It will be seen that New York and Philadelphia gained while Chicago lost. In the main the other cities registered about an even break so that the total of 74 million is almost identical for the two years.

Judge Dunn is reported to have said that the trial of cases has degenerated into a game. He refers particularly to the criminal cases in which he states that the attorney for the defense is one player, the District Attorney the other and the Judge is the umpire. In case it result in conviction and an appeal is taken, it is decided not upon the guilt or innocence of the accused, but upon whether or not one of the rules of the game has been violated.

What the judge says of the criminal law is equally applicable to civil cases. And these long delays and endless arguments are being put an end to by the commissions that have been established with judicial powers.

The Workman's Compensation Act is one of the acts that has established a commission that does away with delay in personal injury cases.

INSIDE BUNGALOW.

The Pacific Building Materials Company has built and tastefully furnished a complete California bungalow inside their office at 523 Market Street, for the purpose of demonstrating the uses of the different Building Materials and Equipment they handle.

This inside bungalow besides being extremely novel, is very interesting to a prospective home builder, for a good many ideas for decoration and furnishing a modern home are shown to good advantage. There is not a detail either in construction or furnishing, that has been overlooked.

The Pacific Building Materials Company extends a cordial invitation to our readers to inspect this bungalow at any time. We feel that you would be interested in seeing this attractive and useful demonstration and it is with much pleasure that we extend this in-

The Use Of Asphaltic Road Oil.

By W. N. Frickstad,
Assistant City Engineer of Oakland, Cal.

From Pacific Municipalities.

Before the Third meeting of the Bay Cities Branch of the League of California Municipalities, at San Jose, Cal., May 9, 1914.

The man who discovered that asphaltic oil is useful in road building unknowingly started a series of considerable part of the time of trustees, engineers and other municipal officials for the past several years, particularly the last five. The use of his product has been called the greatest advance in road building since the days of John McAdam, a triumph of American inventive genius and a wonderful saver of the taxpayer's money. On the other hand, it has been set down as merely another luxury entering into the high cost of living; or by others of a different mental attitude, called a pitiful substitute for something better and more permanent. It is not my purpose to engage vigorously on either side of the controversy. Probably there is truth in all of these statements, and certainly, under some circumstances all are wrong. It is rather my purpose to point out the circumstances under which oil is useful, at least as we have developed the subject in the Oakland Street Department; to describe briefly our methods of using it and to tell something of the cost to us.

You have undoubtedly heard that a street should be designed according to the traffic that it will carry. Other considerations enter, but undoubtedly the amount and kind of traffic is an important factor. A street that is likely to carry less than a hundred vehicles per day can be paved in a very different manner than one that will carry three to six thousand. Also the character of the vehicles is important. In November, 1908, five and one-half years ago, the best information at hand indicates that automobile traffic in Oakland was between 10% and 12% of the total.—Not enough to be a serious factor except on a few main highways especially useful to them. A year ago a count of 130,000 vehicles covering 25 points showed 53.8% of the total to be automobiles of various kinds, the stations ranging from 7% to 72%. A similar count this year shows nearly 60% as an average. Obviously there has been a great change in the kind of traffic in the last few years.

However, the traffic is not the sole consideration in selecting a pavement. In deference to our optimistic friends the real estate operator who wants a pavement, but wants it thin, and to the pessimistic protestant who appears before the Board of Council as evidence that he does not want any pavement at all, but if he must have it wants it cheap, I will say that cost is an important item. On the other hand, certain things must be secured even on our streets of lightest traffic. The average residence street is essentially part of the front yard. It should be of decent appearance and reasonably clean. The children will surely use it for a playground, and it should not be a series of bog holes in winter and the

source of a fog of dust in summer. These latter considerations alone cause the demand for many miles of paving annually. Incidentally, the individual property owner who has an automobile or a horse wants to reach his home conveniently; the grocer, butcher and expressman find good streets necessary in the residence district, and occasionally every street will be traversed by the heaviest truck in town with a load of lumber, stone or other building material.

From the foregoing remarks it is clear that any pavement, to be useful, must be durable in proportion to the expected traffic, clean or easily cleaned, reasonably noiseless, pleasing in appearance, low in tractive resistance, offer a good foothold, be capable of sustaining the heaviest loads and be easily repaired. Certain minimum requirements must be exacted regardless of the amount and kind of traffic. Under former conditions plain macadam served the purpose very well on streets of moderate travel, and was extensively used under medium and even heavy traffic. In recent years there has been a growing demand for cleaner streets, and macadam was nearly always dusty in summer and muddy in winter. Then came the automobile, propelled by its own wheels at high speed, and plain macadam promptly became out of date.

The problem of finding a substitute for macadam arose in Oakland five or six years ago. We did not care to adopt a standard asphalt pavement at a cost double or treble that of macadam. All of the patented pavements that came into vogue at about that time seemed defective in some vital point or were too expensive. After some experimenting, which has been in progress to some extent ever since, we adopted the use of asphaltic oil to modernize our macadam. It is now our standard for streets of light and medium traffic. So far as can be known at the present time it fulfills, to a reasonable degree, all of the requirements set forth above, excepting that it is distinctly not easily repaired, especially over refilled trenches. But this is true of any type of pavement built without an adequate concrete base, and is one of the penalties attached to building a low priced pavement.

The precise amount of traffic that should bear the use of oil macadam in favor of something better is difficult to say. Tentatively, perhaps 1,000 vehicles per day on a roadway thirty-five or forty feet wide might be suggested, although if most of the traffic be ordinary automobiles or light horse-drawn vehicles, this might be too conservative. Time alone, combined with careful traffic records, will answer this question. A traffic of 1,000 vehicles per day is not found on many streets in a small city, and even in a large city the mileage is limited. So if experience proves that this limit is correct, even if other pavements prove to be satisfactory and economical, the field of usefulness for oil macadam is extremely broad.

Another field in which asphaltic oil has been useful to us began primarily as a maintenance operation and secondarily a betterment. When we abandoned the construction of plain macadam in 1910 we had about 273 miles of that class of streets. It was obviously impossible to order their immediate reconstruction, most of them being in good or fair condition. The automobiles, however, were beginning their deadly work. We were forced to find some means of protecting these roadways. Surface oiling, which had already been successful in other places, was adopted as the most economical protection in sight, promising also to reduce the cost of maintenance by eliminating the sprinkling and decreasing the cost of cleaning. A beginning was made in 1910 and 1911 and the work prosecuted vigorously since. To date we have surface oiled about 65 miles of street. Reconstruction has further reduced the length of plain macadam to about 193 miles, of which fully 100 miles will be oiled as rapidly as funds permit. The others are too old to be oiled economically.

So much in general as to the field of usefulness of road oil. Many methods have been developed in various cities, but to make clear upon what we are basing our faith it might be advisable to continue to limit the discussion to Oakland practice. I shall omit many details. For further information, if you wish to compare our methods with yours, I invite you to visit Oakland at almost any time between now and October. We will be glad to give any information available and show some of the actual work.

Our work is of four types:

(1) Oil macadam, which consists of a macadam street into which oil has been worked during the process of construction. The term *oil macadam* covers a wide range of specifications, but as used in this paper the distinctive feature is a definite penetration of oil into the pavement to the extent of two or three or more inches.

(2) Surface oiling, which consists of spreading a thin wearing surface of oil and screenings over a completed water-bound macadam street.

(3) Surface oiling on a concrete base, somewhat after the manner of the so-called dollar-way pavement.

(4) Oil used in patching or repair work.

We are using two types of oil macadam, one being called single course, and the other two course oil macadam. The former is constructed as follows:

After the curbs and gutters have been completed and the subgrade carefully graded and rolled, a layer of stone is spread, varying in depth from eight inches at the center to six inches at the gutters, measured before rolling. This rock is rolled once, then screened and rolled alternately until filled with screenings and the roadway is fairly compact and firm. Then oil is applied at the rate of about seven-eighths gallon to the square yard. Sufficient time is allowed for the oil to sink into the rock, when the street is again screened and rolled. Then about five-eighths of

a gallon of oil per square yard is applied and again the street is screened and rolled.

In the main, we have had good success with this pavement because we have insisted on good material and careful workmanship. However, we have had some partial failures. The main difficulty is with the fundamental theory of the pavement. When we secure perfect results we have an oil-bound wearing surface about three inches thick overlaying another layer of rock three or four inches thick which may or may not be thoroughly compacted, bound or filled with screenings. The base is therefore likely to be weak, especially in spots, and give way under a heavy load. Furthermore, certain practical difficulties occur in trying to secure results. If we roll sufficiently to pack the base before oiling we are almost certain to seal the top so that the oil will not penetrate; if we leave the top open and porous to absorb the oil, the base may not be compact. The slightest carelessness results in both defects in the same block. Then we find that the details must be varied from day to day according to the weather. Also that the rock from each quarry needs its own treatment, and we used rock from twelve quarries last year. Also the personal equation of the contractors, foremen and inspectors has its influence. Nor does the pavement seem capable of supporting heavy loads in the first years of its life.

Because of these difficulties and the uncertainties involved, we have ceased to issue specifications for single course macadam, which might better be described as an attempt to build a two-course pavement in a single operation. All of our new specifications frankly call for two courses or layers. The essential features are as follows:

After the roadway has been brought to the proper subgrade, and after the curbs and gutters have been constructed, a course of broken stone, known as the base course, having a depth varying uniformly from five inches at the center of the roadway to four inches at the gutters, measured before rolling, shall be spread on said subgrade. This base course shall then be rolled, etc., as usual for water-bound macadam. Upon the base course shall be spread a course of broken stone, known as the top course, having a uniform depth of three inches, measured before rolling. This top course shall then be sprinkled uniformly with oil at the rate of one-half gallon to the square yard, after which said top course shall be barrowed and again sprinkled uniformly with oil at the rate of one-half gallon to the square yard. This oiled surface shall then be thoroughly rolled, enough screenings being spread in light layers on said top course during the rolling to completely fill the voids. After the top course has been so prepared oil shall be sprinkled uniformly over the surface at the rate of one-half gallon to the square yard, then covered with screenings and thoroughly rolled.

The stone for the top course must be of a high grade, ranging from one inch to two inches in size, but for the base course may be poorer and coarser.

The two important precautions in building this kind of pavement, aside from good material and workmanship, which we have with us in all con-

struction, are (1) compacting and binding the base course, and (2) oiling the top course uniformly.

This pavement is fundamentally sound. It conforms to good theory and practice. It is not new or untried. We let one contract in 1911 and five in 1913, and have observed the success of other municipalities with this kind of construction for some years. We have long believed it to be better than the single course macadam, but have hesitated over the additional expense. It is now clear to us that the additional cost is fully justified by the improvement in quality, and we hope that when the contractors appreciate its comparative simplicity of construction that the difference in price will be reduced.

Oil macadam, particularly of the two-course type, has all of the good qualities of plain macadam, excepting that traction is slightly heavier for horse-drawn vehicles on warm days. On the other hand, automobiles seem to have little effect upon it. Iron tires, especially when heavily loaded, tend to slowly wear the surface, which can be renewed. The surface is clean, no dust or dirt being created by the wear. The roadway and gutters are kept cleaner than our plain macadam at half the expense. The edges at the gutters are not washed out by an occasional winter flood and crossing culverts are seldom blocked by sand. It gives a good foothold for horses and rubber tires, except in wet or extremely cold weather, when it is still less slippery than asphalt. It is practically noiseless. In appearance and fundamental soundness it is comparable with an asphaltic concrete wearing surface laid on a plain macadam base. Which of the two is ultimately better, maintenance, first cost and service all considered, cannot be said at this time, but the oil macadam is certainly the cheaper in first cost.

The second method of using oil, surface oiling, starts off with a sound, hard, reasonably smooth macadam roadway. The street is carefully cleaned and repaired. Oil is then spread upon the street at a rate varying from five-tenths to six-tenths gallons per square yard. This oil is covered with clean screenings and rolled. A few weeks of moderately warm weather, together with an ordinary amount of traffic, will produce a smooth asphaltic surface.

This operation is easily accomplished by skilled workmen. But we have found—and the case is probably the same with many of you—that certain things are necessary for success. The first of these is a good street on which to work, for every soft spot, ridge or depression will show in exaggerated form shortly after oiling. Another is skilled workmen, especially the foreman, operator of the oil wagon and teamster. Another is thoroughly cleaning of the street, for the oil will not adhere when insulated from the rock by a layer of dust. Another is clean, hard screening. Another is suitable oil. We are using 90 per cent refined oil, but other grades have given success. Without going into a technical discussion of oils, it may be said that oil with high adhesive qualities is necessary for this work as well as for any other method of using road oil. A final precaution is to limit the amount of oil. Excess oil is expensive in itself,

requires extra screenings in proportion, and results in a wavy road.

Indications are that the oil surface will last from three to five or six years. Few of our streets oiled four years ago show any necessity of a re-oiling, although some carry a fair traffic. This kind of street has all the merits of oil macadam as to appearance and cleanliness, but it is more affected by horse-drawn vehicles and by moisture. When a break occurs in the surface, the surrounding pavement goes rapidly.

The third method of using oil is by a surface application on a concrete base. Our experience in Oakland is limited to one short street in the vicinity of the Livingston street wharf. Here we constructed a concrete base to which we applied oil and screenings in much the same manner as ordinary surface oiling. A few months after completion a change in conditions made this road the pathway for a motor truck, dragging a heavy lumber truck with iron tires. Within a few weeks the iron tires had crushed the screenings into a fine powder in long strips and loosened the bond of other parts of the surface so that patches could readily be stripped off with a stick. The surface was repaired, and now, one year later, although the traffic is insignificant, the surface is in bad condition.

It is hardly fair to condemn this type of pavement on this one failure, but reports from other places indicate that iron tire vehicles above and a concrete base below form a combination much like the proverbial millstones, and that the usefulness of this pavement is probably limited to streets that carry auto traffic and light pleasure vehicles exclusively.

The fourth way in which we use road oil in Oakland is a maintenance operation, being the repair of oiled streets of all kinds, and the patching of trenches opened therein. This speedily becomes important as soon as a town accumulates a few miles of oiled streets. There are all sorts of devices for doing this work. The type used should depend upon the amount of work expected. In 1911 we had placed in operation a patching machine that consists of a wagon truck on which is mounted an oil tank, a four-horse power boiler and a pump. The tank holds about 400 gallons and is fitted with a steam coil to keep the oil hot. To the pump is attached a flexible armored hose, fitted with spray nozzles. One man drives the pair of horses and another operates the machine. A steam roller accompanies the oiler, together with a sub-foreman, two carts and three laborers. Screenings are deposited along the street where needed and are distributed by cart.

Ordinary repairs, where the defects consist of spots from which the oil surface has been worked or stripped, are accomplished by sweeping away the dust, spraying lightly with oil, filling the hole with screenings and then rolling. Frequently the rolling is omitted, but that is unwise where there is much auto traffic. The greatest nicety of judgment is required in applying the right quantity of oil. Careless workmanship or poor judgment will soon repair an oiled street into a wreck. Trench repairs or holes that extend below the surface are treated differently. In this case rock,

the coarser the better, is placed in the cavity, thoroughly rolled, oiled, covered with screenings and rolled again. Here the secret of success is to have the rock well keyed into the surrounding pavement, and for trenches to have been properly backfilled.

So much for methods of using oil in Oakland. The cost is best appreciated by comparison with plain macadam.

The cost of adding a surface of oil and screenings to our plain macadam has been about 7 cents per square yard, without including overhead expenses or cost of equipment. At present a contractor is doing some of our work at 10 cents per square yard, which price should possibly be reduced to 9 cents in the future, as the result of more experience and competition.

The cost of oil macadam, being paid by the abutting property owners, is best indicated by the contractor's bidding prices. The prices quoted are all based on the ordinary public or private contract, where the contractor collects from the property owner. In former years we paid from 7 to 8 cents per square foot for plain macadam. Last year prices for single course oil macadam averaged about 9½ cents per square foot. This year prices for two course work averaged about 10.6 cents.

The foregoing indicate an advance of about 2 cents per square foot in the price of single course oil macadam over that of plain macadam. But in this is probably included something to cover discount on the serial bonds that have been in use on this work in the last three years. These figures also indicate an advance of another cent, or slightly more, per square foot, due to laying the pavement in two courses. This is not all properly chargeable to oiling, however, for in most places aside from this part of California, even plain macadam is laid in two courses.

We have reason to believe that certain tract owners, making terms of payment favorable to the contractor, have secured their work for 75 per cent of these prices.

At this time it is impossible to give satisfactory figures on the cost of repairs. The mileage and area of our oiled streets changes so rapidly, conditions are so varied on different streets, and our own repair work is so mixed with trench repairs for sewer contractors and public service corporations that definite figures are difficult to obtain. However, deducting charges billed to public service corporations and others for whom we made repairs during the year 1913 our cost of oil patching was about \$7,000. With this amount we maintained about 78.4 miles of street. The following table is submitted as a comparison of the estimated cost of maintaining an average mile of oiled street and a plain macadam street under Oakland conditions:

	Oiled.	Plain.
Repairs	\$ 89.00	\$212.00
Cleaning	72.00	145.00
Sprinkling	201.00
One-fifth cost rolling

Total

Oiled streets requiring about 73 per cent of the cost of plain macadam.

The above figures are submitted with some hesitancy, but with the belief that the ratio is approximately correct. Also with the belief that the ratio will remain somewhat the same for succeeding years, for while it is true that

our oiled streets are comparatively new, it is also true that improved methods of using oil and a further increase in the proportion of auto traffic tend to make the future more favorable to oil.

In conclusion it may be said that asphaltic oils have two wide fields of usefulness (1) to protect and conserve existing plain macadam streets against changed traffic conditions brought about by the automobile, and to reduce the mud and dust nuisance; (2) to help in building a better macadam than the old type giving better service and having a wider usefulness. Incidentally it is interesting to note that possibly the much abused automobile will

have assisted us—by force—to adopt a type of pavement that will reduce our maintenance bills. That, of course, remains to be proved. The field of road oil is not to provide a substitute for standard asphalt, brick or other high types of pavement, where the expense of these is justified by traffic conditions. Lastly, there is a wide variety of methods of successful use of oil. Good material, careful workmanship and expert supervision are necessary for all. The most important of these is expert supervision, for the way to success has been discovered only after many expensive failures, and the way to failure is just as open now to the inexperienced as it ever was.

NEW PACIFIC COAST HOME OF THE KAWNEER MFG. CO AT BERKELEY, CALIFORNIA.

One of the marvels of the age is the phenomenal growth of the Kawneer Manufacturing Co., manufacturers of metal store front construction.

Seven years ago "Kawneer Store Fronts" was first placed on the market. A small factory for its manufacture was then located in Kansas City, Mo. A year later the factory was moved to Niles, Michigan, where it has steadily grown until today, the parent Company there, is capitalized at \$1,500,000, in order to handle the constantly, increasing output.

Branch offices are maintained in all the large cities throughout the United States and Canada and a branch factory is located in Toronto, Canada, which handles all of the British Empire Trade.

Four years ago, the Company, in a modest way, opened an office in the Monadnock Building, San Francisco. Two years later the business had grown sufficient to justify an assembling plant, which has been located since that time at Nos. 426-422 Turk Street. Every year the business has doubled the preceding year.

The directors of the parent company realizing the future prospects on the Pacific Coast, decided, some several

months ago, to form a separate company out here and locate a manufacturing plant for the Pacific Coast and Oriental trade.

On June 8th, the Company moved into their new plant in Berkeley, which is a five hundred foot building of brick, concrete and steel and thoroughly fire-proof. Modern and up-to-date machinery for the manufacture of store front construction has been installed, the investment representing nearly \$200,000.

Branch sales offices are now located in Los Angeles, Portland, Seattle, and San Diego.

The personal of the new company is composed as follows:

F. J. PLYM, (President of the parent Company and original patentee of KAWNEER) President.

C. M. BOYNTON, Vice-President.

W. P. FAIRBAIRN, Secretary.

The new building is a new departure in factory building construction, the roof being saw-tooth type, whereby, the maximum amount of light is secured—thus making every part of the factory bright as day light.

The name "Kawneer" is now a household word throughout the English Speaking World.

Firms desiring bids on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These items are again repeated under "LOCALITIES" in the last part of one news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,500. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, H. Peterson, Monadnock Bldg., S. F. The building will be erected on the east side of Franklin street south of Clay, covering an area of 25 by 74 feet. The building has been arranged to contain six suites of two and three rooms. Interiors will be finished in pine with some elm panels and hardwood floors. There will be wall beds and a hot water system. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,500. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Theo. E. Ruifs. The building will be erected on property adjoining a similar building for Mr. Peterson, and will have a frontage of 25 feet and a depth of 74 feet. There will be a total of six three-room suites with baths. Interior will be finished in pine with elm panels and hardwood floors. Plans provide for private baths and wall beds. A hot water supply will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans will be completed within a few days and segregated figures will then be called.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel, \$35,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mrs. Bradbury. The building will be erected at the northwest corner of Polk and California streets, having a frontage on Polk street of 120 feet and on California of 51 feet. There will be seven stores on the first floor and a number of two and three room suites on the upper floors. Interior finish will be of pine throughout. Plans provide for steam heat, a hot water system and automatic elevator. All suites will have private bath rooms and wall beds. Bath rooms will be finished in tile with composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$12,000 each. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, John Johanson. These two buildings will be erected on adjoining property on the east side of Franklin street between Clay and Washington. Each has been designed to contain six apartments of three and four rooms. Interiors will be finished in pine with elm panels and hardwood floors. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Entrances will be finished in marble. Exterior of the buildings will be covered with rustic and cement plaster on metal lath.

Plans are nearly complete and work will shortly be started by Day Labor. **OAKLAND, CAL.**—Apartment house, 3 story and base, brick and frame, \$45,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. Laing. The building is now under construction at the corner of Grand avenue and Park View Terrace, and when complete will contain a number of two and three room suites. Interior finish will be of pine with some elm panels and oak floors. There will be steam heat and on oil burning plant. All suites will have wall beds and private bath rooms. The architect is now taking figures for the following work: Brick work, metal lath, elevators, hardwood finish and floors, canvas decks, tile and marble work, galvanized iron work and terra cotta tile.

OAKLAND, CAL.—Apartment house addition, 2 story and base, frame, Cost not stated. Architect, William Wilde, Albany Bldg., Oakland. Owner, B. Bereovich. The building located at the northwest corner of Isabel and San Pablo avenue, will undergo alterations and additions. Stores now occupying the first floor will be removed and a lobby and office for the apartments above will be installed. Upper floors will be remodeled and new plumbing, heating and electric work will be installed. Plans are complete and figures are now being taken.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$20,000. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Polk street, and has been designed to contain a number of two and three room apartments. Interior will be finished in pine throughout. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Wall beds are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BATH HOUSES.

SAN FRANCISCO—Bath house and swimming tank, concrete and brick. Cost not stated. Architect, Frederick D. Boese, 54 Kearny street, S. F. Owners, City and County of San Francisco. Plans have been completed for a bath house and swimming tank to be erected in the playgrounds at the corner of 19th and Angelica streets. A contract for the concrete work amounting to \$5,308 will be let at once. Bids for the balance of the work will be taken by the Playgrounds Commissioners shortly. Complete particulars can be secured from the Commissioners at their offices on the 6th floor of the Temporary City Hall.

SAN RAFAEL, MARIN CO., CAL.—Bath house equipment. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. Bids are now being called for on the mechanical equipment for the new public baths being erected in San Rafael. The work includes the following: Steam heating, flush and salt water heating, swimming pool supply

and heating, steam generating and distributing engine, power transmission and laundry equipment. Bids will be opened on June 29th. Plans and specifications can be secured from the City Clerk.

BANKS.

STOCKTON, SAN JOAQUIN CO., CAL.—Bank and offices, 10 story and base. Class A construction. Cost not stated. Architect, L. B. Dutton, Chronicle Bldg., S. F., associated with Architects Stone & Wright, Stockton. Owners, Commercial and Savings Bank of Stockton. Officials of the bank have advertised for subfigures on the following parts of the work: Concrete, cement work and fireproofing, brick work and terra cotta setting, stone work, lumber and mill work and labor, sidewalk lights and doors, ornamental iron work, sheet metal work, roofing, metal furring and lathing, plastering, plumbing and gas fitting, electric wiring, heating and ventilating, elevators, sweeper system, painting, glass and glazing, marble mosaic tile and terrazzo, hardware and terra cotta work.

LOS ANGELES, CAL.—Bank and offices, 12 story and base. Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Commercial Fireproof Building Co. The building will be erected at the northwest corner of 5th and Spring streets, covering an area of 115 by 155 feet. Construction will be fireproof throughout with a complete steel frame, brick exterior walls, concrete and hollow tile floors and hollow tile interior partitions. The first floor will be occupied by the Citizens' National Bank. Upper floors will contain in the neighborhood of 42 offices. Interior finish will be of hardwood throughout with some metal trim and marble wainscot. There will be steam heat, elevator service, a vacuum cleaning system, mail chutes and metal window sash and frames. Banking rooms will be finished in hardwood, marble, ornamental plaster and ornamental iron and bronze. Special vaults will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are now being taken.

BONDS.

ASHLAND, Ore.—By a vote of 1206 to 308, or four to one, the \$175,000 mineral springs bond proposition carried. Another special election now must amend the city charter to provide for the selection of three commissioners to work out the development of some immense springs near here.

KEIRMAN UNION HIGH SCHOOL DISTRICT, Fresno Co.—A bond election held here for the purpose of raising funds for the erection of a \$40,000 high school and purchasing the equipment for the same was defeated. There were 216 for the bonds and 117 against.

WATSONVILLE SCHOOL DISTRICT, Santa Cruz Co.—The proposition to bond the Watsonville School District for \$125,000 for the erection of a new school building and to purchase a site for same was lost here by a vote of 588 for the bonds and 497 against. The bonds received a majority of 91 votes, but could not get the necessary two-thirds majority.

TURLOCK, Stanislaus Co.—The vote on issuing \$15,000 in bonds for improved fire apparatus carried here by a handsome majority. There were 353 in favor of the issue and 56 against. The money will be used for the purchase of a standard fire alarm system consisting of not less than 25 boxes, at a cost of \$5,000; an alternating fire bell tower, with electric bell striker, \$1,000; a combination motor-driven hose and chemical truck, \$6,500; repairs to engine house and incidentals, \$1,000.

COLLINS SCHOOL DISTRICT, Santa Clara Co.—Sealed proposals will be received here on July 6th for the purchase of school bonds in the sum of \$5,500. This amount to be used for the erection of a school building and furnishing same with the necessary equipment.

RICHMOND, Contra Costa Co.—Preliminary announcement has been made by Mayor Ludewig that the city council will soon take steps to call for an election to vote \$100,000 in bonds for the city's share in the money required for the dredging by the Federal Government of the Richmond Harbor.

RICHMOND, Contra Costa Co.—At a meeting of the directors of the Stage Sanitary District \$75,000 worth of sewer bonds were sold to R. Whitehead of Oakland.

VISALIA, Tulare Co.—Petitions carrying sufficient signatures to call a special election on the proposed \$1,000,000 bond issue for good roads in Tulare County have been filed with the Supervisors.

STOCKTON, San Joaquin Co.—An election will soon be held in this city for the purpose of raising funds in the sum of \$266,400, this amount to be used in the construction and improvements of streets.

BERKELEY, Alameda Co.—Preliminary steps toward the calling of a municipal bond election were taken when the City Council instructed City Attorney Frank V. Cornish to draft formal papers naming August 15th as the date for the election. The sum of \$1,175,000 will be asked. Funds will be used as follows: Schools, \$500,000; harbor improvement, \$500,000; civic center, \$175,000.

HAYWARD, Alameda Co.—A \$35,000 bond election will be called by the school trustees to provide for the erection of a domestic science annex to the present school building. Several clubs of Hayward are backing the movement.

SACRAMENTO—All of the State Highway bonds advertised for sale were disposed of by State Treasurer E. D. Roberts. The bonds were disposed of as follows: Mendocino, \$75,000; Yuba, \$104,000; Los Angeles, \$100,000; Kern, \$180,000; while the Board of Control bid in the remainder of the \$3,000,000 issue.

TRES PINOS UNION HIGH SCHOOL DISTRICT, San Benito Co.—Bonds are now being issued in the amount of \$6,500 by the Board of Supervisors for the purpose of raising funds for school improvements.

LODI, San Joaquin Co.—A bond election has been called for July 8th in the Davis School District to vote on the issuing of bonds of \$7,500 to be used in the erection of a school building.

AUBURN SCHOOL DISTRICT, Placer Co.—By a vote of 485 to 37, bonds in the sum of \$47,000 carried here. Funds will be used in the erection of a new school building, plans for which have

already been submitted to the Trustees by Architect W. H. Weeks of San Francisco.

LIVE OAK SCHOOL DISTRICT, Sutter Co.—An election held here to vote on the proposition of bond holding the school district for \$2,000 for a new school building was defeated. The total vote was 74, it being necessary that 50 be cast in favor of the same. The vote was 46 for the issue and 28 against. It is believed that the trustees will levy a direct tax to make the improvements.

RICHMOND, Contra Costa Co.—Details have been completed for the Richmond Municipal Water District for the \$2,500,000 bond issue which will be held in this city on July 22nd. Data and general information with regard to the proposition involved by the water bond issue will be compiled and issued in pamphlet form.

WATSONVILLE, Santa Cruz Co.—The Board of Aldermen here have passed a resolution declaring a bond issue to raise funds with which to purchase a modern auto fire engine and other necessary equipment. The new equipment will cost approximately \$12,000. The bond issue will be for \$26,000, the balance to be used in the construction of a bridge over the Pajaro River.

BRIDGES AND DAMS.

SAN FRANCISCO—Dry dock, steel and reinforced concrete, \$1,500,000. Engineer, Union Iron Works, S. F. Owners, Union Iron Works, S. F. Congress has given final assurance that the Navy Department will spend at least \$50,000 annually for dry dock work at San Francisco for a period of six years. This action assures the construction of the \$2,500,000 plant of the Union Iron Works at Hunter's Point. Complete, the dock will be the largest on the Pacific Coast. The Union Iron Works has assured a representative of this paper that construction will be underway inside of thirty days and that plans will be out for figures within ten days.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge extension, reinforced concrete. Cost not stated. Engineer, County Surveyor, Court House, San Jose. Owners, Santa Clara County. Plans for the extensions to be built to the reinforced concrete bridge over Llagas Creek on Martin avenue, San Jose, have been completed and figures are now being called. Bids will be opened by the Board of Supervisors on July 20th. Plans and specifications can be secured from the County Surveyor.

NAPA, NAPA CO., CAL.—Bridge, reinforced concrete and steel. Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. Plans for a new bridge of the steel and reinforced concrete type to be erected over the Napa River on East First street have been completed. Bids are now being called and will be opened on July 2nd. Plans and specifications can be secured from the City Clerk.

SAN RAFAEL, MARIN CO., CAL.—Bridge, frame and concrete. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Bids will be opened on July 7th for constructing a wood and concrete bridge over Nicasio Creek in Marin County. Plans and specifications can be secured from the County Engineer.

YUBA CITY, SUTTER CO., CAL.—Levee work. Cost not stated. Engi-

neer, County Surveyor, Yuba City. Owners, Levee District No. 1, Sutter County. Bids are now being called for an excavating and furnishing material for about 90,000 cubic yards and 30,000 cubic yards respectively of levee work. Bids will close on June 27th. Plans and complete particulars can be secured from the County Surveyor, Yuba City.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Concrete girder bridge. Cost not stated. Engineer, City Engineer, San Luis Obispo. Owners, City of San Luis Obispo. Plans for a concrete girder bridge to be erected over the San Luis Obispo River at Nipomo street are complete. Plans can be secured from the City Clerk or Engineer. Bids will be opened on July 6th.

KERNVILLE, KERN CO., CAL.—Bridges, 2, timber pile and concrete. Cost not stated. Engineer, County Surveyor, Buftington, Bakersfield. Owners, Kern County. Bids will be opened on July 15th for two bridges across the North Fork of the Kern River. Plans and specifications can be had from the County Surveyor.

FRESNO, FRESNO CO., CAL.—Subway, concrete construction, \$30,000. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Engineer is preparing plans for two subways each 15 feet in the clear to be built across the Southern Pacific tracks at Monterey street. Bids will be called for shortly.

SAN FRANCISCO—Pier, timber and concrete construction. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids will be opened by the State Board of Harbor Commissioners on July 2nd for the construction of Pier No. 35. Plans and specifications can be secured from the State Board of Harbor Commissioners, Ferry Bldg., S. F.

SAUSALITO, MARIN CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Bids are now being taken for a reinforced concrete bridge to be erected at the entrance to Fort Baker. The cost will be divided between the War Department and the town of Sausalito.

Contracts Awarded.

DRYDEN, WASH.—Bridge, steel and concrete, \$24,965. Engineer, County Surveyor, Wenatchee. Owners, Chelan County. Contractors, Bailey & O'Connor, care of County Engineer, Wenatchee. Contract price, \$24,965.

COURT HOUSES.

OAKLAND, CAL.—Municipal auditorium, 2 story and base. Class A construction, \$1,000,000. Architects, Palmer & Hornbostel, New York. Owners, City of Oakland. Bids will be called for within two weeks for the sheet metal work including a number of large skylights.

CHURCHES.

DIXON, SOLANO CO., CAL.—Church. 1 story and base, frame and plaster, \$18,000. Architect, John J. Foley, 41 Kearny street, S. F. Owners, Roman Catholic Church of Dixon. The building has been designed in the Mission style and will contain a main auditorium and Sunday school rooms. Interior finish will be of pine and red-

wood with ornamental plaster in the main auditorium. There will be a central heating system, probably warm air. Art glass and marble are specified. Exterior of the building will be covered with cement plaster on metal lath. Bids have been taken and a contract will be awarded shortly.

UKIAH, MENDOCINO CO., CAL.—Church, 1 story and base, frame and plaster, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church of Ukiah. The building will be arranged for a main auditorium and Sunday school rooms. Interior finish will be of pine with some ornamental plaster in the auditorium. A central heating system will be installed. Art glass windows will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Church, 2 story and base, frame and concrete, \$25,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Gertrude's Parish. The building will be erected on a corner site and will be of concrete and frame construction. Besides the auditorium and Sunday school rooms there will be social hall and study. Interior will be finished in pine with ornamental plaster. A central heating system will be installed. Art glass and marble are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Church, 2 story and base, reinforced concrete, \$200,000. Architect, John T. Comes, Washington Bldg., Pittsburgh, Pa. Owners, St. Vincent's Parish, Father Joseph S. Glass. The building will be erected at the corner of Figueroa and West Adams streets, and will cover a large area. Construction will be practically fireproof throughout. Interior will be finished in pine with ornamental plaster. A central heating system will be installed. Art glass windows are specified. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

SAN FRANCISCO—Church, 1 story and base, frame and plaster, \$13,151. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Emidius Parish. Contractors, Ward & Goodwin, 110 Jessie street, S. F. Contract price, \$13,151.

FACTORIES & WAREHOUSES.

RICHMOND, CONTRA COSTA CO., CAL.—Tank farm, 15 steel oil tanks. Contract stated, Engineer, Engineering Department Standard Oil Co., Standard Oil Bldg., S. F. Owners, Standard Oil Co. Work has been started on 15 large steel oil tanks and is progressing rapidly. The company intends to erect 100 of these tanks before the close of 1914.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Jail completion, 4 story and base, Class A construction, \$45,000. Architect, City Dept. of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the completion of the City Jail and

Emergency Hospital portions of the City and County Jail buildings show T. W. McClenahan low at \$29,200. He will probably be awarded the contract.

FLATS.

SAN FRANCISCO—Flat alteration and addition, 2 story, frame. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name withheld. The building located on Mission street between 19th and 20th streets will undergo alteration and addition. The front will be arranged for stores and a one-story addition will be constructed in the rear which will contain living rooms. The work will require new plastering, interior finish, electric work, painting and plumbing. Considerable marble wainscoting will be used in the store. Plans are complete and figures are being taken.

SAN FRANCISCO—Flat alterations, 3, 3 story and base, frame, \$3,500 to \$10,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners' names withheld. These three buildings are all located in the Western Addition. They will be altered from flats into apartments of two and three rooms. There will be new plumbing, electric work, painting, interior finish and plastering. Wall beds will be installed. Exteriors will also be altered and will require cement plaster on metal lath. Plans are being prepared and will go out for figures shortly.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, none. Owner, Frank de Custon, Mountain View. The building will be erected at the southwest corner of Clement and 3rd avenue, covering an area of 30 by 60 feet. The first floor will contain a store. Upper floors will be arranged for five modern flats. Interiors will be finished in pine and redwood with some oak floors. There will be open fire places and tile mantels. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame, \$12,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, J. Eric Johanson, 110 Jessie street, S. F. The building will be erected on Franklin street near Sacramento and has been designed to contain six modern flats. Plans are complete and the work will be done by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, Class A construction, \$25,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Bishop Estate. The building will be erected on Jackson street near Van Ness avenue, covering an area of 92½ by 127½ feet. Construction will be fireproof throughout with a complete steel frame, steel roof trusses and brick walls. A cement floor will be used. Interior finish will be of pine throughout. Plans provide for metal window sash and frames. Besides the storage space there will be a large and complete equipped machine shop. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

San Francisco Public Building, Light Pictures.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing lighting fixtures in the U. S. public building at San Francisco, Cal., under the fixed cost of \$10,000, competition based on time of completion:

Home Light Co. of America, New York City, July 15, 1913.

Cassidy & Son Manufacturing Co., New York City, July 15, 1913.

Sterling Bronze Co., New York City, June 1, 1913.

David J. Braun Manufacturing Co., Chicago, Ill., May 1, 1913.

H. W. Johns-Manville Co., New York City, Jan. 2, 1913.

Reading Chandelier Works, Reading, Pa., March 1, 1913.

The Enos & Watkins Co., New York City, Jan. 15, 1913.

Three-Mile Diversion Works.

Schedule of bids for Tree-Mile Falls diversion works, Umatilla reclamation project, Oregon, opened at Hermiston, Ore.:

Bid 1. The J. H. Tillman Co., Portland, Ore.

Bid 2. Bates & Rogers Construction Co., Spokane, Wash.

Bid 3. Morrison - Knudsen Co., Boise, Idaho.

Bid 4. Jacobsen-Bade Co., Portland, Ore.

Bid 5. The Graft Construction Co., Seattle, Wash.

Bid 6. Chamberlain Construction Co., Seattle, Wash.

Bid 7. Hellance Construction Co., Portland, Ore.

Bid 8. Andrus & Bode, Portland, Ore.

Bid 9. Pacific Bridge Co., Portland, Ore.

Bid 10. Newport Land and Construction Co., Hermiston, Ore.

Item 1. 1,100 cu yds excavation, class A—Bid 1, \$3; 2, \$2.50; 3, \$2; 4, \$3; 5, \$1.75; 6, \$2.40; 7, \$4; 8, \$3.75; 9, \$3.25; 10, \$3.05.

2. 1,100 cu yds excavation, class B—Bid 1, 50c; 2, 50c; 3, 65c; 4, 70c; 5, 45c; 6, 75c; 7, \$1; 8, 75c; 9, \$1; 10, 50c.

3. 2,600 cu yds concrete—Bid 1, \$17.23; 2, \$9.75; 3, \$9.75; 4, \$12.28; 5, \$8; 6, \$10.65; 7, \$10.50; 8, \$11.25; 9, \$10.44; 10, \$9.90.

4. 200 cu yds embankment backfill—Bid 1, 40c; 2, 25c; 3, 50c; 4, \$1.50; 5, 45c; 6, 80c; 7, 40c; 8, 60c; 9, 60c; 10, 75c.

5. 125 cu yds paving—Bid 1, \$6; 2, \$1.75; 3, \$4; 4, \$3; 5, \$2; 6, \$7.30; 7, \$3.25; 8, \$4; 9, \$4; 10, \$2.75.

6. Handling, placing, etc., 36,000 lbs reinforcing—Bid 1, 0.5c; 2, 2c; 3, 2.5c; 4, 2c; 5, 1c; 6, 1.5c; 7, 1.55c; 8, 3c; 9, 2.5c; 10, 1.5c.

7. Handling water—Bid 1, \$1.250; 2, \$1.510; 3, \$900; 4, \$2,000; 5, \$9,925; 6, \$689; 7, \$2,400; 8, \$3,500; 9, \$1,500; 10, \$1,499.

Totals—Bid 1, \$52,708; 2, \$32,648.75; 3, \$31,865; 4, \$41,193; 5, \$34,895; 6, \$34,955.50; 7, \$38,536.25; 8, \$40,650; 9, \$36,789; 10, \$34,007.75.

Pearl Harbor Dock.

Complete reversal of the Navy Department's policy in the construction of the dry dock at Pearl Harbor, Hawaii, has been decided upon through the appointment of a special board of engineers to submit estimates for the completion of the work under the plans of Civil Engineer Alfred Noble of New York. From these estimates the de-

partment will decide whether to proceed with the work under contract or handle the dry dock construction itself. The members of the board are Civil Engineers L. M. Cox and F. R. Harris, U. S. Navy, the former stationed at the Norfolk navy yard and the other at the New York yard. They have been instructed to take up the work at once and complete it with the utmost dispatch, in order that construction along the new lines may be begun at the earliest possible date.

Work on the Pearl Harbor dock had proceeded satisfactorily under the government's contract with the San Francisco Bridge Company until February 17, 1913, when the entire concrete floor of the structure was lifted by a tremendous subsurface pressure. At that time the contractors complained to the Navy Department that the plans of the dock were not suited to the conditions as they had developed. At their request an expert on the foundation conditions was sent to Hawaii, Engineer Noble being selected. His report was to the effect that the plans should be changed to meet with conditions that had developed.

Two weeks ago the contractors were ordered to proceed with the work on the first piers, but this order was revoked by the new decision. The total contract for the dock, which will be 1,000 feet long, involves approximately \$2,200,000, a large part of which had been expended when the floor became raised a year ago.

Phoenix Indian School, Industrial Building.

The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., for the construction of a brick industrial building at the Phoenix Indian School, Ariz.:

Joe Prasecki, San Francisco, Cal., \$17,461; if Keene cement is substituted for composition wainscoting, \$17,200; 180 days.

Charles H. Odum, Phoenix, Ariz., \$20,421; for substituting Keene cement, \$19,561; 180 days.

The M. P. Olson Construction Co., Phoenix, Ariz., \$20,500; substituting Keene cement, \$20,100.

W. D. Lovell, Minneapolis, Minn., \$20,910; substituting Keene cement, deduct \$200; 210 days.

Mare Island, Cal., Reinforcement for Dike.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for reinforcement for dike No. 12 at the navy yard, Mare Island, Vallejo, Cal.:

Item 1, for furnishing material and installing reinforcement on dike 12 as shown by sections A and B, complete. In accordance with plan K-208 and specification; 2, price per pile for driving and securing brace piles complete, as shown on section C, plan K-208 and as described, using creosoted piles; 3, price per pile for driving and securing brace piles, using creosoted piles.

The Thomson Bridge Co., San Francisco, Cal., item 1, \$29,837; 2, \$68; 3, \$38.

Healy-Tibbets Construction Co., San Francisco, Cal., item 1, \$30,123; 2, \$80; 3, \$44.

Hay-Harjes & Co., San Francisco, Cal., item 1, \$31,300; 2, \$79; 3, \$40.

Mervy Elwell Co., Oakland, Cal., item 1, \$36,420; 2, \$86; 3, \$46.

Sacramento, Cal., Repairs, Etc.

The contract for miscellaneous repairs, alterations, and painting in the U. S. post office at Sacramento, Cal., has been awarded to W. B. Bohl at \$2,226.

Steel, Philippine Islands

Bids for steel forgings for Philippine Islands were received by S. W. Roessler, col. of engrs., U. S. Army, New York, N. Y., as follows:

Midvale Steel Co., Box 1606, Philadelphia, Pa., \$29,780.

Erle Forge Co., Erie, Pa., \$76,389.05.

Bethlehem Steel Co., South Bethlehem, Pa., \$29,873.

Metal Flumes.

The U. S. reclamation service is asking for proposals for furnishing about 1,766 linear feet of metal flumes of various diameters ranging from 5 feet 9 inches to 11 feet 6 inches to be used on the Milk river irrigation project, Montana. Bids will be opened after 2 o'clock p. m., July 1, 1914, at the office of the reclamation service, Great Falls, Mont.

Presidio, San Francisco, Crematory.

The contract for the construction of a crematory at the Presidio of San Francisco has been awarded to John H. Flee, care of the depot quartermaster, San Francisco, at \$4,000.

New Engineer, Reclamation Service.

D. C. Henny, consulting engineer in the reclamation service, with headquarters at Portland, Ore., has been designated as acting chief engineer during the absence of Chief Engineer A. P. Davis. Mr. Davis has been granted four months' leave of absence by Secretary Lane and will devote this period as a member of the Red Cross board of engineers in making an investigation of the feasibility of controlling the floods of the Huia river, in China. Mr. Henny has been in charge of construction of several important projects and as consulting engineer has become familiar with all the large engineering features of the reclamation work in the west.

HOSPITALS

ELDRIDGE, SONOMA CO., CAL.—Hospital cottage, 1 story and base, concrete, \$18,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans are being taken for the construction of a cottage for epileptics at the Sonoma State Home. Construction will be of reinforced concrete. Interior finish will be of pine. There will be a central heating system. Exterior of the building will be faced with cement plaster. Bids will be opened on July 21st. An official proposal appears in another column of this issue. Plans and specifications can be secured from the State Department of Engineering, Sacramento.

PATTON, SAN BERNARDINO CO., CAL.—Hospital laundry, 1 story and base, concrete, \$12,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on July 22nd for a new laundry building at the Southern California Hospital at Patton. Special machinery will be installed. Exterior will be faced with cement plaster. Plans can be secured

from the State Department of Engineering. An official proposal appears in another column of this issue.

HOTELS.

OAKLAND, CAL.—Hotels, 2, 7 story and base, brick and steel, \$50,000 each. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, A. C. Aiken. These buildings will be erected on adjoining property at the corner of 15th and Jefferson streets. There will be stores on the first floor besides the hotel office and lobby. Upper floors will be arranged for a large number of guest rooms, a large percentage of which will have connecting baths. Interiors will be finished in pine throughout. Some ornamental plaster will be used in the offices and lobbies. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Interiors will be faced with pressed brick. Plans are complete and P. A. Muller, Syndicate Bldg., Oakland, is now taking segregated figures on the work.

SEATTLE, WASH.—Hotel, 4 story and base, brick and mill construction, \$75,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. The building will be designed to contain one store on the first floor besides the hotel office and lobby, and will cover an area of 78 by 167 by 174 feet. Upper floors will contain in the neighborhood of 140 guest rooms and a number of public baths. Plans provide for steam heat, elevator service and a hot water supply. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken for the general construction which will include everything.

LOS ANGELES, CAL.—Hotel addition, 4 story and base, brick. Cost not stated. Architect, Antone Reif, Higgins Bldg., L. A. Owner, John Orth. The building will be erected on San Pedro street between 3rd and 4th, and will cover an area of 36 by 75 feet. Interior will be finished in pine. Plans provide for steam heat and a hot water supply. Two baths will be located on each floor. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 12 story and base, Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Rindge Estate. The building will be erected at the northeast corner of Broadway and 3rd street, and is being promoted by the Central Business Stability Association. Construction will be fireproof through out. Details have not been perfected and further mention will be made of the work.

Contracts Awarded.

POINT REYES, MARIN CO., CAL.—Hotel, 2 story and base, brick, \$50,000. Architect's name not given. Owner, Mr. Grandt, Contractor, Stewart Scott, Petaluma Contract price, \$50,000. Note: The building will cover a ground area of 100 by 120 feet.

LIBRARIES.

SAN ANSELMO, MARIN CO., CAL.—Library, 1 story and base, reinforced concrete. Cost not stated. Architect's

name not given. Owners, Town of San Anselmo. Bids opened for the construction of this building show Fred Field low at \$9,000. He will probably be awarded the contract. Bids ran as high as \$10,500.

PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Press building, 2 story, frame and plaster, \$22,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for this work show Neil A. McLean, Chronicle Bldg., low at \$22,000. He will probably be awarded the contract. A complete list of the figures submitted will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Ferry building, 1 story, frame and steel, \$42,200. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for the construction of a Ferry building on the Exposition Grounds show Strehlow, Freese & Peterson low at \$42,200. They will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Court of the Universe, frame and plaster construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed and figures are now being taken for the construction of one of the few remaining buildings outside of the various state exhibit buildings and concession buildings at the 1915 Exposition. Bids for the construction of the Court of the Universe will be opened on June 30th. An official proposal appears in another column of this issue. Plans and specifications can be secured from the Director of Works.

SAN FRANCISCO—State exhibit building, 1 and 2 story, frame and plaster. Cost not stated. Architects, Cannon & Fetzner, Salt Lake. Owners, State of Utah. Bids opened on June 18th for this work show the Northwest Construction Co., Merchants Exchange Bldg., S. F., low at \$12,400. The bid does not include all work. An award of contract has not been made. Further mention will be made of the work. A complete list of the figures received will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost not stated. Architects, Cannon & Fetzner, Salt Lake City. Owners, State of Utah. A telegram has been received from the architects stating that the bid of the Northwest Construction Co. of \$12,400 for this work should have read \$15,902.

Contracts Awarded.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, \$28,000. Architect's name not given. Owners, State of Nevada. Contractor, Alfred S. Gough, Godfield, Nev. Contract price, \$23,000. Note: The two lowest bidders on this work were disqualified.

POST OFFICES.

HANFORD, KINGS CO., CAL.—Post office, 2 story and base, brick and stone, \$52,000. Architect, Supervising Archi-

tect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened for the construction of the new Federal Building at Hanford show Frank Gallagher of San Francisco low at \$52,990 for limestone and \$52,750 for sandstone. He will probably be awarded the contract. A complete list of the bids received will be found under the heading of Fresno, Modesto and Central California in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Passenger station and trackage, 2 story and base, frame and concrete construction, \$150,000. Architect, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The Southern Pacific Co. has started the construction of the new Third and Townsend streets station, which when completed, with the new trackage system will cost over \$1,000,000. The new station will cover an area of 260 by 112 feet and is a fine example of the Mission style of architecture. Construction will be of reinforced concrete with the exterior faced with cement plaster. A red clay tile roof will be used. The new trackage system will greatly increase the present crowded facilities and when completed will give the Southern Pacific one of the finest railroad terminals in the West. Most of the work will be done by Day Labor.

Contracts Awarded.

SAN FRANCISCO—Railroad construction, \$27,802. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Contractors, Contra Costa Construction Co., S. F. Contract price, \$27,802.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, brick and plaster, \$16,000. Architect, Louis Upton, 111 Ellis street. S. F. Owner, J. O. Gantner. The dwelling will be erected at the northwest corner of Baker and Vallejo streets, and has been designed for a ten-room house with several baths and sleeping porch. Interior will be finished in pine and hardwoods with hardwood and inlaid floors in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$2,000. Architect, none. Owners, United States Building, Realty and Investment Co., Crocker Bldg., S. F. The dwelling has been designed for a five-room house and will be erected on Curtis street south of Ralph. Interior finish will be of pine and redwood with some oak floors. There will be an open fire place and tile mantel. Bath room and kitchen will be finished in tile. Exterior of the dwelling will be covered with rustic shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base. Class A construction, \$150,-

000. Architect, Charles Peter Weeks. Mutual Bank Bldg., S. F. Owner, Mary L. Eichen. The dwelling, which will be one of the handsomest as well as the most costly homes in San Francisco, will be erected on the north side of Washington street west of Octavia. There will be a complete steel frame, brick exterior walls and hollow tile interior partitions. Interior finish will be of hardwoods throughout. Hardwood and inlaid floors will be used in the principal rooms. There will be a central heating system, either steam or hot water. Open fire places and tile and marble mantels will be used in the principal rooms. Plans provide for elevator service, a vacuum cleaning system and other modern conveniences. All bath rooms will be finished in tile. Ornamental iron grilles are specified. Exterior of the dwelling will be faced with pressed brick and terra cotta. Plans are nearly complete and figure will be called for within two or three weeks. Further mention will be made of the work.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$2,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, B. S. Berry. The dwelling will be erected on London street south of Amazon, and has been designed to contain five rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. T. Morris, 616 7th avenue, S. F. STORES & OFFICE BUILDINGS

OAKLAND, CAL.—Stores, 1 story and base, brick, \$5,000. Architect, none. Owner, George Gruge, 1171 14th street, Oakland. The building will be erected on East 14th street west of 36th avenue, and has been designed to contain three modern stores. Interiors will be finished in pine throughout. Plate glass windows and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Offices, 3 story and base, Class C construction, \$50,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco-Oakland and Terminal Railroads. This work has been mentioned here a number of times before when the architects were first commissioned to prepare plans. The building will be erected at the corner of 22nd and Grove streets and will be used as an administration building by the owners. Interior finish will be of pine with some

hardwood veneer. There will be steam heat and a hot water supply. Special fireproof vaults will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

ATASCADERO, SAN LUIS OBISPO CO., CAL.—Administration building cost not stated. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Atascadero Colony. Plans have been completed and figures are now being taken for the main administration building which is to be erected at the Atascadero Colony in San Luis Obispo County for the Atascadero Community, a company promoted by Lewis, of University City fame and publisher of the Women's World. It is the intention of the company to build a complete city with warehouses, cold storage plant, ice making plant, factories, packing houses, stores, hotel and life apartments. The company holds several thousand acres of rich farm lands which are all under option and which will be farmed under the scientific direction of the best authorities in California. The administration building will be three stories high, of reinforced concrete construction and will cost over \$100,000. Excavation and foundation work have been completed and figures are being taken on other parts of the work. Work is progressing rapidly on plans for the other buildings and contracts will be let shortly.

SAN FRANCISCO—Bakery, 1 story and base, brick, \$4,000. Architect, none. Owner, J. G. Harney, Pacific Bldg. The building will be erected on the south side of 20th street east of Valencia. Interior will be finished in pine with some terra cotta tile. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Store, 1 story, frame, \$50,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, G. L. Kibbe. The building will be erected at the corner of Redwood Road and Hopkins street, and has been designed to contain five small stores. Interiors will be finished in pine throughout. Patent store fronts will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Stores and offices, 2 story and base brick. Cost not stated. Architect, J. B. Oghorn, Richmond. Owners, Charles J. Cray and M. Heinzen. The building will be erected on Macdonald avenue near 9th, and will cover an area of 50 by 80 feet. There will be four stores on the first floor. Upper floor will be arranged for offices. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO—Stores and offices 5 story and base, brick and steel \$50,000. Architect's name not given. Owner, Mrs. W. K. Vandellbilt Jr., Contractor, J. H. Hjul, Merchants Exchange Bldg., S. F. Contract price, \$50,000.

SEALED PROPOSALS.

PROPOSALS FOR TURBINE.

TURBINE—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. July 14, 1914, for furnishing a variable head turbine for the Salt River Project, Arizona. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

PROPOSALS FOR METAL FLUMES.

METAL FLUMES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until 2 o'clock p. m. July 14, 1914, for furnishing 1,766 linear feet of metal flumes of various dimensions ranging from 5 feet 9 inches to 11 feet 8 inches. For particulars address the United States Reclamation Service, Washington, D. C., or Great Falls, Mont. F. H. NEWELL, director.

PROPOSALS FOR BRIDGE WORK.

NOTICE is hereby given that sealed proposals or bids will be received by the Board of Supervisors of Santa Clara County, California, at their rooms in the Court House in the City of San Jose up to 11 o'clock a. m. of Monday, July 20, 1914, for the construction of a reinforced concrete extension to the bridge over Llagas Creek on San Martin avenue in accordance with plans and specifications on file in the chambers of the Board of Supervisors.

Each bid must be accompanied by a certified check in the sum of ten per cent of the amount bid, drawn upon some reliable bank in favor of Henry A. Pfister, County Clerk, as liquidated damages in case the successful bidder fails to file a satisfactory bond as required by said Board within five days for the faithful performance of the conditions of the contract.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry A. Pfister, Chairman of the Board of Supervisors of Santa Clara County, and indorsed "Bids for Extension of Bridge at San Martin Avenue."

By order of the Board of Supervisors of Santa Clara County.

Attest: HENRY A. PFISTER, Clerk.

By F. A. Schilling, Deputy Clerk.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that the Board of Trustees of the City of Fresno, County of Fresno, State of California, on Monday, the 6th day of July, 1914, beginning at the hour of 8 o'clock p. m. and ending at the hour of 9 o'clock p. m. of said day, will be in session at the Council Chamber in the City Hall of said City of Fresno, for the purpose of receiving and will receive proposals or bids for the following:

A combined mixer and heater for bituminous road mixture, the same to have a capacity of approximately ten cubic feet per batch of mixed material, with approximately one-horse power engine to operate the mixer, and with approximately a twelve horsepower boiler for heating and mixing.

Bidders must submit specifications therewith for their bids.

Said bids will be opened at the hour of 10 o'clock a. m. on the 6th day of July, 1914, and all bids must be accompanied by a check certified by a responsible bank, payable to the order of the Mayor and City Clerk of said City of Fresno for an amount not less than ten per cent of the amount of the proposed contract.

The Board of Trustees reserves the right to reject any or all bids made.

The successful bidder shall within five days after the award of the contract have executed and executed a written contract therefor with said City of Fresno, for approval by the City Attorney of said City, and shall also make and execute a bond to said

City and file the same with the City Clerk in a sum not less than one-half of the total amount of said bid, which said bond shall be conditioned that said combined mixer and heater shall be delivered to said City of Fresno, in accordance with the specifications submitted therefor, within the time specified in said contract, not to exceed in any case thirty days from the date of said contract.

Dated this 9th day of June, 1914.

W. H. RYAN,
City Clerk of the City of Fresno.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that the City Council of the City of San Rafael, Marin County, California, will receive up to Monday evening, June 29th, 1914, at 8 o'clock, sealed bids for the construction of pipe sewers, manholes and lamp posts on Fourth street, between avenue and B street in the City of San Rafael.

The quantities will be about as follows: 41 brick or concrete manholes with cast iron curbs and covers; 16 lamp posts with 6 inch pipes, cast iron curbs and covers; 124 feet of 12 inch sewer; 124 lineal feet of 10 inch sewer; 210 feet of 8 inch sewer, and 850 feet of 6 inch sewer.

Progress estimates will be allowed each month by the City Council for an amount equal to 75 per cent of the value of the work done during the preceding month.

Each bid shall be accompanied by check certified by a responsible bank for an amount not less than ten per cent of the aggregate of the proposal and payable to the order of the Mayor of the City of San Rafael, as a guarantee that the bidder will execute a contract for the performance of said work.

The said City Council reserves the right to accept any one of the bids received or to reject one or more of said bids.

The successful bidder must furnish full compensation insurance indemnifying the City against loss or damages by fire or death of any employee engaged in the said work.

EUGENE W. SMITH,
City Clerk.

NOTICE TO CONTRACTORS.

SEALED bids will be received by the Clerk of the Board of Supervisors of Marin County at his office until 2 o'clock p. m. of Monday, the 7th day of July, 1914, for the construction of a wooden bridge with concrete foundations to be constructed at the crossing of Mexican "Crown" network, Stations "C1" and "C2" upon the proposed new road in Road Districts Nos. 4 and 6, Marin County, California.

All in strict accordance with the plans and specifications therefor now on file in the office of the County Clerk of said County.

Each bid shall be accompanied by a certified check drawn on any responsible bank for an amount not less than ten per cent of the aggregate of the proposal and made payable to the order of the Chairman of the Board of Supervisors of Marin County as a guarantee that the bidder will enter into a contract for the performance of said work.

The Board reserves the right to reject any or all bids.

ROF E. GRAHAM,
Clerk of the Board of Supervisors.

PROPOSALS FOR REINFORCED CONCRETE BRIDGE.

OFFICE of the Clerk of the City of Napa, City Hall, Napa, California.

NOTICE is hereby given that in pursuance of an order of the City Council of the City of Napa made and entered on the 2nd day of June, 1914, plans and specifications were adopted by the City Council for building a reinforced steel and concrete bridge across Napa River where East First street crosses said river, which plans and specifications are now on file in the City Clerk's office.

And further notice is hereby given that sealed bids will be received by the undersigned at his office for constructing said bridge according to plans and specifications adopted on Thursday, July 2nd, 1914, at 7:30 a. m. No bid will be received unless accom-

paid by a certified check or certificate of deposit equal to 5 per cent of the total amount of bid, made payable to the City Clerk of the City of Napa; said check or certificate will be returned to the party or parties whose bids are not accepted, and to the party whose bid is accepted, upon his entering into a contract with said City of Napa for said work and saving such bond as the Council may hereafter determine.

Copies of plans, specifications and contract may be had upon application to the City Clerk and upon a deposit of \$10, which will be returned to applicant upon his returning said plans and other papers in good condition. Bidders shall bid only upon forms which will be furnished upon application.

The Council reserves the right to reject any and all bids.

By order of the City Council,
DAVID C. SCHRIBER,
City Clerk.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 1st day of July, 1914, for doing the following work:

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 1st day of July, 1914, for doing the following work:

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within ten calendar days from the receipt of written notice from the Board of Public Works, and completed within one hundred twenty (120) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Board of Public Works, for an amount not less than ten per cent of the aggregate of the proposal, to be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such form.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works,
F. J. CHURCHILL,
Secretary.

Two-story and basement building, ground area 4300 square feet, partially fireproof construction, stone and brick facing and composition roof. Drawings and specifications may be obtained from the custodian of site at Bozeman, Mont., or at this office, in the office of the supervising architect, O. WENDEROTH, supervising architect.

PROPOSALS FOR GENERATOR.

GENERATOR—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. July 14, 1914, for furnishing one vertical alternating-current generator for the Salt River project, Arizona. For particulars apply to the U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

PROPOSALS FOR OIL SYSTEM.

OIL SYSTEM AND BURNERS—Vancouver Barracks, Washington—Sealed proposals in triplicate, will be received until 11 a. m. July 1, 1914, and then

publicly opened for installation of fuel oil distributing system and oil burners here. Information furnished on application. Envelopes containing proposals should be indorsed "Proposals for Fuel Oil for the construction of the CONSTRUCTING QUARTERMASTER."

NOTICE TO CONTRACTORS.

NOTICE IS HEREBY GIVEN that the Board of Education of the City of Fresno School District will receive sealed bids for building, constructing and making alterations and additions to the present Shop Building located on block No. 132, Fresno City (Known as High School Block) and furnishing all work and materials therefor, according to the plans and specifications, which may be seen at the office of W. D. Coates Jr., Room 626 Rowell Building, where the terms and conditions of bidding may be learned. Bids must be addressed to C. Starr, Secretary, and left at his office in the High School Building on or before 5 P. M. July 2nd, 1914, when they will be opened. The Board reserves the right to reject any or all bids.

By order of said Board of Education,
C. STARR, Secretary.

ADDITIONAL TERMS AND CONDITIONS.

All bids must be sealed and have a copy of this notice attached and be accompanied by a certified check in the sum of at least 10% of such bid, said sum to be forfeited to the undersigned in the event of the bid being accepted and the bidder failing, refusing or neglecting, within 5 days after notice of award of bid, to execute a satisfactory contract with the undersigned for the construction and completion and the furnishing of all work, labor and material necessary therefor.

PROPOSALS FOR DREDGING.

DREDGING—U. S. Engineer Office 405 Custom House, San Francisco, Cal.—Sealed proposals for dredging in San Joaquin River and Stockton Channel, California, will be received until 10 a. m. July 25, 1914, and then publicly opened. Information on application. S. A. CHENEY, major engineer.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 1st day of July, 1914, for doing the following work:

The furnishing and installing of machinery for the Municipal Asphalt Plant located at Florida street and Treat avenue.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days from the date of the contract, and completed within one hundred and twenty (120) calendar days from the date of the contract, and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check, certified by a responsible bank, payable to the order of the Board of Public Works, for an amount not less than ten per cent of the aggregate of the proposal.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works,
RICHARD J. CLINE,
Secretary.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington D. C.—Sealed proposals will be opened in this office at 3 p. m. June 30, 1914, for the construction complete (including mechanical equip-

ment, lighting fixtures and approaches), of a one-story basement and mezzanine stone-faced building of 8,000 square feet ground area, fireproof construction, for the United States post office at Greeley, Colo. Drawings and specifications may be obtained from the custodian at Greeley, Colo., or at this office, in the discretion of the supervising architect, C. WENDEROTH, supervising architect.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition temporary at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 900 A. M. Tuesday, June 30, 1914, for Constructing Court of the Universe, in accordance with plans and specifications on file in the office of the Director of works.

Separate proposals will be allowed on Water Piping and on Electric Wiring.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made, all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be retained upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$25.00, which amount will be refunded to the contractor submitting bona fide bids. All persons taking on plans and failing to submit bona fide bids will forfeit the deposit of Twenty-five Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.
WILLIAM H. CROCKER,
Chairman. (••)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, July 21st, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction of a building to be known as the Cottage for Epileptics, Sonoma State House, Eldridge, Cal. Plans and specifications may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum of the bid, must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked "Envelope: Proposal for Cottage for Epileptics, Sonoma State House, Eldridge, California."
(SIGNED) W. F. McCLURE,
State Engineer. (••)

avenue, and has been designed to contain six rooms and bath. Interior finish will be largely of pine with some elm panels and beam ceilings. Hardwood floors will be used in the living room and dining room. There will be a large open fire place and tile mantel. Bath room will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

PRESS BUILDING—2 story, frame and plaster, \$22,000. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for this work show Neil A. McLean, Chronicle Bldg., law at \$22,000. He will probably be awarded the contract. A complete list of the figures submitted will be found under the heading of San Francisco in this issue.

FERRY BUILDING—1 story, frame and steel, \$12,500. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for the construction of a Ferry building on the Exposition Grounds show Strehlow, Freese & Peterson low at \$12,200. They will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

APARTMENT HOUSE—3 story and base, frame, \$12,500. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, H. Peterson, Monadnock Bldg., S. F. The building will be erected on the east side of Franklin street south of Clay, covering an area of 25 by 74 feet. The building has been arranged to contain six suites of two and three rooms. Interiors will be finished in pine with some elm panels and hardwood floors. There will be wall beds and a hot water system. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$12,500. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Theo. E. Ruifs. The building will be erected on property adjoining a similar building for Mr. Peterson, and will have a frontage of 25 feet and a depth of 74 feet. There will be a total of six three-room suites with baths. Interior will be finished in pine with elm panels and hardwood floors. Plans provide for private baths and wall beds. A hot water supply will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans will be completed within a few days and segregated figures will then be called.

APARTMENT HOUSE—3 story and base, brick and steel, \$3,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mrs. Bradbury. The building will be erected at the northwest corner of Polk and California streets, having a frontage on Polk street of 120 feet and on California of 54 feet. There will be seven stores on the first floor and a number of two and three room suites on the upper floors. Interior finish will be of

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, brick and plaster, \$16,000. San Francisco. Architect, Louis Upton, 111 Ellis street, S. F. Owner, J. O. Gantner. The dwelling will be erected at the northwest corner of Baker and Vallejo streets, and has been designed for a ten-room house with several baths and sleeping porch. Interior will be finished in pine and hardwoods with hardwood and inlaid floors in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

RESIDENCE—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owners, United States Building, Realty and Investment Co., Crocker Bldg., S. F. The dwelling has been designed for a five-room house and will be erected on Curtis street south of Rolph. Interior finish will be of pine and redwood with some oak floors. There will be an open fire place and tile mantel. Bath room and kitchen will be finished in tile. Exterior of the dwelling will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, Class A construction, \$150,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, Mary L. Phelan. The dwelling,

which will be one of the handsomest as well as the most costly homes in San Francisco, will be erected on the north side of Washington street west of Occidental. There will be a complete steel frame, brick exterior walls and hollow tile interior partitions. Interior finish will be of hardwoods throughout. Hardwood and inlaid floors will be used in the principal rooms. There will be a central heating system, either steam or hot water. Open fire places and tile and marble mantels will be used in the principal rooms. Plans provide for elevator service, a vacuum cleaning system and other modern conveniences. All bath rooms will be finished in tile. Ornamental iron grilles are specified. Exterior of the dwelling will be faced with pressed brick and terra cotta. Plans are nearly complete and figures will be called for within two or three weeks. Further mention will be made of the work.

BUNGALOW—1½ story and base, frame, \$2,600. San Francisco. Architect, E. Evans, 2367 Mission street, S. F. Owner, B. S. Berry. The dwelling will be erected on London street south of Amazon, and has been designed to contain five rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. T. Morris, 616 7th avenue, S. F. The house will be erected at the corner of Anza and 11th

pine throughout. Plans provide for steam heat, a hot water system and an automatic elevator. All suites will have private bath rooms and wall beds. Bath rooms will be finished in tile with composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSES—2, 3 story and base, frame, \$12,000 each. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, John Johanson. These two buildings will be erected on adjoining property on the east side of Franklin street between Clay and Washington. Each has been designed to contain six apartments of three and four rooms. Interiors will be finished in pine with elm panels and hardwood floors. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Entrances will be finished in marble. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are nearly complete and work will shortly be started by Day Labor.

BATH HOUSE AND SWIMMING TANK—Concrete and brick. Cost not stated. San Francisco. Architect, Frederick D. Boese, 45 Kearny street, S. F. Owners, City and County of San Francisco. Plans have been completed for a bath house and swimming tank to be erected in the playgrounds at the corner of 19th and Angelica streets. A contract for the concrete work amounting to \$8,308 will be let at once. Bids for the balance of the work will be taken by the Playground Commissioners shortly. Complete particulars can be secured from the Commissioners at their offices on the 6th floor of the Temporary City Hall.

DRY DOCK—Steel and reinforced concrete, \$1,500,000. San Francisco. Engineer, Union Iron Works, S. F. Owners, Union Iron Works, S. F. Congress has given final assurance that the Navy Department will spend at least \$50,000 annually for a dry dock in San Francisco for a period of six years. This action assures the construction of the \$2,500,000 plant of the Union Iron Works a Hunter's Point. Complete the dock will be the largest on the Pacific Coast. The Union Iron Works has assured a representative of this paper that construction will be underway inside of thirty days, and that plans will be out for figures within ten days.

JAIL COMPLETION—4 story and base, Class A construction, \$45,000. San Francisco. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the completion of the City Jail and Emergency Hospital portions of the City and County Jail buildings show T. W. McClenahan low at \$39,300. He will probably be awarded the contract.

FLAT ALTERATION AND ADDITION—2 story frame. Cost not stated. San Francisco. Architect, Carl Gellius, 46 Kearny street, S. F. Owner's name withheld. The building located on Mission street between 19th and 20th streets will undergo alteration and addition. The front will be arranged for stores, and a one-story addition will be constructed in the rear which will contain living rooms. The work will require new plastering, in-

terior finish, electric work, painting and plumbing. Considerable marble wainscoting will be used in the store. Plans are complete and figures are being taken.

FLAT ALTERATIONS—2, 3 story and base, frame, \$3,500 to \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners' names withheld. These three buildings are all located in the Western Addition. They will be altered from flats into apartments of two and three rooms. There will be new plumbing, electric work, painting, interior finish and plastering. Wall beds will be installed. Exteriors will also be altered and will require cement plaster on metal lath. Plans are being prepared and will go out for figures shortly.

FLATS—2 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, Frank de Curtoni, Mountain View. The building will be erected at the southwest corner of Clement and 3rd avenue, covering an area of 30 by 60 feet. The first floor will contain a store. Upper floors will be arranged for five modern flats. Interiors will be finished in pine and redwood with some oak floors. There will be open fire places and tile mantels. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

GARAGE—1 story and base, Class A construction, \$25,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Bishop Estate. The building will be erected on Jackson street near Van Ness avenue, covering an area of 92½ by 127½ feet. Construction will be fireproof throughout with a complete steel frame, steel roof trusses and brick walls. A cement floor will be used. Interior finish will be of pine throughout. Plans provide for metal window sash and frames. Besides the storage space there will be a large and complete equipped machine shop. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are being taken.

PASSENGER STATION AND TRACKAGE—2 story and base, frame and concrete construction, \$150,000. San Francisco. Architect, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The Southern Pacific Co. has started the construction of the new Third and Townsend streets station, which, when completed, with the new trackage system, will cost over \$1,000,000. The new station will cover an area of 260 by 112 feet and is a fine example of the Mission style of architecture. Construction will be of reinforced concrete with the exterior faced with cement plaster. A red clay tile roof will be used. The new trackage system will greatly increase the present crowded facilities and when completed will give the Southern Pacific one of the finest railroad terminals in the West. Most of the work will be done by Day Labor.

SCHOOL LATHING AND FURRING—Cost not stated. San Francisco. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the furring and lathing in the Academic building of the Polytechnic group. Bids

will be opened by the Board of Public Works on July 1st. Plans and specifications can be secured from the Architecture Department. An official proposal appears in another column of this issue.

STATE EXHIBIT BUILDING—1 and 2 story, frame and plaster. Cost not stated. San Francisco. Architects, Cannon & Fetzer, Salt Lake. Owners, State of Utah. Bids opened on June 18th for this work show the Northwest Construction Co., Merchants' Exchange Bldg., S. F., low at \$12,400. The bid does not include all work. An award of contract has not been made. Further mention will be made of the work. A complete list of the figures received will be found under the heading of San Francisco in this issue.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine with some elm panels and hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, James Welsh, 244 20th avenue, S. F. The dwelling has been designed to contain seven rooms and bath, and will be erected on the east side of 22nd avenue near Lake street. Pine and redwood finish with some hardwood floors will be used. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, Laura S. Nathan. The dwelling will be erected on Jones near Glover, and has been designed to contain twelve rooms and six baths. Interior finish will be of pine and oak with hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architects, Cannon & Fetzer, Salt Lake City. Owners, State of Utah. A telegram has been received from the architects stating that the bid of the Northwest Construction Co. of \$12,400 for this work should have read \$15,902.

APARTMENT HOUSE—3 story and base, reinforced concrete, \$20,000. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Folk street, and has been designed to contain a number of two and three room apartments. Interior will be finished in pine through-

out. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Wall beds are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BAKERY—1 story and base, brick, \$1,000. San Francisco. Architect, none. Owner, J. G. Harney, Pacific Bldg. The building will be erected on the south side of 20th street east of Valencia. Interior will be finished in pine with some terra cotta tile. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

PIER—Timber and concrete construction. Cost not stated. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids will be opened by the State Board of Harbor Commissioners on July 2nd for the construction of Pier No. 35. Plans and specifications can be secured from the State Board of Harbor Commissioners, Ferry Bldg., S. F.

RESIDENCE—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owner, P. W. Montroll, 270 Andover street, S. F. The house has been designed for a six-room dwelling and will be erected on Sears street. Interior will be finished in pine. There will be open fire place and tile mantel. Exterior will be covered with rustic and cement plaster. The work will be done by Day Labor.

Contracts Awarded.

room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame. Cost not stated, Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, J. M. Parks. The dwelling will be erected in the Claremont Tract, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures have been taken and are now under advisement.

RESIDENCE — 2 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, William Olney. The dwelling will be erected in the Claremont Tract and has been designed to contain eight rooms, bath and sleeping porch. Pine and hardwood veneer will be used for interior finish. There will be hardwood floors and beam ceilings. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and floor and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. An automatic water heater will be installed. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, brick and frame, \$15,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. Laing. The building is now under construction at the corner of Grand avenue and Park View Terrace, and when complete will contain a number of two and three room suites. Interior finish will be of pine with some elm panels and oak floors. There will be steam heat and an oil-burning plant. All suites will have wall beds and private bath rooms. The architect is now taking figures for the following work: Brick work, metal lath, elevators, hardwood finish and floors, canvas decks, tile and marble work, galvanized iron work and terra cotta tile.

HOTELS—2, 7 story and base, brick and steel, \$50,000 each. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, A. C. Alken. These two buildings will be erected on adjoining property at the corner of 15th and Jefferson streets. There will be stores on the first floor besides the hotel office and lobby. Upper floors will be arranged for a large number of guest rooms, a large percentage of which will have connecting baths. Interiors will be finished in pine throughout. Some ornamental plaster will be used in the offices and lobbies. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Exteriors will be faced with pressed brick. Plans are complete and F. A. Muller, Syndicate Bldg., Oakland, is now taking segregated figures on the work.

be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame. Cost not stated, Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. F. Jackson. The dwelling will be erected in the Crocker Highlands and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile and equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. Preliminary sketches only have been prepared.

RESIDENCE — 2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, Lloyd A. Rally, 1731 Sonoma avenue, Berkeley.

Owner, W. W. Johnson. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected in Claremont. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile and will be equipped with showers. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame. Cost not stated, Oakland, Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, A. F. Hockenbeamer. The dwelling will be erected on a large lot and has been designed to contain eight rooms and bath. A garage will also be erected on the rear of the property. Interior will be finished in pine and hardwood veneer. Oak and inlaid floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath

Bids for Plumbing, Oakland Public Schools.

Bids Opened By the Board of Education For Work at Garfield, Emerson and Manual Training.

Bids were opened by the Oakland Board of Education Tuesday night for furnishing the rough and finished plumbing in the Emerson, Garfield and Manual Training Schools. Bids ran as follows:

Plumbing, Oakland Schools.			
Bidder	Emerson	Garfield	Manual Training
J. B. Cruz.....	\$2,226	\$2,828
C. R. Catton.....	2,199	3,869	2,899
F. S. Snook & Co.....	2,056	3,742	2,610
James Rankin & Son.....	2,234.65	3,734.85	3,074.90
Carl Doell.....	2,024	2,645

RESIDENCE—2 story and abse, frame, \$3,000. Oakland, Cal. Architect, none. Owner C. E. Carlson, 1512 Grove street, Oakland. The dwelling will contain six rooms and bath, and will be erected on Thomas street west of Napa. Interior finish will be of pine. Some oak floors will be used. There will be furnace heat and open fire places. Mantels will be of tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STORES—1 story and base, brick, \$5,000. Oakland, Cal. Architect, none. Owner, George Gruge, 1171 14th street, Oakland. The building will be erected on East 14th street west of 36th avenue, and has been designed to contain three modern stores. Interiors will be finished in pine throughout. Plate glass windows and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OFFICES—3 story and base, Class C construction, \$50,000. Oakland, Cal. Architects, Milvain Bros., Delger Bldg., Oakland, Owners, San Francisco-Oakland and Terminal Railroads. This work has been mentioned here a number of times before when the architects were first commissioned to prepare plans. The building will be erected at the corner of 22nd and Grove streets, and will be used as an administration building by the owners. Interior finish will be of pine with some hardwood veneer. There will be steam heat and a hot water supply. Special fireproof vaults will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

APARTMENT HOUSE ADDITION—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, B. Bercovlch. The building located at the northwest corner of Isabel and San Pablo avenue will undergo alterations and additions. Stores now occupying the first floor will be removed and a lobby and office for the apartments above will be installed. Upper floors will be remodeled and new plumbing, heating and electric work will be installed. Plans are complete and figures are now being taken.

COLLEGE BUILDING—2 story and base, reinforced concrete, \$40,000. Oakland, Cal. Architect, Frederick D. Boese, 45 Kearny street, S. F. Owners, California Concordia College. The building will occupy the center of a four-acre tract and itself will cover an area of 195 by 111 feet. Interior has been arranged for class rooms, assembly hall and dormitories. Pine and hardwood finish will be used. There will be steam heat and modern school plumbing. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

SEMI-REINFORCED CONCRETE, \$25,000. Berkeley, Alameda Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, California School for the Deaf and Blind. Plans are complete and figures are now being taken for a gymnasium building at the School for the Deaf and Blind. Plans and specifications can be secured from the State Department of Engineering. An official proposal appears in another column of this issue. Bids will be opened on July 20th.

SEMI-REINFORCED CONCRETE, \$25,000. Berkeley, Alameda Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, California School for the Deaf and Blind. Plans are complete and figures are now being taken for a gymnasium building at the School for the Deaf and Blind. Plans and specifications can be secured from the State Department of Engineering. An official proposal appears in another column of this issue. Bids will be opened on July 20th.

STORE—1 story, frame, \$5,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, G. L. Kibbe. The building will be erected at the corner of Redwood Road and Hopkins street, and has been designed to contain five small stores. Interiors will be finished in pine throughout. Patent store fronts will be used. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

MUNICIPAL AUDITORIUM—2 story and base, Class A construction, \$1,000,000. Oakland, Cal. Architects, Palmer & Horstbel, New York. Owners, City of Oakland. Bids will be called for within two weeks for the sheet metal works including a number of large skylights.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Claude B. Barton, First Trust and Savings Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Thousand Oaks Tract, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine. There will be oak floors and tile bath rooms. Furnace heat and open fire places will be used. Mantels will be of tile. Exterior will be covered with cement plaster on metal lath. Plans are being prepared.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

BRIDGE—Frame and concrete. Cost not stated. San Rafael, Marin Co., Cal. Engineer, Coun. Surveyor San Rafael. Owners, Marin County. Bids will be opened on July 7th for constructing a wood and concrete bridge over Nicastro Creek in Marin County. Plans and specifications can be secured from the County Engineer.

BRIDGE—Reinforced concrete and steel. Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. Plans for a new bridge of the steel and reinforced concrete type to be erected over the Napa River on East First street have been completed. Bids are now being called and will be opened on July 2nd. Plans and specifications can be secured from the City Clerk.

SEWER WORK. MANHOLES, ETC. —Cost not stated. San Rafael, Marin Co., Cal. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. Plans have been completed and bids will be opened on June 29th for sewer

work in the town of San Rafael. The work will require approximately the following quantities: 41 brick or concrete manholes, 16 lampholes with 6 inch pipe, 397 feet 12 inch pipe, 124 feet 10 inch pipe, 210 feet 8 inch and 850 feet 6 inch. Plans and specifications can be secured from the City Clerk, Eugene W. Smith. An official proposal appears in another column of this issue.

BATH HOUSE EQUIPMENT—Cost not stated. San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. Bids are now being called for on the mechanical equipment for the new Public Baths being erected in San Rafael. The work includes the following: Steam heating, flush and salt water heating, swimming pool supply and heating, steam generating and distributing engine, power transmission and laundry equipment. Bids will be opened on June 29th. Plans and specifications can be secured from the City Clerk.

LIBRARY—1 story and base, reinforced concrete. Cost not stated. San Anselmo, Marin Co., Cal. Architect's name not given. Owners, Town of San Anselmo. Bids opened for the construction of this building show Fred Field low at \$9,000. He will probably be awarded the contract. Bids ran as high as \$10,500.

CHURCH—1 story and base, frame and plaster, \$18,000. Dixon, Solano Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church of Dixon. The building has been designed in the Mission style and will contain a main auditorium and Sunday school rooms. Interior finish will be of pine and redwood with ornamental plaster in the main auditorium. There will be a central heating system, probably warm air. Art glass and marble are specified. Exterior of the building will be covered with cement plaster on metal lath. Bids have been taken and a contract will be awarded shortly.

WATER TOWER AND STEEL TANK—Cost not stated. San Rafael, Marin Co., Cal. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. Plans are complete and figures will be opened on June 29th by the City Council for constructing a water tower and steel tank. Tank will have capacity of 60,000 gallons. Plans and specifications can be secured from the City Engineer or the City Clerk.

BRIDGE—Reinforced concrete. Cost not stated. Sausalito, Marin Co., Cal. Engineer, Constructing Quartermaster's Office, Fort Mason. Bids are now being taken for a reinforced concrete bridge to be erected at the entrance to Fort Baker. The cost will be divided between the War Department and the town of Sausalito.

TANK FARM—15 steel oil tanks. Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, Engineering Dept Standard Oil Co., Standard Oil Bldg., S. F. Owners, Standard Oil Co. Work has been started on 15 large steel oil tanks and is progressing rapidly. The company intends to erect 15 of these tanks before the close of 1914.

STORES AND OFFICES—2 story and base, brick. Cost not stated. Richmond, Contra Costa Co., Cal. Architect, J. B. Ogborn, Richmond. Owners, Charles J. Crary and M. Heinzon. The building will be erected on Macdonald avenue near 9th, and will cover an

area of 50 by 80 feet. There will be four stores on the first floor. Upper floor will be arranged for offices. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

HOTEL—2 story and base, brick. \$50,000. Point Reyes, Marin Co., Cal. Architect's name not given. Owner, Mr. Grandi. Contractor, Stewart Scott, Petaluma. Contract price, \$50,000. Note: The building will cover a ground area of 100 by 120 feet.

**LOS ANGELES AND SOUTH-
EERN CALIFORNIA.**

BANK AND OFFICES—12 story and
Lase. Class A construction. Cost not
stated. Los Angeles, Cal. Architects,
Parkinson & Bergstrom, Security Bldg.,
L. A. Owners, Commercial Fireproof
Building Co. The building will be
erected at the northwest corner of 5th
and Spring streets, covering an area
of 115 by 155 feet. Construction will
be fireproof throughout with a com-
plete steel frame, brick exterior walls,
concrete and hollow tile floors and hol-
low tile interior partitions. The first
floor will be occupied by the Citizens'
National Bank. Upper floors will con-
tain in the neighborhood of 462 of-
fices. Interior finish will be of hard-
wood throughout with some metal
trim and marble wainscot. There will
be steam heat, elevator service, a vac-
uum cleaning system, mail chutes and
metal window sash and frames. Bank-
ing rooms will be finished in hard-
wood, marble, ornamental plaster and

ornamental iron and bronze. Special
vaults will be installed. Exterior of
the building will be faced with pressed
brick and terra cotta. Plans are com-
plete and figures are now being taken.

CHURCH—2 story and base. rein-
forced concrete, \$200,000. Los An-
geles, Cal. Architect, John T. Cones,
Washington Bldg., Pittsburgh, Pa.
Owners, St. Vincent's Parish, Father
Joseph S. Glass. The building will be
erected at the corner of Figueroa and
West Adams streets and will cover a
large area. Construction will be prac-
tically fireproof throughout. Interior
will be finished in pine with orna-
mental plaster. A central heating sys-
tem will be installed. Art glass win-
dows are specified. Exterior of the
building will be faced with cement
plaster. Plans are nearly complete and
figures will be called for shortly.

HOSPITAL LAUNDRY—1 story and
base, concrete, \$12,000. Patton, San
Bernardino Co., Cal. Architect, State
Architect George B. McDougal, Sacra-
mento. Owners, State of California.
Bids will be opened on July 22nd for
a new laundry at the Southern Cali-
fornia Hospital at Patton. Special ma-
chinery will be installed. Exterior
will be faced with cement plaster.
Plans can be secured from the State
Department of Engineering. An of-
ficial proposal appears in another col-
umn of this issue.

HOTEL ADDITION—4 story and
base, brick. Cost not stated. Los An-
geles, Cal. Architect, Antone Reif,
Higgins Bldg., L. A. Owner, John
Orth. The building will be erected on
San Pedro street between 3rd and 4th,
and will cover an area of 35 by 75 feet.
Interior will be finished in pine. Plans
provide for steam heat and a hot water
supply. Two baths will be located on
each floor. Exterior of the building
will be faced with pressed brick. Plans
are now being prepared.

HOTEL—12 story and base. Class
A construction. Cost not stated. Los
Angeles, Cal. Architects, Parkinson &
Bergstrom, Security Bldg., L. A. Own-
ers, Rindge Estate. The building will
be erected at the northwest corner of
Broadway and 3rd streets, and is be-
ing promoted by the Central Business
Stability Association. Construction will
be fireproof throughout. Details have
not been perfected and further men-
tion will be made of the work.

RESIDENCE—2 story and base,
frame and hollow tile. Cost not stated.
San Gabriel, Los Angeles Co., Cal.
Architects, Allison & Allison, Hiber-
nian Bldg., L. A. Owner, David Roney.
The dwelling will contain ten rooms,
three baths and sleeping porches. In-
terior finish will be largely of hard-
wood with hardwood and inlaid floors.
There will be furnace heat and open
fire places. Mantels will be of tile
and brick. Bath rooms will be finished
in tile and will be equipped with show-
ers. Exterior of the house will be
faced with cement plaster. Plans are
complete and figures are being taken.

GIRLS SCHOOL—2 story and base,
brick, \$60,000. Los Angeles, Cal. Ar-
chitects, Austin & Pennell, Wright &
Callender Bldg., L. A. Owners, Mar-
borough School for Girls. The building
will cover an area of 156 by 170 feet,
and will contain all modern improve-
ments. Interior finish will be of pine
with some maple floors. Steam heat
is specified. Exterior of the building
will be faced with pressed brick. Plans
are being prepared.

PORTLAND AND OREGON.

SCHOOL—2 story and base, brick, \$30,000. Portland, Ore. Architect, F. A. Naramore, Supt. of Properties, Portland, Owners, City of Portland. The building will be erected in Fulton Park and has been designed for an eight-room school with office and assembly hall. Interior finish will be of pine with maple floors in the class rooms. There will be steam heat. Composition blackboards are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Plans and specifications can be secured from the Supt. of Properties' office in the Court House, Portland.

SEATTLE AND WASHINGTON.

HOTEL—4 story and base, brick and mill construction, \$75,000. Seattle, Wash. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. The building will be designed to contain one store on the first floor besides the hotel office and lobby, and will cover an area of 78 by 167 by 174 feet. Upper floors will contain in the neighborhood of 140 guest rooms and a number of public baths. Plans provide for steam heat elevator service and a hot water supply. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken for the general construction which will include everything.

Contracts Awarded.

BRIDGE—Steel and concrete, \$24,963. Dryden, Wash. Engineer, County Surveyor, Wenatchee. Owners, Chelan County Contractors, Bailey & O'Connor, care of County Engineer, Wenatchee. Contract price, \$24,963.

Owners, Central High School District of North Vancouver, B. C. Contractors, W. J. Smith, Ltd., 602 Hastings, West Vancouver. Contract price, \$116,112.

HARDWOOD FORESTS OF SOUTH AMERICA.

[Consul Isaac A. Manning, Barranquilla, Colombia.]

That there is much mahogany, Spanish cedar, and lignum-vitæ in the undeveloped forests of the Caribbean and Pacific coasts of Colombia seems well established, but from information previously had from people engaged in timber exploitation it appears that the stand will rarely exceed 15,000 feet to the acre, and will not likely average above 9,000 feet.

To secure these lands the better way by far is for the persons interested to come into the country and by the aid of local competent agents and guides, get in touch with owners, examine the properties, and between them agree on price. There is no fixed value, much depending on the necessities of the

owner, location, and availability of the lands for agricultural and stock-raising purposes. It is safe to say, however, that prices of such lands, where titles are good and the lands not over-run by squatters, might be anywhere from \$1 to \$1 per hectare (2.47 acres), with owners usually asking, tentatively, the higher price, and probably willing to accept less than asked, in cash. Options are almost impossible to secure except for brief periods, sufficient to permit examination. To acquire a large area purchasers would probably have to treat with various owners.

Almost all the lands where such timber as suggested above is found, would serve for colonization purposes, especially for cattle ranches and for sugar cane and other purely tropical products.

Reforestation—Government Land.

In this connection it might be mentioned that a firm which has been established in Colombia for a number of years owns about 15,000 acres on the Atrato River; 8 years ago it planted 30,000 Spanish cedar from the seed on this tract. These trees will be classed as merchantable timber in two years more. Last year one tree was cut for a special purpose from this planting, yielding a 20-foot log squaring 14 by 14 inches. This firm is planting 40,000 more trees this year and feels satisfied that this manner of reforestation can provide all future demands for this class of timber. These trees are planted 21 feet apart, and for the first three years the land between the trees is cropped with corn and plantains (bananas).

As to Government or waste land, it seems wise to this consulate that anyone desiring to obtain such go first to Bogota and confer with the Minister of Fomento (Exploitation).

Peru Imports Hardwoods Because of Lack of Railway.

[Consul General Wm. H. Handley, Callao, Peru.]

Although Peru is situated within a tropical latitude and the entire eastern slope enjoys a luxuriant vegetation with extensive primitive forests of hard and valuable woods, the line along the entire western coast extending from the sea to the backbone of the Andes Mountains, a distance of 40 to 100 miles, or more, is practically void of all vegetation and appears as barren as a desert as far as the eye can see. In a few instances along the coast of Peru, where small rivers empty into the sea or where irrigation projects have been successful, some vegetable life is seen, in the form of bush growth, sugar cane, and cotton, but never woodland or forests.

Most of the hardwood that is used in Peru to-day is imported from Nicaragua and California—cedar from the first-named and redwood railway ties from the latter. On the eastern slope of the Andes Mountains and in the lower level in what is known as the Montana region, there are, as previously stated, vast tropical forests of hard, valuable woods; but inasmuch as there are no railroads connecting that region with the coast either west or east, Peru, for the present at least, should not be considered as a country offering good opportunities for the investment of American capital in the exploitation of hardwoods.

Ecuadorian Trees Useful for Lumber.
[Consul General Frederick W. Goding, Guayaquil, Ecuador.]

LLOYD C. COMEGES

COMMERCIAL ATTORNEY

Efficiency Methods - Adjustments
Advertising Service

902 Mutual Savings Bank Bldg.

Cor. Market & Kearny, Kearny 3864

A large part of the Republic of Ecuador is covered with forests of valuable timbers, both hard and soft, after the removal of which cocoa, coffee, rice tobacco, cereals, fruits, and vegetables are grown in many districts. The haciendas now producing such enormous quantities of cocoa and sugar formerly were forests. A partial list of Ecuadorian trees useful for lumber includes:

Alcamior, yellow, has odor of camphor.

Algarrobo (Prosopis dulcis), low-land tree.

Aliso (Alnus sp.), alder tree.

Amarillo, one of the best timbers.

Arrayan, good timber.

Balsamo, one of the balsams.

Bantano, timber tree.

Bellamaría, fine timber.

Calmito (Chrysophyllum calmito).

Canelo (Canella alba and Canella amarilla).

Canje.

Canafistula (Cassia fistula), strong timber.

Copal (Hyminaea sp.),

Cachacomo, hard wood.

Cashaguro.

Capuli (Prunus salicifolia), red cherry, valuable.

Celba (Bombax salba), source of kapok.

Cedro, cedar.

Chamburo (Carica papaya).

Chucula (Spondias purpurea and Spondias sp.), plum; both varieties valuable.

Ehano (Cesalpinia sp.), native ebony.

Perman Sanchez.

Figeroa.

Figua.

Guaybo (Inga edulis).

Guanañana Anoma muricata).

Guayumo (Cecropia peltata), useful for paper pulp.

Guachapelí, a leguminous tree producing fine curved timber.

Guayacon (Gualacum sp.), hard timber.

Habaquiro.

Laurel (Laurus sp.), fine white and black timber.

Mamey, mado serrano (Mammea americana), good for furniture.

Mamey colorado (Achras mamosa), for furniture.

Mango (Mangifera indica).

Mangle (Rhizophora mangle), fine timber; bark used for tanning.

Moral, handles and fine furniture; yellow and white.

Majagua (Anacardium rhinocarpum), good timber.

Moraleño (Ficus dendroica)

Niguito, exceedingly hard.

Nispero (Achras sapota).

Palo de balsa (Ochroma piscatoria), large use.

Palo de vaca (Galatodendrum sp.), white gum.

Petrina negra, or Palo prieto (Erythrina glauca), valuable.

Nogal, called walnut; good.

Pechiche (Vitex gigantea), fine heavy timber; much used.

Pumanaqui.

Quitafol timber of the Andes slopes.

Rede, called oak, but not an oak; splendid timber.

Sapan.

Siman.

Salto (Salix humboldtiana), willow of highlands.

Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

How Advertising Can Make Money For You.

In order to understand how advertising can make money for you it is necessary to understand what advertising is and what it can accomplish. Advertising in its broader sense, is:

First: PUBLICITY:

Which is that acquainting the public in a general way with the name of a firm or its offerings which does not have the appearance of direct advertising and is largely received by the public as news.

Second: TRADE NAME ADVERTISING:

Which appears to the public frankly as Advertising. It aims to make known the name of the firm and the goods it carries. Trade name advertising does not count on direct results, relying upon sales being made by its own salesmen or by the other firms and salesmen who are acting or selling for them.

Third: DIRECT ADVERTISING:

Which is the selecting of definite parties or a definite locality to whom you desire to sell your offerings and getting your proposition, as directly as possible from you to them. In this you can figure the cost of doing so, the total amount realized on the volume of business obtained thereby and your profit on such business. You can submit a definite, concrete offer to them, and provide for a means of closing that offer and realizing your profit. This allows you to pick out a large number of parties, submit your proposition to them and continue to follow up submitting it to them, until you have effected a sale or found that a sale cannot reasonably be made. In other words advertising and especially direct advertising is that scientific method or aid which can be used in disposing of whatever you have to offer, instead of relying entirely upon personal salesmanship as of old. Properly used advertising can make more money for you than possibly any other single business facility that there is.

If you can sell your offering to more than one party try at the same time to sell it to a thousand or more.

To hire salesmen would cost you much and it would be impossible for you to go to each of a thousand within any reasonable time. By advertising you can talk your proposition to the thousand in a single day. You can learn who is interested and who will not take your line.

You eliminate the time of personally seeing those who won't buy.

You eliminate the cost of personally seeing those who won't buy.

Your time is your capital and what is saved is added capital for additional endeavors.

Advertising enlarges your field of action, enabling you to make more money.

Proper direct advertising also accomplishes trade-name advertising.

A trade journal or paper, while the least sensational of all publications, if properly used, can be made to return very great results. It is read carefully and with the mind of the reader to the general trade subject. If your ad has something live and interesting to say and it is said in an agreeable and clear manner, your little ad will drive home your proposition before thousands at a less cost than a salesman could explain it to a few dozen persons.

Just try asking your advertisements live talking salesman for you and not a mere jumble of words, and you will be surprised and greatly pleased at the increased results.

LETTER BOXES TO ASSIST THE POST OFFICE DEPARTMENT.

The Postmaster of San Francisco has sent out an appeal for assistance in the matter of private mail receptacles, especially in references to flats and apartment buildings. Here is what he says:

OFFICE OF POSTMASTER SAN FRANCISCO, CAL.

June 15, 1914.

Daily Pacific Builder,
560 Mission Street,
San Francisco, Cal.

Gentlemen:

I hope to secure your co-operation in my efforts to improve the local delivery service of this office. I am working to reduce the stair climbing now being done by letter carriers and to eliminate unnecessary delays at doorways. The Postal Laws and Regulations declare that private mail receptacles should be used to facilitate the delivery of mail.

I wish to suggest that henceforth in planning or building houses for the residential section that you make arrangements for the installation of private letter boxes near the bottom of the front stairways. The boxes to be of good service should be larger than those now used in flats and apartment houses. It is not possible to insert a large envelope or small magazine in the present style of boxes. In a number of flats a push button at each box connects with the house bell and serves to announce the delivery of mail.

Boxes of the "keyless" type are now on the market. Simple combinations open the box. One style is in use at Station "K," 89 Stevenson street, and this office is engaged in correspondence regarding cheaper makes. These boxes prevent the annoyance arising out of lost, mislaid or stolen keys.

At business places arrangements should be made for slots in the front, or office doors, so that the early morning mail may be delivered in the absence of the occupant.

I will greatly appreciate any assistance that you may render the service in this matter.

Very truly,

CHAS. W. FAY,
Postmaster

ASPHALT FROM THE PHILIPPINES.

[Consul] General Geo. E. Anderson,
Hongkong, China.]

The discovery of a vein of asphalt of high quality and of large extent in the Philippine Islands is likely to have a marked influence upon the paving of cities in the Far East and upon other lines of building and contracting work. The vein has been discovered by a Government forester who took an outcrop of the vein on a hillside for coal. The deposit lies in the Leyte Province, barrio of Campopoc, on the northwest peninsula of the island about 10 miles from the ocean. The vein discovered runs about a yard and a half thick and can readily be traced about 160

yards along the side of the hill, several thousand tons of the material being actually in sight with indications that the deposit is of much greater scope. The analysis of the deposit made in Europe shows that it is of a quality suitable for the highest uses and ought to bring the highest prices. The discoverers of the vein are already using the material for roofing and similar purposes. Emanations of an oily nature in the country near the deposit have been noticed for many years and were supposed to indicate oil.

Prospective Benefits.

The successful application of this Philippine asphalt to paving and similar work will be of the highest importance, both to the Philippines and to other portions of the East. At present asphalt for paving, roofing, and other purposes is imported from Europe and the United States at a high cost, the result being not only high priced pavements but a minimum of high grade material in construction of such pavements.

The Far East is just commencing to turn to modern pavements generally, and the use of asphalt heretofore has been quiet limited. In Hongkong where, by reason of its peculiar location and the nature of its topography, road building has received particularly careful attention and has been the subject of considerable experimentation, little has been done in the use of asphalt until comparatively recently and the change has been due to the increasing use of motor cars and heavy traffic vehicles instead of the chairs and jinrickshas, which heretofore have made the use of macadam and of concrete and cement practicable. On the less frequently used roads and on the higher levels a concrete mixture of broken stone, a peculiar sticky Chinese clay and lime has usually been employed. As a result of the heavier demand upon the roads of the lower levels by motor-car traffic the need of a heavier hinder for the broken stone has been seen and most of the better class pavements now being laid are of broken stone laid in asphalt or in tar.

The supply of asphalt in the Far East at present is coming largely from the west coast of the United States and the trade is increasing. Pavement grades of asphalt at present in Hongkong cost around \$75 gold per ton, other grades running as high as \$75 gold per ton, delivered in Hongkong in either case. In Hongkong little compressed asphalt has been used so far and that used has been imported through the Crown agents in London. Tar macadam is the chief pavement employed at present, but government engineers report that they expect to employ more compressed asphalt in the future.

NEW METHOD OF STREET PAVING IN HAMBURG.

[Consul] General Henry H. Morgan,
Hamburg, Germany.]

The so-called Kleinförster system for armorizing roads has come into extensive use in Germany and other parts of Europe during the past few years, and experience has shown that roads laid with small granite blocks under this system have many advantages over highways armored with macadam or concrete. It is far cleaner than other armors, and roads laid therewith are

particularly free from dust and dirt, and during wet and damp weather the danger to horses from slipping is reduced to a minimum on account of the joints being so close together. The finished surface is smooth and well adapted for both light and heavy traffic. As a rule, the road once laid requires no maintenance.

The granite blocks used are cut by machines in the required shape and are covered by patents held by the Bornholm Granite Co. The cost of armoring roads with the Kleinfalter system in Germany, including all necessary work, amounts to \$1.58 per square meter (1.196 square yards), and the life of the road is about 20 years where traffic is heavy and 30 years where traffic is light.

In a small pamphlet written by Ferdinand Weiller upon the Kleinfalter system the following description of the method of laying the road is given:

First, the old macadam is carefully leveled and rolled. In the absence of an old macadam, one may lay a foundation of concrete 4 to 6 inches in depth. The small stones of approximately cubical shape are placed in position on a bed of sand and pressed tight against each other so as to form a kind of rough mosaic. * * * The subsoil contributes to a great extent to the solidity of the pavement, which, laid on a solid foundation, will last accordingly. The old road should be carefully leveled and rolled or rammed so as to form a solid and water-tight surface with very little camber. A perfect smoothness of the surface is of great importance, as every unevenness of the same will be visible in the plaster and should consequently be removed, the surface being given a camber of one-fiftieth of the width of the road, or even less in flat and broad streets in towns, and then finally rolled by a steam roller.

Sand is spread over the finished foundation to a depth of about one-half inch, to bring up the shallow stones to the level of those of full depth. Only coarse-grained sand, without any earthy substance, or fine gravel is fit for this purpose. The small stones should be of approximately cubical shape, not too wedge-shaped, 3% to 3½ inches or 3 to 4 inches in depth, the heads measuring 6 to 12 square inches. The size of the cubes depends on the hardness of the stone and on the amount of traffic. Numerous streets in Hamburg are armored with the so-called Kleinfalter, and photographs illustrating the same, together with a photograph showing the machine which splits the stone into the r-quilled shape, are forwarded [and will be loaned by the Bureau of Foreign and Domestic Commerce, Washington, D. C.]

PRENDERGAST FOR JUSTICE OF THE PEACE.

Among the candidates for the office of Justice of the Peace to be voted for in the coming primaries, we note one that should be kept in mind by all people interested in the building line because of his knowledge of conditions in real estate and building affairs in San Francisco. We refer to Mr. Thomas F. Prendergast, the well known attorney, who has for years been the authority for the Chronicle on these subjects, and who has written most exact and careful weekly articles on realty and building transactions.

His knowledge of the inside history of matters of so much importance will be valuable to all the citizens if he should be chosen to the office he seeks. Our intimate acquaintance with Mr. Prendergast and our knowledge of his

a solid integrity, his soundness of judgment and his keen sense of the true spirit as well as the letter of the law, warrant us in advising all our friends and all the thinking and right-minded people of San Francisco to see that he is elected as one of the Justices of the Peace.

That he has been approved by the Bar Association of San Francisco in its formal endorsement, and also by many of the influential clubs, improvement associations, etc., show how his candidacy is being received. We predict for Mr. Prendergast a sure victory at the polls.

—JUDGE, TWO MONTHS 11

PROCESS OF MAKING RAILS OF STEEL.

A. Russell Bond in the St. Nicholas Magazine: That rail mill was certainly a wonderful sight! The enormous glowing ingots were carried on a transfer car to a sort of trough. The floor of the trough, or "table," as they call it, consisted of a series of rollers that were turning rapidly. Riding on them, the big clumsy ingot sailed along until it bumped against a pair of large steel rolls. Immediately the rolls seized it and hauled it through, like clothes through a clothes wringer. We could not see that it has been flattened down very much, but we noticed that deep corrugations had been cut into its upper surface. As it moved on, the rollers turned it over on its side before it was caught by the next pair or "stand" of rolls. It went through four stands in succession, turning over between each stand, until it had made a complete turn. Then it came to what is called a "three-inch" mill, which has three rolls, one above the other. First the "bloom," as it is now called, went between the middle and bottom rolls; but no sooner had it emerged, than it was raised bodily, the supporting roller "tables" on both sides of the mill being raised up simultaneously. The rollers of the tables were then reversed, causing the bloom to start back between the middle and top rolls. The tables were now lowered, their rollers reversed, and the bloom sent through between the middle and bottom rolls as before; but this time it was switched to one side, where the rolls were a little larger in diameter, and it was a tighter squeeze getting through them. And so the bloom went back and forth, being switched over to a tighter pass each time until it was squeezed down to about 8 inches square and over a foot long. Then it was cut in two, and each bloom went through another set of rolls that gradually worked it down to the size and shape of a rail. It was fascinating to watch that snakelike bar over a hundred feet long, writhing as it alive. As it came back for its last Sally through the rolls, a whistle was blown as a warning that the rolling was finished, and the rail was now on its way to the saws. There were five circular saws that dropped down upon the glowing metal, and amid a shower of sparks, sawed it into four ten-yard rails. After that, the rails were carried off on "run-out tables" to the "hotbeds" to cool.

"GRINGO" HOW THE NAME WAS APPLIED BY THE MEXICANS.

Perhaps only one person in a hundred knows how the word "Gringo"

came to be applied to Americans by the Mexicans. What does it mean? And why did the Mexicans apply it to us? The derivation and origination of words has filled several volumes—but only a few of them are shown to have sprung into life in such a unique and interesting way as "Gringo." And this is how it happened:

When the soldiers were marching through Mexico in our war with that Country, they fell to singing "Green Grow the Rashies, O." Wherever they went, this song heralded their coming. The Mexicans, listening, did not quite grasp the meaning, "Green Grow," etc., the soldiers sang to the top of their lungs. The two words—green grow—stuck in the Mexicans' minds. And so in a short time the soldiers, and all Americans along with them, were given that name—only in the Mexican tongue

FLOOD CONTROL IN CHINA BIG ENGINEERING FEAT.

To reclaim more than 17,000 square miles of fertile land which has been annually devastated by the overflowing of the Hual River, the Chinese government has authorized a bond issue of \$20,000,000, and designated a New York engineering firm to undertake the construction of dams and reservoirs. The project is one of the greatest of engineering enterprises, even in this day of big things. An interesting feature of the matter is the fact that the general supervision of the work has been intrusted by the Chinese government to the Red Cross Society. The territory served by this project is larger than the combined areas of New Jersey, Delaware, Connecticut, and Rhode Island, with Long Island thrown in. The river Hual, also known as the Hual-Ho, 800 miles long, has been subject to violent floods for 2,500 years, and as in many places, even at low stage, it is kept within its course only by dikes of earth, its ravages during the spring floods are the source of tremendous losses. The plan is to dredge the channel of the river and of the Grand Canal, which it feeds; to construct dams and reservoirs, and to store the surplus water against the time of drouth. Many tributary streams are to be diverted, and the entire project cannot be completed for many years.—Popular Mechanics.

THE NEW BOOK OF EVIDENCE.

The Cerest Waterproofing Co. of Chicago, have published a very interesting book on waterproofing, that should be in the hands of every architect and contractor. They are free for the asking. Drop a postal to the Cerest Waterproofing Co., Chicago, or to Parrott & Co., 326 California St., S. F., who are the Pacific Coast Representatives. Just say "Send me the New Book of Evidence."
